Y., \$1; Stroudsburg, Pa., \$1; Peekskill, N. Y., \$5; North Grantham, N. H., \$5; Bellevue, Ky., \$3; Elmira District, Central New York Conference, \$192. The following have been instituted founders by the payment of \$1,000 each: Hon. W. L. Woodcock, L. T. Voder.

In the above subscriptions it will be noted that many States are represented, and that a large number of Leagues have already responded. The responses have been exceedingly gratifying, considering the fact that the campaign was only commenced in the early summer, just about the time when many Leagues were preparing to give up their work for the summer months, and they delayed any action on the matter until the fall. Now that the summer vacations are over and the work is again being taken up, cheering reports are coming from all quarters that The American University is to be object of generosity during the winter months. There are more than twenty thousand Leagues in Methodism. If their contributions could average ten dollars, the beautiful Epworth College of Literature would be assured. Some Leagues, it will be noticed, have sent as high as sixty dollars. "One dollar each" ought to be the battle cry. It is an amount which could easily be given by even the poorest. The beautiful certificate, which goes to each contributor, is a work of art and will be greatly prized. It is confidently expected that in the next few months this matter will be taken up with enthusiasm by every League. Send to this office for literature to help you push the campaign. Do not delay, but begin the work at once. It will be glorious in the after years, when visiting Washington, to look upon the completed Epworth Building and say, "I had a share in it."

Shall the Government Control a University?

The interest which has been awakened in The American University, the large gifts which have been received, and the determination on the part of a great denomination to build this institution at the nation's capital has more than anything else prevented the Government from erecting a university in Washington. Every year, without exception, a bill has been presented in the Senate looking towards a University of the United States, and it has gone to a committee appointed to take into consideration this interest. Senator Depew of New York presented the bill last winter. The committee discussed it, but it never got outside of their room.

Our wisest legislators are opposed to a great university supported at Government expense, and the strongest argument which they use against it is that the Christian denominations of the country are now engaged in establishing educational institutions on as large plans as the Government could hope to do, and while the Christian people are willing to do it, it is needless for the Government to undertake it.

The history of State schools is not a brilliant one. They so easily run to secularism. Such an institution fostered by the Government would simply become a recruiting office for politics. The leading educators of the country, individually and in official capacity, have declared against it. We here append a summary of the unanswerable arguments which can be used against the founding of a university supported by Government expense.

I. Governmental.

1. The constitutional right has been and still is questioned.
2. A serious question as to the right to use moneys raised from all the people to the special advantage of a select number.
3. The tendency to centralization and paternalism is objectionable.
4. Our Government is not authorized to do what private agencies are already accomplishing.
5. Such a university would impair or destroy the spirit of self-reliance.
6. Serious objections to political parties having control of issues sure to come, in managing the details of such an institution.
7. The State universities have encountered great difficulties, which would be greater in a National university.
8. Such a university would be a perpetual claimant for increasing amounts of money—thousands growing into millions annually.

II. Educational.

1. Existing institutions are doing or planning to do all that such a university would do.
2. It would be a rival to our other great universities in which millions are already invested.
3. It would check the gifts now flowing into our great institutions of learning.
4. Its proposed domination over other institutions would injure the free spirit required for educational advance.
5. It would be too conservative to lead in research.
6. It would of necessity be an imperfect university, for some of the chief departments would be excluded, such as the Science of Religion, Theology, Ethics, Moral Philosophy, Modern History, Political Science, and Economics.
7. It is opposed by the Committee of Fifteen of the National Educational Association, composed of the leading educators of the country, on the ground of the impossibility of freeing it from political bias and treatment.

III. Moral.

1. The Government cannot require tests of faith, and a National University would be non-religious, which, in substance, would mean non-moral, non-believing, and agnostic.
2. It would be a bulwark for secularism in education, the divorce of education from religious life and influence.

IV. Practical and Local.

1. The various religious bodies have already taken steps toward university foundations in Washington :
 - (a) The Baptists, in Columbian University.
 - (b) The Roman Catholics, in The Catholic University.
 - (c) The Methodists, representing general Protestantism, in The American University.
 - (d) The Protestant Episcopalians, in The Cathedral Foundation.
2. Such an institution would become the harbor of worn-out politicians and their friends.

Let every Epworth League in Methodism do something handsome for the Epworth College of Literature during this winter. Urge your President to present it. Let some member present a paper on the subject. Write us for facts. Send for sample certificate. It will be worth much to you in all the future to have been allied to this movement.

Many subscribers to the Asbury Fund will receive this issue of the COURIER. To many it will be a reminder that a part, at least, of their subscription is due and unpaid. Will you not aid us by at once sending it on? It will be greatly helpful.

We are now prepared to furnish a handsome illuminated and engrossed certificate to all who complete the payment of any subscription made to The American University. It is a rare bit of art, and you will prize its possession. Complete your payment at once and get it.

Asbury Memorial Hall.

Asbury subscriptions paid since the last issue of the COURIER.

Many pastors in Methodism will receive this issue of the paper. After you look it over please hand it to some one with means who might be interested, saying a kindly word. Great harvests may come from such seed sowing.

Gifts and Bequests.

Miss Helen M. Gould has given \$5,000 to Berea College, Kentucky.

The late Thomas Henry Ismay, of England, bequeathed about \$125,000 to charities.

Mrs. Thomas McKean, of Philadelphia, has given \$25,000 to the University of Pennsylvania.

Mrs. Antoinette Eno Wood has contributed \$5,000 to the Botanical Garden of New York City.

Walker Scott Dickson, of Salem, Mass., has made a conditional gift of \$50,000 to Tufts College.

The gifts received by Harvard University from August 1, 1895, to July 31, 1899, aggregate \$1,544,827.

Mrs. H. D. Cable has given \$50,000 for the building and endowment of a hospital for children in Evanston, Ill.

Ten thousand dollars have been given to the town of Farmington, Me., for a public library by Isaac Cutler, of Boston.

Miss Helen M. Gould is to give a library of selected books to the Young Men's Christian Association of Fort Scott, Kans.

P. A. B. Widener has formally transferred to the city of Philadelphia his beautiful mansion and its contents for a free library.

Mrs. Roswell P. Flower and her daughter, Mrs. Emma Flower Taylor, have each given \$100,000 to the Flower Hospital, New York.

The announcement is made of two gifts to Lombard University of Galesburg, Ill.—one of \$25,000, and the other of \$8,000.

Mrs. Rachael B. Crane, of Peekskill, N. Y., has given \$50,000 each to the boards of home and foreign missions of the Presbyterian Church.

Andrew Carnegie has given \$50,000 to East Orange, N. J., for a public library, and has offered the same amount to York, Pa., for a library.

Frederick Kimball Stearns, of Detroit, has given a valuable musical library, containing about 1,600 titles, to the University of Michigan.

Henry C. Lytton, of Chicago, is delivering, through the Bureau of Associated Charities, half a ton of soft coal to 1,000 poor families of that city.

John D. Rockefeller has promised to give \$100,000 to Wellesley College when the debt of that institution is raised. The debt is about \$96,000.

Capt. John Lisle, who died recently at Cold Spring Harbor, Long Island, left \$1,000 to the Methodist and \$500 to the Baptist Churches of that place.

Ex-Congressman Isaac Stephenson has announced his intention of giving to the city of Marinette, Wis., a public library building to cost \$50,000.

Miss Helen Gould has given \$50,000 to aid in the building of the new home for the naval branch of the Young Men's Christian Association in Brooklyn, N. Y.

A woman in Philadelphia has given Booker T. Washington \$5,000 to add to the endowment fund of the Tuskegee Normal and Industrial Institute at Tuskegee, Ala.

Mr. James Stillman, of New York City, has doubled his gift to Harvard University for a hospital and infirmary for sick students, making the total gift \$100,000.

The will of the late Charles W. Rand, of Burlington, Iowa, gives \$12,000 to the establishment of a free course of public lectures, to be called the "Rand Memorial."

A citizen of Philadelphia, who will not permit his name to be known, has given \$5,000 toward a fund for the erection of worthy memorial to Captain John Euss.

John J. Albright, of Buffalo, N. Y., has announced to the Board of Directors of the Fine Arts Academy of that city his intention to present to Buffalo an art gallery to cost \$300,000.

The late George H. Norman, of Newport, R. I., bequeathed \$10,000 to the Rogers High School, and \$5,000 each to the Newport Hospital, the People's Library, and the Redwood Library.

The late Rev. Lucius E. Barnard, of Galesburg, Ill., bequeathed \$5,000 to the University of Vermont, \$1,000 to the Auburn (N. Y.) Theological Seminary, and \$300 each to the Boards of the Presbyterian Church.

Dr. D. K. Pearsons of Chicago has made an offer to the Congregational Educational Society to give \$15,000 to the general treasury provided the society will secure \$30,000 additional from friends of its work.

Alexander E. Patton, of Curwensville, Pa., has given \$1,000 to establish a scholarship in Dickinson Seminary, of which institution he is a director; and Mrs. Elizabeth S. Jackson has given \$500 for a similar purpose.

By the will of the late Oliver H. Durrell, of Cambridge, Mass., bequests aggregating \$17,000 are made to religious and educational institutions, Boston University receiving \$5,000, and Wesleyan Academy at Wilbraham \$1,000.

The late Mrs. Ann E. Smith willed to the Missionary Society of the Methodist Episcopal Church a piece of real estate in Hoboken, N. J., valued at \$55,000, subject to uses of her daughter, Mrs. H. C. Dodd, during her natural life.

Mrs. Willard Ives, of Watertown, N. Y., who a short time ago gave \$10,000 to endow the chair of English Bible in Syracuse University, has recently given \$2,000 to that institution to found scholarships in memory of former friends.

Two Chicago men have recently given \$50,000 apiece to the University of Chicago toward meeting the conditions made by John D. Rockefeller in his offer to give \$2,000,000 to the University provided that an equal sum is contributed by others.

Erza J. Warner, of Chicago, has given \$50,000 to Middlebury College of Middlebury, Vt. A building to be known as the Warner Science Hall, to be dedicated to the memory of the donor's father, Joseph Warner, will be erected with the money.

The will of John Daniel Brez, who died recently in Switzerland, has been filed in Brooklyn, N. Y. It bequeaths \$3,000 to foreign charitable societies, \$1,000 to the poor of New York \$1,000 to the Swiss Society, and \$1,000 to the Huguenot Society.

Under the will of the late Walter S. Benton, of Minneapolis, \$25,000 are left to the Window Institute, \$10,000 for a library at Anamosa, Iowa, and \$10,000 to the Woman's Christian Association of Minneapolis, for the erection of a home for aged women.

The late Cecilia Julia Loux, of New York, bequeathed \$3,000 each to the Isabella Heimath Home and St. Francis Hospital, \$3,200 each to St. Joseph's Hospital and the German Hospital and Dispensary, and \$2,000 each to Roosevelt Hospital and the New York Institution for the Blind.

Henry Wischemeyer, who died recently in Chicago, left in trust an estate valued at \$105,000 to his widow. The will provides that \$15,000 be paid to the Little Sisters of the Poor. The trustee is directed to expend \$25,000 in charities and select those she deems most worthy of support.

Mr. and Mrs. Joseph W. Stickler, who recently gave a new building to the Orange, New Jersey, Free Library at an estimated cost of \$60,000, have just made an offer to the Young Men's Christian Association of that city to give \$30,000 to it for the erection of a new building on the lot in front of the present building. They have also given \$5,000 to the Orange Orphan Home.

By the will of the late Samuel Seibert of Hagerstown, Md., the Lutheran Theological Seminary at Gettysburg, Pa., will receive \$8,000 and the Pennsylvania College (Lutheran) in the same town \$4,000. After bequests to individuals and of \$3,000 to missionary and charitable institutions of the Lutheran Church, the residue of the estate (about \$10,000) goes to the Susquehanna Lutheran University at Selins Grove, Pa.

Officers of the American University.

THE UNIVERSITY COURIER

Devoted to the Interests of The American University and Higher Education.

VOL. VIII.

WASHINGTON, D. C., JULY, 1901.

No. 4.

Published Quarterly. Office, 1419 F Street N.W.

Subscription Price, Twenty-five Cents a Year.

President McKinley to Young People.

The other afternoon Bishop Hurst and Bishop McCabe called at the White House to see the President. While in conversation with Mr. Cortelyou, who is the gracious and thoughtful Secretary to the President, he called their attention to a typewritten copy of an impromptu address which the President made to a mass meeting composed of representatives of various young people's societies, held in the California Street Methodist Episcopal Church, San Francisco, Cal., May 21, 1901. Being impromptu, it came from the heart. Wise and reverent are the great President's views of life. Such ringing words from high places must carry great weight. We are glad to give it to the readers of THE COURIER. It was one of the best the President made on his Western trip. We are glad we have such a man for a Trustee. The following is the text:

LADIES AND GENTLEMEN: It gives me very great pleasure, on this the last evening of my stay in your hospitable city, to meet with the young men and the young women of the Epworth League and the Christian Endeavor, and the union of the Baptist Church and the Christian young people generally who have dedicated themselves to the holy cause of Christian teaching. I congratulate you that you are to be the host of the great International Epworth League to be held in your city in the month of July, for the success of which you have my best wishes. I congratulate you upon the noble work in which you are engaged and the great results which have followed your efforts. He who serves the Master best serves man best, and he who serves truth serves civilization. There is nothing in this world that counts for as much as godly living. There is nothing that lasts so long or wears so well and is of such inestimable advantage to the possessor as high character and an upright life. And that is what you teach by example and by instruction. And when you are serving man by helping him to be better and nobler you are serving your country. I don't know whether it is true that every man is the architect of his own fortune, but surely every man is the architect of his own character and he is the builder of his own character. It is what he makes it; and it is growing all the time easier to live right, to do right, and to be right. With our churches, our Young Men's Christian Associations, our various church societies, every assistance is given for

righteous living and righteous doing. It is no longer a drawback to the progress of a young man to be a member of a Christian church. It is no embarrassment. It is an encouragement. It is no hindrance. It is help. There never in all the past was such a demand as now for incorruptible character strong enough to resist every temptation to do wrong. We need it in every relation of life, in the home, in the store, the bank, and in the great business affairs of the country. We need it in the discharge of the new duties that have come to the Government. It is needed everywhere, never more than at this hour. I am glad to show my interest in the great cause for which you are enlisted, for you are helping all the time home and family, law and liberty and country.

I bid you all God speed, and say good night.

A National University.

PROMINENT EDUCATORS OPPOSE IT.

A committee of leading educators has for some time past been considering the scheme for a National University at Washington, and has finally come to a unanimous decision against it. This verdict accords closely with the conclusion which has been reached by thoughtful people throughout the country who have given any attention to the matter. It was possible to make some argument for the plan a quarter of a century ago, when Harvard and Yale were still colleges, Johns Hopkins just starting, Chicago University not projected, and the present scope of Columbia not dreamed of, while the so-called universities of the West were such only in name. To-day there is no reason why the National Government should duplicate the work of the established universities. Even at Washington education is not so badly off. The Columbian, the Catholic, and the proposed Methodist University will not be for a time serious rivals of the older foundations, but in certain subjects excellent work is already done, and improvement is certain. As these private foundations grow in scope and usefulness, there is clearly less need for a competing national university.—*Editorial New York Evening Post, May 25, 1901.*

GOOD NEWS—TWO NEW BUILDINGS TO BE COMMENCED!

It will be glad news to all loyal friends of The American University to know that the Trustees have decided to begin at once the construction of two new buildings.

The architect, Mr. Henry Ives Cobb, is now busily engaged preparing the plans and specifications. Ground will be broken at no distant day and the foundations of these buildings commenced. President McKinley has given his promise to lay the corner stones. If the work succeeds, as now planned, it is hoped that this impressive ceremony may take place some time in December. Recent generous gifts have made this beginning possible. We present to our readers, on opposite pages of this publication, photogravure pictures of the buildings to be erected. Although they have been referred to in these columns, an additional word of description will, of course, be in place at the present time.

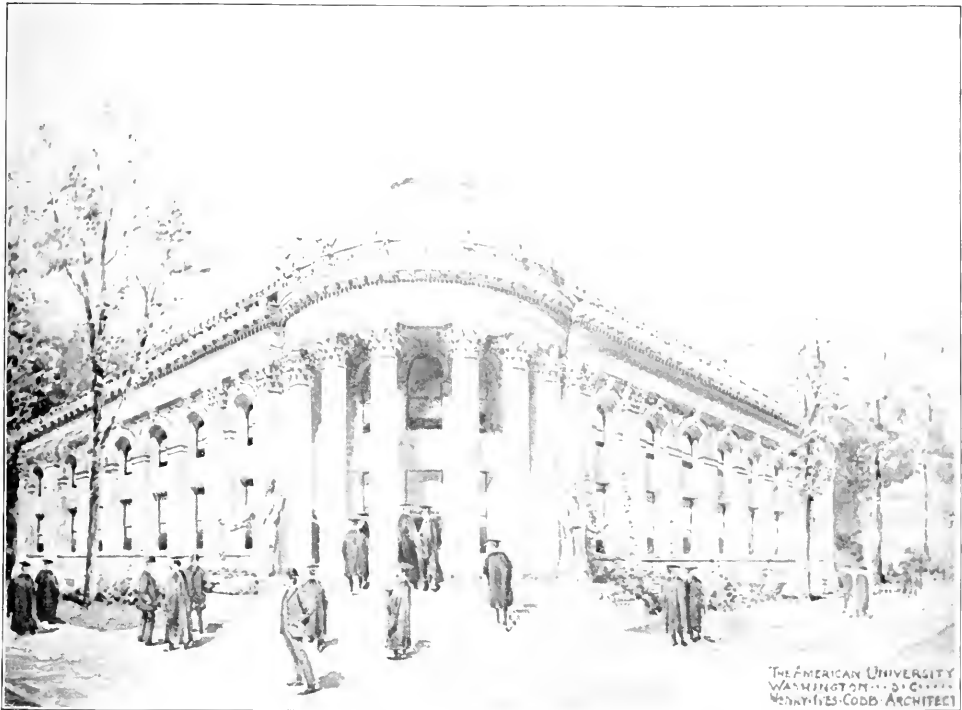

The Pennsylvania Hall of Administration.

The Pennsylvania Hall of Administration is to be erected by the devoted and patriotic citizens of the Keystone State and the building will cost \$450,000. Many generous gifts have already been received. One elect lady has contributed \$60,000; another has given \$25,000. Numerous gifts in smaller amounts have been received from various sections of Pennsylvania. The American University appeals to citizens of the Keystone State for several reasons.

The contour of the University grounds resembles a key-stone. The first fortifications thrown up for the protection of the Capital city during the Civil War were on the land now included in the University campus, and the Pennsylvania Reserves were the first to occupy them.

The building, with wings and imposing corridors, will stretch for 250 feet across the end of one of the quadrangles. It will be the heart of the University system, containing an immense lecture hall and the offices of those who will administer the affairs of the University. Pennsylvania is a great and wealthy State, and deserves the honor of having named one of the best buildings in The University Foundation. Her loyal citizens will build and endow it.

The Ohio College of Government.

The architectural beauty of this building is commented upon by all who see this picture. It will be built of marble and will be the gem in the University setting. The loyal citizens of Ohio will be justly proud of this building when it is completed. The Ohio College of Government is not only unique as to its architecture but also as to the subjects that shall be taught therein.

A new pathway is to be broken in the realm of education. The departments of investigation include: Diplomacy, Arbitration, Constitutional Law, Science of Government, Municipal Government, and the large problems which have been thrust upon us as we take our place as one of the world powers. The foremost lecturers in this building will be the Chief Justices of the United States. Subscriptions large and small are pouring in constantly for the erection of this building. Four Ohio governors, two Ohio senators and one Ohio president have given generous contributions. The building will cost \$200,000.

Devoted friends are planning for a William McKinley Professorship with an endowment of \$100,000 to forever perpetuate, at the nation's capital, the memory of the man whom Ohio and the nation delight to honor. He has given his heartiest commendation to The American University and is one of its honored trustees. He is one of a very few of our presidents who have taken active interest in educational matters.

One of the supreme acts in the life of Thomas Jefferson, which will outlive all others and which he desired recorded on his tombstone, was that he was the founder of the University of Virginia.

As soon as the work on this building is commenced generous subscriptions to build and endow it will doubtless come from all parts of the great and wealthy State of Ohio.

The Woman's Guild of the American University.—The College of Comparative Religion.

By J. Ellen Foster, V. Pres.-at-Large, Woman's Guild.

Each century is debtor to the one which preceded it: Yes, to all the centuries of the past.

From the mounts of vision of twentieth century American civilization, the historian, the patriot, the economist, the scholar, and the Christian behold the course of the race from its childhood in Eden to its manhood in the twentieth century of the Christian era. Each sees that for which he looks; but each observes that all roads by which the race has come, lead to this Mecca of popular government under the Stars and Stripes and the Cross of Jesus Christ.

Each century reveals more clearly the image of God in the man which He made.

Many a pure soul in rapture exclaims with the poet:

"A dim aurora rises in my East
Beyond the line of jagged questions hoar,
As if the head of our High Priest
Began to glow behind the unopened door;
Up I rise and press the more
To meet the sure coming of the Master's day."

It is written, "The pure in heart shall see God;" but only prophets and seers can grasp the concept of what the maturity and ripeness of the race shall be in the Golden Age that is to come.

American universities as they are found in various parts of the country are the best equipped observatories of past and present vital conditions of the human race; they point to the "dim aurora rising in the East," and unfold the wonders of material things and of intellectual ideals; but The American University, located at Washington, the Nation's Capital, is the concept of seers and prophets, who a decade ago caught a glimpse of the quick coming grandeur of this nation among the powers of the earth. These men in the splendid evening of the nineteenth century were in the holy calling of the Christian ministry, they were in the learned professions, in the halls of legislation—State and National—and in the marts of trade.

Women were in the company also; they, too, were prophets and seers; they remembered Miriam and Deborah, and Mary the mother of Jesus, and the other women who ministered to Him. They remembered Susannah Wesley and Barbara Heck and

the women of Colonial days and Revolutionary times and of the Civil War; they had heard the words of the prophecy, about the pouring out of the Spirit in the last days upon the sons and daughters, and the servants and handmaids who should see visions and dream dreams.

The vision which the men of The American University saw has been set before the gaze of the people for ten years—the great and beautiful Hall of History, which glitters in the rising and glows in the setting sun, is the present materialization of that vision; others will rise within a twelvemonth, and make other "dreams come true."

Not so many people have heard the dream of the women. It is that in the glorious city of colleges on the highlands over against Washington, when History, and Science, and Philosophy, and Literature, and Art shall arsenal their treasures for the world's help and the world's blessing, there shall arise a structure the most beautiful of all, in the most commanding position of all, and on its gleaming facade of white marble shall be inscribed, "College of Comparative Religion."

To this college ripe scholars shall come; having found out how man may subdue the earth for his dwelling place and make its forces his servants; how he may associate in human society and create and distribute its wealth; through what forms of governmental life society may reach the highest development, and by what graces of language and art and literature may be established a brotherhood of the minds of men, and a universal comradeship in the world of ideas; these splendidly equipped knights of the Twentieth Century with reverent steps shall approach this inner temple of the sanctuary of human knowledge, where is inscribed the record of how the Heavenly Father has drawn the race to Himself; how He has been revealed in such measure as self-determined men would open their eyes to see and unstop their ears to hear.

This college will not be a school of theology, it will not give degrees in creeds or diplomas in beliefs; recognizing the Force which makes for righteousness and the Force which makes against righteousness, it will find the points of strength and the points of weakness in all so-called false creeds, and the infinite perfection and adaptation of Christianity to the world's need.

The Religion of Jesus has been challenged on

every field of human thought and human action. The College of Comparative Religion will gather these challenges: it will give the history of the combatants and the temporary or final outcome.

It will say to all religions and all races, "Come, let us reason together." With the self-conscious power and calm patience and tender love which centuries of sacrifice and conflict and victory have wrought, the College of Comparative Religion in The American University will crown the work of all.

How stupendous the times in which we live and see visions and dream dreams!

In the councils of the nations the United States leads; in the diplomacy of the world this nation sits at the head of the table.

Through the Spanish-American war, and its results, our government and our people are brought

At every turn in the road of opportunity for woman, if she has hesitated, she has been urged to action by the message to Mary, "The Master is come, and calleth for thee." Or, if with joyous response she accepts large responsibility, with reverence she hears the wondering ejaculation, "Who knoweth but thou art come into the kingdom for such a time as this?" Let American women answer the call: let them come into their kingdom at this time.

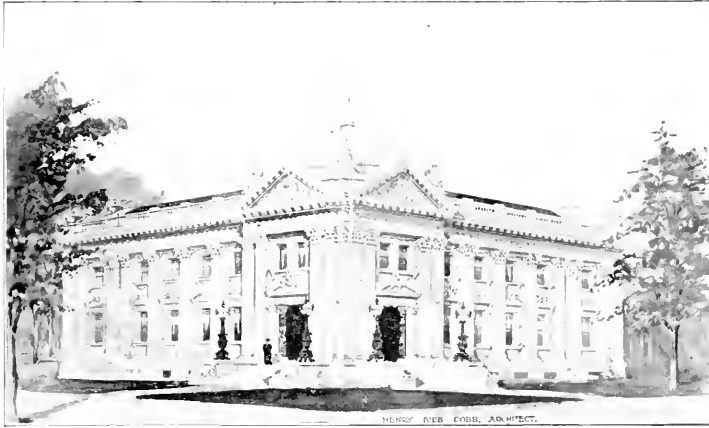

The Epworth College of Literature.

More than one thousand Leagues, representing all States of the Union, have sent contributions to this building which the young people of the Epworth League are attempting to build.

The handsome lithographed certificates have been engrossed and sent out to all subscribers. Those

who receive them are delighted. Many Leagues in Washington City, the home of the University, have recently made handsome subscriptions.

What of the other 19,000 Leagues in Methodism? Are you to have no part in this great work? Has the matter simply been overlooked, or are you purposely neglecting it? You will be grateful in the days to come to have had some little share in this splendid project. Many young people now in our Leagues are certain to be students

The Woman's Guild College of Comparative Religion.

in touch with the civilizations of the Orient, and with the religions upon which these civilizations are founded. Commerce and trade and politics, with their net-work of associations and their many points of contact, bring the features of religious faiths into bold relief. It is impossible to avoid this contact; the Christian missionary has studied these faiths that he might the better teach his own. The American must study them now, because religion is a civilizer or is the opposite.

Every motive of self-interest to the nation, as well as love for the race, makes a discriminating knowledge of these religions necessary.

in this University.

A subscription of one dollar entitles you to the handsome certificate. Send for one, then show it to your friends. Talk the matter up in your League. Send for literature and information. A University Night in your League could be made a grand success—full of inspiration. Don't delay, but act at once. Join the one thousand loyal Leagues who have already put their hand to this work.

Mr. Arthur E. Gutteridge, the son of our Financial Secretary, is doing valuable service in addressing Epworth Leagues and collecting some of the subscriptions made to the University. Many pleasant things are said about him.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Address all communications to UNIVERSITY SECRETARY,
1419 F Street N. W., Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

WE SEEK to make the COURIER self-sustaining, without crowding its columns with advertisements. The subscription price is twenty-five cents a year. Let us have your subscription, that the policy of the paper may be maintained.

HON. JOHN FRITZ, of Bethlehem, Pa., has recently given some valuable real estate in Washington to the University. He is a Trustee.

BESIDES paying over the \$14,856, held in trust by the Ives' Seminary, at Antwerp, N. Y., from the bequest of Willard Ives, the Board of Trustees in the final settlement voted \$200 additional as a 20th Century Thank Offering.

PLEASE do not neglect the prompt payment of your subscription. It is an easy matter to mislay your notification and forget all about it. Pay the amount the very day you get the notification. You will save us additional postage, simplify our book-keeping, relieve your own mind, and add to our stock in hand with which to push our work.

THE TOTAL assets of The American University are now about \$2,700,000, not a bad record for even ten years of work. All great undertakings are neces-

sarily of slow growth. The superb Cathedral at Milan, Italy, was commenced in 1380 and has never since been without scaffolding and the noise of workmen. In the building there were niches for 10,000 statues; only 4,000 have yet been filled. We are content to grow slowly and lay well the foundations. Our life is to be co-existent with that of the Republic, and that means centuries for wise and careful building and development. Our assets will be more than doubled in the next three years.

FIFTEEN hundred students have already applied for admission to The American University. Is any stronger argument for its necessity needed? The Capital of the Nation, with its unparalleled educational facilities, has an attraction for students desiring to pursue original investigation. Applications are also coming from our new possessions in the seas. We must open our doors to receive them.

LANDS IN Louisiana and the Southwest, in which the University has large interest, through gifts which have been made to the endowment funds, are turning out to be immensely valuable through the growth of rice and the discovery of oil.

SOME OF THE Trustees and Officers of the American University are delegates to the Ecumenical Conference, which meets in London in September. The Chancellor, Bishop Hurst, who is Chairman of the Western Section, sails for Europe on July 4. The Rev. Charles W. Baldwin, D. D., Secretary of the Board of Trustees, sails June 29. The Rev. Wilbur L. Davidson, D. D., Secretary of the University, is also a delegate, but may be detained in this country looking after the work on the two new buildings.

SINCE the last issue of the COURIER the University Secretary has spent a Sabbath in the interests of the University at Barnesville, Kingsville, Coshocton, Akron, Steubenville, Hill-boro', Newton Falls, and Bedford, all in Ohio; at North Avenue, Allegheny City, Blairsville, McKeesport, New Castle, Greenville, Oil City, Johnstown, and Sharon, in Pennsylvania, and Ripley and Franklinville, New York.

Kindly receptions were extended everywhere. The people gladly heard the story of the rise and growth and prospects of this enterprise, and evidenced their

interest and loyalty by generous contributions. Many heard of the movement for the first time and were captivated with the project. Promises of bequests were made by many persons. At one point a beautiful young girl, with deep emotion, said: "I have no money, but the scheme is ideal and appeals to me. I want to help. I have only my voice. God has put some sweetness into it and I have had the best of training. I will sing for the University whenever you think I can be of service. You may have my voice as my poor gift."

At all the places mentioned above subscriptions in pledges, in three annual installments, were made in sums from \$1 to \$1,000. A large majority of these subscriptions are being promptly paid. Notices from the Washington office of the University are sent to each subscriber a few days before the annual payment is due. The subscriptions were made in good faith and of course will be paid. They were made by men and women who, without any special urging, were moved by God's Spirit to have some little part in this great Christian enterprise. Our success in completing buildings is entirely dependent on the promptness with which our friends meet their obligations. Please be prompt. If this COURIER is a reminder that you are in arrears, let not the sun go down until you have made remittance and cheered those who are working day and night to make glorious the opening years of the new century by the complete equipment of The American University the child of faith and prayer. Many subscriptions fall due July 1st. In case of change of address at once notify the Secretary, Dr. W. L. Davidson, 1419 F street N. W., Washington, D. C., to whom remittance of subscriptions can also be made.

WHEN you have finished reading this illustrated number of THE COURIER kindly hand it to some friend. You can thus widen the knowledge of our undertaking, and who can tell what may come of it? If you want THE COURIER sent to some one who might be interested send us name and address.

Three Trustees Translated.

The HONORABLE HIRAM PRICE, long and favorably known and much beloved in the political and religious circles of Washington and of the nation, has served as a Trustee of the American University for nine years.

At the semi-annual meeting of the Board in December, 1892, he presided with much ability and effectiveness, though then having reached nearly his four-score years. He has been a cheerful and liberal contributor to its funds. His lofty Christian faith, his broad and fervent charity, his love of truth, his hatred of wrong, his beautiful composure of spirit, combined with a high order of executive dispatch, made him a man of mark in any company, and render his decease, on May 30, 1901, a distinct loss to all who knew him.

Rev. THOMAS H. PEARSE, D. D., has been a member of our Board of Trustees since 1893. He died at Evanston, Cincinnati, on June 20, aged 81 years. He has shown a lively and keen interest in The American University ever since its inception, and found time in the midst of his intense activities to give a large attention to its purposes. He also planned out of his own resources (which have later been found to be less easily converted into money values than he hoped) to make a full provision for a professorship in the University, and entered into legal contract for that express object. Nobleness of soul characterized all his lines of action, and an industrious productiveness marked the closing decade, as well as the previous years of his long career. The three-score years of his active work in the itinerant ministry furnish a record on which men and angels may look with admiring wonder.

Mr. GEO. P. HUKILL, another of our valued Trustees, died of apoplexy on May 30, in Oil City, Pa. He rarely missed a meeting of our Board since his election in 1892. He was engaged largely in the prospecting for and production of oil, making large gains, and afterwards took an active part in the banking business. He was a member of the Board of Education of the Methodist Episcopal Church, and a Trustee of Allegheny College. He was treasurer of the Pennsylvania Methodist State Convention which met in Harrisburg last October. He was a member of the General Conference of 1900, and actively participated in its business, serving on many important committees. He was a loyal, faithful man. The writer of this spent a few delightful hours with him and his family in his ideal home in Oil City just two weeks before his death. It is difficult to realize that he has passed out of our sight.

**Address of Mr. Aldis B. Browne, at the
Banquet of the Alumni of Columbian
University, given at the Raleigh,
Washington, D. C., April
13, 1901.**

MR. PRESIDENT, GENTLEMEN—BRETHREN :

I am one of the family, and must address you as such. Strong as is my interest, and great as is my faith in The American University, deep also is my affection for Columbian. For within her walls, and under the stimulus of a quickened ambition, there was laid for me, strong and deep, the foundation on which I am striving to build in my brief day.

It is matter of deep regret that the wise and earnest man who stands at the forefront of this great enterprise is kept from this Board by the call of duty. I can only seek to voice, in a feeble way, the thought which he could utter with far greater force and in language far more richly adorned. And yet it is to me a genuine pleasure to bring to my Alma Mater and her graduate sons to-night a warm and hearty greeting from the young giant which is slowly but surely growing upon those western hills which overlook this great city.

The American University is my allotted theme. I beg your patient indulgence while I briefly recount its status and its aims.

Its dwelling place could not have been more happily chosen. A broad elevation commanding a view of hill, valley, and flowing river, alike charming to the eye and restful and inspiring to the mind.

In land, buildings, endowments, legacies, and pledges its tangible assets now equal two millions of dollars. With such possessions, it would naturally appear that the University should now open its doors to the admission of students, but the great Church under whose patronage it dwells requires that it shall thus possess five millions of dollars before beginning practical educational work. While it is thus building slowly, it is building for the centuries. If in the lifetime of the youngest men who now sit upon its Board it shall possess this great sum and open its doors to students, they will be profoundly content. We have completed one noble building—the Hall of History—a marble structure, at a cost of some \$200,000, recognizing that the study of history stands in the outer vestibule of all knowledge, and that now, as always, men have learned new truth through patient search and analysis of the records of the old. True, indeed, is it that "the proper study of mankind is man." Many other buildings are planned wherein to house the schools of languages, of government, of theology, of technology, of law, of medicine, and, in short, the whole well-rounded curriculum which a great university foundation implies. Among its present valuable possessions is a great reflecting telescope

glass, the result of years of labor voluntarily given by a man who has passed the three score years and ten, and whose work and its results have elicited the highest admiration from the learned men of that profession which measures the stars and bounds the firmament.

The university government is vested in a corporation created by special Congressional enactment. It numbers among its trustees men of nearly all communions, some of whom have wrought noble deeds for the University, and their interest in its development increases with the years.

It is sufficient surety that when we shall face the duty of selecting a proper faculty the University will seek for men of large intellect—for those who stand pre-eminent in their chosen fields, yet possessing withal an abiding faith in the Eternal Fatherhood of God and the universal brotherhood of man.

The founders and friends of this University recognize, as do all observing men, that at the National Capital there has been garnered through the slow labors and accretions of the years, a vast storehouse of knowledge—a mine whose depths may be explored with increasing profit—a treasure that may be seen and handled. In the natural world about us; in the starry heavens above us; in the spiritual world within us, these toilers of the day and of the night have built and are building a great roofless university of higher knowledge here, a knowledge which may be acquired by our young men through wise and patient direction, as broad and as deep as that which can be imparted through the universities of the Old World. The Capital of this great Nation, hitherto the seat of enlightened liberty and now "the center of a world's desire," is hence becoming also the center of an intellectual empire whose peaceful sway shall encircle the round world.

The Church under whose fostering care The American University stands—a Church great in numbers and greater in its simple elements of faith, summons all of kindred communion to the support of this University foundation, in the spirit only of friendly rivalry. Its prime condition of matriculation is the possession of a college degree, for it will seek to guide only along the highway of advanced knowledge those who gather within her walls. It will aim to graduate full rounded men—teaching them, as an essential basic element, the scholar's duty as fully proportioned to the scholar's privilege—teaching, in a word, that from him unto whom much hath been given much also will be required.

In all of this there can be no room for discord or petty jealousies. The American University stands with outstretched hands in fraternal greeting to all institutions which seek to uplift humanity through the spread of knowledge. It is and will be, indeed, but another beacon light set upon the hills, seeking to guide men into more perfect liberty, through more perfect apprehension of the perfect truth.

The Woman's Guild of the American University.

[By Mrs. M. E. HARTSOCK, President.]

The Woman's Guild of The American University has its headquarters in Washington, D. C. Its object is to form an organized center for the united thought and action of the women of the country to promote the interests of The American University, and to give them an opportunity to concentrate their gifts for building and endowing the Woman's Guild College of Comparative Religion; and to receive and to hold in trust for the Woman's Guild College of Comparative Religion of The American University the gifts and bequests of women to the said University. The management of this guild is entrusted to a central committee, called the Central Guild, whose officers are: Mrs. M. E. Hartsock, D. C., President; Mrs. J. Ellen Foster, D. C., Vice-President-at-Large; Miss E. F. Pierce, D. C., Recording Secretary; Miss Perie A. Anderson, D. C., Corresponding Secretary; Miss Mammie A. Emery, D. C., Treasurer; Mrs. Viola Price Franklin, Ill., 1st Vice-President. Vice-Presidents—Mrs. T. H. Anderson, D. C.; Mrs. P. J. Bennett, Penna.; Mrs. A. B. Browne, D. C.; Mrs. D. H. Carroll, Md.; Mrs. J. P. Dolliver, Iowa; Miss Margaret Gay Dolliver, Iowa; Mrs. A. B. Duvall, D. C.; Mrs. Charles Fairbanks, Ind.; Mrs. M. A. Hepburn, Iowa; Mrs. John Hoedtkeker, Del.; Mrs. John A. Logan, D. C.; Mrs. B. F. Leighton, D. C.; Mrs. Charles C. MacLean, Penna.; Mrs. C. C. McCabe, Neb.; Mrs. J. B. Showalter, D. C.; Miss Ida Simpson, Penna.; Mrs. T. DeWitt Talmage, D. C.; Mrs. M. B. Tulloch, D. C.; Mrs. Charlotte F. Wilder, Kans.

State and local guilds may be formed, consisting of a regent, one or more vice-regents, recording and corresponding secretary, and treasurer, with five or more affiliated members. State and local guilds may determine the amount to be paid for dues in their respective guilds (not less than one dollar per year). Persons may be elected members-at-large of the Central Guild on payment of five dollars annually.

At our first public meeting, held in December last, the Chancellor, Bishop Hurst, and the Trustees congratulated the Woman's Guild in uniting with one of the greatest enterprises of the Twentieth Century. The President responded, thanking the Chancellor and officers for making it possible for American womanhood to rear in the gateway of the Twentieth Century such a monument as the Woman's Guild College of Comparative Religion, which will be to America what Bartholdi statue is to New York Harbor, a light and guide, a search-light on all religions. We are confident it will show that the only true religion is that founded upon the Word of God, and will furnish a standard for the proper measurement of all the religions of the earth.

Since the Ecumenical Missionary Conference in New York, in 1900, the Christian world has been alive upon this subject. That was a conference of comity. It becomes Protestantism to crystallize it into unity. This can be done by the College of Comparative Religion, furnished with a corps of professors and educators, set apart to devote their time and thought to this specific department. Under a pure evangelical superintendency, the work will not be a cold research, with no warm heart glow, but rather, it will serve as a lens to bring all religious truth to a focus. It will also be a post-graduate school, where they who are studying for the mission field may be fully equipped for their work.

The following regents have been appointed in the different States: Mrs. Judge Anderson, Regent of the District of Columbia; Mrs. D. H. Carroll, of Maryland; Mrs. Viola Price Franklin, of Illinois; Mrs. C. C. McCabe, of Nebraska; Mrs. Charlotte L. Wilder, of Kansas; Mrs. Hiram Amboden, of Wichita, Kans., Vice Regent; Miss Margaret Gay Dolliver, of Iowa.

The object of the Guild has the sanction of many of our leading educators, and is in accord with the advice of George Washington, who said, in his farewell address, "Let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect that national morality can prevail in exclusion to religious principle." It is also in keeping with the spirit of our forefathers, to whom Christianity was the constant objective.

We have as yet not many life members. The history of all great enterprises shows small beginnings. Christ, the King of Kings, was born in a stable, because there was no room in the inn. The lower and humbler places have often been hallowed by blessed ministries which the higher turned aside; having failed to recognize their day of visitation.

The inscription on Thomas Jefferson's tomb-stone, dictated by himself, contains no reference to his having been President of the United States, but records the fact that he was founder of the University of Virginia! May American womanhood realize this is her opportunity to crystallize her gift into a monument for coming generations.

Of the fifty-six colleges and universities of the Methodist Episcopal Church, not one has a fully equipped and endowed College of Comparative Religion. Ten million dollars are asked for as a Thank Offering for schools at this opening of the century. Will not the women of the Protestant Churches join to build a college with the thousands of dollars needed for the purpose? Let our gifts be, not like the nebulae of the Milky Way, but a star of the first magnitude, a College of Comparative Religion.

Meeting of the Board of Trustees.

The semi-annual meeting of the Board of Trustees of The American University was held at Washington, D. C., May 9. Among those present were Bishop Thomas Bowman, of New Jersey; Bishop John F. Hurst, Chancellor of the University; Judge William M. Springer; Drs. David H. Carroll and Charles W. Baldwin, of Baltimore; the Hon. William L. Woodcock, of Altoona, Pa.; Mr. A. B. Browne, Mr. B. H. Warner, Mr. B. F. Leighton, the Hon. M. G. Emery, Treasurer, and the officers of the University; Dr. W. L. Davidson, Secretary; Dr. John A. Gutteridge, Financial Secretary; the Rev. Albert Osborn, Registrar. The meeting was organized by the election of Dr. D. H. Carroll as President. Prayer was offered by Bishop Bowman. Carefully prepared and encouraging reports were presented by the Chancellor, Bishop Hurst, the Secretary, Dr. W. L. Davidson, and the Financial Secretary, Dr. J. A. Gutteridge. Dr. R. S. Copeland, identified with the Medical Department of the University of Michigan, at Ann Arbor, was also present to outline a policy for the development of the Medical Department in connection with The American University. The following committee was appointed to consider the subject and report to the Board: John F. Hurst, A. B. Browne, B. F. Leighton, A. B. Duvall, S. Parkes Cadman, R. E. Pattison, and W. L. Woodcock.

Letters of regret were read from many of the Trustees, who found it impossible to be present, among them Vice President Roosevelt, who has expressed great interest in the affairs of the University, and has within the past two months written the following letter of commendation, which has not yet been given to the press:

"I most heartily agree with what President McKinley says in his letter to Bishop Hurst as to The American University. I rejoice that such progress has been made in an undertaking fraught with such far-reaching promise of good to the entire nation. I am certain that success will crown your efforts, and I am delighted that so much has already been done, not only in the matter of organization, but in the erection of buildings. I earnestly hope that all possible success will attend the Trustees of the University in their labors, and that they will receive the fullest meed of popular recognition of the value of the great work they are doing.

"Very sincerely yours.

"THEODORE ROOSEVELT."

General J. F. Rusling, of New Jersey, and Mr. John Farson, of Chicago, Ill., were elected Trustees to fill vacancies.

It was unanimously decided, in view of the large contributions which have recently been received, and the very encouraging outlook which the opening century brings to the Trustees, that the foundations for two new buildings, the Ohio College of Government and the Pennsylvania Hall of Administration, should at once be commenced according to plans and specifications prepared by the architect, Henry Ives Cobb. It is expected that by early winter with appropriate ceremonies, the corner stones of these two buildings will be laid, and the work pushed as rapidly as possible. So that the splendid marble Hall of History, which is now completed, and which is so greatly admired by all who see it, will no longer stand alone, but will be surrounded by companion buildings whose architecture shall be as impressive as that of the building which has been completed.

The Trustees of The American University have ever been conservative. They have realized that they are handling a great enterprise, the life of which is to be coexistent with the life of the Republic; that no great haste is necessary, but whatever is done should be done well; but the interest which has been awakened has inspired them to take this decided stand, the news of which will be gladly received by interested people all over the country. A building committee, consisting of Bishop J. F. Hurst, Mr. A. B. Duvall, the Hon. M. G. Emery, Mr. John E. Herrell, and Dr. W. L. Davidson, was appointed.

Mrs. M. E. Hartsock, president, and Mrs. J. Ellen Foster, vice president at large of the Woman's Guild of The American University, were present, and addressed the Trustees in the interests of the Woman's Guild College of Comparative Religion.

Great enthusiasm was awakened by the announcement that on May 8, the day before the meeting of the Trustees, Mrs. John A. Logan had presented the University 1,000 volumes from the library of her distinguished husband, including many rare and exceedingly valuable books; and also an heroic bronze bust of General Logan, which was first displayed in the National Convention Hall. A Logan alcove will at once be set aside in the Hall of History, which will contain the books thus donated, and at the entrance of the alcove will be placed this splendid bronze bust, which will forever speak of the distinguished career of this soldier, patriot, and statesman.

Gifts to the Epworth College of Literature.

The following amounts have been received by the Treasurer, Washington, D. C., from November 13, 1900, to May 31, 1901:

Epworth League, Bellevue, Ky., \$3; Epworth League, Lee, Mass., \$6; Epworth League, Knoxville, Tenn., \$3; Epworth League, Geiger's Mills, Pa., \$2; Epworth League, Higginsville, Mo., \$1; Epworth League, Lancaster, Pa., \$1; Epworth League, Highland, Conn., \$5; Epworth League, Jersey City, N. J., \$1; St. Paul's Epworth League, Washington, D. C., \$6; Miss Estler Gordon, Washington, D. C., \$1; Epworth League, Delta, N. Y., \$15; Epworth League, Mt. Vernon, Ind., \$6; Douglas Epworth League, Washington, D. C., \$10; Second M. E. Church Epworth League, Englewood, Ill., \$5; St. Paul Epworth League, Trenton, N. J., \$10; Epworth League, Olessa, Del., \$12; Epworth League, Millville, N. J., \$3; Epworth League, Anderson, Ind., \$3; Epworth League, South River, N. J., \$10; Epworth League, Cedarville, Ill., \$10; Epworth League, Viola, N. Y., \$3; Epworth League, Sharpsburg, Pa., \$5; Epworth League, New Haven, Conn., \$2; Epworth League; Meadville, Pa., \$2; Epworth League, Rochester, N. Y., \$2; Epworth League, Fall River, Mass., \$2; Epworth League, Lodi, N. Y., \$5; Epworth League, Pemberton, N. J., \$5; Epworth League, Salt Lake City, Utah, \$1; Epworth League, Brooklyn, N. Y., \$10; Epworth League, Stockbridge, Mich., \$5; Epworth League, St. Cloud, Minn., \$2; Epworth League, Salida, Col., \$1; Frank T. Israel, Washington, D. C., \$10; Epworth League, Indianapolis, Ind., \$1; Franklin Street Epworth League, Johnstown, Pa., \$20; Epworth League, Easton, Cal., \$8; Union Epworth League, Allegheny, Pa., \$6; Lizzie M. Evans, Blairsville, Pa., \$1; Rev. J. I. Garrett, Fayette, Miss., \$1; George E. Metcalf, Fayette, Miss., \$1; First Street Church Epworth League, Pitchburg, Mass., \$5; Epworth League, Plainfield, N. J., \$10; Delaware Avenue Epworth League, Buffalo, N. Y., \$17; West York Street Epworth League, Philadelphia, Pa., \$3.

Epworth League, Manchester, N. H., \$33; Epworth League, Milltown, N. J., \$1; Englewood Epworth League, Chicago, Ill., \$5; Franklin Street Epworth League, Baltimore, Md., \$2; New Trenton Epworth League, New Trenton, Ind., \$3; Epworth League, Simsbury, Conn., \$3; Foundry Epworth League, Washington, D. C., \$17; Roseville Epworth League, Newark, N. J., \$10; Fourth Street Epworth League, New Bedford, Mass., \$4; Epworth League, Barneget, N. J., \$12; Epworth League, Pittsburg, Pa., \$10; Milton Epworth League, Phoenix, Pa., \$3.61; Blairsville Intersection Epworth League, Blairsville Intersection, Pa., \$3.30; Epworth League, St. Louis, Mo., \$7; Epworth League, Liberty Falls, N. Y., \$3.62; Epworth League, Deckertown, N. J., \$5; Epworth League, Troy, N. Y., \$1; Epworth League, Gadena, Ill., \$1; Epworth League, Chariton, Ia., \$2; Humline Epworth League, Washington, D. C., \$25; Metropolitan Epworth League, Washington, D. C., \$35; Epworth League, Girardville, Pa., \$5; Epworth League, Middleville, Pa., \$5; Epworth League, Columbus, Ohio, \$5; Epworth League, Shickshinny, Pa., \$7; Epworth League, Wilmington, Del., \$10; Epworth League, Blairsville, Pa., \$13; Epworth League, East Weymouth, Mass., \$5; St. James Epworth League, Chicago, Ill., \$12; First Church Epworth League, Rock Island, Ill., \$3; Isaac N. Crane, Livingston, N. J., \$1; Mrs. B. L. Gage, Chicago, Ill., \$1; Grace Church, Washington, D. C., \$18; McKendree Church, Washington, D. C., \$28; Rock Island, Ill., \$2; Ontario, O., \$2.

Recent Improvements.

The friends of The American University have new cause for rejoicing. One of the acts of the closing session of Congress was the appropriation of \$1,500 for the cutting through and grading of Nebraska Avenue. This avenue forms one of the most important features in the development of the Northwest

Heights of Washington. Its line runs in a north-northeast and south-southwest direction along the highest ground in the District, and forms the eastern boundary of the University site, looking towards the city. It furnishes the finest and most extensive outlook over the surrounding country, both on the Virginia and Maryland sides of the Potomac, and will be the most popular driveway for pleasure in the whole suburban region. The grade of the University campus already established around the College of History has had the appearance of being considerably below the highway, as seen in the Loughborough road, and the building itself has seemed to stand at an angle to the public highway, but the laying out and grading of Nebraska Avenue will bring the grade of the highway a little below that of the campus, and the avenue will run exactly parallel with the building. This will give the whole frontage of the University site its proper setting and reveal the beauty of the campus proper as related to the adjoining streets, and to the remaining portions of the extensive tract comprising the site.

Asbury Memorial Hall.

Asbury subscriptions paid since the last issue of the Courier:

\$200—A. C. Hazzard \$100—B. F. Bennett for E. T. Mowbray, James Montgomery, W. G. Smith, Samuel Sterling, F. M. North. \$60—C. B. Brecont. \$50—A. S. Kavanagh, W. W. Washburn, H. E. Wolfe, Vaughan S. Collins, D. P. Miller. \$45—Ebenzer Adams. \$40—J. B. Westcott. \$34—H. R. Naylor. \$30—Sarah O. Aushutz, J. Messmer. \$33.33—S. W. Thomas, Thos. Harwood. \$25—B. L. McElroy, F. A New Way to Help.

Rev. B. D. Campbell, of St. Joseph, Mo., has insured his life for \$1,000 in favor of The American University. This is a unique and beautiful method of furnishing a substantial gift to a worthy cause in an easy way.

Forty thousand dollars of the debt on Epworth Memorial M. E. Church, Cleveland, was provided for in forty insurance policies of \$1,000, taken out and paid for by friends of the church. Grace Episcopal Church, in Chicago, is just now securing \$100,000 on the same plan.

The New York Mutual Life Insurance Company has recently organized a special department to care for this class of insurance. The average annual premium amounts to about 4 per cent. on the total insurance carried. People of limited income, but with large benevolent impulses, can thus find it possible at a very low rate of annual interest to make available at the end of life a handsome gift to some cause of their choice.

Many friends of The American University have already taken this plan into their thought on their own suggestion. A gentleman in Altoona, Pa., hearing first of The American University through a brief notice which he saw in the public press, wrote for fuller information. His enthusiasm took fire, and although a man of moderate means, he proposed to be one of a given number to pay annually an amount which would be equal to the interest on a gift of \$1,000. The plan of insurance in favor of the University would exactly cover the case.

Will not one thousand friends of the cause of higher Christian education, as embodied in the purposes of The American University, take out such insurance? Will not one hundred persons insure for \$10,000 each? This would endow in perpetuity the two buildings which are soon to be constructed, and erect five new buildings besides. Take it into your thought and give your heart a little chance in the decision.

A Noble Gift.

Mrs. Gen. John A. Logan has, from its inception, been a loyal supporter of The American University. She has watched its progress with increasing interest. Her faith and loyalty have never wavered. She was the prime mover in The American University League, and is one of the earnest workers

in the Woman's Guild, of which extended mention is made in this paper. The latest evidence of her devotion to the cause was the presentation to the University, within the past month, of more than three thousand volumes from the library of her distinguished husband. A room is now being fitted up in the completed College of History to be forever known as the Logan Alcove. It will contain besides the splendid library, a handsome bust of General Logan of heroic size, the chair in which the General sat when a member of the Senate, and the desk used in his home, near which he sat to receive those who solicited his aid. Other things of rare historic interest will be added to the room, which will speak of the career of this brave soldier and gifted statesman, and to this room many loving pilgrimages will be made in the years to come.

Officers of the American University.

Chancellor - - - BISHOP JOHN F. HURST, D.D., LL.D.
Vice-Chancellor, BISHOP C. C. McCABE, D.D., LL.D.
Secretary - - - REV. WILBUR L. DAVIDSON, D. D.

The Martyred President.

Within the memory of men, several years less than fifty, three Presidents of the United States have been foully assassinated. This record outdoes Russia, the hot-bed of Nihilism. There are some weaknesses in our Republic. We have prated so much about "freedom of speech" that every demagogue feels that here he can give expression to his mad views with impunity. The last sad drama of death has awakened the nation, and Congress will certainly enact stringent laws to prevent another such a startling crime. Anarchists, discovered to be such, should not be allowed to land on our shores. Public gatherings of anarchists should in no case be permitted. No law could or should reach and control the private views of men, but any public incendiary utterance, calculated to arouse passions or stir up violence towards a public official operating under the Constitution, should either be counted as treason and punished as such, or the offender should at once be made to leave the country. Let all of the foremost nations of the earth enter into an alliance to treat anarchists in this same fashion.

Those who could not be suppressed would be thus quickly driven to the outskirts of civilization, where they could, among themselves, test their theories. Those with any sense of decency left would soon tire of this isolation and would quickly promise silence, for a return to civilization.

Then, too, we have been too careless of the persons of our chief magistrates. They have not been guarded when in public with sufficient care. It is distasteful under our form of government for a President to take his exercise inside a square of glistening bayonets, still these precious lives must be cared for, and no risk should be taken. Let alert detectives closely surround him when in public. He is in constant danger, not only from the depraved, but from the insane, too many of whom are allowed to run at large. Some drastic

WILLIAM MCKINLEY.

measures should also be taken to throttle the sensational press, which is in no small degree responsible for this foul assassination.

The murder of McKinley was one of the blackest crimes in the history of the Republic. He seemed a man without enemies. He was the soul of kindness and brotherliness. He came from among the

people and loved them and was constantly interested in their uplifting. The assassin could hardly have heard the last public utterance of the President, so full of broadest charity, spoken so little a time before the fatal bullet was fired, else his rash hand had been stayed.

President McKinley's administration was one of the cleanest and most successful in the nation's history. He held the ship of state with steady hand. He gave righteous solution to problems of world-wide reach, giving evidence of statesmanship of the highest type. He did much to allay sectional differences, bringing the North and South more closely together. He ushered in an era of phenomenal prosperity. He stood for peace when war threatened, until some thought him cowardly, but when forced to the issue as Commander-in-Chief of the Army and Navy, in a campaign of one hundred days, glorified by the most brilliant naval victories in the history of the world, he secured the signing of the protocol. He taught the world by beautiful example how a husband should love a wife, and how a man in public life could be an earnest and consistent Christian, without losing caste. He had reached that eminence where the whole world saw him, and seeing him, loved him.

He died just when we seemed to need him most. His name is imperishably linked with those of Washington and Lincoln. His administration will be historic, and his name will be forever on the lips of men. Without a stain upon his fame he joined the immortals. Why he went is a Providence difficult to understand, but no more satisfactory solution can be given than fell from the lips of the dying President himself, as with faltering breath he whispered: "It is God's way."

Rev. Dr. Newell Dwight Hillis in Plymouth Church, Brooklyn, said some things in his memorial address which our law makers should remember:

"Among the heroes and martyrs who have died vicariously let us make a large place for our slain leader.

"In the highest sense our President has now entered into the Holy of Holies, bearing the sins of his people with him. Reverently we confess that he was wounded for our transgressions and he was bruised for our iniquities. Black and grievous the story of the sins of the nation.

"In a Republic founded on law we have fostered anarchy and lawlessness. Blessed by freedom of speech and of the press, we have transformed this liberty into unbridled license. In a Republic where everything depends upon reverence and honor to our rulers, we chose this man for our President, we laid the heaviest duties upon him, and in the critical moment of perplexity we permitted cartoonists who knew nothing of the principles of statesmanship or diplomacy, or of national problems—cartoonists, indeed, whose judgment we would not ask as to the

best method of raising cabbages—to belittle, to vilify our leader, and to do all that was in their power to destroy the respect of the weak and of the ignorant as represented by this assassin, who became at last the tool of the sensational press."

Scope of The American University.

Like the illustrious founder of Methodism, who said, "the world is my parish," the founder of The great American University at Washington and his coadjutors have planned an institution of world-wide influence. Like the builders of those majestic shrines, the pride and glory of the Old World, they are building not merely for the day in which they live, but for the centuries which are to come. Many of the men who comprised the first Board of Trustees have long since gone to their reward; many of the early contributors to the enterprise have entered the celestial city; many of the friends who are now interested may never live to see the consummation of their hopes, but be they living or dead, in that glad day when The American University shall be open to the graduates of every college in the world, posterity will arise and call them blessed for their unselfish devotion and willing sacrifices in the interest of the generations that are to come after them. While these founders have longed to see the result of their efforts and have earnestly desired a speedy development of their plans, they have not felt it to be as important to hurry the erection of buildings as they have to lay broad and deep foundations, to have well matured plans, and, at all times, to proceed along the lines of safety.

For this reason, what has been done has been well done. Our magnificent site of ninety-six acres has been secured at a cost of \$100,000, all of which is paid. The stately College of History has been completed and paid for at a cost of some \$200,000. It presents a beautiful and imposing aspect of classic architecture, and is ready for occupancy. We have assets in lands, buildings, invested funds and good subscriptions amounting to close upon three millions of dollars. These are being increased almost daily and we have every reason to hope that the day is not far distant when we shall have sufficient funds to warrant us in throwing open the doors to the hundreds of post-graduates who have already applied for admission.

We are now happy to announce to our many friends that their generosity has justified our pro-

ceeding with the erection of some of the buildings towards which the largest contributions have been made. While our appeals have been to the whole Church and the Nation, and every section of the Union (even Canada has responded more or less liberally), the subscriptions from some of the larger and more wealthy States have approached more nearly the amount required to erect their buildings than have those of the smaller and less able sections of the country, however willing they might be. While the Trustees have, at all times, held themselves in readiness to erect any building in the plan toward which an adequate amount could be relied upon to complete it, prudence has dictated the wisdom of giving priority to such buildings as have called forth from their interested friends available funds sufficient to warrant our so doing.

The generous amounts subscribed in Ohio during the lifetime of our much beloved Trustee, the late President McKinley, had justified the Trustees in making arrangements to build "the Ohio College of Government," and to this end Bishops Hurst and McCabe had waited upon Mr. McKinley and had secured his promise to lay the corner-stone of that building in December; the preliminary steps for this had already been taken when the nation was plunged in grief by his cruel assassination. It was also in contemplation to have the corner-stone of the Pennsylvania Hall of Administration laid at the same time, to be followed, soon after, by the Illinois, Maryland, New England, and possibly some other buildings towards which substantial subscriptions have been secured.

Nothing could be more fitting, at this time, than to concentrate all efforts on the completion of the Ohio building at the earliest possible moment, that it may stand as a magnificent memorial to our martyred President and a loving tribute from the people to Ohio's most illustrious citizen.

The writer was at the White House when President McKinley said to the Trustees of the University: "I regard the building of the American University as the most important educational enterprise the Methodist Church has ever undertaken. I am proud of it; and I should think every Methodist in the land would be proud of it. I have given towards it and expect to do more as it progresses."

Alas! he is no longer with us to aid us by his counsel, his influence, or his money, but, thank

God, he has so identified himself with the movement that his precious memory will always abide, and the immediate erection of the one particular building that he took special pride in is the least we can do at this time as a suitable tribute to his illustrious memory. As the Ohio College of Government is to be one of the most costly and magnificent in the group of twenty-three buildings, it will always be a very conspicuous and important part of the University plant, and, as such, a credit to the State that gave Mr. McKinley to the nation, and a perpetual reminder of the great and good man.

It is fortunate for the University that his popular successor in the White House, the Hon. Theodore Roosevelt, is also a Trustee of The American University. One day he expressed to the writer his interest in Christian education by saying: "I want you to convey my thanks to the Trustees for the honor they have done me in electing me one of their number, as I regard your Methodist Church as one of the greatest religious factors in this world."

It affords us pleasure to announce to our friends this "forward movement." From the beginning the representatives of the University have proceeded with all the energy and enterprise that was commensurate with the magnitude of the undertaking and the funds at their command. Our great universities have all been the product of slow growth and small beginnings, and few, if any, have made the progress in the first few years of their history that The American University has. Few, if any, were projected on such a magnificent scale, having abundance of room to display to the best possible advantage the twenty-three marble buildings, ensuring unity, harmony, and perspective. With a curriculum of studies for post-graduate students so complete as to leave nothing to be desired in any department of knowledge, The American University will soon take its place among the great educational institutions of the world, and enable the Methodist Episcopal Church to fully take her share in the great effort to impart a Christian education to the young people of our land. Thus will our sons and daughters be adorned and fitted for a place in the well-ordered and beautiful fabric of a Christian society, and the ideal of the Psalmist be realized, "that our sons may be as plants grown up in their youth, our daughters as corner stones, polished after the similitude of a palace."—J. A. G.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Address all communications to UNIVERSITY SECRETARY,
1419 F Street N. W., Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

THE semi-annual meeting of the Board of Trustees of The American University will be held in Washington December 11. In view of the work which has recently been commenced and the plans for the future which must be discussed, a very large attendance is expected.

THROUGH the kindness of the Trustees of the Metropolitan Methodist Episcopal Church, and at the suggestion of the pastor, Rev. Frank M. Bristol, D. D., the Book of Psalms and the Methodist Hymnal from the pew of the martyred President McKinley were given to The American University. These are priceless treasures, as they were often in the hands of the President, who was a devout worshiper in the Metropolitan Church during his term of service in Washington.

PLEASE do not neglect the prompt payment of your subscription. Some fall due January 1. Many others July 1. We shall give you ample notification. It is an easy matter to mislay this notification and forget all about it. Pay the amount the very day you get the card. You will save us additional postage, simplify our bookkeeping, relieve your own mind, and add to our stock in hand with which to push our work.

THE American University is to be congratulated in the election of Mr. Chas. C. Glover as its Treasurer. No more appropriate selection could have been made. Mr. Glover is the President of the Riggs National Bank, one of the strongest financial institutions in Washington. He has a wide acquaintance with public men, who honor him for his manliness and unusual business sagacity. Mr. Glover is a member of the Protestant Episcopal Church, and has had large share in promoting the Cathedral Foundation which has been projected by that church. He is a broad and generous man, whom Washington greatly respects.

THE subscription price of this paper is twenty-five cents a year. It is the desire to make it self-sustaining without crowding its columns with advertisements. We should exceedingly like to have you on our list. Won't you send your name and money?

The Woman's Guild.

THE enthusiasm of the Woman's Guild of The American University has settled into a firm conviction that it has for its object one of the greatest needs of this age. The great synthesis of this era is to bring the theory of the universe and religion together, it is not a question of some truth or more truth—it is for *Truth*. All literary criticism, philosophy, diverse creeds, history will be used to prove that Christianity came down from God, it is His only gift to man for his salvation: "It is God's way." It will convince the inquiring mind for Truth that Christianity is the knowledge of salvation supernaturally given, as *the way* of salvation, which will not only convince the pessimist, but will not leave the agnostic a foothold on which to rest his theory. The regular meetings of The Guild, which were suspended during the summer, have been resumed and The Guild will do active service the coming winter.

The Passing of Hon. Matthew G. Emery.

THE American University has suffered an irreparable loss in the death of Hon. Matthew Gault Emery, who from the beginning has been a valued Trustee and the efficient Treasurer. Mr. Emery came of sturdy New England stock, the founder of the family in this country having landed in Boston in 1637. He was born in Pembroke, N. H., September 28, 1818, and after instruction in the town schools was ready for college, when the determina-

tion was reached by him to enter at once into business, and going to Baltimore, Md., he apprenticed himself to a stone cutter, becoming a master workman, and in a little while had laid the foundation of his fortune. He removed to Washington in 1812. He was active in the service of the Government during the Civil War, and upon its close became a member of the Board of Aldermen of the city. In 1870 he was elected Mayor of the city of Washington, and was the last Mayor under the old regime. He was identified with all the general movements of the city productive of education and morality. He was one of the financially strong men of the city, a director in several of its institutions, and for many years the President of the Second National Bank. Brought into association with the public men of the National Capital, he was a personal friend of almost every occupant of the White House from the days of President Pierce. Secular concerns did not so absorb his busy mind as to crowd out religious matters. He was one of the founders of the Metropolitan M. E. Church, and was ever loyal and generous in its support. Five years ago he made a gift to the church of a commodious parsonage.

Having rounded out the measure of his days in honorable service, he came to the end of life in full possession of his intellectual force, maintaining unflinchingly his faith in Jesus Christ, and in view of the valley of the shadow felt no fear, knowing that God was with him. His was a true and manly Christian life, and his departure was in the triumph of faith. The Trustees of The American University at their semi-annual meeting, passed the following resolution:

MATTHEW G. EMERY.

"WHEREAS, God, in his infinite wisdom, has seen fit to translate to his home in Heaven Matthew G. Emery, therefore

"Resolved, That we, the Trustees of The American University, while humbly submitting to the will of God, desire to record the fact that we have sustained a loss well nigh beyond the power of words to express. For nearly eleven years or during the entire history of The American University he served as Treasurer. This was no small tax upon his time and strength. He was painstaking and careful to the smallest detail. He gladly did all this work without compensation, and was prompted to undertake it because of the love he bore the enterprise.

As the years grew upon him, and strength failed a little, he sometimes spoke of resigning, but the expressed confidence and love of his associates in the work turned him from his purpose and he held it to the end.

"As a Trustee for eleven years he was prompt to perform every duty. His large business experience brought wisdom to the deliberations of the Board. He was wisely conservative in all his views, and stood firmly for what he felt to be right. As a member of the Building Committee he gave much time and patient thought to the construction of the Hall of History. His interest could not have been greater had the building been his own. His further in-

terest in the University was evidenced by the donation of a block of valuable property.

"One of our staunchest friends and wisest counsellors has passed out of our sight. We mourn, but not as those without hope. Knowing his life and heart as we did, we are assured that death has been to him great gain; that he has entered into a full and blessed reward, and is performing angel service at God's right hand.

"'Though a form in the coffin lies lifeless and chill
And the wind breathes a sigh in each blast,
The voice of his wisdom is speaking here still,
And his future speaks out from his past.'"

Address by Bishop J. F. Hurst at the
**Opening of the Third Ecumenical
 Conference, London, England,
 September 4, 1901.**

These words of welcome, an eloquent trinity in voice, but a beautiful unity in spirit, warm and stir our hearts to a quicker and stronger stroke. We had supposed that every puff of the locomotive, that every splash and turn of the steamer's wheels, that every coach and car used on our journey hither were taking us farther and farther away from our homes; but the deep fraternal love that pervades these cordial greetings puts every pilgrim from across the seas to this Mecca of modern evangelism at once and wholly at home again. The speed of travel and the annihilation of distance by easy transportation are among the greatest of latter-day achievements with steam and electricity; but these do not equal in luxury and rapidity the real and enduring transports of the spiritual children of one common Father, who already find themselves sitting at the family hearthstone, looking into countenances that at first wore something of a strange look, but in a trice, through the spirit of prayer and affection, are transformed into the faces of kindred. Truly and thankfully we may say, "We are brethren," and this is without exaggeration "a heavenly place in Christ Jesus." May these opening words of faith and fraternity lead on to a filling feast of fellowship, to a sweet foretaste of the final home-coming to the Father's house and the Savior's bosom.

No marvel is it, however, that your earnest welcome should evoke a prompt response of kindred feeling from our hearts. For the ties that join us are neither few nor weak. Blood that ran in the veins of a common ancestry still flows in their descendants—a current whose tide, disturbed by the incidental and temporary conditions of political independence on the part of the colonies, and now and then rippled by the breezes of international and commercial differences, nevertheless moves majestically on—the Anglo-Saxon factor in all modern civilization both in the Eastern and the Western Hemispheres. President Grant, our own Ulysses, renowned as a warrior, and now recognized as a wise and far-seeing statesman, prior to his world-wide wanderings in 1877, said: "I will not speak of the English and the Americans as two peoples, because, in fact, they are one people, with a common destiny; and that destiny will be brilliant in proportion to the friendship and co-operation of the brethren dwelling on each side of the Atlantic." Lowell, in whom you have special interest, who himself was one of the strong links between the Old and the New England, and who now has a memorial in one of the little windows in your great Westminster Abbey, wrote of Raleigh, who has a similar honor:

"The New World's sons, from England's breast we drew
 Such milk as bids remember whence we came;
 Proud of her past, from which our present grew,
 This window we erect in Raleigh's name."

Our common heritage of liberty has been beautifully expressed by one in whose life and works were wonderfully blended the calm light and peace of the Friend and the stern and warlike spirit of the Puritan, and who sang, as only Whittier could sing, of the brave and good Milton:

"The New World honors him whose noble plea
 For England's freedom made our own more sure."

To the strength of this bond of blood has been added during the swiftly flying years of sixteen decades the great force of a vital faith. Out of the Epworth rectory, ruled by the virile brain of the father, and more by the disciplined, intelligent, and talented mind of the mother, trooped a company of children, on two of whom the seal of Heaven was set for mighty deeds and heroic leadership of God's people. That rector's home was a fitting vestibule of the Holy Club of Oxford, to which our common ecclesiastical and spiritual ancestry runs back. In that renaissance of a simple, personal, and victorious trust in Christ into which Charles and John Wesley were led we all rejoice and in its benefits we all share. While the streams of spiritual influence from this source have gone into all other bodies of Christians, and are to-day contributing largely both in men and inspiration to their efficiency, we yet have increasing reason for a glad recognition of one another's growth and progress as compact and well-ordered organisms, endeavoring to publish, and to a signal degree succeeding in making known, a Gospel intended for all men of every rank and station, and in carrying its life-giving message to every creature.

This solidarity of our faith makes us, with all our diversities of name and polity, a unit of great weight on all the continents, and is doing much to prepare the way for the future federation of Protestantism in works of charity and evangelism.

If besides these bonds of blood and faith there be any other welding us together, it is no venture of boldness to say that it is the duty that rests upon both Englishmen and Americans to join in a perpetual covenant of hearts, voices, and hands to work out for ourselves and, under Providence, for others the principles which underlie our past, which give significance to our present, and which now promise grander reaches for liberty and larger triumphs for truth in the future destiny of the Anglo-Saxon, or, as we now prefer to say, the Anglo-American.

So long as we love and practice national righteousness, so long as the virtues of the Christian home are developed in all their purity and loveliness, so long as the Christian Sabbath with all its train of spiritual and moral benefits is maintained as the boon of heaven to solace and beautify lives otherwise sodden with care and blighted by love of

self, so long as the bone and sinew of the two lands are enlisted in the unceasing warfare of Immanuel for the conquest of the world of sin by the strength of love and the power of the cross, so long we may hope to be able to teach other peoples, both by precept based on experience at home and by example shown abroad, that He who was with our fathers is with their children still, and that the whole earth is one day to feel itself of one kin through the Headship and oneness of Christ.

A peculiar sacredness pervades and marks the place of our present assembly. When the old Foundery, name of blessed and inspiring memories, could no longer well house the growing family of his spiritual children, when a whole generation and more had come and gone since he began his immortal work, and our now white-haired and white-souled leader was about entering on the eighth decade of his life and the fifth of his unparalleled itinerating, this chapel opened to him, and has ever since remained the historical center and shrine of our many-named but one-souled Methodism. What clouds of witnesses compass us about, and of how noble a record are they all and each! The roll of our worthies, whose names are registered in the hearts of millions, the dust of some of whom makes more sacred this consecrated place, and whose ministries of truth and service in administration have issued hence to the ends of the earth, who shall call? Too long that list of names would be for this brief hour. Other structures there are in England where rich and varied religious associations cluster; but not one is there that possesses the intense and unique characteristics of this veritable cathedral of evangelism, whose portals today welcome the glad home-coming of those who have journeyed from every clime, and who speak well-nigh every tongue known to man. Amid all the utterances and discussions of this Conference may the unspoken but eloquent and mighty sentiments of our departed leaders find reverent recognition, and may our counsels and labors be happily joined to the bright record of our fathers, and prove equally fruitful of good in human history.

The meeting of the third Ecumenical Conference brings to mind the first, which was held twenty years ago in this venerable and now newly renovated chapel; and the second, convened in 1891 in Metropolitan Church, at the American Capital. About one-half of those who came to that first great love feast of world-wide Methodism have since gone to be with the Lord. Our American Chrysostom, Matthew Simpson, who preached the opening sermon on that occasion, has ceased from among us, but, being dead, yet speaketh. The Nestor of your own Wesleyan body, George Osborn, who presided and spoke the welcome on the opening day twenty years ago, has been called to his reward, but his works do follow him.

A larger number of those who composed the second Conference still survive to speak of its golden days and its inspiring addresses. The one who was easily the first in that great meeting, and whose opening sermon, read by another because of his own lack of voice, but accompanied by and embodying his own personality through his erect and dignified standing at the side of the reader, will never be forgotten, has only a few months ago gone over from sunny Cannes to the sunnier paradise of God. We miss William Arthur today, but his "Tongue of Fire" is still a lambent flame of light and power among all our hosts. John P. Newman and William Xavier Ninde, who were active members of both Conferences, have also closed their career on earth with honor and entered into rest.

One who held the highest place within the gift of his countrymen in the United States, and who endeared himself to all Christians by his steadfast adherence to Christian standards in all his public and private walks, and who especially ingratiated himself with the members of the second Ecumenical Conference by his personal visit to that body and the utterance of a few pregnant and hopeful sentences on the subject of international arbitration, has been summoned to the presence of his Master and Sovereign, and Benjamin Harrison is mourned wherever he was known. Nor can we forget, in this hour of tender remembrance of those gone on before, to voice the universal sorrow that visited all lands touched by Christian civilization, when, in the first glad weeks of the new year and the new century, your Queen, the beloved Victoria, after a life of singular strength and beauty, and a reign unexampled in its length and its glory, went to her second and eternal coronation.

It is cause of rejoicing with us that, as we return your visit of ten years ago to our National Capital, it is our privilege to know that in the greeting which today comes from the Occident to the Orient we bring the hearty good will and fraternal God-speed of one who regularly worships in the same church where you then assembled, whose pastor is one of our honored delegates to this meeting, who himself loves all Churches, and who has for the second time become the popular choice of the American Republic as its Chief Magistrate, President William McKinley. Brethren, one of the happiest effects, and certainly one of the chief objects, of our two preceding Conferences bearing the name of Ecumenical has been the enlarging and love-crowned spirit of catholicity which has prevailed throughout the sessions, and left its sweet fruitage in the personal life and consciousness of each and all of the delegates.

The sentiments thus nourished into new power by these addresses and by their wide-spread dissemination through the press have led the thoughts of the whole Church to higher altitudes and stimulated

all hearts to a broader, warmer, more generous, and more comprehensive love for all who bear the name and desire to welcome and obey the spirit of Christ. If the ecumenical quality of our meeting today, as of those of ten and twenty years ago, should be questioned by any who doubt the propriety of the present application of the term, or should be challenged by any who eye with jealous wonder the wide-spreading growth of Methodism, the best defense of our adoption of this globe-covering word would be found not in the statistical tables of our growing communion in all the habitable parts of the planet, but rather in the catholic spirit of John Wesley—the most truly catholic man of the eighteenth century—and in the continuous and unfolding catholicity of the millions who have answered with their faith and love to that apostolic voice, example, and evangel.

Ecumenical is the word, the right word, the appropriate word; prophetic it may be now, in part, but it shall yet become historical. Justified it is now by the wide variety of race, language, climate, and countries here represented, but more and more will it measure up to its ideal fullness of meaning as, with its world-embracing arms, it embodies in its thought, its words, its acts, the heart-drawing spirit of him whose parish was the world and whose desire was "a league offensive and defensive with every soldier of Jesus Christ," and thus brings the divine Teacher of Olivet across the centuries into living touch with His disciples of today, who hear and with the thrill of joy obey the Master's command, "Go ye into all the world, and preach the Gospel to every creature!"

The Ohio College of Government Commenced: A Memorial to President McKinley.

The friends of this great educational enterprise at the Nation's Capital will be glad to know that work is being commenced on another new building. The contract has just been let for the foundation of the Ohio College of Government, and it will be pushed as rapidly as possible. The same contractors who are building the Carnegie marble library at Washington, D. C., will have charge of the construction. The Trustees of the University hold their semi-annual meeting in Washington on December 11th. The corner stone of the new building may be laid in the very early Spring. President McKinley, one of the Trustees of The American University, had promised to perform this service before work fell from his hands. Some one of national reputation will be secured for the occasion, and due announcement will be made.

In the lifetime of President McKinley The American University honored him in the attempt to raise \$500,000 for the McKinley Foundation of the Ohio College of Government, covering five professorships:

Diplomacy, International Law and Arbitration, Constitutional Law, Municipal Government, Civics. No name in American history is more fit or worthy to stand in permanent association with the highest teaching on these great themes of international scope than that of William McKinley. The American University was the first in the field to lay plans to perpetuate the memory of this great and good man. Why should not this noble marble building, standing here at the heart of the nation, costing \$250,000, be the McKinley Memorial-Ohio College of Government? Every footfall in its halls for the years to come would echo the name and fame of the great and honored man in whose memory the building was erected. More enduring than arch or monument, however beautiful and costly, would be this McKinley Memorial-Ohio College of Government, from which great men shall go out to bless the world. It would be something more than a mere object of interest to tourists.

One of the few Executives of the American nation to show decided interest in higher education was President McKinley. Most of them have departed from the Capital City without leaving much trace of their presence here, save a monument or a statue. Thomas Jefferson was a notable exception. He desired to live on in the hearts and lives of men, and on his tombstone wished it permanently recorded that he was the founder of the University of Virginia.

Let this beautiful and useful memorial be built by the loyal and loving friends of the martyred President, in Ohio, and elsewhere, on the hill-top overlooking Washington City, the scene of his historic administration. It will be a bulwark to Protestantism and Americanism through all the years to come. This would be an imperishable memorial and one whose purpose his wisdom and high philanthropy would sanction could he but speak. Already the patriotic and generous citizens of Ohio have contributed nearly \$70,000 toward this building. The foundation is commenced. If generous gifts were to pour in from all quarters the building could soon be completed. Let the arch and the monument rise. No loyal citizen of the Republic would do aught to hinder their progress, but let this stately and significant memorial, which was projected in the lifetime of the Christian President, be quickly completed, that it may begin its ministry of service for mankind. All subscriptions may be sent to the Chancellor of the University, Bishop John F. Hurst, Washington, D. C.

WHEN you have finished reading this illustrated number of THE COURIER kindly hand it to some friend. You can thus widen the knowledge of our undertaking, and who can tell what may come of it? If you want THE COURIER sent to some one who might be interested send us name and address.

The Epworth College of Literature.

Two hundred and fifty feet away and directly fronting the College of History in the plant of The American University is to be built the beautiful Epworth College of Literature, which is to be entirely of marble.

Subscriptions are constantly coming in from Leaguers all over the country. From some remote places where the members are very poor we receive generous subscriptions, showing their interest in the work. If those who have so little of this world's goods can contribute towards this College, it seems that those who have been blessed with ample means should gladly help.

Various methods have been employed by the Leaguers in different parts of the country to raise money for this College. One League gave an entertainment, the proceeds of which the Secretary sent to the office of the University.

We have received letters from some who are not able to give now, but have promised either to collect or earn it.

There are countless ways of earning money, which will also give pleasure to all who participate.

In the summer a lawn party could be given. A number of children dressed in dainty costumes could, after a short program is rendered, serve refreshments. Any one who has an attractive lawn should surely be ready to take advantage of the opportunity to use it for the benefit of the Epworth College of Literature. A home, or church social, or a concert would answer a splendid purpose in the raising of money for this great object, as well as giving a good time to the participants.

To be a Builder one need only give the small sum of \$1, either himself, or in sums of ten cents collected. Handsome lithographed certificates, which are worthy to be framed and hung in any home, will be sent to all subscribers.

About one thousand Leaguers have responded to our call. Where are the others? Wake up! There will come a time when you will be proud of the fact that you gave even one dollar. Two hundred thousand dollars is needed to build this College, and, if each member of each League in the country would contribute, enough would be secured to build it.

Speak to your League President about the matter and urge him to take it up. Write this office for literature and all information. We shall be very glad to correspond with you.

Editorial Comments on the McKinley Memorial in connection with The American University.

Rev. Jas. H. Potts, D. D., the widely-quoted editor of the *Michigan Christian Advocate*, was the first to speak. His suggestion gave inspiration to the University authorities to make their appeal. Dr. Potts spoke as follows:

"Various suggestions are being made for a fitting memorial to the late President. A grand memorial arch at Washington, a marble shaft at Canton and a costly hospital somewhere else are among the propositions. We believe that a utilitarian monument of some kind is the correct thing to erect. Mr. McKinley's life war a busy one. He was generous-hearted and nobly kind toward the unfortunate and weak, and toward children. Even the cruel shot of his murderer did not awaken a feeling of vengeance. 'Let no one hurt him,' he said, as he reeled to his chair, never to rise again.

"It seems to us that a fitting memorial to such a man might take the form of a public hospital or medical school in connection with The American University of which the President was a Trustee. The University is founded on a broad platform and has in view vast educational achievements in the centuries to come. A popular subscription which would identify the name and character of the lamented dead with some conspicuous building in that grand enterprise would be both suitable and expressive of the grief and tenderness which we all experience." Dr. Potts wrote a second editorial in which he warmly commended the proposed McKinley Memorial College of Government.

Dr. Leech, in the *Baltimore Methodist*, had this strong word to say:

"One would think that the authorities of the American University might with the greatest propriety appeal to the country to aid in the establishment and endowment of an institution with some object and name like the above, as a memorial to our late honored President. He was a Methodist from boyhood, an honored member of the Board of Trustees of the University, long a resident at Washington. It would make a worthy memorial, would appeal to a multitude who think that a mere arch or bridge, however appropriate, should not constitute the chief memorial of such a man. It seems to us that a better memorial could hardly be raised. The Methodist people could easily raise the money."

In case of change of address, notify at once the Secretary, Dr. W. L. Davidson, 1119 F street, Washington, D. C., to whom remittance for subscriptions can be made, and who will be glad to let THE UNIVERSITY COURIER follow you wherever you may go, so you may keep in touch with the work of the University.

**Laying of the Corner Stone of the McKinley
Memorial—Ohio College of
Government.**

For several weeks there has been unusual activity on the grounds of the University. A dozen strong teams and a multitude of workmen have been busy excavating for the foundation of the Ohio College of Government. Fair weather has been the rule, and fine progress has been made. The hole is deep and broad, for this new building is to be of immense proportions. Nearly five thousand cubic yards of soil have been moved. Wind and heavy rains greatly interfered with the work during the week of November 18. The contractors will be a little delayed in the beginning of the foundation, and it is now quite certain that the work can not be completed, as was confidently expected, for the laying of the corner stone on December 12. Disagreeable days are certain to come at this season of the year, when work must be suspended. To invite our friends to the laying of a corner stone on an incomplete foundation would defeat many of the plans we have in mind. Should the day be cold and disagreeable, as it is quite apt to be in middle December, but few people would be present, and it is the purpose to make of this corner-stone laying an historic occasion. Then, too, it is impossible on this date to secure all of the distinguished Americans whom we desire to have part in this service. In the spring it may be possible for us to have them with us. The corner stone of the College of History was laid on a bright day in October, one of the most beautiful months of the year in the latitude of Washington. A great crowd was present, and the impressive services will long be remembered by those who were there. The chief reason for pushing the work so that the corner stone should be laid December 12 was that the semi-annual meeting of the Board of Trustees takes place on the 11th, and their presence in the city would seem to make of it the appropriate time for such service. Their deep interest, however, will certainly prompt them to make a special trip, and the laying of the corner stone of the new building will, for all these good and sufficient reasons, be delayed until some balmy day in the spring time when the work is all completed, and nature shall have put on attractive attire. Due notice will be given.

Open the Doors for Work.

WE must soon open our doors for work. Fifteen hundred students stand knocking. Protestant students are attending the Roman Catholic University in Washington simply because we are not ready to receive them. With two buildings completed we shall have accommodations for several important departments of instruction. A few more royal gifts, and the \$5,000,000 condition imposed by the General Conference will have been honestly met. A faculty representing the best scholarships of the world will be organized and work commenced. Once open, money will flow into the Treasury as rapidly as it shall be needed. What a glad day that will be. The dawn is now breaking.

Beautiful Nebraska Avenue.

Those who have not visited the grounds of The American University lately will be greatly surprised at the changed appearance of things. The old Loughborough Road, with its winding way, is a thing of the past. At an expense of \$11,500 Nebraska Avenue has been opened, graded, and beautifully macadanized with bluestone. It is as straight as an arrow and as level as a floor.

The appropriation of the last Congress was hardly sufficient to grade it to its full width for its entire length. On the University side of the avenue, however, in the vicinity of the College of History, full width was secured. The office of the Superintendent of Grounds, which stood on a high knoll near to and obstructing the view of the beautiful marble building, has been moved to another point of the Campus. The grounds about the College of History are now being graded to the avenue. This will give the building a handsome elevation above the street. In the spring the entire lawn will be sown in grass and trees planted. Water mains have been laid in the new avenue. Appropriations are already assured by which the avenue will during the year be made full width for its entire length. Adjacent property owners have signified their purpose to at once do all needed grading.

This will give the entire frontage of the University site its proper elevation, and reveal, as never before, the beauty of the Campus proper as related to the adjacent streets and to the remaining portions of the extensive tract composing the site. The new avenue is on the crest of the hill, where surpassing views are had in all directions, and will be the most popular driveway for pleasure in the whole suburban region.

The Ecumenical Methodist Conference.

Every ten years a great Methodist conference is held which embraces all sections of Methodists throughout the world. The third of such gatherings was held September 1-17 in Wesley Chapel, City Road, London, the mother church of Methodism, in which the first conference took place twenty years ago. The arrangements were undertaken by a committee representative of all the British Methodist churches, and their task was a formidable one. The financial responsibility was no light matter, a guarantee fund of £2,000 having to be provided for expenses. The delegates numbered upwards of 500, and included about 100 colored preachers from the United States. Several of the negro delegates to the Conference were staying at a large and fashionable London hotel, the Saint Ermins, and other American guests—not, however, associated with Methodism—objected to their presence, and represented to the manager that if the colored visitors remained they must leave. The manager refused to give the delegates notice to leave, and declined to make any distinction between the black and white guests.

The colored brethren were very much in evidence in the discussions of the Conference, and were the "observed of all observers" at the several receptions which were given to the delegates.

The Conference was a great success in every way. Great themes were admirably discussed by truly great men. Not a foolish thing was done, not a silly word was said. The union of Methodism the wide world round, a consummation devoutly to be wished, was brought a little nearer. A hymnal for universal Methodism was talked of, and will come at no distant day. This would be a splendid beginning. We could soon sing ourselves into complete union. A great shadow rested over the Conference in the assassination and death of President McKinley. Strong men wept like children. Many earnest prayers were offered for the wounded President and stricken country. When death came the memorial service was tender and beautiful. The heartfelt sympathy manifested throughout England was touching and comforting. Flags were everywhere at half-mast. They seemed to sorrow as though they had lost one of their own. It seemed a strange coincidence that just twenty years before, when the first Ecumenical Conference was in session in London, news was received of the death of President Garfield, who had also been assassinated. The Conference ten years hence will likely be held in Toronto, Canada.

Mr. Andrew Carnegie's Gifts.

During the recent months the gifts of Mr. Andrew Carnegie for charitable purposes aggregate the vast sum of \$42,000,000. No wonder the world is startled by such pouring out of wealth for the good

of society. He richly deserves the thanks of the race for his generosity. Through the remainder of his earthly pilgrimage he can look on the imperishable monuments he has erected by these gifts. The example of this great benefactor of mankind will be far-reaching in its effects. Others of great wealth will be inspired by it. It is to be regretted that from various sources the offers of this gentleman have been to a certain extent unkindly received, and even abuse has been hurled at him. He feels his responsibility, and is pursuing a course that can only bring satisfaction and pleasure to his own mind and heart, and also benefit to the world.

Asbury Memorial Hall.

Asbury subscriptions paid since the last issue of the COURIER:

Gifts to the Epworth College of Literature.

The following amounts have been received by the Treasurer, Washington, D. C., since last issue of the COURIER:

Boston, Mass., \$1; New London, Conn., \$8.40; Wilmington, Del., \$6; Philander Smith College League, Little Rock, Ark., \$1; Bellevue, Ky., \$2; Hamline Church, Washington, D. C., \$5; Gettysburg, Pa., \$2; Groesdale, Ill., \$2.60; Metropolitan Church, Washington, D. C., \$10; Dauphin, Pa., \$5; St. Mark's, C. E. Society, West Philadelphia, Pa., \$5; Douglas Memorial Church, Washington, D. C., \$2.25; Founary Church, Washington, D. C., \$11; Chicago, Ill., \$2; Wright's Church, Venetia, Pa., \$100; Wright's Church, Junior League, Venetia, Pa., \$15; James Church, Gilkath, Pa., \$10; Rev. W. W. Youngson, Vandergrift, Pa., \$50; Cambridge Springs, Pa., \$14; Wilson Memorial Church, Washington, D. C., \$8.

Washington the Educational Center.

We stop the press long enough to say that Mr. Carnegie has just proposed to give \$10,000,000 for a university in Washington, if the terms shall be accepted by Congress. The *Washington Post* well says that, "with The American University and the Roman Catholic University and the Carnegie University, Washington will become the greatest educational center in the country."

OHIO COLLEGE OF GOVERNMENT—MCKINLEY MEMORIAL.

Gifts and Bequests.

Dr. John Kost of Adrian, Mich., has given to the College of Medicine and Surgery, Chicago, a museum of zoological specimens which is valued at \$150,000.

John A. Johnson, of Madison, Wis., has offered \$40,000 to the Board of Supervisors of Dane County, Wis., for the purpose of erecting and maintaining a home for aged people.

William C. Schermerhorn, second vice president of the New York Eye and Ear Infirmary, has given \$75,000 to that institution for the construction of a pavilion for patients afflicted with diseases of the ear.

Under the will of the late Charles Higgins, of Chicago, the following religious bequests are to be distributed after the death of his widow: St. James' Episcopal Church, \$10,000; St. Luke's Hospital, \$10,000; Church Home for Aged Persons, \$5,000; Grace Church, Waterford, N. Y., \$5,000; and bishop of the Episcopal diocese of Chicago, for the benefit of poor churches, \$20,000.

Ohio Wesleyan University is in the lead of recipients of twentieth-century gifts, having received about \$600,000.

Matilda Goddard has willed \$30,000 to charitable and scholastic institutions. Boston University receives \$500.

Miss Helen Gould has presented to Vassar College a scholarship of \$10,000 in memory of her mother. This is the third scholarship received from Miss Gould within a few years.

D. W. Minshall, of Terre Haute, has made a third gift to De Pany University, comprising altogether, \$50,000. The money will be used for the construction of the new science hall, for which the contract has already been let.

Thus far J. Pierpont Morgan has given \$500,000 for a New York technical school, \$75,000 for a botanical park in New York, \$100,000 for a hospital, \$150,000 for a yacht club, \$800,000 for a church, \$25,000 for lighting St. Paul's Cathedral, London, and 30,000 rare manuscripts to the New York library.

John D. Rockefeller's latest gift to the University of Chicago was announced by President Harper at the annual convocation of the university in Studebaker Hall, on December 18, to be

\$1,500,000. This brings the total endowment of the institution up to \$13,005,874, of which amount Mr. Rockefeller has contributed no less than \$9,133,874, and all save \$1,000,000 of the remainder was raised by reason of the provisos attached to many of Mr. Rockefeller's gifts, which made necessary the raising from outside sources of sums equal to those he promised. Of Mr. Rockefeller's present, \$1,000,000 is to be used as an endowment fund, and the remaining half million is for present needs; \$100,000 is to be used for erecting a university press building, a large part of which is to be devoted to library purposes.

Boston University has received \$2,000—a gift from Mrs. Katherine Stackpool and Mrs. Elizabeth Osgood.

Grand Rapids can have a gift of \$150,000 from Martin A. Ryerson, of Chicago, for a new library building on liberal conditions.

Mrs. Allan Sells Greenspan's will give \$200,000 to the Topeka, Kan., Orphans' Home.

President Roosevelt Entering his Carriage after Laying the Corner Stone.
Completed College of History in the foreground.

AN EPOCH-MAKING DAY.

Full report of impressive ceremonies attending the corner-stone laying of the McKinley Memorial Ohio College of Government.

The day long looked for, May 14th, has come and gone. It was as lovely a May day as ever smiled upon the world. Fifteen hundred people found their way to the University site, including many prominent in the religious and political life of the nation. The grounds, in their spring attire, never

looked finer. The view from the commanding hill-top in the clear atmosphere of the day was superb. Across the green fields to the east, the dome of the Capitol and many public buildings of the city were plainly visible. To the west, the purple peaks of the Blue Ridge Mountains, and the Potomac winding in and out among the hills. Mr. J. B. Hammond, the superintendent of the grounds, had made wise and ample provision for the expected crowd. A platform fifty feet square was built, on which one hundred and fifty chairs had been placed for the Trus-

tees, members of Congress, and the Cabinet, the speakers and their friends. An elevated platform served as the speakers' stand near the site where the corner-stone was to be laid, over which floated the Stars and Stripes. The only shadow on the day was the absence of the beloved Chancellor, Bishop John F. Hurst, who for a dozen years has carried this great enterprise on his heart and in his hands. How rejoiced he would have been to have seen the great company present and to have participated in the impressive ceremonies. Protracted physical weakness prevented his being present. Earnest prayers were offered for his recovery. In his absence, the preparation of the program and the carrying out of all the details fell upon the University Secretary, Dr. W. L. Davidson. It was carried through without a break. The addresses were brief, timely, and eloquent. It would have been impossible to have gathered together in this country a more representative company of speakers. The presence of the President of the United States gave great interest to the occasion. The services lasted exactly one hour and ten minutes. We are glad to be able to present to our readers the addresses in full. They are worthy of preservation. Dr. Davidson introduced as the presiding officer of the hour, Bishop Willard F. Mallalien, of Boston, who from the very beginning has been one of the loyal friends of the enterprise. An original hymn, written for the occasion by Rev. J. E. Rankin, D. D., President of Howard University, was sung to the tune of "America." Selections from Proverbs were read responsively.

**Prayer by Rev. Joseph F. Berry, D. D.,
of Chicago.**

Almighty and Everlasting Lord God! We bless Thy name for the privilege of meeting under such favorable auspices to-day, and we pray that gratitude may take possession of all our hearts.

We have reason, as individuals, for profound thanksgiving unto God. Thou hast done for us more than we know. The fever that has laid others upon beds of pain to be raised up again with eyesight impaired or hearing gone; the pestilence that suddenly smote down our fellows, causing wretchedness in many homes and sadness in many hearts; the raging fire that has devoured in a moment the earnings of many years of hard toil, and perhaps many a valued life; the storm that has swept over the earth, leaving ruin and destruction in its path;

the earthquake that rocked thousands in its giant cradle and hushed their wild cry in the sleep of death;—from all these terrible catastrophes Thou hast shielded us and we have mercies unnumbered to enjoy. May we call upon our souls and all within us to laud and magnify the name of the Lord.

And we have reason as a nation to praise Thy name forever. Thou hast been good unto us. Thou hast established us upon strong and secure foundations. Thou hast blessed us in innumerable ways. Thou hast led us in ways that we knew not. Thou hast been with us from the beginning until now. O God! in this presence we bless Thy name for the unnumbered gifts of a national character Thou hast bestowed upon us. May we praise Thy name forever.

And now, Lord, we look to Thee for Thy blessing. Bless us, we pray Thee, as individuals. Thou knowest us, our needs, the real necessities of our lives. O God! Bless us, not according to our measure of supply, not according to our estimate of what should be enough; but bless Thou us according unto Thy riches and glory by Christ Jesus.

Bless, we pray Thee, the Nation. Be Thou with Thy servant, the President of the United States, with his official advisers, with our representatives in Congress, with the men who fill the places of responsibility upon the Bench, with our Governors and all who are placed in authority over us. O God! may we continue to be a nation whose God is the Lord.

Bless, we pray Thee, our educational system, all that is being done for the intellectual life and elevation of our people. Grant, O God, to give wisdom in generous measure for the intellectual life of rising generations. And we pray Thee, Our Father, that we may plant broadly and wisely in this great field of responsibility. Bless, we pray Thee, the cause of Christian education. May we see, more than ever, that education and Christianity go hand in hand. May the Union be cemented and strengthened in every institution of this kind that rises to do this work for the nation.

God bless the institution the beginnings of which we behold to-day. Prosper, O prosper this work greatly in our midst, and may the work upon the foundation stones, which are being laid in our day, go forward rising until many buildings shall cover this ample campus, and until a great completed institution shall be planted here to do the work for the nation and for the glory of God.

Bless Thou the Chancellor of this University, who is detained at home by illness to-day. Graciously comfort and sustain him in his affliction. And in his absence, may those who are entrusted with the responsibility of carrying forward the work be divinely helped, and may the work redound unto the glory of God and the well-being of all people.

These mercies, and all other of our hearts' desires, we ask in the name of Jesus Christ, our Lord and Redeemer. Amen!

Introductory Remarks by Bishop Mallahan.

Before the regular speakers are called, I have a few words, somewhat introductory in their character, to which I call your attention.

To-day we are gathered in the Capital of the grandest nation on the face of the earth.

Magnificence and beauty surround us on every hand.

Athens and Rome in their palmiest days are not worthy to be compared with this city. No capital of any

nation in Christendom equals the Capital of our own free and glorious Republic.

In the good providence of God, from the days of the illustrious man, whose name it bears and will forever bear, until the present hour, progress—rapid, sure and substantial—has here prevailed.

Every genuine American is proud of his nation's hearth and home, and confidently expects that the generations of the coming centuries will have still greater occasion for congratulation and pride.

The experiment of self-government has not proved a failure; with the divine blessing and guidance it shall not prove a failure, but rather an inspiring

and up-lifting example to all the nations of the earth.

If this hope shall be realized it will be because our rulers—municipal, State, and national—are, from this time on, men who fear God and work righteousness; because our lawmakers are not degenerates, but staunch and true, conscientious and courageous, seeking the divine approval rather than the praise of men; because our judges are wise and well instructed in the law, and have unquestioned integrity, and also the ability to hold the scales of justice with a steady hand.

The fundamental purpose of The American University is to secure for all aspiring souls the most complete and broadest training and culture preparatory to the right discharge of all duties and respon-

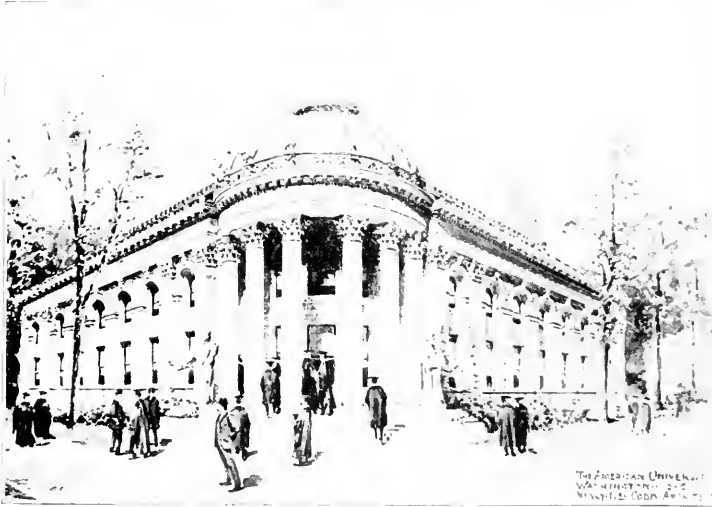

sibilities that may devolve upon them.

It assumes that all its students will recognize their obligations to themselves, to humanity, and to God; that for themselves they will cherish the highest, noblest, and purest ideals, and earnestly strive to realize them;

that in behalf of their fellow-men they will render generous, self-sacrificing service, and, that, recognizing God as the Creator, Upholder, and Governor of all worlds and of all intelligent beings, they will steadfastly seek to know and do his will.

The Department of Government, the corner-stone of whose hall is laid to-day, is one of the most important of the University. Its course of instruction will be comprehensive, and have intimate and important relation to diverse aggregations of citizens in our own country, and also to the people of all other lands.

Here diplomats will be trained to perform wisely

MCKINLEY MEMORIAL—OHIO COLLEGE OF GOVERNMENT.

and well the varied and delicate duties which belong to those who represent us in the chief cities and capitals of the world.

It is to be hoped that they will abjure the effete and Machiavelian policy of the past, and, instead thereof, hold fast to the distinctively American policy of telling the plain, honest truth, and when that can not be done, by pen or voice, remain as silent and uncommunicative as the Sphinx.

If this department of The American University shall fulfill the expectations of its friends it will show us how the rapidly multiplying populations of our great cities can be governed; so that they shall not become hot-beds of socialism and anarchy; so that they shall not encourage lawlessness in any form; so that scientific sanitation and symmetrical methods of education shall insure both health of body and mind; so that conscienceless demagogues shall not crowd themselves into official positions for the sake of what they can pilfer, plunder, and steal from the public funds; so that it shall be made exceedingly difficult for the bad and evil disposed to do wrong, and exceedingly easy for the good and well disposed to do right.

If we would preserve all that is good in our institutions, if we would see our nation all that we desire, all that we imagine in our fondest and brightest dreams, we must care for our great cities; they must have good laws, and those laws must be administered by men who at the same time are thoroughly honest and utterly fearless.

In a Union like our own, comprising nearly fifty separate States, each one possessing a measure of sovereignty, and especially jealous of constitutionally reserved rights, it is absolutely certain that the harmonious and satisfactory adjustment of conflicting claims and interests will become more and more intricate and difficult. All will agree that the Union must be preserved, but how and by whom are the supreme questions. Surely not by intriguers and sycophants, not by the ignorant and immoral, not by the doctrinaires and faddists, not by wild dreamers and stupid utopians. State governors and State legislators ought to be alert and active in thought and execution, they ought to be in close touch with the common people, they ought to be broad-minded and generous in their plans and sympathies, they ought to prize the commonweal far beyond their own most cherished personal am-

bitions, they ought to understand the fundamental principles of popular government and their practical application, they ought to be patriots who see and know that the highest interests of the individual State are best conserved in the conservation of the Union, in the perpetuation of the institutions established by the Fathers, and in the constant encouragement of an enthusiastic patriotism.

Far beyond the vision of the most prophetic souls has expanded the horizon of our national boundaries.

Far beyond the thought of the most imaginative has the nation increased in numbers, wealth, and power. Surely God has been immanent in all our affairs. We believe he has cared for us, and that he still cares for us. But this is no time for small, weak, purposeless men. Just now there is a demand for strong, clear-thinking, clean-handed, resolute men, and the need will be greater as the years come and go.

Where shall such men be found? Where shall they be trained? They will come from the cradles rocked to-day by the gentle touch of loving, loyal, patriotic, Christian, American mothers. They will be trained for the right discharge of supremest duties in the Halls of The American University, and especially in this Hall of Government, to be forever consecrated to the memory of William McKinley, one of the noblest representatives of all that is purest and best in our institutions and people.

And may God grant that from this University, and from this Hall, men from the East, from the North, from the South, from the West in successive generations, may go forth, who shall not only equal but far surpass the men of former years, in all highest patriotic, philanthropic, and Christian aspirations and achievements.

THE PRESIDING OFFICER. I now take great pleasure in introducing, as the first speaker this afternoon, Senator J. P. Dolliver, of Iowa. (Applause.)

Remarks by Senator J. P. Dolliver.

Ladies and gentlemen: It is a very great pleasure to me to have the opportunity of participating in this interesting and important occasion, although I am bound to say that my appearance here, by the express arrangement of the Committee, has been surrounded with embarrassments such as all of you will not readily appreciate; I have been asked to

divide twenty minutes with the distinguished Senator from Ohio (Mr. Hanna), and the Committee, evidently suspicious of such surroundings, has put my name first, in order that my friend and colleague may have his share of the time. (Laughter.)

I confess that when I first heard of the project of The American University, it appeared to me to be visionary, and I am now glad that it was, for I am convinced that it took in a larger horizon in the intellectual life of the Republic than those of us who were discouraged at the outset had any conception of at that time.

In the first place, it has captured the most magnificent situation in the United States for a great university.

In the next place, its foundations have been laid slowly and quietly. Its founders have put themselves in partnership with artists, and, at the very beginning of their work, have given to this city and to this community the promise of a beauty in architecture such as belongs to no other American institution of learning. (Applause.) I am glad that its foundations are being laid slowly.

And while it seems possibly a thing out of place to say, I am glad that it will have to struggle for its life. I have had an opportunity to observe the growth and influence of such institutions in the United States, and those to-day are the most influential—like Yale, and Harvard, and Princeton—which in their origin and early history saw all the hardships that belong to a struggle for life. The strength of a man is made by the perils he goes through, by the hardships he encounters, and by the work he does. (Applause.) The same law is applicable to the life of all institutions, and most of all to the institutions which are to command the intellectual future of the United States.

I am glad also, that this institution is to be dedicated to a broad, generous recognition of the religious life of the American people. I do not know whether it ought to be said, but it has seemed to me that the intellectual growth of the American people, as illustrated in many of the great centers of secular education, has in it an element of danger to the moral stability of the Republic. I have an old-fashioned faith in the convictions that were with the fathers when they laid the foundations of our government, and I do not believe that a system of higher education is without danger to our civil life, if it deliberately turns its back on the moral nature of man and forgets the human soul in its highest

spiritual relation. (Applause, and cries of "Hear!" "Hear!")

I am glad to know that this institution is to be dedicated to patriotism, and that it is to stand side by side with the College of History. The history of nations is merely a record of their preparation for the part that they are to have in the progress of the human race.

It is perfectly fitting that the great denomination which has taken in hand this work should dedicate among its first buildings a College of Political Science. It is a guaranty that the lessons given here will be in line with the highest standards of American patriotism. It could not be otherwise and be satisfactory to the fifteen millions of Methodists in the United States. (Applause.) In the darkest hour of the Civil War, when Bishop Ames went to the White House to pledge the sympathy and support of his people to Abraham Lincoln, that great man uttered a eulogy which can not be too often repeated by those who take an interest in the political life of the American Republic. He said: "It is no fault in others that the Methodist Church sends more soldiers to the field, more nurses to the hospital, more prayers to heaven than any. God bless the Methodist Church. Bless all the churches, and blessed be God, who, in this, our great trial, giveth us the churches." (Amen, and applause.)

I am glad that this great institution is to perpetuate the name of an ideal American patriot, soldier, and statesman. (Applause.) It is fitting that an institution originally intended to enlist the interest of the people of the State of Ohio while McKinley was living, should be turned, now that he has gone, into a memorial of his public services. I count him among the great statesmen in our national annals. (Applause.) He had rendered a great public service before he became President of the United States, and a thing happened to him that has happened but to few men—to be called upon in the hour of his largest responsibility to deal with new and strange questions; and he so dealt with them that the latter years of his life have already been lifted into the light of universal history, and his fame has passed into immortality. (Great applause.)

It is fitting that his name should be connected with a school of American political science, for he was, in his comprehension of the every-day duties of American citizenship, the best illustration of intelligent devotion to the civic activities of his times.

(Applause.) If he had lived a little longer, you would have seen this familiar notice in the newspapers: "The President yesterday left the Capital on his way to Canton to vote." I saw such a notice as that in the newspapers every year after he became President, and it used to interest me, knowing, as I did, so many good people who never had time to vote. How did it happen that the busiest man in the world always had time to vote? (Applause.) Last summer, being at the cottage in Canton, I made bold to ask him what his philosophy was in that regard, and he told me a thing which I intend to repeat in the ears of my countrymen wherever I can get anybody to listen to me. He said that from the day he cast his first vote on the march and in the ranks of the old Union Army in the mountains of Virginia up to that time he had never once failed to stand uncovered in the polling place where he had the legal right to vote. (Applause.) My own conviction is that our institutions are likely to take more damage from our habitual negligence than by our failure to vote right; that is, from your failure to vote my way. (Laughter.)

Not very long ago the venerable Senator from Massachusetts (Mr. Hoar) upon a notable public occasion found opportunity to say that experience had taken out of him all the bigotry of his earlier years; that as he had grown in observation and knowledge of the world, he had made up his mind that a great many of the ideas he had cherished in the earlier years of his life were wrong. He said he used to think that if all the Protestants were dead, the Catholics would destroy our institutions; he used to think that if all the Republicans were dead, the Democrats would play havoc with our affairs; if all men born in the United States were gone, the people of foreign birth would undoubtedly wreck our civil liberties; and if all the people of the North should happen to withdraw, the people of the South would lose no time in overthrowing the foundations of freedom in the United States. But he said he had lived long enough to find out that if every Republican were dead, every Protestant dead, every native born American dead, and every man of the North were dead, our brethren of the South, our Catholic brethren, our brethren who loved our flag even afar off, our Democratic brethren, would take up the burdens of the government and carry forward our institutions in the spirit of liberty. (Applause.) That is the larger conception of our na-

tional life. So that I repeat that if our institutions are ever destroyed, it will not be by reason of our failure to vote right, to put our judgment and our consciences into the ballot box, but by reason of the habitual and general negligence of the American people to give any attention at all to their political obligations.

And so, as we are to-day to dedicate this College of Political Science to the memory of one of the great popular leaders of our times, I welcome the larger political ideal exemplified in the life of William McKinley, an ideal which shall one day dedicate the best heart and brain and conscience of America to an intelligent interest in public affairs. (Applause.)

And now I desire to thank you for the kindness of your attention, and to apologize to those who are to follow me for having been betrayed into too long a discourse, and to wish this rising enterprise all prosperity. May we live to see the day when its diploma shall be a passport to intellectual celebrity all over the United States. (Great Applause.)

THE PRESIDING OFFICER: I now take great pleasure in introducing Senator M. A. Hanna, of Ohio. (Applause.)

Remarks by Senator Marcus A. Hanna.

Ladies and gentlemen: This is an important and very interesting occasion to me. These associations bring up memories—the laying of this corner-stone in the foundation of this temple of learning to be builded by the public-spirited men of my native State, and consecrated to the memory of her dearest son, William McKinley. (Great Applause.)

Pile up your marble, and every stone will mark an incident in his life of devotion to his fellow men. ("That is true!" and applause.) Crown it in the glory of its completion, and he will look down from on high and bless your noble work. It is indeed a noble work.

President McKinley was deeply interested in this enterprise, and it was owing to the expression of his belief that the people of Ohio were stirred to make the realization of it meet his views and wishes.

It was to him that we looked for leadership in thought not only, but in example as well. It was not because this institution was to be built by a sect of which he was a member, but it was because of his devotion to all public institutions that contribute to the development of his countrymen.

He was proud of this beautiful city where he had spent the best part of his life. He was proud to see it grow in its beauty and in its development, calling together here the representatives of all the people, and of the highest honors of official life. He knew the A B C of life; he knew the foundation principle, which was to make his country great. His experience in public life made him appreciate, perhaps more than any other man, the value of an institution like this.

That corner-stone has beneath it a foundation more enduring than granite—it is morality. That was the foundation of McKinley's life. (Applause.)

Upon this subject I can not speak as I would, my friends. The memories which come to me on an occasion like this are too painful to dwell upon. Our martyred President is here to-day in spirit. If that sacrifice were needed that we might search our hearts to learn wherein we could do higher and nobler deeds, if that example were necessary to inspire the young men of this country to broader, more liberal and higher motives in social and governmental life, then indeed His will, not ours, be done. (Applause.)

THE PRESIDING OFFICER. I take great pleasure in introducing Henry B. F. Macfarland, Commissioner of the District of Columbia. (Applause.)

Remarks by Commissioner Macfarland.

Mr. President, ladies and gentlemen: A world man, under whose leadership the United States became a world power, William McKinley, will be associated forever with the National Capital. This

was his official residence for a quarter of a century. Here he did his greatest work as a leader and commander of the people in the expansion of the Republic, and the extension of its influence, through the war of liberation. Here he entered, unknown, upon his national career, and hence he was carried amid the unparalleled mourning of the civilized world, to his last sleep, after his service had become international, and his fame had become immortal. Memorials in his honor are appropriate here. And none can be more appropriate than a college for the study of government in this American University,

in this Christian university, which is to exalt the spiritual and the intellectual above the material.

Upon these heights, looking west toward Harper's Ferry, where McKinley campaigned, and looking down to the Capitol and the White House, where McKinley spoke and wrought, and across to Arlington, where glory guards forever his comrades of two wars, we do well to raise this monument to his memory. That scene of beauty and peace before us contains the Capital

which he loved. From this very point he has looked upon it, doubtless with that desire for its development and embellishment which he so often expressed, and with the thought, seeing below him the Potomac, of that memorial bridge, which he said should connect the city of the living with the city of the dead, and the District of Columbia with Virginia, as "a monument to American patriotism," and as a symbol of the ties binding together our country which has never been divided.

McKinley, like Washington and Lincoln, was

WILLIAM McKINLEY.

not a college graduate; but that fact made him the more appreciative, perhaps, of the advantages of a collegiate education. Certainly, he took a deep personal interest in the colleges and universities of the country, and accepted willingly their honorary degrees. He took thought for all the institutions of the higher learning which are so rapidly making this a university center. But most naturally he had a special and personal regard for The American University, and gave its interests particular attention. He lent his name and his influence to its upbuilding. We can not doubt that he would approve its purpose to preserve that name and influence, in this building, as an opportunity, and an inspiration, to the youth of the country.

William McKinley took his higher education on the battle-field, practicing the lessons of patriotism which had come down from Revolutionary ancestors, and setting that example of good citizenship to the young men of America, which became more prominent, but not more luminous and commanding, as he steadily climbed the path of duty until it became the way of glory. No other name in our history stands more plainly for service and sacrifice. No other name is more beloved or more revered. The life, the death, of no other man has more power upon the lives of men. To work in the College of Government, raised to the honor of that great master of government, will be in itself a noble education.

Out of this college may go the governors of our future, not only for the home States, but for the distant islands of the sea which McKinley brought under the beneficence of our flag, each man equipped with McKinley's principles and inspired by McKinley's patriotism. (Continued Applause.)

The PRESIDENT OFFICER. We have with us this afternoon President McKinley's last and much-loved pastor, Rev. F. M. Bristol, D. D., at present and for some years past in charge of the Metropolitan Church. I take great pleasure in introducing Dr. Bristol.

Remarks by Rev. F. M. Bristol, D. D.

We find on this program of exercises a remarkable collocation of names: McKinley, Ohio, American! These names represent severally the ideal Patriot, the ideal Commonwealth, and the ideal Nationalism. Well may the College of Government of The American University bear the name of

a State which has furnished so many brave soldiers and distinguished generals to maintain the Union of this Republic, so many intelligent and manly toilers to build up her industrial and commercial prosperity, and so many wise and patriotic statesmen to construct her laws, fashion her institutions, and determine her high destiny among the world-powers of civilization. And well may Ohio, that State of enviable distinction as the mother of great men, be represented in the title of this College by the name McKinley, which in the splendor of its fame reflects immortal glory upon Ohio, upon Americanism, and upon our common humanity. From the beginning, the genius of Americanism has insisted upon the intelligence of democracy and the democracy of intelligence. Law-protected liberty is possible only with educated liberty. A free people must not long remain ignorant, for an ignorant people can not long remain free.

By the best publicists of the ancient times society was divided into two classes, the governed and the governors. And even according to the Aristotilian idea, the only class that needed or that should have an education was the class that was destined to govern the other class. One idea, however, was accentuated in that old philosophy of government and of education, viz., that whether the governments were monarchies, oligarchies or aristocracies, all rulers and governors should be educated. When sovereignty is lodged in the many rather than in the few, when the people rule, is it not likewise necessary that they shall be educated? If hereditary princes and kings, and if despots and tyrants must be trained in the science and art of government, must not free men, self-governing peoples, just as necessarily—yea, more necessarily—be educated to govern themselves? Every school house built, every college endowed, every university founded, is a new guarantee of national enlightenment and progress and a new prophecy of the perpetuity of free institutions. After all, the greatest victories for right and righteousness are gained by ideas, not by bullets. Civilization is the creation of thought. Our Americanism was originally but a magnificent dream. Our national history has been but the rational evolution of that dream. Our Republic to-day is the incarnation of humanity's immortal aspiration. The Book, the Press, the School, the Church—these are our defenses, more impregnable, more invincible than forts and battleships. A people trained to

think and reason are superior in power to any who are only taught to shoot. Our national destiny will be determined by our educational policy.

Washington, the political center of this Republic, Washington, which is rapidly becoming the most beautiful city of America, if not the most attractive capital of the world, Washington is destined to become the center of the scientific life of the nation, and, shall we not say, the center of the art life of the nation? Yes, and Washington will inevitably become the educational center of this continent in all post graduate training and investigation.

This is the belief of the patriotic and progressive spirits who have conceived the vast enterprise of this American University. Let it become, as it surely will, the glory of Washington, the pride of America, the light of the world!

The illustrious patriot, with whose name this College will be adorned, often expressed his belief in the wisdom of this great undertaking, and he hoped to witness its consummation in a University of which the nation would be proud. When in a distant land, Bishop Hurst received the sad intelligence that the great, good President had fallen, he seemed dazed, smitten by a blow from which we can hardly hope he will soon recover. For he knew that not only a great man and a great President had fallen, but also that the University had lost one of its best and wisest friends, if not its most powerful and influential supporter. But may not the good Bishop be comforted and encouraged by the assurance that the people who loved William McKinley loved what he loved, and that Washington, Ohio, America will see to it that this College rises to beautiful form and perfection as a worthy and lasting memorial of him? Let this College of Government rise as a monument to the living greatness and glory of the best government ever conceived in human wisdom and favored and defended by Divine Providence—"the government of the people, by the people, and for the people." Let this College of Government rise as a monument to the patriotism, generosity and enlightenment of that great Ohio which glories in having been the native State of William McKinley, and in her bereavement joys to guard with sleepless memory and grateful veneration the precious ashes of her mighty dead. Let this College of Government rise as a monument, no less practical and useful than grand and artistic, to the virtues of that

ideal American, William McKinley, than whom no man ever did more to give our flag honor on the seas and our country front rank among the nations of the earth. That name, "McKinley," has become synonymous with national honor, national prosperity, national dignity, and national duty. That name stands to-day for a greater America, for a richer, more unselfish America, for a history-making America, for a world-enlightening America. That name represents to all men the government of law and liberty, the government of brotherhood and reciprocity, the government of peace and prosperity, the government of justice, equality, enlightenment, and happiness.

He fell, this great American, a martyr to the highest, most humane ideal of government that ever possessed the mind of sage or patriot or people. By the very creed of lawlessness and anarchy he was slain because he stood for government, for American government, and represented the people's ideal of government. Let this College of Government be his monument! And let it educate the coming generations in that broad-minded, liberty-loving, law-respecting, and beneficent Americanism to which William McKinley was a blessed martyr! (Applause.)

THE PRESIDING OFFICER. We are greatly favored to-day in having such a charming condition of weather that enables this occasion to proceed without interruption or discomfort. There is very much to be thankful for, but I know that I shall voice the thought of every person present when I say that we are especially glad and thankful that the President of the United States (applause), a Trustee of The American University, with all his cares and responsibilities and pressing duties, has set apart the hours of this afternoon to be present with us. No words of mine can express my personal gratification at his presence, and I know that you fully share with me in these feelings. (Applause.)

Remarks by President Roosevelt.

Mr. Chairman, ladies and gentlemen: I am to say but one word. Nothing more need be said than has been said already by those who have addressed you this afternoon—the statesmen who worked with McKinley, and the pastor under whose ministrations he sat.

It is, indeed, appropriate that the Methodists of America—the men belonging to that religious or-

ganization which furnished the pioneers in carving out of the West what is now the heart of the great American Republic—should found this great university in the city of Washington, and should build the college that is to teach the science of government in the name of the great exponent of good and strong government who died last fall, and who died as truly for his country as Abraham Lincoln himself.

I thank you for having given me the opportunity this afternoon to come before you and to lay the corner-stone of this building. (Applause.)

The President then stepped from the platform to the polished granite corner-stone, which was suspended in a crane ready to be swung into place. The architect, Henry Ives Cobb, handed the President a new trowel. With it he spread the mortar and then stepped back, as the great stone settled into its place in the foundation. The stone contained a copper box, which will later be appropriately filled. The Gloria Patria was sung, and after it, at the request of the President, a thousand voices joined in "Praise God, from whom all blessings flow." The benediction was pronounced by Rev. H. R. Naylor, D. D. An informal reception was tendered the President before he took his carriage. He had a kindly word for all. It was certainly a great and inspiring day in the history of The American University.

Now for the completion of the McKinley Memorial. The foundation is built and paid for, and the corner-stone is laid. Nearly half the money needed to complete it is in sight. Thousands of small subscriptions have been received from members in many churches throughout Ohio. Most of them are being promptly paid. Payments on many of them fall due July 1st. Now that the work is progressing it is hoped that every subscription may be promptly met. Other generous subscriptions are certain to come from those who loved the martyred President, and from those who believe that this Ohio College of Government will be the most worthy and significant memorial which will be erected to his memory. Will you not have some share in it? All subscriptions should be made payable to the Treasurer of The American University.

As we go to press a telegram brings the sad intelligence of the death of one of our most valued Trustees, Mr. J. F. Robinson, Rock Island, Ill. In all that makes for manhood of the royal type, he was one among a thousand. Further notice will be given later.

Trustees Hold Semi-Annual Meeting.

The semi-annual meeting of the Trustees of The American University was held May 11th at the offices of the University in the Glover building. In the absence of the President, John E. Andrus, detained by illness, Mr. B. H. Warner was chosen chairman *pro tem*. Others present were Bishop Thomas Bowman of New Jersey, Bishop W. F. Mallalien of Boston, Dr. Thomas N. Boyle of Pittsburg, Dr. David H. Carroll and Dr. Charles W. Baldwin, Secretary of the Board, of Baltimore; Dr. J. Wesley Hill of Harrisburg; William L. Woodcock, Altoona, Pa.; C. Price Speer of Chambersburg, Pa.; W. M. Springer, John E. Herrell, A. B. Browne, B. F. Leighton and Thomas W. Smith of Washington; Dr. W. L. Davidson, Secretary of the University; Dr. John A. Gutteridge, Financial Secretary; Albert Osborn, Registrar, and Mrs. M. A. Hartsack, President of the Woman's Guild. Dr. Jos. F. Berry of Chicago, editor of the *Epworth Herald*, was present.

The reports of the Secretary, Dr. Davidson, and of the Financial Secretary, Dr. Gutteridge, indicated substantial and increasing growth both of funds and of values of present holdings. This is particularly the case with some of the real estate owned by the University near Pittsburg. Plans were devised and approved for the raising of funds needed to complete the Ohio College of Government.

Bishop Mallalien, Dr. Boyle and Mr. Speer, who were for the first time in attendance, each spoke enthusiastically of his interest in the enterprise. A message of hearty interest was received from Bishop McCabe, Vice Chancellor, now in Europe, who will return at the close of the summer. Universal regret was felt and expressed at the continued illness of the Chancellor, Bishop John F. Hurst, and resolutions of sympathy were adopted.

Many generous gifts have recently come into the the treasury of The American University. Checks for one and two thousand dollars have been numerous, and many for smaller amounts. Some of the property holdings of the University are wonderfully increasing in value. Lands deeded to the University near one of the large cities, which have been valued at \$60,000, will probably realize to the University at least \$250,000. It is becoming a popular place for suburban residence. The University Secretary, Dr. W. L. Davidson, has had kindly receptions in many pulpits, and generous subscriptions have been given to the University.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

The crowded conditions of our columns make it necessary to increase the size of the COURIER for this issue to sixteen pages. We were anxious to give to our readers a complete account of the impressive ceremonies incident to the corner-stone laying of the McKinley Memorial Ohio College of Government. The addresses delivered on that occasion are worthy of preservation. Other items of great interest and importance are also treated in our columns. We sincerely trust that you may read and enjoy every word of it. If you would like a copy sent to some friend who might be interested, we shall be glad to see that it is forwarded, if you will send name and address.

The Epworth Leaguers in the Fourth General Conference District visit Washington in great number June 19th for their Annual Convention. A splendid program has been arranged. We shall give them a royal welcome.

Many Epworth Leaguers have already made investments in The American University. On Saturday morning, June 21st, a sunrise prayer meeting is to be held on The American University grounds on the spot where in after years the Epworth College of Literature is to stand. Special car service will be arranged, and some of the active Washington Leaguers are planning for light refreshments. It is one of the things incident to the Convention to

which many are looking forward with great anticipation. The meeting will doubtless be full of inspiration and turn anew the thoughts of those who participate in it, toward this worthy enterprise.

Woman's Guild of The American University.

The Woman's Guild of The American University has purposely withheld aggressive work this year, giving the Twentieth Century Thank Offering the right of way; as the time for this offering has nearly expired, The Woman's Guild will begin active work this fall for the College of Comparative Religion. Our motto is "Ye shall know the truth, and the truth shall make you free."

The havoc false teachings have made with the religious thought of many in the last decade, who for want of information from correct sources, have gone on the wrong path, has emphasized the necessity for a College of Comparative Religion. Like Hadessa, we come to the Kingdom for such a time as this. We search into all sacred history, all so-called religions with no fear as to the result. Christianity will compel all to surrender to its claims, to concede its right over the conscience of the world, and admit that only the "Truth can make you free."

The Woman's Guild has appointed Mrs. Mary Scott Badley as Field Secretary and Organizer. Mrs. Badley, through long residence in the far East, has had large opportunities to study social and religious conditions under heathen systems. She is a platform speaker of unusual power. She is authorized to organize Guilds and collect funds for the Woman's Guild College of Comparative Religion throughout the extent of American Protestantism.

Guild members,	-	-	\$1.00 per year.
Members at large,	-	-	\$5.00 per year.
Life members,	-	-	\$100.00.

Of the latter many have been secured.

Mrs. J. Ellen Foster, the Vice President at large—now in Europe as a delegate on the part of the United States to the International Red Cross Conference at St. Petersburg—was authorized by the Central Guild to visit the universities of Europe in the interests of the cause. This work will tend to interdenominational fellowship as well as better methods of Christian missions. Laying foundations is slow, and out of sight, but on them rests all the superstructure. The Woman's Guild has been laying foundations, and now as *never before* are not only ready for aggressive work, but are sanguine of results.

—M. E. H.

Cecil Rhodes and His Will.

Death and the reading of a will often tempers our judgment of men. Frequently not until we have seen the tip of the departing wing are we made aware that an angel has been with us. Not that Cecil Rhodes was in any sense an angel; but now that his death has caused us to look upon his life as a whole, rather than to single out the individual acts which made it up, and his remarkable will has revealed heart-purposes to which he was thought to be a stranger, the world has come to believe that, after all, he was a better man than they gave him credit for being. While we can never forget his brutal treatment of Lobengula and his connection with the Jameson Raid on the Boers, he was nevertheless a great constructive statesman. He was a real patriot; a dreamer of great dreams, the greatest of these was of an Anglo-Saxon Empire in South Africa in which law and liberty should prevail. "He had the world-vision, which unfortunately most Englishmen lack."

The carrying out of the conditions of his will had the intent above everything else of the unification of the Anglo-Saxon and Germanic races. Being himself an educated man it is not strange that Mr. Rhodes should have made bequests to education. But, strange to relate, he is the first Englishman to devote vast wealth to this purpose.

A more remarkable will than that of Cecil Rhodes has not been given to the world since the will of Julius Cæsar spread broadcast benefactions through the Roman Empire. It is munificent to an extent unparalleled in the history of endowment. The most valuable undergraduate scholarships at Harvard are worth: one \$450, one \$125, and the majority are worth less than \$200. At Oxford the most desirable scholarship, tenable by undergraduates are not worth more than \$400, and of these there are not many. Yet Mr. Rhodes has endowed no fewer than one hundred and sixty undergraduate scholarships at Oxford, each worth \$1,500, and tenable for three years. One hundred to the United States, two to each State and Territory; nine to Rhodesia; twelve to Cape Colony, and three each to thirteen other British trans-marine dependencies. Five other scholarships, worth \$1,250 each, are to be held by German youths, to be designated by the German Emperor. The total sum needed will be about \$250,000 a year, which is the interest at 2½ per cent.

on \$10,000,000. Whether Americans will seek to avail themselves of this opportunity to pursue their studies in Alfred's ancient university depends upon the question whether a better education is now, or will be hereafter, obtainable at Oxford than at the best American universities. It is the opinion of Prof. Goldwin Smith, himself a graduate of Oxford, that at the present time as good an education, from every point of view, can be obtained in America at the best American universities as at either of England's oldest and most famous seats of learning. This would not apply to German universities.

It would have been wise in Mr. Rhodes in providing for these scholarships, to have also given more largely than he did to the university itself, so that the value of the scholarships might have been thus enhanced. It is unquestionably true that if Oxford meets the new necessity successfully she will have to largely increase her financial resources, as well as make a decided change in her methods of instruction. Certain American universities are as richly endowed as Oxford and Cambridge. If great giving continues in America as it has for the past few years, the English institutions, as far as pecuniary resources are concerned, will be dwarfed into insignificance.

Prof. Goldwin Smith makes another observation which deserves serious consideration on the part of American parents. He has consistently held through his residence on this side of the Atlantic that no greater mistake can be made than to send an American boy to England, or, for that matter, to the continent of Europe to be educated. If you would have a man a patriot you should see to it that he is brought up during the plastic period of his life in the atmosphere and amid the institutions of his native land. This was exactly the opinion of George Washington 105 years ago. This is one of the motives which has inspired the promoters of The American University to create an institution of learning on this side of the sea as strong and great in every particular as any in the world.

Gifts to the Epworth College of Literature.

Amounts received since last issue of the Courier:

St. Paul's Church, Washington, D. C., \$1; Dumbarton Church, Washington, D. C., \$35; Waugh Church, Washington, D. C., \$12; Grace Church, Washington, D. C., \$5; Metropolitan Church, Washington, D. C., \$56; Burlington, N. J., \$1; Milwaukee, Wis., \$4; Jacksonville, Fla., \$18; Brooklyn, N. Y., \$12; Aurora, Ill., \$4; Bellevue, Ky., \$1.50; Millville, N. J., \$23.

The Twentieth Century Thank Offering.

A note of victory has just come from the office of the Corresponding Secretary, Rev. Edmund M. Mills, D. D., whose wise plans and heroic efforts are now certain to be crowned with glorious success. He has gone through the Church like a whirlwind, and has shaken the golden fruit from every bough of generosity. He has been ably assisted on many of his campaigns by that prince of workers, Dr. W. F. McDowell, of the Educational Society.

To raise twenty million of dollars seemed like a herculean task, but a great Church, which rarely ever fails, was behind the task. Sixteen million dollars has already been paid or subscribed for the objects included in the Thank Offering. Eight months still remain in which to gather the four millions still lacking. It will come, with some to spare. The future historian will not record a failure. If new churches and parsonages were counted, as in the movement of 1866, and as the Presbyterians are counting in their Thank Offering, ours would now amount to \$28,000,000.

Many complaints are heard that certain things are not included in the Thank Offering. The wisdom of those who framed this call to the Church is, however, growing more apparent daily. Churches and parsonages will be built of necessity. Church schools and institutions and the worn-out preachers have waited long for help; they needed all the twenty millions, and only under such a call could they have received adequate relief and help.

Noble laymen in many parts of the country have risen to the occasion, and under their inspiring leadership marvelous gifts have been made possible. Frank A. Arter and Horace Benton, of Cleveland; S. W. Bowne, John D. Archbold, and others in New York; Harry H. Benedict, of New Haven, and a host of others deserve the three cheers and a tiger of the entire Church. God bless such noble men, and rapidly increase their number.

The Woman's Foreign Missionary Society started out to gather a Thank Offering of \$200,000, and has succeeded in getting \$401,000. The Woman's Home Missionary Society wanted \$200,000, and has collected \$186,000, and will easily secure the balance. One German Conference in America has already raised \$20 per member for the Thank Offering. Only one-third of a million has yet been subscribed to Conference claimants. This is disappointing.

There should be a gain in this fund on the home stretch.

More than \$6,000,000 have been given to education. A glorious record! Syracuse University, Ohio Wesleyan, Allegheny College, Women's College, The American University, and a host of others have received great donations; and the end is not yet. The Church seems in the humor for giving. The more people give the more they want to give. It easily grows into a passion.

Is there a narrow preacher anywhere who fears to present the claims of the Twentieth Century Thank Offering, lest it might interfere with the payment of his salary? Such a man is certain to go to conference without both Thank Offering and salary, and leave behind him a congregation dwarfed in one of the chief graces of Christian life—generosity.

Let this cause find a place in every pulpit in the Church in the next eight months. Put holy enthusiasm into the work. A strong pull—a long pull, a pull all together. We shall cross the twenty million dollar line with time to spare. A great shout will go up over the complete victory, and we shall have gained greatly in the respect of the world.

The Carnegie Institution.

No series of public gifts by a private citizen for literary and educational objects has ever been so unique and extensive as that already made by Andrew Carnegie. Beginning with widespread donations of library buildings to scores of towns and cities, each conditioned on stated annual appropriations for books, and later making generous provision for students in the leading universities of Scotland, he has this year given signal proof of his interest in human progress by a new and marked departure from his former lines of beneficence, in the creation of the Carnegie Institution of Washington, D. C. This latter event, which no one may safely declare to be the last or closing gift of our large-minded Scotch-American, has awakened a deep and widening interest in all educational circles. We give herewith an account of its objects and aims, so far as these have been officially declared or may be inferred from a careful examination of all the data at present accessible.

ITS GENESIS.

The Carnegie Institution originated in the fertile mind of its founder during the summer of 1901, while he was enjoying his usual sojourn at Skibo Castle. In his own words, addressed to the Trustees, we have the best account of its genesis: "My first idea while I dwelt upon the subject during the summer in Scotland, was that it might be reserved for me to fulfill one of Washington's dearest wishes—to establish a university in Washington. I gave it careful study when I returned, and was forced to the conclusion that if he were with us here to-day his finely balanced judgment would decide that such, under present conditions, would not be the best use of wealth. * * * This is intended to co-operate with all existing institutions, because one of the objections—the most serious one, which I could not overcome when I was desirous to establish a university here, to carry out Washington's idea—was this: That it might tend to weaken existing institutions, while my desire was to co-operate with all kindred institutions, and to establish what would be a source of strength to all of them and not of weakness, and therefore I abandoned the idea of a Washington University, or anything of a memorial character."

The opening paragraph of the Trust Deed made on January 28, 1902, furnishes a view of the motive which lies back of the great gift: "I, Andrew Carnegie, of New York, having retired from active business, and deeming it to be my duty, and one of my highest privileges, to administer the wealth which has come to me as a trustee in behalf of others; and entertaining the confident belief that one of the best means of discharging that trust is by providing funds for improving and extending the opportunities for study and research in our country; and having full confidence in the gentlemen afternamed, who have at my request signified their willingness to

carry out the trust which I have confided to them, therefore I have transferred to these, the Trustees of the Carnegie Institution of Washington, ten millions of registered five per cent. bonds of the United States Steel Corporation."

ITS ORGANIZATION.

The Carnegie Institution was organized on the afternoon of January 29, 1902, at the State Department, in harmony with the Articles of Incorporation bearing date of January 1, 1902, which were signed by six incorporators, as follows: John Hay, Edward D. White, John S. Billings, Daniel C. Gilman, Charles D. Walcott, and Carroll D. Wright. Those present at the meeting were: Senator William P. Frye, Speaker David B. Henderson, Secretary Samuel P. Langley of the Smithsonian Institution, President Alexander Agassiz of the National Academy of Sciences, William E. Dodge, John S. Billings, William N. Frew, Lyman J. Gage, Daniel C. Gilman, John Hay, Abram S. Hewitt, Henry L. Higginson, Henry Hitchcock, Charles L. Hutchinson, William Lindsay, Wayne MacVeagh, D. O. Mills, S. Weir Mitchell, William W. Morrow, Elihu Root, Charles D. Walcott, and Carroll D. Wright.

The meeting lasted for three hours, and was supplemented by a shorter one at the New Willard on the morning of January 30.

ITS PERSONNEL.

The Trustees of the Carnegie Institution at present are: The President of the United States; The President of the Senate; The Speaker of the House of Representatives; The Secretary of the Smithsonian Institution; The President of the National Academy of Sciences; John S. Billings, William E. Dodge, Seth Low, D. O. Mills, Elihu Root, and Andrew D. White, of New York; William N. Frew, Wayne MacVeagh and S. Weir Mitchell, of Pennsylvania; Lyman J. Gage and Charles L. Hutchinson, of Illinois; Daniel C. Gilman, of Maryland; John Hay, Charles D. Walcott, and Carroll D. Wright, of the District of Columbia; Abram S. Hewitt, of New Jersey; Henry L. Higginson of Massachusetts; William Lindsay, of Kentucky; William W. Morrow, of California; John C. Spooner, of Wisconsin; and Edward D. White, of Louisiana.

Its Executive Committee consists of Abram S. Hewitt, Daniel C. Gilman, Elihu Root, John S. Billings, Carroll D. Wright, S. Weir Mitchell, and Charles D. Walcott. Daniel C. Gilman is the President of the Institution. The officers of the Board of Trustees are: Abram S. Hewitt, Chairman; Dr. John S. Billings, Vice Chairman; and Professor Charles D. Walcott, Secretary. Mr. Marcus Baker is Assistant Secretary, and has charge of the office at 1439 K Street, Northwest.

ITS PURPOSE.

The purposes of the Institution, as declared in the Articles of Incorporation, are: "To conduct, endow, and assist investigation in any department of science, literature or art, and to this end to co-operate with

governments, universities, colleges, technical schools, learned societies, and individuals; to appoint committees of experts to direct special lines of research; to publish and distribute documents; to conduct lectures and to acquire and maintain a library."

A more complete declaration of its objects is contained in the following excerpt from the Trust Deed:

"The purposes of the Trust are as follows, and the revenues therefrom are to be devoted thereto: It is proposed to found in the City of Washington an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall in the broadest and most liberal manner encourage investigation, research and discovery; show the application of knowledge to the improvement of mankind, provide such buildings, laboratories, books and apparatus, as may be needed; and afford instruction of an advanced character to students properly qualified to profit thereby. Among its aims are these:

1. To promote original research, paying great attention thereto, as one of the most important of all departments.

2. To discover the exceptional man in every department of study whenever and wherever found, inside or outside of schools, and enable him to make the work for which he seems specially designed his life work.

3. To increase facilities for higher education.

4. To increase the efficiency of the universities, and other institutions of learning throughout the country, by utilizing and adding to their existing facilities and aiding teachers in the various institutions for experimental and other work in these institutions as far as advisable.

5. To enable such students as may find Washington the best point for their special studies to enjoy the advantages of the Museums, Libraries, Laboratories, Observatory, Meteorological, Piscicultural, and Forestry Schools, and kindred institutions of the several Departments of the Government.

6. To ensure the prompt publication and distribution of the results of scientific investigation, a field considered highly important."

ITS METHODS.

The general methods or lines of procedure of the Institution are indicated in outline in the following letter issued by the Executive Committee to "heads of American institutions and others interested in the work of investigation:—"

"Some of the ablest thinkers and investigators in the country have already called attention to important lines of inquiry. Their communications will be referred to special committees in different departments of knowledge—astronomical, physical, chemical, biological, geological, archeological, philological, historical, bibliographical, economical, etc., and the referees will be requested to add their own suggestions and to report to the Carnegie Institution such methods of procedure, and the names of such

investigators, as they deem likely to advance with wisdom the great purpose of the foundation. No large appropriations can be made at present as there will be no income from the fund before August. The summer will be chiefly devoted to a careful study of the problems of scientific investigation, at home and abroad, and in the autumn definite plans of procedure will be formulated. Any member of the Executive Committee will be glad to receive from you, at any time, suggestions, opinions and advice as to fields that the Carnegie Institution ought to occupy, and the best methods for carrying forward its work in those fields; but in order that important papers, designed for official consideration, may be properly recorded and filed, they should be addressed to the President of the Carnegie Institution, 1439 K Street, Washington, D. C."

A FORECAST.

It is safe to say that the effect of the Carnegie Institution will be a mighty stimulus to original research, and a distinct widening of the horizon of human knowledge. It will also without doubt call into public appearance, if not into existence, a large number of would be specialists, whose schemes and claims will need careful sifting as from chaff, and in many cases with the finest of meshes, to find a small quota of worthy and permanent contributions to progress. Mr. Carnegie's own assumption of the role of prophet in his address to the Trustees, is in this fashion:

"Gentlemen, your work now begins, your aims are high, you seek to expand known forces, to discover and utilize unknown forces for the benefit of man. Than this there can scarcely be a greater work. I wish you abundant success, and I venture to prophesy that through your efforts, in co-operation with kindred organizations, our country's contributions through research and the higher science in the domain of which we are now so woefully deficient, will compare in the near future not unfavorably with those of any other land."

From a study of the foregoing authoritative statements and of the present prevailing conditions of advanced research, there is little doubt that the trend of the Carnegie Institution will be in the direction of the development of the physical sciences, with minor but substantial encouragement to the departments of literature and art.

The functions of the special committees of experts will be all-important in the practical working-out of the general purposes. The fruits of the whole scheme will be of great avail to the instructors and advanced students in all our American institutions of the higher learning, and in these benefits the professors and students of The American University will have their merited share, with certain very valuable advantages growing out of their actual proximity to the headquarters of the Carnegie Institution and to the immense and ever-growing collections of the General Government. —A. O.

THE UNIVERSITY COURIER.

FORM OF WILL FOR

THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University" a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Future of the Small College.

In a recent address, President Nicholas Murray Butler, of Columbia, discussed the trend of American collegiate education. In the main his views were characterized by the calm thought to be expected from a gentleman of his standing in the educational world. In one particular, however, his remarks partook of a vein too pessimistic to be indorsed by careful observers. He expressed a fear almost amounting to prophecy that the small college would soon disappear, at least in another generation, unless certain influences were checked, and that it would be replaced by institutions suited only to the purses of sons of the wealthy.

However harmful the influences cited by President Butler may appear to leading educators, they are not sufficient to bring about so dire a result. There are two distinct forces in college education. One is broad and liberal; the other tends toward specialization. Each has its province. One lays the foundation for future effort, whether it be in the classroom of some polytechnic institution or a business or professional career. The other seeks to fit the student directly for his life work. The small college is the best type of the former institution, and

the medical school may serve as a model for the latter.

Of late years the great university has combined the functions of both. Its academic course meets all the requirements of the small college, while its advantages for specialized work can not be over-estimated. But the large university is not a trust, in spite of the fact that it practices the principle of the "community of interests." The small college need have no fear of extinction.

If anything, the polytechnic institutions will suffer most largely from the competition. The small college, with the exception of such time-honored homes of learning as Dartmouth, Amherst, Bowdoin, Williams, and others, draws its students from near-by localities, or from families of the denomination it represents. These young men have not yet fallen victims to the football germ in its most virulent stage, and they are content with a less showy alma mater, one where they can secure the foundation for an education without taxing the resources of their parents to the limit. The special student makes his choice in a different manner. He must have the best, and he goes where laboratory and library facilities are the most extensive. Of late years he

Bishop C. C. McCabe,

Vice Chancellor of The American University. Now in full charge during the illness of Bishop Hurst.

finds these advantages at the university, and he is more apt to select it.

As long as small colleges offer an academic curriculum on a par with the university they are in no danger of being eliminated, and they will continue to draw their quota of students and preserve the traditions of American education without regard to their more showy rivals.

It is an unquestioned fact, fully attested by those who are familiar with American conditions, that nine-tenths of the college men who have reached national eminence are graduates of institutions almost unknown outside of their own State. The small college is with us still and is destined to abide. Were it not for the aspirations which they enkindled in the minds of many students to take advanced work and fit themselves for special careers, the great universities would have a serious struggle for existence. President Butler's suggestion as to a two years' college course, with the degree of A. B. at the end, in order to give earlier entrance into professional courses, is also running a gauntlet of criticism. His contentions, however, are forcefully maintained.

The Great Missionary Convention.

The Great Missionary Gathering of the Methodist Episcopal Church in Cleveland, Ohio, in October was without precedent in the history of the Church. It is doubtful if such a convention, accompanied by such deep thinking, such enthusiasm, such spontaneous and generous giving, ever before took place in the history of the Christian Church. A crisis confronted a great Church. Open doors of opportunity to the East, almost without number, were waiting the coming of consecrated missionaries. Beyond them was the rich promise of repeated Pentecosts. As one speaker dramatically put it, it was not open doors simply, the whole side of the globe was flung wide open. If not entered the doors might be closed. Men fresh from the fields "white to the harvest," stirred all hearts, as with a strange, new eloquence, set on fire by the Holy Ghost, they pleaded for enlargement of purpose, faith and generosity that the "nations who sit in darkness" might have a "great light" even in our generation.

The program was built with consummate skill. Every theme was pertinent and was discussed by a

master. No slovenly work was done. Preparation was evidently made on the knees. No false note was struck. The enthusiasm grew with every passing hour. The great subscription of \$307,000, made in less than two hours, while unparalleled, was not surprising. It was the legitimate climax of the hour. Everything said and done led up to just such an outcome. It was a scene which will never be forgotten by those who witnessed it. Never did the singing of "Praise God from Whom all Blessings Flow" seem more appropriate, and each new singing swelled the subscription by thousands. Richest blessings on the "unknowns," whose \$131,000, in pledges, made the mighty aggregate possible.

What a privilege to belong to a mighty church which can and will lay on the altar a thank offering of \$20,000,000 in three years, and can stop long enough between to subscribe in little over an hour the sum of \$307,000 for world-wide evangelization. The spirit of Christ still fills the hearts of men. The Church of the living God was never more certain of capturing the world for Christ. Such a meeting as this silences the skeptic and none the less inspires the whole Church. The call has gone out to the Church, which was not at Cleveland, for \$200,000, to bring up the total gift to \$500,000. It will speedily be secured. A day of great rejoicing over new and marvelous conquests in foreign lands is just at hand. The great convention looked like a General Conference. Nearly all the men well-known in Methodism were present, including a large number of the Bishops.

It will be a good while before the necessity will be upon us for another convention of the same kind. The generous impulses it created will not soon die. To talk of one annually is foolish. It would soon lose power and efficiency. Other worthy causes demand a hearing. The time was ripe for such a missionary gathering and it would be unwise and unsafe to attempt to duplicate it for some years to come.

A HANDSOME illustrated pamphlet has been issued, containing a full account of the impressive ceremonies incident to the laying of the corner-stone of the McKinley Memorial Ohio College of Government. The addresses are well worth preserving. A copy will be gladly sent on application to the Secretary.

The Carnegie Institution.

It is now just one year since Andrew Carnegie placed in the hands of a representative board of trustees the sum of ten millions of dollars in steel-trust bonds for the purpose of founding the Carnegie Institution at Washington. Seven of the trustees are lawyers, seven are scientists, seven are business men and three of them are Government officials. All of them are men of national reputation. When the gift was made the general purposes for which the proceeds were to be applied were outlined by Mr. Carnegie as follows:

1. To promote original research.
2. To insure prompt publication and distribution of the results of scientific investigation.
3. To discover the specially gifted man and enable him to pursue as a life work that for which he seemed specially designed.
4. To increase facilities for higher education.
5. To co-operate with and increase the efficiency of the institutions of higher learning in the United States.
6. To aid specially qualified students in utilizing the facilities of research and study in the Government departments in Washington.

But little real work was done during the year, as there were no "sinews of war" until a dividend had been paid on the steel stock. Twenty of the twenty-six trustees attended the first annual meeting in Washington on November 25. The session was held with closed doors. One of the questions discussed was the buying of a site on which to erect an administration building for the Institution, but was finally laid over until the next annual meeting. The offices are now in a modest home on K Street N. W. The trustees refused to make public any of the details of the Institution's work, as it was thought best to avoid jealousies and rivalry by keeping secret the names of the scientists and institutions which are receiving the assistance of the Carnegie Institution.

The Board authorized the Executive Committee to appropriate \$200,000 of the income to the purposes recommended by the advisory committees in various branches of science. The sum of \$40,000 was set aside for the publication of the results of scientific investigation.

For rentals, salaries, and other expenses \$50,000 was set aside. A reserve fund of \$100,000 was authorized. Mr. Carnegie was not at the meeting. A cablegram of congratulation was sent him. This Institution, in a quiet but effective way, is destined to do a new, but needed educational work. It is also more apparent now than ever that the work done will be entirely on new lines, and that there will be a studied avoidance of any conflict with existing institutions, with a hand of fellowship reached out to all.

University Possibilities in Washington.

President Harper, of the Chicago University, after investigating the advantages of Washington as an educational center said a few years ago, "Give me one million dollars, and I will make here a better university than can be done in Chicago with ten millions." This seems a bold statement, but was spoken by one of our most successful and alert educators, who is not given to exaggeration. The statement if true then is doubly true now, for the Government collections have increased immeasurably in value in recent years. They represent at present an expenditure of more than \$50,000,000. No such scientific and literary collections are massed in any single city in the world. By unanimous act of Congress they are all wide open to students, so that no outlay along these lines need be made.

Outside universities, in order to have commanding influence, must at great expense provide these—and yet can never hope to duplicate that which is provided at the Nation's Capital, absolutely without a dollar of expense. Professors would teach in Washington at twenty-five per cent. less than elsewhere. The advantages of Washington as a place of residence and study would gladly be counted as worth the difference. Students would flock to the Nation's Capital, if actual and definite post-graduate work were possible, with commanding buildings and representative faculty. It is, looked at from every standpoint the most inviting situation for a truly great post-graduate university which the country affords.

Ten millions invested as proposed in The American University would count for as much as fifty millions invested in a university elsewhere. Why will not our men of wealth see it, and make the glad consummation possible?

Epworth College of Literature.

The summer, with its vacations and consequent disturbance to many lines of church work, being over, aggressive effort is once more being attempted. This is particularly the case with the Epworth Leagues. Many worthy objects are urgently appealing to this splendid organization of young people for sympathy and support. Very many of them have generously responded to our invitation to have some share in the building of the Epworth College of Literature. Many others have heard, but have not answered. Some have promised to do something later, but have forgotten the promise. To keep in touch by correspondence with all the Leagues is an expensive business. The officers change annually, and when once out of office little care is manifested, so we have discovered to our sorrow, in passing communications to the hands of the proper officers. We are hardly ready to prosecute a campaign in behalf of this work, which will cost as much, in clerk hire and postage, as will be likely to come back to us in gifts. We trust, however, that this item will fall under the eye of many Epworth Leagues. If your Chapter has done nothing for this cause, write us for particulars. We will send you a picture of the beautiful building to be erected, and a sample copy of the handsome lithographed certificate given to each contributor. We will give you full information as to how you can take up the work and give your League a happy and helpful night some time during the winter.

Woman's Guild of The American University.

This organization, under the efficient leadership of its President, Mrs. M. E. Hartsock, is planning for a vigorous campaign during the winter. Mrs. Mary Badley, who has had large experience in missionary work, and who has won wide renown as a public speaker since her return, has been secured as a national worker and organizer for the Guild. She is to visit many of the large cities in the near future and seek to interest women in the College of Comparative Religions, which this organization is undertaking to build. Many clever women are already identified with the Guild in Washington and elsewhere. The membership fee has been reduced to

\$1.00 with the hope of interesting a great multitude. Local Guilds should be organized in every church. For a copy of the Constitution and all information address Mrs. M. E. Hartsock, 808 Eleventh Street N. E., Washington, D. C.

The American University.

The following appears in the Methodist Year Book for 1903. So many facts are crowded into such small compass, that, for the sake of those who may pick up this paper who are not familiar with the history of this enterprise, we reproduce it in full.

WHAT IT IS: A REXNING HISTORY.—A Protestant, post-graduate university at the Nation's Capital, where the largest university now in operation is Roman Catholic. In the Providence of God, up to this time the Methodist Episcopal Church has been given the leadership, and if they are loyal to their trust can hold it.

HERE IS THE HISTORY.—Ninety-three acres of land purchased and paid for, now valued at ten times its cost. One beautiful marble building, the College of History, fully completed and paid for at a cost of \$176,000. The foundation of a second building, the McKinley Memorial Ohio College of Government, completed and paid for. Stocks, bonds, buildings, lands, bequests and subscriptions equalling in all about \$2,500,000. Twenty-three buildings contemplated, ten millions of dollars to be used for erection and endowment. It is all for the honor of Americanism and Protestantism, a Christian post-graduate university on this side of the sea as great and commanding as any on the round globe, and at the heart of the Nation.

THE RELATION OF THE CARNEGIE INSTITUTION.—Several important events have taken place during the year bearing somewhat directly on the work of the University. One was the organization of the Carnegie Institution backed by the splendid gift of ten millions of dollars by its generous and far-seeing founder. The morning it was announced the whole world was startled first into reverent silence, then into rapturous applause. It came as a surprise, for there had been no hint of it to the public. Its aims were at first misunderstood and misrepresented. Mr. Carnegie himself altered his own plans, and instead of making the gift to the General Government, to be administered by them, he saw fit to have created a

Board of Trustees who were to look after all details and have supreme control. With the early announcement of the gift, the press gave assurance that a group of costly and beautiful buildings would be erected in the Capital City—comprising a University—that a splendid faculty would be created, and post-graduate work would be undertaken close by the great scientific and literary collections of the Government. All this gave some little uneasiness to the friends of The American University, who knew that for ten years this was the very ground on which The American University stood appealing for help, and if Mr. Carnegie, with millions at his command, was to undertake the same work, what hope or large necessity could there be for the struggling American University. But soon the mists lifted a little and revealed more clearly the proposed plans. No buildings were contemplated—no resident faculty was to be organized. With great emphasis Mr. Carnegie declared again and again that the work was not to interfere with any university already organized or contemplated. That he would co-operate with all, assisting aspiring and needy students properly accredited, who were pursuing original investigation. This constituted The American University a sharer in his benefactions. It simply made of Washington a greater educational center than ever and gave added emphasis to the educational value of the great Government collections of the Capital City, and their unsurpassed utility in connection with post-graduate work which The American University has been ardently advocating for ten years. The necessity for The American University with its local habitat and its organized faculty became more apparent than ever.

CORNERSTONE OF NEW BUILDING LAID.—Another important event in the life of the year was the laying of the cornerstone of the McKinley Memorial Ohio College of Government, which took place on May 14th. It was as lovely a May day as ever smiled upon the world. Fifteen hundred people found their way to the University site, including many prominent in the religious and political life of the nation. The grounds, in their spring attire, never looked finer. The view from the commanding hill top in the clear atmosphere of the day was superb. Across the green fields to the east the dome of the Capitol and many public buildings of the city were plainly visible. To the west the purple peaks of the Blue Ridge Mountains, and the

Potomac winding in and out among the hills. President Roosevelt, one of the Trustees, made a brief but telling address and slipped the cornerstone into place. Bishop W. F. Mallalicu presided. Prayer was offered by Rev. J. E. Berry, D. D. Appropriate addresses were delivered by Senators J. P. Dolliver and M. A. Hanna, Rev. Dr. Frank M. Bristol and Henry B. F. Macfarland, Commissioner of the District of Columbia. It was certainly a great and inspiring day in the history of The American University. The press of the entire country gave extended and kindly notices of the occasion. Nearly half the money needed to complete the building is now in sight, and work upon it will be commenced at no distant day. Twenty-five thousand dollars has recently come from a generous friend, and other fine subscriptions are certain to come from those who loved the martyred President and from those who believe that the Ohio College of Government will be the most worthy and significant memorial which will be erected to his memory.

OTHER GIFTS.—These have been frequent during the year. Nearly every mail brought something. A bequest which promised to realize for the University, possibly two hundred thousand dollars, has very recently been made. The work of the year has been cheering, and promise of large gifts make hopeful the future. An undertaking of such magnitude requires years of heroic labor and patient waiting. The handicap which the General Conference has placed on the University in requiring an unreasonable endowment before work is commenced is enough to distance even the fleetest steed on the educational track. Glad and speedy opportunity should be given the University to open for work without violating any compact. Fifteen hundred students have applied for admission. Enough productive endowment is now on hand to provide instructors for two or three most important departments of study. A great building is completed and ready for occupancy. With definite work once under way on the large plan proposed by the University, earnest men and women of means would pour their money into its treasury, and the future would be bright with hope. This glad consummation is close at hand. The growth of the past year has been so pronounced in many lines, and so much in advance of other years, that ultimate victory seems very much nearer.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

A SPLENDID gift of \$25,000, from one who was a loyal friend, has just come into the treasury of the University.

The semi-annual meeting of the Board of Trustees of The American University will be held December 10, in Washington. At that time action will doubtless be taken as to pushing the work on the McKinley Memorial—Ohio College of Government.

FRIENDS of The American University will greatly rejoice that Bishop C. C. McCabe has consented to give enlarged service to the work of the University. For some years he has been the Vice Chancellor, and has given valuable aid to Bishop Hurst in council and on the platform. With his hand on the helm every gale will be weathered. No man stronger in leadership, and with greater ability to bring things to pass, could have been selected to take up the work during the illness of Bishop Hurst.

PRESIDENT James of the Northwestern University was a recent visitor in Washington. He did not forget to stop at the offices of The American University, where he has frequently been a caller in

the past. His loyal interest in our great work shows no decline. He is large enough to accord us a place in the educational world, not permitting the great work recently committed to his hands to make him forgetful or fearful of all others. He was happy over the marked interest attending his installation. Time will prove him the right man in the right place.

PAYMENT on your subscription to The American University is overdue. Why don't you pay it? The office clerks have followed you up faithfully with notifications. The postage item on your account is by no means insignificant. The books look badly on the credit side under your name. Why wait longer? The times are good. Settle it now and be done with it. You will make us very happy, and you will feel lots better yourself.

THE American University is receiving some money on annuity. A fair interest is paid to those who want and need the use of their money during their lifetime, and who want it to go eventually to the University. This is as fine a method of investment for people up in years who want to be free from all business complications. The interest is sure and larger than the banks pay. You have at the same time the consciousness that you are helping a worthy cause, and that your money will at last be put to noble uses. We shall be glad to take up the matter of annuity with any who are interested.

IN the new appraisal of real estate in the District of Columbia the taxes on the property of The American University have been increased nearly one-half, now aggregating \$2,300. This would almost half pay the salary of a great professor. If the University were open for work, even in one department, we would be free from taxation. Why we can not open for work is told in another column. We have no desire to ignore the resolution of the General Conference compelling us to have \$5,000,000 before opening for work if we want its recognition. Such action, however, is eminently unfair and hurtful, and the next General Conference must give us relief.

To fully demonstrate the wisdom displayed by Bishop Hurst in locating the University upon its present site, it is only necessary to stand upon the

foundations of the new McKinley Memorial Hall and look about you. On every side are seen large improvements being made, and every evidence that preparations are in progress to provide for a new Washington to be located along the line of Nebraska Avenue, and in the immediate vicinity of the University campus. Scores of new houses, tasty, artistic, and attractive are going up on every side, and are rapidly being occupied by some of the best of Washington's growing population.

Notwithstanding the fact that acreage property has advanced from \$1,200 per acre to from \$5,000 to \$8,000 per acre, we believe that the history of the University will sustain the Bishop in not purchasing a larger tract with the ultimate object of selling it off and increasing the endowment. We want it well understood that the University has no lots or land of any kind for sale. Its business is to build a great Protestant University, and not to dabble in real estate, and we believe the patriotic and generous public that is loyal to Protestantism and higher education will, by their munificence and liberality, sustain us in this view, and provide the means necessary to place this institution upon a safe financial basis.

THE American University is finding its way into many wills. This is one of the encouraging features of the work. The story of the movement is being told from many pulpits, by the Secretary, Dr. W. L. Davidson and others. It is certain to make an impression on devoted hearts which is not easily eradicated. Those whom God has blessed with means, when they come to provide for its use after they are gone, realize that it could scarce be better invested, and draw larger interest for all time to come, than in the high work contemplated by this University. A great host are thus remembering us, and the number is to increase. We are not always notified concerning these bequests. Many executors are slow in giving information, and delay to the last possible moment the payment of bequests to benevolent objects. By the merest chance we have just learned of a handsome bequest made to the University by a man who has been dead for more than a year, and yet not one word had been sent to us by any one interested in the will. It would be well, as many have done, to is notify us what has been done, at the time the will made, so that we might make record of it in the office.

The Passing of James Frank Robinson.

The last issue of the COURIER contained a brief line concerning the sad and untimely death of one of our valued Trustees, James Frank Robinson, of Rock Island, Ill. His splendid life and large philanthropic work demand a larger notice. Mr. Robinson was born in Hillsdale, Ill., February 27, 1849, and moved with his parents to Rock Island in 1853. In childhood he was converted and united with the church, and during his whole life was an exemplary, devoted follower of Christ. Passing through the public schools of his native city, he took the classical course at Northwestern University, graduating from that institution in 1872. For more than a quarter of a century he was cashier of the Rock Island National Bank and upon the death of his father became its president. He married Miss Mary E. Rhoads, of Pekin, Ill. Their married life was ideal. In 1900 Mr. Robinson became a Trustee of the The American University. In the same year he was made a Trustee of Northwestern University. He was greatly interested in both of these institutions, as he was in every philanthropic and Christian enterprise. His wisdom and hearty sympathy won for him a place of high esteem among the Board of Trustees of The American University. He rarely missed a meeting after his election, and at one meeting was elected to the Presidency. He believed with all his heart in the work which was being attempted. He evidenced his faith by a gift of \$25,000, and not content with that left the last three-eighths of his large estate to the University. His good wife, now so bereft and lonely, was in hearty sympathy with all his plans and is finding a much needed comfort in carrying out to the smallest detail all the benevolent projects of which they so frequently talked during the life time of her devoted husband. A great and good man has gone, whose wise counsels will be sadly missed in the affairs of the University.

A new building has just been commenced in the plant of the Roman Catholic University at Washington and will be speedily completed. They never delay, and are quietly but certainly building up a great University.

Liberty Limited by Love.

Bishop JOHN F. HERST.

It is one of the oldest and most beautiful of lessons of the Christian religion, that each individual sits upon a throne of power.

The world's greatest Oriental faiths seem to have the peculiarity of grouping men, so far as individual influence is concerned, and of thus losing the special in the general. Their power over souls and countries seems to be by the dead weight of numbers, not by the spontaneous energy of the individual. But Christianity comes with its marvelous individuality, and proposes to do its work by the ones and twos and threes, and lays down its formula of individual influence and the impossibility of a forceless soul: "He that gathereth not with me scattereth abroad." A special feature of this power of the unit in religious life comes out with great prominence in relation to the injury often done to the weaker and the younger by the example of the stronger. On the one hand there is the measure of independence which belongs to everybody, by virtue of which a man is a man as well as a Christian. How far can this independence be exerted? What is the limit of the right of the individual, and where does personal liberty cease to be a virtue, and verge into the sin of offending?

There can be no question in the mind of any one who reads carefully the lives of the princes of Christian piety, that the purest spirits in the Church have always kept a watchful eye upon the possible evil that their conduct might inflict upon some tender soul. Indeed, so marked has this quality been in many persons, that their entire life has been shaped by regard to it. Do we respect independence? Where shall we find a more heroic and self-reliant soul than Paul? Do we love most tenderly one who will not partake of a doubtful pleasure even for life itself, or would abstain from almost a necessity through fear of causing some harm to another? Where shall we find a better example than Paul, who declared that he would eat no meat while the world stands, lest he might cause his brother to offend? In all Christian history we can not find a better model of the happy harmony of these apparently contrary virtues—the liberty of soul, and the care lest that liberty wound another. Happy for the Church and for all pure and holy living, that at the threshold of the long life of the

Church, there stands the greatest human teacher the world has ever seen, who so loved the weak that he was willing to make any sacrifice for their strength and salvation.

The same quality stands out very prominently in the life of John Wesley. Indeed, one of the first inferences we draw from following the matter-of-fact biography of Tyerman is that this spiritual leader had constantly in mind the possible influence that his example would exert on those whom he had been the instrument of converting. His education at Oxford, his elevated theological tastes, and his acquaintance with many of the most honored men of the times, gave him a breadth of perception and a catholicity of judgment which have never been surpassed in ministerial life. Here he was in marked contrast to the German reformers, who were for the most part of lowly origin, and ascended to intimacy with men of high condition by their native talents and deep piety. Luther, the miner's son of Eisleben, was the fit associate of princes, but never lost the traces of his origin. Wesley, the scion of a long line of clerical ancestors, whose associations with the best society and culture of the land had been uninterrupted, possessed all the refinement and urbanity of his first home down to the day of his death. Yet this same Wesley never permitted his scholarship or his eminent culture to look with the slightest disdain on the weaknesses of his less forward spiritual children. His long ministerial life was spent rather in the midst of the poor and the neglected, and he loved their souls with absorbing affection. Much of his ethical teaching, as any one can see from his sermons, was directed to the injury that comes to others through the want of care on the part of Christian believers. One might sometimes doubt concerning his judgment, but where can a critic find in his life a line of action, or the presence of a usage, which, by any construction, could be made an injury to the souls of others? Luther's equivocal couplet—

Who loves not wine, wife, and song,
Remains a fool his whole life long—

could never have been said by the more circumspect founder of the great Wesleyan body.

The only safe rule is so to act that the weakest can find no flaw in the life. Every character is a great spectacle. It is seen by the world. The days of religious retirement are so far in the dim past

that now they are an impossibility. No one can hope to lead a perfectly hidden existence. The times in which we now live are peculiarly public, and it is one of the peculiarities of the present age to criticise every career. The higher the position of a public character the more certain is its revelation to every eye. One of the few lessons which every political campaign teaches is, that everything which a candidate for high office has ever done is declared from the very housetops. Every word he has uttered, every act from his early youth, and even the life of his ancestors, are arrayed in all possible magnitude, for his benefit or detriment. There is no escape from this revealing tendency of the present public mind, and happy is he who can stand this ordeal successfully. The Christian believer should remember that he is emphatically a person whose very profession makes him a mark for the severest criticism. If he should connive, either in public or private, at any sin, or even at any doubtful course of action, he will be reckoned a participant; and so religion must suffer because of the taint. The borderland between the Church and the world is so indeterminate that only a positive Christian character can be reckoned on the side of Christ. Spiritual indifference is sin, and the religious indefinite counts always on the side of Satan.

It is possible to live without offending one's spiritual brother. There are lives, and many of them, which furnish so blameless a picture that the most exacting, and even censorious, stand abashed before them. Let the great career and character of Edmund L. Janes, or of Matthew Simpson, or of William Xavier Ninde, or of William Taylor, undergo a rigid analysis, and who shall lay aught to their charge? What weak believer can find that they did doubtful deeds? Nay, where is there a babe in Christ who does not take courage as he beholds the positiveness of their purity? And such lives may be found in all our Christian communions. Religion is the greatest of all certainties, and the possession of its fullness can be discovered without effort. It is a blemish in any religious character when it causes another to offend. It should be the aim of every believer to preach Christ by the whiteness of his example.

Purity of heart will make purity of example. If the fountain be pure, who can find aught but purity in the stream which flows from it?

Glorious Giving.

From every quarter comes the glad news of great contributions for the cause of education. It is the exception to pick up a daily paper which does not announce some large gift. The press of the present week contains some significant items, several of them of interest to Methodists. One of the most inspiring was the announcement that \$200,000 had been added to the endowment fund of Boston University, the trustees of the institution contributing \$50,000 of the sum. An appeal has been issued by them asking for a full quarter million by January 1.

Five of the Bishops, over their signatures, are asking the Church for \$50,000 with which to endow the Jesse Lee Chair of Preaching in the Boston University School of Theology. Of course it will come.

A happy man is President Martin, of Baker University, Baldwin, Kansas, who sent Thanksgiving greetings to a number of friends and former students of the institution, in which he made an appeal for \$25,000 to meet some urgent needs. In response to his appeal, he has received \$30,000, and has assurances that this sum will be considerably increased.

The next institution to be congratulated is Syracuse University. Chancellor Day has announced a gift of \$10,000, made by Mrs. Estel Baker Steel, widow of J. Dorman Steel, the famous scientist, and donor of the Hall of Physics. It seems very evident that the tide of the twentieth century movement in the Methodist Episcopal Church has not yet come to the ebb. The closing days of December, with the generous impulses which are stirred in the hearts of men at the coming of the Christmas-tide, should record some astonishing gifts to philanthropy of every kind. The call for the twentieth century fund will have ended when the bell of God shall strike the passing of the year. But little time now remains. Prosperity is evident on every hand. People of means never had so much to give away; and how royally they are giving! Such prosperity will not last forever. The law of the pendulum holds good here; it will swing back. We shall pay for the wanton extravagance of the good times. Every great and worthy movement should be put squarely on its feet while the good times are with us and the people are in the humor for giving. A Christmas gift of \$1,000,000 to The American University is none too large to expect. Keep the matter in your thought and heart.

Impressive Improvements.

The grounds surrounding the site of The American University are being greatly improved. Nebraska Avenue is now being opened to its full width by the District. This avenue is the northern frontage of the University property. Property owners adjacent are bringing their grounds to the grade of the avenue. All these changes greatly improve the region, and will make it one of the most popular drives about the city. Joliet Street has been opened from Wisconsin Avenue to Tunlaw Road, graded and macadamized. This shortens the drive to the University by nearly a mile, giving a direct route. The electric cars will be in readiness whenever they are needed.

Millions to Colleges.

President Charles F. Thwing, D. D., LL.D., of Western Reserve University, has collected reports from between 100 and 200 of the representative colleges of the United States relative to their finances and investments. These reports are said to show that at least four-fifths of all the productive funds of the colleges are invested in bonds and mortgages. Few colleges, and a few only, have a part of their endowment in stocks of any sort. A few of them, notably Columbia and Harvard, have invested largely in real estate. Cornell University has about \$1,000,000 in bonds and about \$2,000,000 in mortgages; Wabash has property of \$362,000, of which \$18,000 is in building, \$21,000 in bonds, \$323,000 in mortgages; the University of California has somewhat more than \$2,000,000 equally divided between bonds and mortgages; Wesleyan University has \$1,125,000, of which \$81,000 is in real estate, \$260,000 in bonds, \$77,000 in stocks, \$868,000 in mortgages; of the \$3,000,000 possessed by Northwestern University \$150,000 is represented in buildings, bonds and mortgages, and the balance is embodied in lands and leases; the property of the University of Pennsylvania, more than \$2,500,000, is divided into \$357,000 in buildings, \$514,000 in bonds, \$127,000 in stocks, \$429,000 in mortgages, and the remaining \$1,000,000 is, as the treasurer describes, "in other values." Harvard's immense property is changed in the forms of its investments more frequently than the property of many colleges; but of its ten or more millions, railroad bonds and real

estate represent the larger share, the amount of bonds exceeding the value of real estate.

In the United States are no less than 20 colleges having an income-producing property of at least \$1,000,000. Among these are our two oldest colleges—Harvard, which has more than \$10,000,000, and Yale, which has about \$5,000,000. Columbia has an amount of property, largely real, that brings an annual revenue of at least \$425,000. Cornell has about \$6,000,000, the University of Chicago has \$8,000,000 or more, and Johns Hopkins has \$3,000,000. The Northwestern University also has \$3,000,000, and the University of Pennsylvania somewhat more than \$2,500,000. Wesleyan University of Middletown, Conn., has more than \$1,000,000, as also has Amherst, as well as Boston University; Rochester University has \$1,200,000; Tulane University, of Louisiana, is to be placed above the million mark, as also is the Western Reserve University of Rhode Island. Several State universities are possessed of either funds or an income by the State representing property of at least \$1,000,000. Among the wealthiest of these universities are those of California, of Michigan, of Wisconsin, and of Minnesota.

In the United States are about 400 colleges reporting more or less fully to the National Bureau of Education. If, therefore, the number of colleges possessed of more than \$1,000,000 each is so small, it is evident that the vast majority of our colleges are poor. The number of colleges which have each less than \$200,000 in interest-bearing funds, is considerably larger than the number of those which have more than \$200,000. The latest reports show that all these colleges have at least \$150,000,000, whence they derive their income for their support. The value of the grounds, buildings, and apparatus of these colleges is another \$150,000,000.

Adelbert College, of Western Reserve University, lends money on notes secured by mortgages on property in the city of Cleveland, and it lends little or none on property outside; Wabash on mortgages covering farms near Crawfordsville, and Ohio Wesleyan on mortgages on farms situated near Delaware.

The great sum of \$150,000,000 intrusted to the American colleges is invested well—well in point of security, well, also, in point of income. The financial management of the colleges in the United States has, on the whole, been abler than the management

of the banks of the United States. The University of California never made a bad investment but one, and that of only \$22,000.

The salary of the most highly paid professors in American colleges, considered in the aggregate, is about \$2,000, and the salary of other professors about \$1,500. The average number of members in the faculty of American colleges, taking 121 colleges as a basis, is 16½ persons. Two or three colleges are paying to few teachers salaries of \$7,000, and perhaps 10 colleges are paying \$1,000 at least. The present tendency is toward an increase of the highest salaries and toward a decrease of the stipend of new instructors.

A gift of \$1,000,000 to education is now more common than was the gift of \$50,000 fifty years ago. Gifts of \$5,000,000 are soon to become as common as gifts of \$50,000 were fifty years ago, and the time may not be remote when the gift of \$50,000,000 toward establishments of learning or of charity may be frequent.

No corporations in the United States are able to command so great talent as the college corporations.

Book Notice.

CHRONICLES OF COLONIAL MARYLAND, with illustrations. By James Walter Thomas, Member of the Maryland Historical Society, Baltimore, Cushing & Co., 1900.

We have received from the author through our friend Mr. W. F. Boogher, of Washington, the above volume. It is a valuable contribution to the history of Maryland during the early Colonial days, and will serve a very useful purpose in our University Library. We quote from the preface:

"This work may be classified as a historical review of Maryland, anterior to the American Revolution, though its author bestows upon it the more modest title—Chronicles of Colonial Maryland. His chief object has been to explore and develop historic fields which have hitherto either been wholly neglected, or have received but scant notice at the hands of historians. This does not apply to the first chapter, the object of which was to relocate a cherished landmark, 'once known, but forgotten,'—the historic Island of St. Clement's—and thus rescue from oblivion, the spot consecrated as the first landing place of the Maryland Colonists; as well, also, to identify the exact point of landing at the place of its permanent settlement."

Asbury Memorial Hall.

Asbury subscriptions paid since the last issue of the Courier:

\$400—A. C. Hazard \$66.66—J. P. Weston, for M. R. Webster. \$60—L. E. Lovejoy. \$50—D. D. King. \$25—Thomas Stable, Chauncey King, Robert F. Bishop and J. K. Adams. \$20—W. C. Endley, E. D. Hagerman and Arthur Veitch. \$15—J. H. Bell, M. T. Scarborough, F. M. Taylor and wife, Stanley O. Royal, and P. T. Rhodes. \$12.56—Alex. Smith. \$12—W. D. Cherington. \$10.33—Frank B. Lynch. \$10—Geo. P. Eekman, F. R. Bouton, J. A. Sigafosse, C. A. Weaver, H. C. McWhorter, W. M. Sterling, J. Stansfield, J. McEldowney, Hartley Cansfield, and J. E. Jacklin. \$9—J. G. Haller. \$8.50—C. B. Graham. \$8.35—T. S. Eren. \$7.50—D. J. Higgins. \$6—A. Merrills, and J. D. Walsh. \$5—J. W. Vallenentyne, O. V. L. Harbour, F. H. Smiley, A. F. Nagler, S. A. Morse, W. F. Dudman, A. D. Welty, E. G. W. Hall's boys, M. E. Ketcham, and W. T. Wallace. \$4.17—J. R. Wilder for his father, C. M. Wilder (deceased). \$4—J. M. Mason. \$3.34—William Anderson and J. W. Heard. \$2—T. A. Jeffers, William Ackroyd, and S. F. B. Peace. \$1.68—D. L. Shrode. \$1.67—T. W. Stott. \$1.33—J. C. Beach. \$1—B. F. Lowber, and W. T. W. Siecht.

Gifts and Bequests.

Chicago University will absorb the great Rush Medical College. Large gifts are constantly coming to this splendid University.

William Waldorf Astor has given \$100,000 for the endowment of four professorships at the University College, London.

Judge Horace Russell has given \$1,000 to the University of Georgia, to be used in the establishment of two annual prizes in psychology and ethics.

Mr and Mrs. E. C. Thompson, of Indianapolis, have added \$20,000 to the \$10,000 previously given by them to Butler College in that city, for the construction of the Eona Thompson Library, as a memorial to their daughter.

The will of Solomon Jones has been made public at Jamestown, New York. Out of an estate of \$125,000, \$15,000 was given in bequests to local institutions, including \$5,000 to the Jamestown Y. M. C. A., \$5,000 to the Jamestown Hospital, \$3,000 to the Randolph Children's Home, \$1,000 to the Swedish Orphanage, and \$1,000 to the First Presbyterian Church of Jamestown.

President J. P. Greene, of William Jewell College, Liberty, Missouri, announced recently that John D. Rockefeller, the oil magnate, has offered to give \$25,000 to the endowment fund of William Jewell College. The offer is made through the American Baptist Educational Society and is on condition that \$75,000 more be raised this year. William Jewell's endowment was increased \$100,000 last year, A. D. Brown, of St. Louis, giving \$25,000 on the same condition as the Rockefeller offer. The college now has an endowment of \$300,000.

The will of Timothy B. Blackstone, formerly president of the Chicago and Alton Railroad, has been admitted to record in the Probate Court. It disposes of an estate amounting to nearly \$5,000,000.

Two hundred and fifty thousand dollars are given to public institutions, \$375,000 to relatives and the remainder of the estate is left to the widow, Isabella F. Blackstone.

The following Chicago institutions are made beneficiaries: Art Institute, \$25,000; Orphan Asylum, \$25,000; Home for the Friendless, \$25,000; St. Luke's Hospital, \$25,000; Relief and Aid Society, \$25,000; Passavant Memorial Hospital, \$25,000.

To the James Blackstone Library of Branford, Conn., \$100,000 is bequeathed.

Chancellor James R. Day announces that Lyman C. Smith has expressed his intention of equipping Syracuse University with an engineering building which will cost between \$300,000 and \$750,000. Dr. Day says the new department, when completed, will be the finest of its kind in the State.

FORM OF WILL FOR THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University" a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Officers of the American University.

THE UNIVERSITY COURIER

Published by and Devoted to the Interests of The American University.

VOL. X.

WASHINGTON, D. C., APRIL, 1903.

No. 1.

Published Quarterly. Office, 1419 F Street N.W. }
Subscription Price, Twenty-five Cents a Year. }

{ Entered December 21, 1902, at Washington, D. C., as second-
class mail matter under act of Congress of July 16, 1894.

The American University—Taking our Bearings.

THE APPEAL OF CHANCELLOR BISHOP C. C. M'CABE TO THE CHURCH AND THE COUNTRY.

The Board of Trustees of the American University met in Washington, December 10, 1902. At that meeting the resignation of Bishop John F. Hurst of the office of Chancellor was presented, and most regretfully it was accepted by the Board. Bishop Hurst's continued ill-health made it necessary for him to resign. He has accomplished a wonderful work. He bought the land for the site and campus on his own responsibility. He raised the purchase money, one hundred thousand dollars, to pay for it. The transfer of the title was to him. He held it in his own name only until the last dollar of debt upon it was paid in 1895, when he immediately transferred the title to a Board of Trustees, and this great enterprise was fully launched.

Leaving the calm quiet of his study, this scholarly man became a wanderer through the nation, pleading with individuals and with great audiences to help him build and endow the American University. When the story of the life of Bishop Hurst shall be fully and fairly told, it will be seen how unselfishly, how nobly, how successfully he has wrought for the advancement of the kingdom of Christ in the world. He saved Drew Theological Seminary from total financial wreck when its endowment of three hundred thousand dollars was, in a great panic, swept away forever. He did his work so deftly, so swiftly, so thoroughly that the church scarcely felt the jar of that lost endowment, and many thousands of our members do not realize to this day that that grand institution of sacred learning was ever in peril at all.

He planted the mission in Finland. He sent a Methodist preacher through the front door of the Russian Empire, who has now 2,000 followers. He planted that glorious mission in Malaysia by send-

ing W. F. Oldham to begin the work at Singapore. When I come to look over the result of his life and work the word "matchless" comes very near slipping off my pen.

His crowning achievement was the founding of the American University. He did not claim that the idea originated with him. He gave the credit of the original thought to Bishops Simpson and Ames and to Bishop John P. Newman, who was at that time pastor of the Metropolitan Church. The American University lay for ten years in his mind as a possibility. He thought of it—he prayed about it, he talked with his friends concerning it, and at last he determined to go and purchase the land and begin it. Think of raising one hundred thousand dollars for a site in Washington and getting it all paid in before the church fairly realized that he had bought the land. To me there is a wonderful pathos in the vision of John F. Hurst, in declining health, with waning physical vigor, at an age when other men seek repose, passing through the land from city to city, talking, arguing, pleading with men to help him make his dream come true, and *it will come true!* The church can not afford to fail now. What if it should fail? Follow that trail of thought a little while and see where it will bring you.

The General Conference has very strongly endorsed the enterprise. The Bishops have endorsed it and pledged it their support. The Senate of College Presidents and the Board of Control of the Epworth League, in unqualified language, have commended this great national educational enterprise to the Protestant churches of America, so that we *must* go forward. There is no other course to pursue.

Almost immediately after the resignation of Bishop Hurst was accepted I was nominated for the Chancellorship. I was really in hopes that some one else would be selected, but the nomination was made

and the election took place, and I accepted the position because I did not dare to refuse. Bishop Alphaeus W. Wilson, of the Methodist Episcopal Church South, was presiding that day. I felt a great desire to have him in more active alliance with us. He has been a member of the Board of Trustees from the beginning. I had the pleasure of nominating him for Vice-Chancellor. He was elected by a unanimous vote and that vote was hailed by the Board of Trustees with great satisfaction, as it will be by united Methodism.

This University is not for the Methodist Episcopal Church alone. We invite the active co-operation of all branches of Methodism and of all Protestant denominations. The Roman Catholics are building their greatest university in Washington. One of their strongest and most progressive men has recently been selected to preside over it. The Baptists have already begun collegiate instruction in Columbia University. Washington is to be the greatest educational centre of the Republic, and it may be of the world.

I have requested our Secretary, Rev. Dr. W. L. Davidson, to furnish a carefully prepared list of all cash, real estate, bonds, known bequests, pledges and subscriptions that we have now recorded on our books, and that the estimates placed upon these holdings shall not be in the slightest degree exaggerated, but be *under* rather than over the truth. This list, in classified form, I herewith present to the church:

ASSETS OF THE AMERICAN UNIVERSITY.

Ninety-three acres of land for building sites and campus	\$1,000,000
COLLEGE OF HISTORY Building.....	176,000
Foundation now completed OHIO COLLEGE OF GOVERNMENT or McKinley Memorial Building.....	10,500
Productive endowment in railroad and other bonds	164,017
Bequests known to be on the way to the treasury	256,000
Real estate, the value of which is estimated by competent judges	343,300
Senator Stanford's guaranteed pledge.....	10,000
Twenty Shares Book Depository Baltimore Annual Conference	500

We have as the net amount of our assets..... \$2,423,860

Now as to the first item—the value of the land. The Episcopalians have recently purchased thirty-four acres near our property upon which they have built their Cathedral School for girls. I learn from their treasurer that they paid for the thirty-four acres, \$270,000. They did not buy it all at once. The last three acres cost them \$25,000. Our land is higher and better than theirs, and when Massachusetts Avenue shall be opened and paved with asphalt, as it will be, our land will be as accessible as theirs. For these and other reasons we believe that the estimate of its value is conservatively stated at \$1,000,000. The College of History, which has been erected and is now ready for occupancy, cost us \$176,000.

The bonds referred to brought us an income last year of \$7,080. They form the beginning of our endowment. It is only a beginning, but I well remember when the endowment of the Ohio Wesleyan University was not more than half that sum. Behold her now. "She sits a queen."

I well remember when about all there seemed to be of the Syracuse University was Bishop Peck with his post-mortem pledge of \$25,000 and his life insurance policy of \$25,000. Behold her now, with her cluster of splendid buildings and her endowment of nearly two millions. Beautiful for situation! The joy of the whole Empire State!

Two years ago I secured pledges from two hundred and ten preachers that they would each endeavor to secure a thousand dollars for the endowment of the American University. One of the first to sign this covenant was the Rev. John H. Bickford, who secured for us property which we could sell to-day for enough money to repay his pledge

sixty times over, but we value it much higher than that on account of certain events which are sure to occur. Of course, there will be men among the two hundred and ten who will fail and become discouraged, but many of them will far exceed their pledges.

The list of subscriptions has in it only the names of those who have made subscriptions in good faith and who intend to pay them. The bequests have been made in good faith also, and the executors and administrators offer no objection to their payment in full.

We have a mutual interest with the United States Government in the opening up of Massachusetts Avenue and in the building of the bridge over Rock Creek. Congress has made the following appropriations, which will greatly inure to the benefit of the American University, because they will secure the improvement of the streets and avenues leading to our grounds. The appropriations are as follows:

For Massachusetts Avenue bridge.....	\$227,500
For Massachusetts Avenue grading	50,000
For the sewerage of Arizona Avenue.....	150,000
For Joliet Street	28,000
For Nebraska Avenue.....	10,000
For the extension of Nebraska Avenue, paid out of county funds	18,000
Grand total	\$483,500

When these improvements are made we shall be within twenty minutes' ride of the Capitol of the nation, along a splendid avenue paved with asphalt.

Now this enterprise is fully before us. A church which can give over nineteen thousand dollars a day for more than a thousand days as a special thank-offering for the maintenance and spread of the kingdom of God in the earth, can build, endow and equip the American University, even though that enterprise is so great that, as Bishop Moore says, "Like the Grand Cañon in Colorado, it takes three looks to see to the top of it."

The American University will be for post-graduate work only. This is not another college. Only those students will be received who have graduated in other colleges, and so many have already applied for admission and have announced their intention of taking post-graduate courses with us, that I may safely say there is no university or college in Washington to-day that has half as many students as those who have signified their desire to

come to us, and would come if we were ready to receive them.

They will come to Washington to avail themselves of the libraries, museums, laboratories and institutions which belong to the Government and which have been opened by Congress to all students of all institutions of learning situated in the Capital. The value of these collections, according to Major John W. Powell of the United States Geological Survey, was in 1898, \$32,485,000, but now reaches beyond \$50,000,000. The opportunities for original research are unequaled in the world. President Harper, of the University of Chicago, is quoted as saying: "Give me one million dollars and I will make a better University in Washington than can be made in Chicago with ten millions." These vast collections are as much ours as though we owned them. Carnegie Institution gives financial assistance to properly accredited students and teachers pursuing original investigation—so that we may work in harmony with his wonderful scheme, and share in his benefactions.

And now, what is our first duty? To build and complete the McKinley Memorial Building. Bishop Hurst called it the Ohio College of Government. It was our intention to ask Ohio to erect this monument to the memory of her illustrious son, but all the citizens of this great nation have a share in the name and fame of William McKinley. We will welcome, therefore, the gifts of the rich and the offerings of the poor alike. Let them come from every State in the Union.

The Board of Trustees have voted that if we have one hundred thousand dollars in the Treasury on the 1st of April, we may go forward. The cornerstone was laid on the 14th of last May by President Roosevelt. The foundation walls are now ready for the superstructure. We have \$40,000 in cash to begin with. We have \$30,000 in good pledges. We need \$30,000 more to comply with the requirements of the Board of Trustees. Please send the money in checks, made payable to the order of C. C. Glover, Treasurer, and send the letters containing checks to our Secretary, Rev. Dr. W. L. Davidson, American University, Washington, D. C.

The Hall of History, now complete, is our first building. The McKinley Memorial will be the second, and then will come the Pennsylvania Building, to be called the Hall of Administration, and the Illinois Building or the College of Languages

and others will be added as they are needed. The plan embraces twenty-one buildings, and they will all be of Grecian architecture, and be built of white marble.

The most important thing to be done immediately after the completion of the McKinley Building will be the creation of the endowment, so that we can support a faculty and begin work. Several times President McKinley said to us, "Why do you not begin?" He said to me once, "I never ride by the site of our University without a great desire that you may begin your work at once."

"Many hands make light work." I hereby request all the presiding elders and pastors to help us by sending us an account of bequests that have been made in favor of the American University. They can also greatly aid us by sending the names of men and women who may be interested in this enterprise and who may be induced to contribute to its funds.

Yet I well know that we can only *begin* this university. Its completion is an event hidden far away in the future. We must be very patient. We can only lay foundations upon which others will build. There will come a time when individual donors shall erect memorial buildings upon this campus. Let us do our part of the work, and that we may do it well I invoke the help of all the Bishops, North and South, of all the college presidents, of all the church papers of united Methodism, and of all the presiding elders and pastors, and of all the six million laymen who stand behind them, and above all, I invoke the aid of Him who has said, "Commit thy way unto the Lord, trust also in Him and He shall bring it to pass." Psa. 37 : 5 In Abraham Lincoln's farewell address to his friends in Springfield, February 11, 1861, he said, "Without the assistance of that Divine Being who ever attended Washington I can not succeed. With that assistance I can not fail." Let us share his faith. This is God's work. Let us go forward and all will be well.

Trustees' Meeting.

The Trustees of The American University met in semi-annual session in Washington, D. C., December 10th. An unusually large number were present. The reports of the officers of the institution were very full of encouragement. A larger cash balance was in the hands of the Treasurer than has been reported for some years. A gift of \$10,000 was

made at the meeting completing a subscription of \$25,000 toward the McKinley Memorial Ohio College of Government. Plans were matured for continuing work on this building in the Spring, the corner-stone of which was laid last May. Announcement was made of a bequest just received which will yield more than \$200,000 for the general purposes of the University. Bishop John W. Hamilton, of San Francisco; Mrs. J. F. Robinson, of Rock Island; and Hon. George C. Sturgiss, of Morgantown, W. Va., were elected members of the Board of Trustees to fill vacancies.

Bishop Hurst, whose health has been impaired for a year or more, was unable to be present on account of illness. His resignation was presented and reluctantly accepted by the Board of Trustees. He was elected Chancellor Emeritus. Bishop Charles C. McCabe, who has been Vice Chancellor, was elected Chancellor and accepted the office. Bishop A. W. Wilson, of the M. E. Church South, was elected Vice Chancellor. Thus the two great Methodisms will be united in the completion of this great educational enterprise. The other officers of the University are as follows: President of the Board of Trustees, Mr. John E. Andrus; Secretary of the Board, Rev. Charles W. Baldwin, D. D.; Treasurer, Mr. Charles C. Glover; Secretary of the University, Rev. W. L. Davidson, D. D.; Financial Secretary, Rev. John A. Gutteridge, D. D.; Registrar, Rev. Albert Osborn, D. D.

It was a source of great regret to his many friends that Bishop Hurst was compelled to lay down the Chancellorship of the University, but the election of Bishop McCabe to take his place, gave universal satisfaction to the members of the Board.

Bishop Hurst is universally recognized as the founder of the American University. His high scholarship which placed him among the educational leaders of the Church and nation thirty years ago, and his marked qualities as an executive, combined with his peculiarly farsighted vision and strong faith, made him the chosen man to bring to fruition the desires and plans of the multitude who were deeply convinced of the need for such an institution. For eleven years and more he has held the office of Chancellor, and has successfully planted on broad foundations the educational enterprise which found a place in his heart in his first residence in Washington in 1858. Ill health compels him to surrender to other hands the trust so long held and ad-

ministered, and to no one more gladly than his successor, Bishop C. C. McCabe, would he have given place in this work of love, which he has done without thought of compensation in addition to his arduous episcopal duties.

Bishop McCabe brings to the office a wide knowledge of men, great practical sagacity, and an inexhaustible resourcefulness of service linked with a contagious enthusiasm for the success of the University which will add thousands to its already host of friends.

The American University.

EDITORIAL IN CHRISTIAN ADVOCATE (NASHVILLE, TENN.), THE OFFICIAL ORGAN OF THE METHODIST EPISCOPAL CHURCH SOUTH.

Such is the name given to the great institution projected in Washington City by Bishop Hurst. It will be under the auspices of Methodism and for graduate work only. A campus of nearly one hundred acres, in a most attractive and what will soon be a most accessible location, was secured by Bishop Hurst's foresight. It is now estimated to be worth about a million dollars. One building worth \$176,000 has been completed. Another in memory of President McKinley is projected and the foundation laid.

Bishop Hurst's failing health made it necessary for him to give up the chancellorship and Bishop C. C. McCabe has been chosen to succeed him. On his nomination, Bishop A. W. Wilson, of our Church, was elected Vice Chancellor. Bishop McCabe, with characteristic energy, has set about securing money for the completion of the McKinley building and for a sufficient endowment to appoint a faculty and begin work. His marked skill and wide experience in raising money augur well for this enterprise.

We confess that this institution and its plans and prospects appeal to us. The incomparable Congressional Library is at Washington. The National Museum and the Smithsonian Institution, with their marvelous collections, are there. The Carnegie Institution, with its millions to aid in original research, has in that city its headquarters. The polite and scholarly life of the American people will more and more tend to center there. Nowhere else in the United States can a university be established and carried on with the possibility of offering so large a return for the same investment. President

Harper is quoted as saying: "With one million dollars it is possible to make a better university in Washington than with ten millions in Chicago."

Bishop McCabe reports assets considerably over two million dollars now in hand. Much of this is in the form of pledges and subscriptions conditional upon the advance toward success of the institution. It seems to us that its success is assured. The Methodist Episcopal Church, flushed with its achievement of twenty million dollars as a Thank Offering, and its five hundred thousand for missions, is not going to allow a movement that already makes the substantial showing of a million and a half of unembarrassed cash values, and contains within itself an unmeasured potency for the future of Christian education, to languish for lack of money. And we believe that our own Church and other Methodist bodies will not fail to take a hand in putting this great institution on its feet. For if properly cared for now, within twenty-five years it will be an object of pride, and a source of gratification to universal Methodism. And it is well to remember that Methodism is to-day the most potent religious influence in the greatest Christian nation of the world.

Large Increase in Values.

The Pittsburg, Fort Wayne and Chicago Railroad Company, part of the Pennsylvania system, has purchased eleven acres of the Grozier Farm, twenty-six miles south of Pittsburg, now owned by the University, for the extension of their freight yards, which are to be the largest in the world. The price paid was \$20,000. In our tabulated assets, until recently, we have always estimated this property at \$1,000 an acre. In this instance our valuation was not inflated, but highly conservative. Right of way through the farm has also been given to an electric road uniting Pittsburg with the busy manufacturing towns of the Ohio and Beaver Valleys. The remaining fifty acres of the farm is certain in the near future to be sold as building lots at handsome prices, and the farm will net the University more than three times what it was said to be worth in the estimated assets. Other properties owned by the University are increasing largely in value. The future of the enterprise was never more promising. New and loyal friends are rising on every hand. Only kindly and enthusiastic words are now spoken.

Editorial Notes.

THE semi-annual meeting of the Board of Trustees of the American University will be held in Washington, D. C., Tuesday, May 26, 1903.

By the settlement of a will, concerning the existence of which no word had ever reached the University authorities, \$586 came into our treasury in February. It was, of course, welcome though unexpected. Many wills being made these days contain bequests in favor of the University.

WORK on the McKinley Memorial Ohio College of Government will, without doubt, be commenced in the near future. The Building Committee will move no faster than the funds in hand warrant. Almost enough is now in sight to put the building under roof. Many subscriptions to the building are still unpaid. Please pay up, won't you? Let all who loved the martyred President have some share in this worthy and significant memorial. Gifts should roll in by the thousands. Money could not be put to a better use. Help us complete the building; then with two magnificent buildings done we shall open the University for work. Students are waiting. We can and should begin our great career.

REV. JOHN PEATE, D. D., has passed to his reward. He was almost eighty-three years old, and until near the close of his life was a remarkably active

man both physically and mentally. He has now entered into the joys of which he spoke so glowingly. His name will live forever in the history of the American University. For two years he worked with loving fidelity on the largest reflector telescope lens at that time in existence. It is now the property of the University. Some friend of Dr. Peate's ought to have the lens appropriately mounted and fitted for actual use. No more fitting memorial could be given the dead hero. Will some friend do it?

A Word of Warning.

In view of the continued misrepresentations which are being made, we feel it our duty to reprint a word of caution which was sent broadcast throughout the Church in 1896. The American University is not in the real estate business—it has no land for sale—it reaps no benefit of any kind from land round about which is being sold. Do not be deceived.

The following action was taken by the Executive Committee of the Trustees of the American University, on the date mentioned, with the request that it be published in all the Church papers:

A CAUTION—TO WHOM IT MAY CONCERN.

"It having been brought to the attention of the Trustees of the American University, that certain persons owning or controlling ground situated contiguous to or in the vicinity of the grounds belonging to the said university, have subdivided the same and are offering it for sale, using in connection therewith, and apparently for the purpose of promoting said sales, the name of the American University, the Trustees of said university consider it their duty to advise the public that it has not now, and never has had, any land for sale; that it has not now, nor ever has had, any interest in any subdivision or land offered for sale in the District of Columbia; that the use of its name in such connection is without its authority or consent, and until recently, was without its knowledge; that no person or persons have any right or privilege to use its name in such connection, and if used at all, it is used to promote private interests of the persons owning or interested in the land, and not for the benefit of the university in any manner.

"This public announcement is due to the University, as well as the community at large.

"Washington, D. C., June 9th, 1896."

MRS. MARY BADLEY, under employment by the Woman's Guild of the American University, has recently been busy about New York city addressing public meetings and seeking to establish local Guilds. Many earnest and capable women are back of this movement. Write for particulars.

What some men say about the City and the University.

"In no city as in Washington can so large an audience of learned men be secured on so short a notice."—*Professor Tyndall.*

"There is no city in the world where scientific study can be pursued to so great advantage as in Washington."—*Professor Halfour of Oxford University.*

"As God, by His special Providence, has led us at every step, so will He lead us in all future years, until students from many lands shall enter its halls in quest of light from Him who is the Light of the World."—*Bishop Hurst.*

"The movement should receive and I hope will receive the effective support and sympathy not only of all the members of your great church, but of all patriotic people."—*President Harrison.*

"The importance of the object at which you aim cannot be too forcibly stated, and I hope that the result may be a University equal to any in the world."—*George Bancroft.*

"Go forward, and may God Almighty permit you to lay the foundations broad and deep, and perhaps the boy is here to-day who shall see the capstone placed amidst shouts of grace and glory."—*Bishop Newman.*

"I see on the summits overlooking the capital of this greatest of nations an opulent group of stately buildings—forming a suitable city of letters, while over the dome of her great science hall, the outstretched arms of the cross and the waving folds of the stars and stripes catch the first beams of the Atlantic sun."—*Bishop Fowler.*

"It is because we believe that America will give a Christian Protestant civilization to the world, and because we believe the American University will help to carry out God's providential plan, that we pledge it our earnest prayers and our heartiest support."—*Dr. Bashford.*

President Roosevelt laid the corner-stone of the McKinley Memorial Building and strongly commended the whole enterprise to the American people.

President McKinley always spoke of it as our *University.*

Asbury Memorial Hall.

M. Minus, W. H. Greer, E. W. Adams, B. G. Frederick, W. T. Hemsley.

Gifts and Bequests.

Cornell University, Ithaca, N. Y., has received an anonymous gift of \$150,000 for the foundation of a co operative professional pension fund.

Mr. Charles H. Schwab has built a \$135,000 steamer for conveying the poor children of New York to Richmond Beach, which he has purchased as a free recreation park for them.

It was announced by the trustees of Barnard College, of New York, that a gift of \$1,000,000 had been made to that institution by a person known only to President Butler and Treasurer Plimpton. The money is to be used for the purchase of land adjoining the present college.

A donation of \$25,000, in addition to \$75,000 already given, by Mr. Charles Scott, Sr., and Mr. Charles Scott, Jr., of Philadelphia, is announced by the trustees of Wesleyan University for the Scott laboratory. Plans are nearly completed for the new structure, and it is expected work will begin on it within a month.

The ambition of many wealthy New York city friends of the late Hon. Abram S. Hewitt, to honor his memory, has taken shape. Mayor Low has announced that J. Pierpont Morgan had subscribed \$25,000, William E. Dodge \$25,000, and Andrew Carnegie \$50,000 to a fund of \$500,000 to be known as the "Abram S. Hewitt endowment of the Cooper Union."

David Brothers, of Denver, president of the Colorado Fruit Growers' Association, and one of the best known horticulturists in the West, has donated his fruit farm of thirty six acres, highly improved, to the Young Men's Christian Association of Colorado, to be used in connection with the projected sanitarium for consumptives, for which the association has been collecting funds for the past year. A large number of tents will be erected as domiciles for the patients, who will be permitted to pay for their keeping in work on the farm. The farm is valued at over \$20,000.

The will of Professor Sylvester Waterhouse, a prominent educator of St. Louis, who died February 12, 1902, has just been made public. He left \$45,000, divided as follows: Washington University, \$25,000; Missouri Historical Society, \$5,000; Phillips Exeter Academy, \$5,000; Harvard University, \$5,000; Dartmouth College, \$5,000. The donation of \$25,000 to Washington University cannot, according to the conditions of the will, be touched until the year 2000, when it is hoped the fund will have increased to \$1,000,000 by reason of accumulated interest.

The will of Don Nicolas Lowe, a staunch friend of our mission work in Mercedes, Argentina, who died recently, included a bequest of 20,000 pesos for the Nicolas Lowe Institute and for the Orphanage at Mercedes. Mrs. Lowe survived her husband only a few weeks. Her will contained a clause giving the residue of her property, after other bequests had been paid, to the Revs. G. J. Schilling, John F. Thompson and William P. McLaughlin, "in joint counsel, to be used as they deem best." This residue amounted to 10,000 pesos. The mission work of the Methodist Episcopal Church will thus profit through the wills of Don and Mrs. Nicolas Lowe to the extent of about \$10,000.

Dr. D. K. Pearson has announced that with the closing of the year 1902 he cancelled his outstanding obligations. He says he is now out of debt. The colleges which are known to have complied with the terms of Dr. Pearson's offers, and the amounts which they will receive, are as follows:

Pomona College, Claremont, Cal.....	\$50,000
Illinois College, Jacksonville, Ill.....	60,000
West Va. Conference Seminary, Eucharan, W. Va.	50,000
Fargo College, Fargo, N. D.	50,000
Fairmount College, Wichita, Kas.....	25,000
	<hr/>
	\$225,000

This amount added to Dr. Pearson's previous benefactions makes \$1,000,000 which he has given to colleges. By his gifts he made conditions which resulted in raising about four times as much as he gave for the cause of education. Dr. and Mrs. Pearson have started on a three or four months' tour of Florida and Cuba for rest and recuperation.

THE UNIVERSITY COURIER.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY
 WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University" a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purposes of said University

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

JOHN FLETCHER HURST.

SALEM, 1834-1903, BETHESDA.

From Salem to Bethesda, thy cradle and thy bier,
Thy struggles marked by trophies shine, triumphs for each year.
From "Peace" to "House of Mercy" thy life to millions blest,
Farewell, thou tireless toiler, who knewest not how to rest.

So oft thy love drew near me to share with me a part,
Thy going leaves me orphaned, twice fatherless my heart :
With courage apostolic, keen scout on truth's frontier,
Thine eye kept ceaseless vigil, our peerless pioneer.

When dread disaster boded to staunch and gallant Drew
Engulfment quick and hopeless for passengers and crew,
Thy grit and grip gigantic the straining helm held true :
She idled in no dry dock, in brine her new keel grew.

Thine ardor for the gospel, with faith that always wins,
Sent Carlsson's warm evangel to frozen Russia's Fins.
Thy daring in the Orient, thy greater Eastern Shore,
Stretched cords, and lo! brave Oldham ploughs deep in Singapore.

Thy work was ever triple, to see, to speak, to do ;
Swept round the globe thy vision and scanned the ages through.
Both past and future blended to light thy fires of hope,
O doer, prophet, seer, our tel-kaleidoscope.

Thine eyes full-orbed, translucent, like Chesapeake's own blue,
Not mirrors mere, were lenses to let God's light shine through.
From seer to overseer, from high to station higher,
The voice of God and people drew on thy heart of fire.

Thy years brimful of labors, as calendared by men,
Cut short by zeal and heart-grief, struck not three score and ten ;
Yet measured by achievement, of deeds to count the sun,
Thy life's full tale is pregnant with a millennium.

Bent ever on thy calling, thy force sometimes gave shock
To men of faith more tardy, who chanced its course to block.
For hate thy haste misreading, eliding cow and soul,
Some ere while judged thee wrongly, small part for noble whole.

Thy pen-work was thy by-play, thy overflowing store ;
Of books maker and lover, thy love for men was more.
Not theory, but practice, the touchstone of thy ken ;
No brooding, hiding hermit, brave man among strong men.

Thy latest, greatest concept, on Washington's fair height
To plant this home of learning, this fortress for the right ;
O man of faith and action, teacher and friend of youth,
Here science blent with worship shall speed man's quest for truth.

Washington, D. C.

ALBERT OSBORN.

A Loving Tribute to Bishop Hurst.

It seems eminently fitting that this issue of the "University Courier" should be a Memorial Number and should be devoted exclusively to a faithful report of the funeral of Bishop Hurst.

The founder of the American University has for a little while passed out of our sight. The loving heart has ceased to beat. The restless mind, satisfied only with the contemplation of gigantic problems, is now busy grappling with the infinite problems in the unseen world. For weary weeks loving friends, who were close to him, with tender solicitude, watched the certain process of dissolution. The mind went first, the well-kept body waged a furious battle, but weary of the struggle gave up at last and the end had come.

In the books he has written, in the sermons he has preached, in the missions he has established, in the theological summary which he saved from financial disaster, in the university which he has founded, he has won for himself immortal remembrance in the Church of his choice, and a royal welcome in the Heaven to which he has gone.

The American University will be his most enduring monument. To it he gave unceasingly the best years of his life. Only those who knew him best will ever know just how much of toil and absolute sacrifice he made for this child of his brain and heart. Just before his final sickness came, he expressed a wish that when he was dead and gone his body might rest in the grounds of the American University. Nothing could be more appropriate. When actual work is commenced, and the present loneliness and insecurity of the place shall have passed away, his body should be taken to the hilltop which he loved. The American University as a whole will, of course, be his memorial. His name will stand identified with it through all the ages to come; but it seems fitting that in some special and specific way there should be a distinctive and suggestive memorial. Why not a beautiful marble chapel, with mortuary wing, which in the years to come might be enlarged, and by tablet, tomb, and bust, become the Westminster Abbey of Methodism? What a mecca it would become—here at the heart of the nation in connection with the greatest institution of learning in the country. Already a generous gift of \$1,000 has been received for this purpose.

He has left us a rich legacy, which we must jealously guard, and see to it that it grows in our hands.

A tender service about the casket of Bishop Hurst, at "Cedarcroft," at which only the members of the family were present, was held just before the sad procession started for the church. Fitting Scripture lessons were read by Rev. Albert Osborn and prayer offered by Dr. W. L. Davidson, both of whom have been for so long a time intimately associated with Bishop Hurst.

Funeral Services

OVER THE REMAINS OF THE LATE BISHOP JOHN FLETCHER HURST, AT METROPOLITAN METHODIST EPISCOPAL CHURCH, JOHN MARSHALL PLACE AND C STREETS NORTHWEST, WASHINGTON, D. C., THURSDAY, MAY 7, 1903, 2 O'CLOCK P. M.

At 2 o'clock p. m. the casket containing the remains of Bishop Hurst was borne down the right aisle of the church, preceded by Bishop Fowler, Bishop McCabe, Bishop Bowman, Bishop Foss, Dr. Buttz, president of Drew Theological Seminary, Dr. Baldwin, Dr. Bristol, Dr. Davidson, secretary of the American University, Rev. Albert Osborn, and others.

As the funeral cortege proceeded down the aisle Bishop Foss read the funeral service of the Methodist Episcopal Church.

Arriving in front of the altar the casket was placed upon pedestals waiting to receive it.

The above-mentioned clergymen having taken seats upon the platform, the choir sang "Lead, Kindly Light."

DR. BRISTOL: The first Scripture Lesson will be read by the senior living bishop, Bishop Bowman; after which Dr. Baldwin, of the Baltimore Conference, will read the second Lesson. Then Dr. Buttz, President of the Drew Theological Seminary, will lead us in prayer.

BISHOP BOWMAN: I will read the first Scripture Lesson from a copy of the Ritual presented to Bishop Hurst on the day of his ordination by the then existing Bishops. I see my own name inscribed here.

DR. BALDWIN: The second Lesson is from the 15th chapter of the First Epistle of Paul to the Corinthians, commencing at verse 11.

Prayer.

DR. BUTTZ:

O God, our help in ages past,
Our hope for years to come,
Our shelter from the stormy blast,
And our eternal home!

We come into Thy presence at this time of our sad bereavement, and we would enter Thy house and gain strength by communion with Thee.

We worship Thee as the God of power. Thou holdest in Thine own hand universal dominion, and none can say unto Thee: What doest Thou?

We worship Thee as the God of holiness. Thou art infinitely holy and absolutely perfect.

We worship Thee as the God of wisdom. Thou knowest the end from the beginning, and understandest our thoughts afar off.

Thou art too wise, Thou art too good, not to be inclined to pity us in our sorrow, and we thank Thee as the God of grace. We thank Thee that Thou hast not left us orphans, but hast cared for us. We thank Thee that Thou hast taught us such great lessons, and especially we thank Thee that Thou didst give to us Thine only Son, Jesus Christ our Lord.

We thank Thee that he could leave the throne of heavenly glory, come down to this lower world, live a beautiful life, and die the sacrificial death on the cross; the third day he rose from the dead, and ascended into Heaven, where he ever liveth to make intercession for us.

We thank Thee for this wondrous gift. We feel that He has brought life and immortality to us, and that through His resurrection from the dead Thou hast assured to all Thy people their final resurrection and glory.

We thank Thee, O God, for all Thy servants, for all the saints and sages who in all the ages have served Thee and honored Thy holy name.

To-day we come into this Thy house, to give thanks for Thy beloved servant who has passed on to the better land. We thank Thee that Thou didst give him to this Church. We thank Thee that Thou didst call him to the ministry, and that Thou didst place upon him great responsibilities. We thank Thee for the great gifts Thou didst give him to serve Thee, and for his fidelity in their exercise. We thank Thee for his heroism, for his faith and consecration to the great and blessed cause.

As we meet together to-day we give hearty thanks that Thou hast brought him to us, and hast given him so long to the Church.

Now, as we are bowed in Thy presence to-day let Thy blessing come upon us. We pray Thy blessing upon the chief pastors of the Church, who have again and again been smitten in losing those of their own number. May their lives and health be precious in Thy sight. Wilt Thou watch over them, keep and help them, and sustain them in their great grief.

Bless all the ministry of the Church, we pray Thee, of which Thy servant was chief pastor. From

his death may there come to us new inspiration and new consecration to the service of God.

Bless the whole Church, and fill it more than it has ever been filled with Thy spirit; and may the example of Thy servant enrich and ennoble it.

We pray Thy blessing upon all the institutions in which Thy servant was so deeply interested. We thank Thee that Thou didst give him a part in planting and maintaining great interests for the Church of Jesus Christ. Bless those interests with which he was so vitally connected. Prosper those charged with their administration; and may his death be but the beginning of a great onward movement for every good cause of the Church of God.

We ask Thy blessing to-day, O Lord, upon all those in this and in all lands who sympathize with us in this hour, the students who have been under his instruction, the many who have been endeared to him by his acts of kindness and gentleness and love, the many everywhere throughout the world who will pour their hearts out to-day. We pray God's blessing upon all that are dear to him. Graciously grant Thy blessing upon the stricken home.

O Thou who art the refuge of Thy people, Thou who art the Father of the fatherless, Thou who art the Comforter of all that put their trust in Thee, come to all the mourning homes to-day, and give them Thy blessing. In their darkness, be Thou their light. In their sadness, be Thou their joy; and may they find in the promises of the Gospel the fullness of the blessing of the Gospel of Jesus Christ.

We thank Thee for Thy promise that at the evening time it shall be light. We thank Thee that Thou art ever with Thy people. We thank Thee that these afflictions shall work out for Thy servants a far more exceeding and eternal weight of glory.

We thank Thee that those who have washed their robes shall at last live forever in the Paradise of God.

O Lord, bless this service. Bless Thy servants who shall speak to us to-day, and out of this service and this hour may there come new consecration. May the life of Thy servant be fruitful in inspiring us and others, and in inspiring this whole world, and bringing it to a knowledge of the truth, as it is in Christ.

And, finally, accept us, in the name of our blessed Saviour, who taught us to pray:

Our Father, who art in heaven; hallowed be Thy name; Thy Kingdom come, Thy will be done on earth, as it is in heaven. Give us this day our daily

bread, and forgive us our trespasses, as we forgive them that trespass against us; and lead us not into temptation, but deliver us from evil. For Thine is the Kingdom, the Power, and the Glory, forever. Amen.

At the conclusion of the prayer the choir sang "Nearer, my God, to Thee."

Dr. BRISTOL: Among the last calm and conscious preparations which the beloved and distinguished Bishop made for his approaching end, was the request which he left that at his funeral Bishop Fowler should speak of him.

Bishop FOWLER: I find it difficult to stand here in this hour. It would suit my feelings better to sit there with these children. It is a sad thing to lose a friend with whom we have walked for a quarter of a century. In early life we make friends; later we make acquaintances. It is sad to lose these friends. The ranks are being decimated about us. I am sorry this man is dead.

It is strange how we change places. Not long ago I expected this man to talk for me as I entered the narrow house; but to-day I am to talk a little for him.

I can not open my heart here. I must confine the little tribute I give to him to the things that are felt in common conviction and judgment concerning him. When I see him I can tell him what was in my heart about him. I will only say this: That if it were necessary I would be glad to put my hand through the veil and grip his hand to let him know that I am standing by.

Methodism is familiar with Bishop Hurst. There is nothing about his life that is private. She knows him altogether. She knows his form, his face. He was nearly, or possibly quite of average size, compact, put up for work. He had a good-sized head, not specially large, but so rounded and filled out at every point that it was always impressive. It was fashioned quite like the head of Sir Walter Scott.

Possibly when you first looked at him you might not be impressed with any great idea of the forces he carried, but when you studied him carefully I am sure he would abide with you as a picture of power.

Bishop Hurst was the embodiment of work. I think that expresses the thought concerning him better than any other word within the reach of our language. He embodied work. He did not stride along with great leaps and bounds, occasionally

turning around to see how far he had come: but he pushed straight ahead, steadily on, all the time.

Like a pack animal, he would take a load as big as himself on his shoulders, and wade right on through the mud, up to his eyes, never hesitating. The character of the highway did not enter into his calculations; he simply went on.

He worked! He had that peculiar and wonderful genius that has been defined as an infinite capacity for work. Nature is the great example that he seems to have followed in his work. Nature now and then blazes out at the peak of a volcano, and rumbles and mutters under the shaking bosom of the earthquake. But she is not working then. She is resting. She is merely turning over on her uneasy couch to find rest. You can not measure Nature's work by these convulsions.

Nature works all the time, pulling down the mountains, digging out the rivers, and filling up the seas. She works all the time, scattering her seeds of life everywhere, driving out her great argosies of moisture, wheeling forth her vast resources of nourishment. Work! That is the example that Bishop Hurst followed.

He seems to have caught fully the truth taught by the old Greek slave, when he said: "The tortoise always wins."

In 1868 Roscoe Conkling made a speech before the National Republican Convention, placing in nomination for the Presidency of the United States General Grant, and in that remarkable speech he said:

"You ask whence comes our candidate. He comes from Appomattox, with the arduous greatness of things achieved."

Bishop Hurst comes to the summit of his power with the arduous greatness of things achieved. You can not think of him otherwise than as working.

I would like to read to you a list of some of the works he published—a little indication of his work. I will ask you to be patient, and will ask the preachers not to condemn themselves as I read the list. His life was full of work.

Born near Salem, Maryland, August 17, 1831; he mastered the college course and graduated from Dickinson College in 1851. He was teacher of Ancient Languages in Hedding Institute, 1851-56; student of theology in Universities of Halle and Heidelberg, 1856-7; joined Newark Conference in 1858; served in pastorates, 1858-66; Professor of

Theology in the Mission Institute, Bremen, Germany, 1866-68, and in the Martin Mission Institute, Frankfort-on-the-Main, 1868-71; traveled through the principal European countries, making a tour through Egypt and Syria, 1868-71; Professor of Historical Theology in Drew Theological Seminary, 1871-80, and President of the same, 1873-80; elected Bishop, 1880; chosen as Chancellor of the American University, May 28, 1891.

He has written and published "History of Rationalism" (New York, 1865; London, 1866); a translation of Hagenbach's History of the Church in the Eighteenth and Nineteenth Centuries (New York, 1869); a translation of Van Oosterzee's Apologetical Lectures on John's Gospel (Edinburgh, 1869); a translation, with additions, of Lange's Commentary on the Epistle to the Romans (New York, 1870); Outline of Bible History (1872); Martyrs to the Tract Cause (1873); Life and Literature in the Fatherland (1874); Outline of Church History (1875); Our Theological Century; a Contribution to the History of Theology in the United States (1876); with Henry C. Whiting, Ph. D., Seneca's Moral Essays, with notes (1877); Bibliotheca Theologica (1883); with George R. Crooks, D. D., LL. D., Theological Encyclopedia and Methodology (1884); Short History of the Early Church (1886); Short History of the Mediaeval Church (1887); Short History of the Reformation (1884); Short History of the Modern Church in Europe (1888); Short History of the Church in the United States (1890); Indika, the Country and People of India and Ceylon (1891); Short History of the Christian Church (1892); Associate Editor of Johnson's Universal Encyclopedia.

Need I say anything more about his work? This great library that has been wrought out by his pen, is only a by-product of his industry. Many a manufacturing establishment has grown into wealth and power by utilizing and saving elements and materials that their rivals have allowed to go into the waste.

This abiding treasure, this great intellectual fortune bequeathed to mankind, has been rescued from spare moments, a by-product. Indeed, it is wonderful that so much should have been accomplished. His life was full of arduous duties, in the regular order of his movement, which had the right of way. Lecturing to crowded and important classes on great subjects; directing and caring for important bodies of students; preaching to exacting Churches; rais-

ing Church debts; rescuing imperiled institutions that have been entrusted to his care, from danger and peril; doing much that tires the average man; carrying the burdens and performing the multiplied works and duties of the Episcopal office—these were the things that had the right of way in his life. While these things tire out and exhaust the energies of most men who handle them, he kept step with his peers in his high and exalted duties, and wrought in his spare time the wonderful things I have mentioned.

Let me emphasize one or two of the things he has done. One of his achievements was the resurrection of the endowment of the Drew Theological Seminary—practically the resurrection of the Seminary. This came as a regular duty, but was, in reality, quite a by-product. He was occupied in the quiet work of the lecture room, and in the easy administration of the institution, when suddenly a land slide in Wall street swept Daniel Drew into the sea of bankruptcy, and with him went the endowment of Drew Theological Seminary. There was a school full of students that must be taught and kept together; there was a faculty that must be kept together and fed, and there was an endowment that must be created. In that critical moment all eyes turned to John F. Hurst. He knelt in the hall of that old mansion and prayed long enough for the Trustees to strap this new burden on his back, and then he went forth rejoicing that he had new worlds to conquer. Patiently and quietly he went from door to door, and from city to city, representing the great interest entrusted to him.

I remember well how he talked about the institution and its importance, about the work done by its graduates, about the beauty of the site the institution owned, and its value, about the great work it had done for the Church. I remember he talked a little—just enough for spice—about the prejudices of the former owner of the mansion, who loathed the “fanatical” Methodists, and the prophecy of a poor old woman who had been pushed from its halls. I remember how he talked of the fact that the Church owned that site and that mansion, and every one of those trees, with the squirrels leaping among their boughs. He said: “It is ours, and it shall shortly be richly endowed.”

The Conference heard him gladly. The preachers and laymen believed him. The foundation was laid in the faith of the Church, and after months

and months of tireless and unremitting toil the endowment was completed.

This was about half a by-product. It shows well how he did the work in hand, and I sometimes think that I would be glad if some of the rest of us could take up some side work, and see if it would not stimulate us in our regular work.

Let me touch upon another work of his that was purely a by-product—the American University. This was a vision hung up before him by unseen hands. It was definitely urged by the mother of these stricken children. She gave the first \$1,000 toward the purchase of the site of the University, and made retreat impossible. He pushed toward that vision with unfaltering and unwavering faith through all the years.

When he had once entered upon the enterprise and had secured the site, he was surprised to find that some wise men in high places felt it necessary to stand somewhat against it. It was thought by some that it would interfere with other colleges and universities. Other universities would spring up, and other colleges, and nobody seemed to think there was anything against them; but this university was born in a storm center, assaulted on every side. Yet it had such an ancestry, it was brought forth by such a man that it gained victory and dominion. Bishop Hurst went straight on, just as if nothing was happening—and nothing was happening. He pushed steadily toward the one goal, and just as that father on the battle field at Gettysburg stood over the wounded body of his son, parrying the bayonets aimed at his breast, and striking down the assailants that sought to destroy him, so Bishop Hurst stood over his last child, the American University, and parried every weapon thrust at it, and gave it room and time in which to rise and stand. It is a fitting monument for him.

His instinct was for books. He took to books as naturally as a fish takes to water. If you wanted to find him in a strange city you needed only to go to the old book stores. He could scent a good or rare book as readily, as correctly, as a bird dog scents the presence of a bird. He had a great and rich private library, and he understood its contents. He was a scholar. He was a superior preacher. He was instructive, interesting, and uplifting. He was a lecturer, wise in his classes, not to be turned from on the public platform. He was a linguist of unusual ability. He could conduct the ritual servi-

ees in nearly all the languages of modern Europe, and he talked freely in many of them. His literary ability is shown by the list of his productions which I have read in your hearing. He was much in evidence in the magazines and in the weekly papers. He was a writer of clearness and point. He had a happy use of the best sort of English, and so handled it that his sentences conveyed clearly his idea. He was a worker in all things.

Indeed, it seems to me a sad thing that he is taken from us, and we are called upon to mourn with the Church which has been smitten first on one side and then on the other. In the field of our intellectual life two brilliant constellations have been swept from our firmament.

In the Southern hemisphere, when the day fades, and the curtains of the night are folded about the trackless sea, the voyager naturally turns to the silent chart above him, and his eye seeks that wonderful constellation, the Southern Cross. When he finds it the ocean is instantly transformed, and it seems to be crossed and recrossed by highways, the barque on which he sails seems solid and certain as the land itself, the darkness loses its terrors, the spectres of the deep vanish, for he has his eye on the chart of that Southern hemisphere. That constellation locates the lines of the universe for that Southern hemisphere.

In this Northern hemisphere we have another constellation, the Great Bear, known from childhood as the Big Dipper, riding around in the heavens, and pointing always to the Polar Star. And when in the mists, or in a flurry of star dust, the Polar Star wanders away out of the field of vision, the Great Bear, with a scent like a blood hound scents out the wandering Polar Star and fixes it anew. Then the traveler knows at once, on land or on the sea, where his pathway lies. That constellation marks the chart of this Northern hemisphere. Down by the equator there is a belt about 18 degrees wide, in which both these constellations appear and give their light and guidance to the traveler.

We of the Church have been traveling in this equatorial belt these years, illumined and guided and strengthened by two great constellations, Bishop Foster and Bishop Hurst, the two greatest scholars American Methodism has produced. But they are taken out of the fields of our vision in a day. We shall seek for them with our eyes in vain. Bishop Foster illumined one hemisphere; Bishop Hurst was the steady light of another.

Bishop Foster was the embodiment of genius. He blazed athwart the heavens with a brilliance never excelled. Bishop Hurst pushed on, shining with the steady beams of a great intellect. Bishop Foster we admired, and we were proud of him on account of the throngs that followed him. We followed Bishop Hurst knowing that we should come to a safe anchorage. Bishop Foster blazed like the wheels of Ezekiel's chariot; Bishop Hurst flowed on like the river in the vision of the Revelator. They were both great, with wide influence, and enduring in their fame. Together they toiled side by side, year after year, in the same institution. Together they struggled with the same great problems of human destiny. Together they passed out into the great Beyond, to rise to newer and mightier enterprises. Let us repeat their industry, emulate their characters, cherish their memories, knowing that in them we have an inheritance of intellectual wealth and of divinely transformed character that may make us rich for many a generation.

Dr. BRISTOL: The future will doubtless measure the creative genius of Bishop Hurst by the vast proportions of the American University. Great as he was as a bishop, prolific as he was as an author, he will be known as the founder of the American University.

In his declining days, when he saw that he must turn to another to lean upon, while the burden of this great enterprise was upon him, he found a kindred soul, a strong soul to lean upon in Bishop McCabe. Upon him has fallen the mantle of Bishop Hurst in this mission of the upbuilding of the American University.

Bishop McCabe has a message for us.

BISHOP McCABE: Will you allow me to sing with you a verse over our fallen comrade?

I would not live away; I ask not to stay
Where storm after storm rises dark o'er the way;
The few lurid mornings that dawn on us here
Are enough for life's woes, full enough for its cheer.

We never feel the poverty of language so much as when we try to utter words of comfort in such an hour as this. Silence, utter silence, as we sit around this bier, seems more befitting than any words of mine. The Psalmist of Israel said in his sorrow, "I was dumb, I opened not my mouth because Thou didst it." Death is a breaker of human hearts. Well is it for us that God has reserved to Himself the office of Comforter. There are times when we need and must have divine consolation. He called Himself

the Comforter. He says, "I, even I am He that comforteth you," and again, "As one whom his mother comforteth, so I will comfort you." And Jesus said to his sorrowing disciples, "I will send you the Comforter, and He shall teach you all things and bring all things to your remembrance whatsoever I have said unto you." Let the Comforter, then, bring to your remembrance some of the things that Jesus said.

In that last address just before he went to Gethsemane, he said, "Let not your heart be troubled, ye believe in God, believe also in Me." "In my Father's house are many mansions; if it were not so I would have told you." "I go to prepare a place for you, and if I go and prepare a place for you I will come again and receive you unto myself, that where I am there ye may be also."

There is comfort enough in these divine words to assuage the grief of a suffering world. Paul was so sure of life immortal, and of the reality of the heavenly world, and of the eternal companionship of Jesus Christ and his faithful followers, that he could write to the Thessalonians:

"I would not have you to be ignorant, brethren concerning them which are asleep, that ye sorrow not, even as others which have no hope. For if we believe that Jesus died and rose again, even so them also which sleep in Jesus will God bring with him. Wherefore comfort one another with these words."

So, now, as we come to the open portals of the tomb, let us think of these things. We are sure of the pity and love of our Heavenly Father, for like as a father pitieth his children, so the Lord pitieth them that fear Him, for He knoweth our frame, He remembereth that we are dust.

"He who sits above in His calm glory,
Will forgive the love His children bear each other,
Though with a vain worship blent; for its close is dim
ever with grief,
And leads the wrong soul back to Him."

Such a love Bishop Hurst inspired in the hearts of those who knew him best. How his children loved him, how his friends loved him, and how the whole Church has looked on during these weeks and months of his illness, while his faithful daughter Helen ministered at his side. How the prayers of thousands of families and congregations have ascended for him. Our whole Church are mourners with you to-day. But we not only loved Bishop Hurst, we admired him, and we may say with David, "A prince and a great man has fallen in Israel."

If you measure greatness by great things accomplished, Bishop Hurst was a great man. I have watched his career with enthusiastic devotion for thirty years. He first attracted my special admiration when he rescued Drew Theological Seminary from financial ruin after the panic of 1873. It took a brave man to undertake the seemingly impossible task of raising \$300,000 after a panic which had wrecked the business of the country. Charles Scott, of Philadelphia, who wrought with him in that successful effort, can bear witness to his amazing industry and persistency and courage in that seemingly impossible task. I came in contact with Bishop Hurst again in 1884. A few friends sent me to Europe for a little rest, and in company with Dr. D. H. Carroll and wife, of Baltimore, we visited old Upsala, in Sweden, where Bishop Hurst was presiding at the Conference. He showed me a petition he had just received from two Finnish sailors who had been over to London, and there in a revival meeting had been converted, and now they wanted a Methodist pastor sent to Helsingfors. There was only one difficulty; there was no money that could be used for such a purpose. That matter was soon arranged, however, and Rev. B. A. Carlson was sent. He planted the mission in Finland, and now, owing to the far-sighted wisdom of Bishop Hurst, the Methodist Episcopal Church stands at the front door of the Russian Empire ready to go in and occupy the land.

A long letter from Rev. B. A. Carlson, who is still in that work, concerning the Stundists of Russia, closes up with the following remarkable postscript: "This was written a few days before the most unexpected notice was read in the papers that the Czar had given religious liberty to his people."

And we are there, right on hand to enter that great empire, and we owe it to Bishop Hurst that we are there.

Bishop Hurst seemed to have a sort of inspiration in opening new work. When he went to hold the Conference in India, he learned upon the steamer before reaching Calcutta, from a perfect stranger who showed him a map of Malaysia, of the commercial importance of Singapore. He immediately resolved to occupy it. Ever in his dreams, Bishop Hurst saw a Kingdom of God coextensive with all the earth. There was a young man coming from the United States to take charge of our work in Calcutta. His name was W. F. Oldham. Bishop

Hurst immediately determined to send Oldham to Singapore, and when the young man arrived at Calcutta, where he thought his journey was ended, Bishop Hurst told him that his appointment was 1,500 miles further on. Brother Oldham obeyed promptly, and went to Singapore and planted that mission, which is now one of the most successful in all Methodism. It has connected with it a self-supporting boys' school, and the latest statistics show that that school has in it twenty-three instructors and 705 scholars, and is a center of religious and intellectual power for all that country and for Siam and Borneo. The Bishop created that mission with the stroke of his pen.

There is one incident connected with this school that used to make the tears rush down Bishop Hurst's cheek.

Brother Oldham needed a helper, and we sent G. W. Gray there, from Zanesville, Ohio. As Brother Oldham saw him get off the steamer, and as he looked upon his stalwart form and noted his quick step, he said "That is the very man for me." Mr. Gray took charge of the school, and in six months he was taken ill. As a surprise to himself, and a great surprise to his friends, he was told by his physician that he must die. He thought about it a little, and then gravitation shifting turned the other way, and he wanted to go home to his father, young and strong as he was. He said to Brother Oldham: "Call in the boys," and they came in—forty boys, from Malaysia and Siam. "Boys," he said, "I have sent for you to let you see how a Christian can die. I want you to pass by and let me grasp each of you by the hand." And while those boys were going by him, he began to sing, all alone:

Down at the Cross where my Saviour died,
Down where for cleansing from sin I cried,
There to my heart was the blood applied,
Glory to His name.

Nobody could sing but the dying man. When the vacation came, Brother Oldham went up into Siam to get some new students, and he took dinner at the house of an old man. At the table one of his boys was sitting. Brother Oldham told the story of how the man sang when he was dying. At the close of the dinner the boy's grandfather took Brother Oldham aside, took him by the coat, and said to him: "Do you see that boy? That is my grandson. He is the light of these old eyes. Take him and fill him full of that religion that makes a man sing when he dies."

The fame of that wonderful song went all over that country, and now the school has pupils numbering 705, and it is felt as an intellectual, a moral, and a religious power all through that country. If Bishop Hurst could have known what was to happen, if he could have known about the Spanish war and its results, he could not have done a wiser thing than to plant that mission at Singapore. That filled up the gap. That made a chain of Methodist missions clear around this globe. Now you can sail around the earth and not be very far at any time from a Methodist mission, and it was the far-sighted wisdom of Bishop Hurst that did that.

It does seem, as we look back upon it, as though he was guided by his Lord.

As you have heard, Bishop Hurst's greatest achievement was the planting of the American University. When I saw him toiling at that gigantic task, at an age when other men seek repose, I could not stand it, and I made the journey all the way from the West here to take his hand and say, "Bishop Hurst, I am with you, I will stand by you." I never shall forget the expression with which he wheeled and grasped my hand, and said, "Thank God, thank God, I feel stronger than I did;" and I helped him with all my might.

The story of the planting of the University is familiar to you. Some incidents could be told illustrating the zeal and energy with which he prosecuted the work. On a trip to Europe he became acquainted with Mr. Hart A. Massey, of Toronto, a princely man. The Bishop unfolded his plan of the American University to him, and a few years afterwards, when Mr. Massey died, it was found that his will contained a bequest of \$50,000 for the University.

In those days he could scarcely talk about anything else. No man accomplishes much who has not an idea upon his brain so thoroughly that he wants to talk about it wherever he goes. Bishop Hurst did that. He got \$50,000 for the American University by sitting down by a perfect stranger on a steamer and telling him about his plans.

Again, during an unusually stormy month in one of our recent winters, on his arrival home from a wearisome journey, he received intelligence of a good man in the valley of the Mississippi, whose heart was warm toward the project of the University, and whose pastor desired Bishop Hurst to preach for him the following Sunday. While yet the winds

were blowing and the snow was blocking trains, he started for the West. At Rock Island, Illinois, he was the guest of Mr. J. Frank Robinson. One of the results of this trip and sermon was a cash gift of \$25,000 and a large share in a will, which will bring an increase of many thousands; some think 200,000, of dollars to the endowment of the University. Brother Robinson, since that day, has gone home to Heaven, but his wife has taken his place upon our Board of Trustees, and she has for our enterprise the same enthusiastic love as her departed husband.

There is no danger that the name of John F. Hurst will be forgotten. A mission once planted is immortal. It never can be given up. Finland and Malaysia will hold that name in reverent remembrance, while as long as this republic lives the American University will never allow the name of its founder to pass from the memories of man.

Dr. BRISTOL: Dr. Davidson, Secretary of the American University, will read the resolutions prepared by various societies and organizations, and sent to this service.

Trustees of Drew Theological Seminary.

The Trustees of Drew Theological Seminary have learned, with profound sorrow of the death of Bishop John F. Hurst, D. D., LL. D., and beg to record their high appreciation of his eminent services to the Church of God as one of its chief pastors, and in the many important interests which were committed to his care. In common with the whole Church while mourning his death, we give hearty thanks to God for his work and for the influence which he exerted in the many causes of public utility and Christian progress.

Especially we record our sense of the loss sustained by Drew Theological Seminary with which he has been so closely identified, and of which he was a Trustee until the time of his death. Elected Professor of Historical Theology in 1871, and in 1873 elected President of the Seminary, he filled these two positions with marked success until his election to the Episcopacy in 1880. As a professor he was scholarly, earnest, and sympathetic with the students in their work, and many graduates of the Seminary in all parts of the world will mourn a faithful and successful instructor.

He came to the Seminary when it was in prosperity, but suddenly the waves of misfortune broke over it, and the institution found itself without endowment; instead of giving way to despondency he at once gave himself to the restoration of that which was lost, and with heroic energy and great wisdom he rallied Trustees and friends to its support. So ably did he carry out this work that the Seminary successfully weathered the storm and has gone forward with the impulse then given it.

The Trustees desire to recognize his great services to the institution and to express in this way their thanks for his labors.

We recognize also his achievements in other institutions with which he was so closely identified, and his services in the department of Christian Literature, and in so many spheres of human interest.

Now, that he has been transferred to the higher ministries of the Heavenly world, we beg to tender to the bereaved family the assurance of our sympathy and our prayers that the abundant consolations of our Heavenly Father may be multiplied to them.

A. H. TUTTLE, ANDREW LONGACRE,
JAMES MONTGOMERY, GEORGE J. FERRY,
HENRY A. BUTZZ, *Committee.*

Baltimore Preachers' Meeting of the Washington Conference.

We, the Baltimore Preachers' Meeting of the Washington Annual Conference now in session at Metropolitan Methodist Episcopal Church, Baltimore, Md., mourn with world-wide Methodism and the Methodist Episcopal Church in particular in the death of Bishop John Fletcher Hurst, who passed from the field of toil to his heavenly reward May 4th.

Another intellectual star has been taken from the human firmament, a star of great magnitude. Our beloved Bishop will live in precious memory in the many books he has written; in the American University, which he conceived, planned, and developed; in his ministrations as a Bishop of the Church, in the impetus he gave to ministerial education, and in his Christian character. While our loss is his eternal gain, we regret always to lose from the Church militant men like Bishop Hurst, who was so faithful, useful, and helpful. It can truly be said of him, that a great man has fallen.

It is our sincere prayer that the Great Head of the Church will raise up one among us like unto our beloved Bishop, whose ability will be as his was recognized by all branches of the Christian Church.

We further pray that our Church will erect a Hurst Memorial Hall of Theology in honor of the Founder of the University. We deeply sympathize with the Board of Bishops of our Church in the loss of another of their colleagues, and with the children and relatives in this hour of their great sorrow.

We have appointed Revs. N. M. Carroll, J. A. Holmes, Joshua Barnes, J. H. Goodrich, and I. L. Thomas to represent the meeting at the funeral services.

Signed:

N. M. CARROLL, *President.*
W. N. HOLT, *Secretary.*

Washington Methodist Preachers' Meeting of the Washington Conference.

RESOLUTIONS OF THE WASHINGTON PREACHERS' MEETING, OF THE WASHINGTON ANNUAL CONFERENCE, ON THE DEATH OF BISHOP JOHN FLETCHER HURST.

Whereas it has pleased Almighty God, in the administration of His all wise providence, to remove from labor to reward Bishop John Fletcher Hurst, one of the general superintendents of the Methodist Episcopal Church, and a distinguished patron of Christian education, both at home and abroad:

Be it resolved. First—That the Methodist Episcopal Church has lost a notable representative; the cause of education an interested and generous patron; and Protestantism a wise and faithful friend.

Second. That his translations and publications in the fields of Christian research, constitute a fitting monument to his indefatigable industry and breadth of culture.

Third. His lofty ideals finding embodiment in the American University, and his commendable promptitude in saving to Methodism Drew Theological Seminary, in the face of a grave financial crisis, are worthy of the emulation of all progressive churchmen, and should fire their ambition and stimulate their exertion to push his cherished plans to speedy completion.

Be it again resolved. That the Washington Preachers' Meeting of the Washington Annual Conference recognizes the loss which has been sustained by our beloved Methodism and the Christian Church; and hereby begs leave to tender its deep sympathy to the bereaved family.

Be it further resolved. That these resolutions be entered upon the minutes of the Preachers' Meeting, and a copy be sent to the family of Bishop Hurst.

W. H. GAINES, *President.*
REV. M. W. CLAIR,
REV. C. G. CUMMINGS, *Secretary.*

Newark Conference Methodist Preachers' Association.

At the regular monthly meeting of the Newark Conference Methodist Preachers' Association held in Newark, N. J., May 4, 1905, the following resolutions were offered and unanimously adopted by a rising vote:

Resolved, That we have heard of the decease of our much beloved brother, Bishop John F. Hurst, with sincere regret, and that it is our desire to give expression to the very ardent affection we all had for him.

We think of him as possessing one of the most genial and lovable spirits that ever graced the membership of our Conference; we think of him as the very popular president of the Drew Theological Seminary, so dear to us by association and its good works, and the heroic and successful efforts he made to save this very valuable institution in the hour of its peril have always commanded our admiration. We think of him, with laudable pride, as having belonged to our Conference at the time of his election to the high and exalted office of a Bishop in the Methodist Episcopal Church, and last, but not least, we think of him as the great historian, the pre-eminent scholar, and the founder of the American University. We have had profound respect for his zeal and energy in its behalf through many of the best years of his life, and as this great enterprise continues to grow and develop, we are fully assured that Bishop Hurst's memory will be forever perpetuated in it.

While we are deeply sensible of the great loss Evangelical Protestantism and world-wide Methodism have sustained in the removal of Bishop Hurst from the scenes of his earthly activities, we are profoundly grateful to our Heavenly Father for having permitted him to accomplish so much for his church, for his country, and for the world.

We hereby appoint Dr. John A. Gutteridge to represent us at the funeral of Bishop Hurst, and ask him to present the above resolutions, and we especially request him to convey to the family of our departed friend and brother our deepest sympathy, and assure them of our prayers that the God of all comfort and peace will graciously sustain them in this hour of their sorrow and affliction.

WESLEY MARTIN, *President.*

J. O. WINNER, *Secretary.*

An Expression of Appreciation by The Washington Methodist Preachers' Meeting.

With profound sorrow we have learned of the death of Bishop John Fletcher Hurst. For fifteen years Bishop Hurst has resided in Washington; and during that time we have learned to admire and love him for his work's sake, and for his noble Christian character. While his services rendered to the Church extend throughout the world, we are persuaded that the grandest achievement of his life is in this city. His heart was fixed on the American University. Although not the first to conceive the thought of this magnificent enterprise, he was first to put that thought into practical operation. He purchased the ground and lived to see the first building rise in beauty and splendor on the heights within the borders of the Capital of our country, and a second building started on its way. When this noble institution shall have been completed it will stand as a monument to his wisdom, zeal, faith, and tireless energy.

Whenever the duties of Bishop Hurst permitted him to be at home he was always ready to aid the preachers of the city in their work by his counsel and personal labors, both on special occasions and at regular religious services. We appreciate the self-sacrificing services thus given, and we are persuaded that they have contributed much to the advancement of the cause of Christ in our midst. By his profound scholarship, his thorough knowledge of public affairs, and his wide reputation as an author, Bishop Hurst has given strength and prominence to Methodism in the Capital of the nation during his residence in this city. In his death not only our own denomination and this city, but also the whole country has sustained a great loss.

To his bereaved family we extend our sincere sympathy,

and assure them of our fervent prayers in their behalf in this time of bereavement and sorrow.

H. R. NAYLOR, E. L. HUBBARD,
LUCIEN CLARK, J. C. NICHOLSON,
WM. H. CHAPMAN, *Committee.*

Methodist Preachers' Meeting, New York City.

The New York Methodist Preachers' Meeting having heard of the decease of our dear friend, and brother, the Rev. John Fletcher Hurst, D. D., LL. D., one of the Bishops of the Methodist Episcopal Church, directed its officers to convey to you its deep sympathy in the loss you have sustained, and to assure you of its prayerful consideration in this time of sorrow and bereavement.

Before his elevation to the Episcopate he was one of our most useful and valued members. His wide scholarship, his Christian courtesy, and kindly consideration made him beloved by all, and his removal is a common bereavement.

Sorrowing as we do, yet we rejoice in a life so unselfishly and usefully spent, being confident of this, that when he passed into the beyond he saw his "pilot face to face."

On behalf of the New York Methodist Preachers' Meeting we tender you our deepest love and earnest sympathy, praying that comfort from the Great Comforter may be yours in richest measure, and that the promise may be abundantly fulfilled, "My grace is sufficient." Yours sincerely,

THOMAS S. BOND, *Secretary.* JOHN J. REED, *President.*

Baltimore Preachers' Meeting.

The Preachers' Meeting of the Methodist Episcopal Church in Baltimore has learned with deep sorrow of the death of our distinguished Bishop, John Fletcher Hurst.

Bishop Hurst was peculiarly related to us, in that he was born in Maryland, of an honored Methodist ancestry, was the resident Bishop of the Baltimore Conference, and had devoted his last years to the task of establishing within our bounds, at the National Capital, a Methodist World-Institution, "The American University," destined to be the crown and glory of our whole educational system.

This great man had the prophet's eye and the leader's force. Other mighty men of our Church had come and gone before he came to the Capital City. To them had appeared the vision of a University; but they did nothing, and the vision faded. He, too, saw and tried to put it away. He knew what labor it would require, and that it would, as he often said, cost blood; but the vision would not away. At last, with indomitable courage and unflinching zeal, with a faith that saw the unseen and stumbled not at impossibilities he put his hand to the enterprise, and literally wearing his life away with incredible labors he never let go till compelled by broken health. For such an undertaking he was peculiarly endowed by God and qualified by training. Naturally ardent, persevering, single-minded and far-sighted, he was brought up in schools, trained in colleges, universities and seminaries, and was intimately acquainted with learned and scholarly men, among whom he himself was conspicuous.

Our preachers in Baltimore, aware of his long and extreme illness, have been awaiting his death with pained expectation. Now that he has entered into Life they have sent a committee of his brethren of the ministry to testify their affection and esteem.

They say he died, it seems to me
That after hours of pain and strife,
He slept one evening peacefully
And woke to everlasting Life.

CHARLES W. BALDWIN,
WILLIAM G. HERBERT, *Committee.*
JAMES P. WRIGHT.

The benediction was pronounced by Bishop FOSS. The interment at Rock Creek Cemetery was private—many floral tributes stood about the grave. The service was read by Rev. Luther B. Wilson, D. D. The body was laid to rest, and the long sad day was done.

Bishop John F. Hurst

RESOLUTIONS BY TRUSTEES OF THE AMERICAN UNIVERSITY

The departure of our former leader and chancellor, Bishop John F. Hurst, leaves us lonely indeed. The measure of our loss lies beyond our present power of computation. Though his personal presence be withdrawn, his work and his influence are vastly more than a record and a memory. They are an inspiration to us in all our present endeavor, and such they will continue to be to our successors. He has moved on and up to his crown and his palm. His work on earth will also go forward to its broad, beautiful and glorious culmination. He was in the line of the prophet and the seer, and his largest service to the world will appear in later times when the centuries shall have given the mighty initiating impulses of his mind and heart opportunity to find their full fruition.

We tender to his bereft children the deep sympathy of our own sorrowing hearts, and in the same moment offer them our sincere congratulations on their heritage of his own honored and beautiful life, and of his unsullied character and name.

Chaplain William H. Milburn

RESOLUTIONS BY TRUSTEES OF THE AMERICAN UNIVERSITY

The removal by death from our number of the Rev. Dr. William H. Milburn, the veteran Chaplain of the United States Senate, gives us grief that we shall not again look upon his manly form and shining visage. He was not of those "who having eyes see not," but rather of those who, not having eyes, yet see. The noble qualities of his heart combined with the brilliant powers of his mind to make him a large factor in all circles that he touched. His grace of speech and diction and the courageous utterance of his convictions have done great service to the cause of truth and righteousness. The fragrance of his pure life will linger long among the people of America and Great Britain, and never cease to bless mankind.

We convey to his surviving family our heartfelt sympathy in their sorrow and loss, and join with them in the hope of a future and unbroken union in the world of light, undimmed by shadows and untouched by tears.

He Made the Biggest Lens.

Brief reference was made to the death of Rev. Dr. John Peate in the April issue of the *The Courier*. The press was stopped to let in the barest mention of the sad news. His was such a splendid life, and his loving service for the American University so unique and satisfactory that further mention must be made.

We are indebted to the *Epworth Herald* for many of the facts relating to his life. In another part of the paper will be found a faithful picture of the noble man, and the great lens he made for the American University. Some generous friend should have the lens mounted and let it at its work.

Dr. John Peate and his 'Great Lens' given the American University.

After a life occupied in religious study and teachings, and crowned with successful scientific researches, Rev. Dr. John Peate, manufacturer of the largest reflecting telescope in the world, died at his old residence in Greenville, Pa., March 23, after a short illness.

Dr. Peate was the inventor of the largest reflecting telescope lens in the world. Until in his seventy-fifth year he had absolutely no technical knowledge of the laws of optics, nor any practical experience in the making of lenses.

Dr. Peate's parents came to America from Ireland when he was but twelve years old, and settled in Buffalo, where the boy learned the bricklaying trade. While in his young manhood he was converted in a Methodist revival, and left his trade to make his own way through Oberlin College, and fit himself for the ministry. He was very hungry for knowledge.

Just after his college days he married Mary Tilden, of Buffalo. He saw some service as chaplain of the One Hundred and Sixty-ninth Ohio Volunteers, and, while in the service, officiated in the first burial in the Arlington Heights Cemetery. For over fifty years he served the Methodist

Episcopal Church in various towns and cities in northwest Pennsylvania, New York, and Ohio, both as pastor, and in later years as presiding elder.

Advancing years decided him to withdraw from active clerical work. He traveled and studied and, when about seventy-five years old, became interested in astronomy. He decided to undertake the making of lenses. Excepting such little information as he got from Dr. Wythe and some slight technical instruction from John A. Brashear, Dr.

Peate relied upon his own skill and inventive ability in the performance of his delicate work.

He made, at first, several small glasses more or less successfully, presenting them to colleges in which he was interested, where they were mounted and are still in use. The crowning task was the making of the immense 62-inch lens for the American University, Washington, D. C., a task which occupied two years of his declining life.

Dr. Peate made several attempts to find a large glass manufacturer who would cast the lens for him, but without success. He then turned from the big glass-molding concerns to the smaller manufacturers, who had much to gain if the cast should be successful, and nothing to lose in case of failure. He went to Butler, Pa., and got a plate glass company to agree to make the attempt. Four times the molten glass was poured into the great mold unsuccessfully, but the fifth cast was pronounced perfect. In the meantime Dr. Peate built, according to his own specifications, a workshop for the accommodation of the glass when it should be transported from Butler. He also had made, according to his own ideas, an enormous convex and circular grinder, the first tool of its kind to be successfully used in making a telescope lens.

Before shipping his great glass to Washington he opened one end of his workshop and wheeled the lens out to have the satisfaction of testing it upon the heavens.

Naturally, his scientific work attracted world-wide attention. German and English universities corresponded with him, and American scientists came to visit him at his little workshop in Greenville. He was offered many honorary degrees and fellowships in many scientific societies but refused them all, being content with his honor as doctor of divinity and Methodist preacher.

Shall There be a National University?

The building of a University of the United States at the nation's capital, to be supported out of the public treasury, has been opposed by the Committee of Fifteen of the National Educational Association, composed of the leading educators of the country, on the ground of the impossibility of freeing it from political bias and treatment.

The constitutional right of such an institution has been and still is questioned, as well as the right to use money raised from all the people for the

spread advantage of a select number. Such an institution would be a rival to all other institutions, in which millions are invested, and its building would check in great measure the gifts now flowing into our great institutions of learning. Existing institutions are doing, or planning to do, practically all such a university could do. The various religious bodies have already taken steps toward university foundations in Washington—the Baptists in the Columbian University, the Roman Catholics in the Catholic University, the Methodists, representing general Protestantism, in the American University, and Protestant Episcopalians in the Cathedral Foundation.

Our wisest legislators are opposed to a university supported at the expense of the Government, and the strongest argument that they use against it is that the Christian philanthropists of the country are now engaged in the establishment of educational institutions on as large plans as the Government could hope to do, and while the Christian people are willing to do it, it is needless for the Government to undertake it. Such an institution founded by the Government would simply become a recruiting office for politics. There would be a constant and disgraceful scramble for denominational control.

The loftiest educational ideas can never be realized by institutions under the patronage of the State, depending on its treasury, and subject to political bias and fluctuations. It is difficult to conceive, for instance, that the Democrats would submit gracefully to taxation for the purpose of sustaining such an institution when the Republicans, being in power, should insist that along the line of economic protection should be the chief doctrine emphasized.

Let the Government continue on a still more liberal scale to encourage and foster literary, historical, and scientific studies by enlarging its present policy as outlined in the establishment and support of its various departments and bureaus, such as furnish facilities and materials for students in higher education. These have been established at a cost of about \$60,000,000, and are supported and increased by annual appropriations of about \$5,500,000. These collections are unrivalled and should be utilized. Congress has already thrown all these collections open to the students in our higher institutions, under proper restrictions, and the general Government can render no better service to the cause of learning and culture than to pursue the

same generous line of developing and augmenting these treasures, while keeping itself free from the unhappy entanglements of an organized university, seeking the patronage of the public, yet unable to meet the popular needs. These treasures owned by and in the custody of the Federal Government, could be so co-ordinated that splendid results might follow. Each could be increased and conducted with reference to its relative value and importance to the whole. All could be brought into a harmonious system and made available for students in special ways. The Smithsonian Institution might be given appropriately the headship in securing the greatest unity of results. To private institutions should be left entirely the work of instruction and the responsibility of conferring of degrees.

The history of State schools is not a brilliant one, as the record fully shows. It is difficult to believe that a university supported by the Government would be one whit better. The constant drift of such schools is toward secularism and scepticism.

Is it too much to require that those who wish to teach science without religion should build and endow their universities, as those who wish both religion and science taught have done?—*W. L. Davidson in the N. Y. Journal.*

A Bisected College Course.

The President of Columbia University, in his annual report, proposes a plan by which undergraduates may enter the professional schools upon the completion of two years of collegiate study, receiving at that time the degree of bachelor of arts. Students who remain for the full four years are to receive the degree of master of arts, and only such students are to be eligible for the courses leading to the Doctorate in Philosophy. The suggestion is full of interest, and will doubtless provoke long discussion. Certain features of the plan immediately commend themselves as practical and useful. It would undoubtedly be advantageous to the average young man to begin his professional course at twenty instead of twenty-two. Such a shortening of the college course would enable the young physician or lawyer to undertake the independent practice of his profession by his twenty-sixth year, which is surely none too early.

It is probably true that the college student at the end of his sophomore year has sufficient material

training to enter upon the course in law or medicine. He knows, or should know, Latin well, and Greek tolerably; he has some slight acquaintance with French and German—if Greek has been omitted, he may even have considerable knowledge of modern languages; he has carried mathematics some distance into trigonometry, and has mastered the rudiments of the physical sciences. It would be absurd to call such a student liberally educated. He has gained no comprehensive view of history, has had only perfunctory instruction in the great literatures, lacks entirely the studies which especially develop the reasoning faculty, such as economics, psychology, and philosophy; and has missed, in short, both the subjects and the quality of instruction that do most to make a cultured man out of a college boy. Nevertheless, since he has no formal deficiency of preparation, it is logical to admit such a student to the professional schools. This should be done, however, with full appreciation of the fact that his studies have fallen far short of the traditional ideal of a liberal education. The Dean of Columbia College believes that the contemplated two years' course "could readily be made to include all of the studies now prescribed at Columbia for candidates for the degree of bachelor of arts." But it could be done only upon paper. Such a course would be as much of a sham as the "finishing" year at an old-school female academy. Whatever rags and tatters of senior and junior studies might be cast about the new-style bachelor of arts, would be provided at the sacrifice of his solid panoply of languages and mathematics. We believe it is desirable in many cases to shorten the undergraduate course to two years, but it is unworthy of a great university to present the new course as "definitive" or to give it the look of an equivalent for the old A. B. course.

President Butler frankly admits that this project takes issue not only with the practice of Harvard and Johns Hopkins, but also with recent tendencies at Columbia. These universities have been steadily working towards the co-ordination of all the graduate departments, requiring the completion of a college course as the indispensable minimum for admission to the departments of Law, Medicine, Philosophy, and Theology. Each and all of these departments were assumed to be pursuing the same ideals of pure science and original research. President Hadley, of Yale, in his report for 1901-02, declared that this ideal was impractical.

bly high for the average Law or Medical School. With him President Butler now takes position, tacitly allowing complete university status only to the School of Philosophy, which will maintain the old requirement for entrance, and accepting for law and medicine the less disinterested and more practical purpose of turning out not legislators and medical discoverers, but practising lawyers and physicians. This is a defensible attitude, and if President Butler seems ready to sacrifice that academic prestige which will accrue to universities holding the contrary way, he doubtless has adequate practical reasons for so doing.

A curious implication of the plan is fully divined, but very cursorily discussed, in the Columbia report, namely, the competition of the preparatory schools. President Butler says that under no circumstances will the professional schools accept boys without collegiate training. This stand could not justly be taken. A dozen preparatory schools in the East give the studies of the collegiate freshman year in a fashion acceptable to Columbia and to every college in the land. These schools could, with no great revolution of their present organization, add the sophomore studies. The next step would be to apply for a charter to give whatever two-years' degree President Butler finally hits upon. No fair-minded legislature could refuse the application. The schools, too, in the interest of their own pupils, would be bound to assume collegiate standing, for it is probable that an added two years in schools of the highest character would be quite as useful to the average boy as the bisected college course, nearly a year of which must be used in getting adjusted to new conditions. It is clear that the tendency of the change would be to multiply greatly the degree-giving institutions, to reduce proportionately the undergraduate students at the universities, to subject the American small college to a very formidable competition, and, in short, to scatter far and wide through the country institutions fairly comparable to the French Lycée and German gymnasium, which prepare their students for the university by their nineteenth or twentieth year.

If this be a fair statement of the implications of President Butler's plan, so revolutionary a movement should be carefully deliberated before it is launched. In justice to the hundreds of American colleges which give the A. B. for four years' work, the bisected course should bear a different designa-

tion. It should also be perceived that the students who take the old four years' course will immediately become an academic élite. They alone will have what Americans have for a generation regarded as a liberal education, and it is fit that they should bear the traditional degree of that education—the Baccalaureate Degree in Arts.—*Nation*.

Why not Open for Work ?

A large number of the Fall Conferences of the Methodist Episcopal Church have passed resolutions memorializing the coming General Conference, at Los Angeles next May, to remove the \$5,000,000 restriction from their resolution commending the work of the American University, and give the Trustees of University the privilege, which certainly belongs to them, of opening the University for work when, in their best judgment, the time has come. There is grave doubt as to whether the General Conference had either legal or moral right to impose such a restriction in the first place. Its approval in a matter of such national importance was, of course, desired, but all details of work and administration rightfully belong to the Trustees, as in the case of all other Methodist institutions of learning. Conditions have greatly changed since the General Conference at Omaha, twelve years ago. Great gifts were not secured as rapidly as was hoped, and the time of opening has been delayed from year to year. Large success has nevertheless come, and the present assets almost equal those of the great schools of Methodism with a half a century of history behind them, and a great army of alumni pushing their in crests.

The Church and the country are demanding that the American University open for work. Large subscriptions are being withheld because no movement in this direction is being made. Fifteen hundred students have knocked for admission. A great and beautiful building stands unoccupied. Very heavy taxes are being paid, which would be remitted if actual teaching work were being done. Productive endowment to adequately provide for several important and popular departments could be made available. Why not open? Then great gifts would come. Let the General Conference play fair, giving Methodism, through its official recognition, a chance and a right to share in the glory which the future years will bring, but let it refrain from dictating as to matters of administration which belong solely to the Trustees.

The McKinley Memorial.

The present is an expensive time to build. Materials and labor command enormous prices. This causes our Trustees to move cautiously in the construction of the McKinley Memorial Ohio College of Government. Complete plans and specifications have been prepared by the architect. Bids have been solicited from reliable contractors. These bids are so in excess of the estimated cost of two years since that the money in hand is hardly sufficient to put the building under roof, as was hoped. Some donations in the price of materials are promised, especially on marble. This may assist in the early commencement of the building on the foundation now completed. Our Trustees have a worthy horror of debt, and can be trusted always to do the wise and conservative thing. If our many subscribers to this building would promptly pay what they owe we would be in better condition to move on with the work. If those who loved the martyred President and desire to see his name and fame perpetuated in connection with this institution which he loved, would help us by generous subscriptions, the stately and significant memorial would soon rise. Will you have a share in it? Work will doubtless be speedily commenced, even if present high prices continue. It may be economy to get ready for business at any cost.

A Building to be Contributed.

THE glad news comes that a gentleman of Pennsylvania, who does not desire his name made public at present, will contribute a building costing \$100,000 to the American University. He proposes an observatory with all modern appliances, which will include the full mounting of Dr. John Peate's great lens, mentioned in another column. This is what we have been praying for ever since Dr. Peate passed to his reward, and felt certain God would prompt some generous soul to do it.

What a monument this will be to the giver! Where could capitalists who are seeking for a sure place of investment for their wealth, find a greater opportunity for large returns than in the erection of buildings or the creation of endowment foundations which shall forever bear their name, in connection with this great Protestant Christian University? The interest returns would come to heart and conscience and make life worth the living. Plan for a Christmas gift of this kind during the approaching holidays.

A Notable Woman Gone.

The Methodist Episcopal Church loses one of its most liberal women in the death of Mrs. Priscilla Lee Bennett, of Wilkes-Barre, Pa. With the setting sun of a recent October day, she sank in a last peaceful sleep after a lengthy illness, which she bore with Christian fortitude. Her hand was open to every worthy cause. In the distribution of her wealth she made it a habit to make her bestowments in her lifetime, instead of providing for them in her will. Thus she has been able to enjoy the good her money was doing. She gave a noble subscription of \$25,000 to the American University.

Mrs. Bennett was a member of the First Methodist Episcopal Church, Wilkes-Barre. She was identified with its Sunday School for more than forty years, and for more than thirty years was assistant superintendent, her step-son, George S. Bennett, being then and now its superintendent. So great was her interest in this work that she gave the splendid Sunday School building, at a cost of \$26,000, it being one of the model structures in Sunday School architecture and design.

She also gave the organ to the First M. E. Church, at a cost of \$10,000; also \$2,000 to build Bennett Chapel, named after her, at East End, Wilkes-Barre.

She contributed largely to the General Missionary Society of the Methodist Church, to the Women's Foreign Missionary Society and the Women's Home Missionary Society, to the church extension of the Methodist Church, to Drew Theological Seminary, besides helping numerous churches, and students preparing for the ministry and for missionary work.

Wesleyan University, Wyoming Seminary, the American University at Washington, Grant University, at Chattanooga, Tenn., were recipients of her bounty.

She gave largely to the local Y. M. C. A., Y. W. C. A. Home for Homeless Women, Home for Friendless Children, of which she was one of the founders, first treasurer, and for many years its president; City Hospital, Wilkes-Barre, endowing the "Washington-Lee bed," at a cost of \$5,000; Brooklyn Methodist Hospital, endowing the "Josephine Lee bed;" Lee Library, and a building at Orangeburg, S. C.; the Bennett building, at Clarkson, Miss., besides many benefactions of which her family and friends know nothing.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

WE beg to acknowledge the receipt of a box of valuable books donated to the University by the Rev. H. W. Hicks, of the Detroit Conference. Such gifts come frequently from our thoughtful pastors and others, and are appreciated. Our library is assuming vast proportions. With the marvelous Congressional Library at our doors—as free to our students as though we owned it—our library facilities will be unequalled by any university in the world.

THE coming session of Congress will undoubtedly order the opening and grading of Massachusetts Avenue through the grounds of the University. Much work has already been done, and nearly all property-owners along the proposed route have agreed to dedicate the right of way. Massachusetts Avenue is the finest residence avenue in the city. It will make a straight and beautiful drive from the heart of the city to the University, and will shorten the distance very considerably. With this avenue opened and improved, in addition to the fine improvements on Nebraska Avenue, recently mentioned in THE COURIER, the University grounds will be greatly beautified.

A CONCRETE water-table, five feet in width, has recently been placed entirely around the College of History. This was done to prevent any possibility of dampness in the basement of this splendid building. The improvement has also added to the beauty of the structure.

THE Rev. J. B. Polsgrove, D. D., of the Central Pennsylvania Conference, has recently been doing some fine work in behalf of the American University. He has interested many people of wealth in the enterprise, and has secured some very generous subscriptions.

A REAL treasure has just come into the possession of the American University—an original oil portrait on wood, of Bishop Francis Asbury. It was bequeathed by Mrs. Sarah B. Attmore, of Strasburg, Lancaster Co., Penn. The portrait was painted during Bishop Asbury's last visit to Strasburg borough, which, according to his journal, was in 1813. Father Boehm and others, who have seen Bishop Asbury, say it is a very faithful likeness of him. This will be a priceless adornment for the Asbury Hall when completed.

CONCERNING the question of coeducation in colleges, the *Advance* thus apostrophizes Presidents Harper, Hall, James, and Thwing:

"Venerable men! In the matter of coeducation your faces are turned backward. You need not be alarmed about the feminization of your schools. There is far more reason to fear that the unmanliness of some of your boys will harm our daughters than that of womanliness of the girls will weaken the boys for the strenuous tasks of scholarship, and for the supreme battle of life. Lift the intellectual standards as high as you will, bate no jot or tittle of scholarly work; but lift the moral—manly and womanly—standards so much higher that the whole world of fathers and mothers shall realize that the safest place on earth for boys and girls to meet is in the atmosphere of a great school of learning."

WHAT will not be promised to be "taught by mail?" Here is one firm that offers, for a slight consideration, to make gentlemen of us—a process that one would think must proceed from within, if anywhere, and take a little time for the doing. But this get-gentlemanly-quick concern obligates itself, for a dollar or two, to tell us by circular the correct thing to do, to say, to write, to wear, on all occasions. There is certainly no excuse for any one being a boor now, when he can be taught good manners and perfect etiquette for a dollar—perhaps 99 cents.

Another enterprising advertiser puts himself

under bond if you will send your dollar—(though he will trust you even for that if you will order)—to teach you to write stories, saying that he has testimonials from students all over the world. Now we have an explanation of it! We have been wondering why on earth the number of novelists had increased so prodigiously. They are the graduates of this dollar school—taught to write overnight. But we fear this firm will turn out for a dollar man who will write sermons, and then preachers who have not had the benefit of "teaching by mail" must look to their laurels. And if it should graduate those who, for only a dollar, had been taught how to compose editorials—what *would* we do?

—*Western Christian Advocate.*

This lack of ministers for the work of the Church is threateningly emphasized by the statistics of the theological seminaries. The table given below exhibits the students and graduates of each of the seminaries reporting to the Presbyterian General Assembly, in the years 1896 and 1903, respectively.

	Students		Graduates	
	1896	1903	1896	1903
Princeton	241	172	78	50
Auburn	124	59	42	15

Gifts and Bequests and News.

Two hundred and seventy five thousand dollars has recently been paid to Mrs. P. L. Gilmore for the Gilmore Library of Music, containing 18,000 volumes.

The late Mr. W. A. Barrows, of Ellijay, Ga., formerly of Worcester, Mass., willed to Georgia Conference \$1,110, to be used in educating young ministers for the mountain region of that Conference.

Messrs. Edward W. and Clarence H. Clark, of Philadelphia, have subscribed \$100,000 to found a professorship in Assyriology at the University of Pennsylvania. The Messrs. Clark have been among the largest subscribers to the Babylonian expeditions of the University of Pennsylvania for the past fourteen years. Dr. H. V. Hilprecht will be the first professor under this endowment.

Mrs. Fannie B. Hardtner, of Springfield, Ill., and her daughter, Mrs. Ira B. Blackstock, have given \$5,000 to the Illinois Woman's College. The money is to be used for the founding of a scholarship in honor of Dr. John Hardtner, deceased. The college officials have assurances that other persons are arranging similar gifts. The new building is now entirely completed, and the college is full to overflowing.

Professor Goldwin Smith and Mrs. Smith have presented a liberal and timely gift of \$10,000 to the library of the University of Toronto.

T. Jefferson Coolidge, late minister to France, has given a fund of \$50,000 to the Jefferson Physical Laboratory of Harvard University for physical research.

Miss Helen Miller Gould has given to Vassar College two scholarships of \$10,000 each, for the benefit of graduates of the Tarrytown High School and of the Washington Irving High School, at Irvington, N. Y.

The American residents of Montreal have subscribed a fund of \$9,000 for the foundation of a fellowship on political economy at McGill University, to be known as the William McKinley fellowship.

President Caroline Hazard, of Wellesley College, has announced that J. D. Rockefeller has offered that institution \$150,000 for a dormitory and a central heating plant, provided an equal amount is added to the college endowment fund from other source before Commencement Day 1904.

An endowment of \$1,000,000 has been given by Mr. and Mrs. Harold McCormick, of Chicago, to found a medical institution, which will be known as the Memorial Institute for Infectious Diseases, as a tribute to the memory of their little son John Rockefeller McCormick who died of scarlet fever a year ago. At present provision has only been made for four years.

The estate of Charles H. Hayden, of Boston, valued at \$700,000, is divided almost entirely among charities by a will and codicil probated recently.

Bequests for educational and religious purposes aggregating \$52,000, were made in the will of the late Jacob Y. Dietz, of Philadelphia. Franklin and Marshall College, in Lancaster, Pa., receives \$10,000, and the Theological Seminary of the Reformed Church in Lancaster, \$16,000.

The Chinese Imperial University at Peking has been closed, only fifty students having presented themselves at the opening of the school year. The collapse of the university is due to the policy of the dowager empress to kill off the reform movement.

The only rational ground for the admiration of any single college would be its pre-eminent spiritual tone.—*Dr. William Jones, of Harvard.*

Tokio is the largest university in the world, for not less than 48,000 young Japanese are studying in it. The favorites are law and civil and mechanical engineering.

The enrollment of students at the great colleges and universities of the country this fall has been unprecedentedly large. Many of them can hardly care for all the students applying. A notable exception has been Chicago University, which shows a loss of nearly six hundred. This famous institution suffers from a group of erratic professors who are constantly airing their "fad" theories in public and bringing temporary discredit upon the institution.

THE UNIVERSITY COURIER.
FORM OF WILL FOR
THE AMERICAN UNIVERSITY
WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University" a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect), to "The American University" a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

The Curtain Falls

*Over the sorrow and over the bliss,
Over the teardrop, over the kiss,
Over the crimes that blotted and blurred,
Over the wound of the angry word,
Over the deeds in weakness done,
Over the battles lost and won,
Now at the end of the flying year,
Year that to-morrow will not be here,
Over our freedom, over our thralls,
In the dark and the midnight, the curtain falls.*

*Over our gain and over our loss,
Over our crown and over our cross,
Over the feet of our discontent,
Over the ill that we never meant,
Over the scars of our self-denial,
Over the strength that conquered trial,
Now in the end of the flying year,
Year that to-morrow will not be here,
Quietly final, the prompter calls:
Over it swiftly the curtain falls.*

*Over the crowds and the solitudes,
Over our shifting, hurrying moods,
Over the hearts where bright flames leap,
Over the cribs where the babies sleep,
Over the clamor, over the strife,
Over the pageantry of life,
Now in the end of the flying year,
Year that to-morrow will not be here,
Swiftly and surely, from starry walls,
Silently downward the curtain falls.*

Harper's Bazar.

Inauguration at DePauw University.

ADDRESS BY PRESIDENT HUGHES.

The exercises connected with the inauguration of Rev. Edwin Holt Hughes, D. D., as president of DePauw University, occurred on December 6, 8 and 9. On Sunday morning there was preaching in the churches of Greencastle by invited guests of the University; in the afternoon Dr. W. F. McDowell preached the University sermon, and in the evening a platform meeting was held. Wednesday was inauguration day. United States Senator Beveridge, of the class of 1885, delivered the address; Mr. William Newkirk, president of the board of trustees, delivered the keys; President Bashford, of Ohio Wesleyan University, gave the charge, and the president of the University made his inaugural address. We quote some of the more striking passages of this fine address:

"The figure of speech that best characterizes the present aspects of educational life is this: The hour is one of 'dissolving views.' The last two decades have thrown old theories into confusion. New problems have arisen. The possible directions of educational progress are so many, and fresh guidance may open such surprising ways, that hasty prophecies are likely to return in the shape of plagues. He would be daring indeed who would attempt to chart this restless sea, to mark all perilous rocks, to time the tides, to distinguish between eddies and currents, to point out to safe harbors. And if prophecy is dangerous, so likewise is an attempt to fit educational history into the present life of our institutions of learning. The perplexing things now are just the things that are new. The educator often searches in vain for historical parallels. He feels that at times he must be a discoverer rather than a disciple. Columbus must not look for precedents when he seeks to find a new world; the original channel is never sprinkled with lights.

* * *

"Great men have gone before us—Gamaliel and Hillel, Plato and Aristotle, Augustine and Origen, Alcuin and Abelard, Arnold and Hopkins, and scores of others whose names flash out of a vast record. They piloted noble crafts, but they did not sail on our ocean. There have been educational explorers and pioneers who have opened new paths and pushed beyond the borders of previous experiences. It may be said that our age sometimes calls for such venturesome leadership. It demands innovations. The pressure of that demand comes heavily upon the teachers and trustees of the period.

"It is a sober statement of facts when we affirm that for eighteen hundred years the Church has been the chief propagator of learning. In the centuries before Christ, Egypt, Assyria and Greece had their schools and scholars; but education was never diffused among the people. The spirit of diffusion came with the dominance of the new faith. That wave of diffusion may be said to have come to its crest in our country and in our century. None the less, it flowed over all the years. For a time the movement sped in spite of the national spirit. Hallam admits that 'for five centuries every part of knowledge was almost wholly confined to the ecclesiastical order.' David Hume was no lover of the Church, yet history forced from him the admission that in the days of the great Alfred 'the monasteries were the only seats of learning.' If the influence of the Church schools could be taken from the history of Europe, the old barbarism would still reign there. In America church and colony were united; yet it may not be denied that the impulse toward higher education sprang from the heart of the Church of Christ. The first college had a Christian birth and bears to this day the name of a Christian minister—John Harvard. The second college was William and Mary. The Virginia Assembly, which gave it a double royal name, gave it also a double religious purpose, and mentioned among its objects 'the supply of the ministry' and the 'promotion of piety.' The third college was Yale. The society that took the initial steps for its founding was composed of 'eleven ministers.' An authority makes the statement that 104 of the first 119 colleges established in the United States had a distinctively Christian origin. ['Colleges in America,' Barker, page 49.] The ultimate history of America will credit the Church of Christ with the primary and supreme influence in our country's educational life.

* * *

"Let it be frankly allowed that the followers of Christ waited a goodly season ere they recognized the legitimacy of all types of real learning. Their first attitude toward many branches was that of hostility. Augustine declared that 'the ignorant seize heaven,' and the context will not permit us to construe the words as being simply a plea for spirituality as against a heartless intellectuality. Gregory the Great declared that he would blush to have the Scriptures 'subjected to the rules of grammar.' [Alein, West, p. 11.] If this iron ecclesiastic were living to-day his face would be constantly crimsoned. Tertullian became the arch-extremist. He called the 'patriarchs of philosophy' the 'patriarchs of heresy,' and named them 'hucksters of philosophy and rhetoric.' The Apostolic constitutions assert that the Books of Kings give history; Job, eloquence; Proverbs, wisdom; the Psalms, tuneful strains; Genesis, the doctrine of origins; the excellent law of the Lord God, the proper customs and observances; and that the Christian student need not go beyond these, but must 'abstain scrupulously from all strange and devilish books.' These judgments seem harsh and cramping. But we may well recall that they came after decades of bloody persecution, and that many so-called instructors of the arts in the later Roman Empire were men of utter villainess. The studies had fallen into bad company, and they bore the penalty of associating with evil teachers. "But since the nature of Christianity was expansive, it was not possible that this first attitude should survive. Augustine himself became the leader of the wider movement back to which we may trace the liberal disciplines of Christian education. In his later years he committed himself, and through his leadership committed the Church, to a sane and wholesome relation to general studies. In a fanciful parallel he says that, as the Children of Israel carried from idolatrous Egypt ornaments of silver and gold to devote them to a better use, so should scholars carry out of the heathen classics all truths and cultures to be used in the higher services of the kingdom. If the great father of Western Christendom did not reach the final goal of breadth, he surely started the Church in a hopeful direction. He gathered his teaching into a free and assuring maxim: 'Let every good and true Christian recognize that truth, wherever he may find it, belongs to his Lord.' [De Christiana Doctrina, II, cap. 17.] From that time onward the followers of Christ were to be the leaders of men in the advancement of the liberal arts. The seed sown by the hand of Augustine has grown into ex-

tended fields of knowledge. Hundreds of schools and millions of scholars have sighted the ideal of breadth. Thus has it come about that Christian education has recognized and promoted the conception that all legitimate life is sacred. The kingdom of God has the roomiest boundaries, and the King is to hold all learning and all service under the sway of his pierced hand.

* * *

"In due season the influence of the Church so moved upon the State that institutions under civic control were founded. It is a mighty compliment to the Christian forces of the Nation that their ideals at last permeated the State. Amid all the discussions as to the relation of State colleges and Church colleges it should in justice be held in mind that the Church has been the mother and the home of education in this Republic. If the prophecies so often made at the present time should prove true and the schools of the Church be killed by the schools of the State, history would offer few clearer and sadder instances of wholesale matricide! But he who imagines such an outcome is lacking in vision.

"The State schools are here, and they will remain. Surely no one would care to decree that all young people must attend an institution of private or denominational founding. The colleges of such private and denominational control have given noble service to our various States. They now have a right to ask for a fair field; have a right to request that there be no needless duplication of collegiate work; have a right to demand that there be no partiality shown in the selection of teachers, principals and superintendents; have a right to assert the glory of their own mission. But more than these rights they can not claim. Their work must be positive and constructive, the strengthening of the various departments, the sending out of men and women of intellect and character.

* * *

"Given these worthy conditions, the schools of the Church will not die. They may have some spells of serious sickness. Or they may change their places of residence. Or they may, when proper love prevails, get married. But discouraged friends and hopeful enemies may call the lease away from our doors. Our schools are the wards of a deathless Church. The Methodist Episcopal branch, though still young, prayed over the cradle of the Republic. Should our Republic perish, that Church will pray at its grave, and among the petitions will be one for a glorious resurrection. The Church will not die; neither will its institutions.

"To be specific: De Pauw University has outlived two generations of men. Our grandfathers were its godfathers. Since its birth the cemeteries of Indiana have received the sacred dust of millions; and when the bodies of all here present are held at last to the bosom of Mother Earth, this University will live on. It is the child of a lasting purpose, and it has an abiding life.

* * *

"Augustine became the leader of the wider movement, back to which we may trace the liberal disciplines of Christian education. In his later years he committed himself, and through his leadership committed the Church, to a sane and wholesome relation to general studies. In a fanciful parallel he says that, as the Children of Israel carried from idolatrous Egypt ornaments of silver and gold to devote them to a better use, so should scholars carry out of the heathen classics all truths and cultures to be used in the higher services of the kingdom. If the great father of Western Christendom did not reach the final goal of breadth, he surely started the Church in a hopeful direction. He gathered his teaching into a free and assuring maxim: 'Let every good and true Christian recognize that truth, wherever de may find it, belongs to his Lord.'

* * *

"De Pauw University fronts the future determined to be evermore an exponent and exemplar of the practicalness of the intellectual life, the fearlessness of the religious life, and the sacredness of all legitimate life. God bless the dear old university and keep her true to this wonderful mission! To you, Mr. Chairman, and to your fellow-trustees, jealous and generous guardians of this vast educational trust; to you, members of the university faculties, partners in long devo-

tion to our work; to you, students of De Pauw, resting under the thrill of youth and of this day's emotion, and to your successors of the years to be; to you, fathers and mothers, representing the dearest anxieties and ambitions of thousands of homes; to you, Christian pastors and laymen, by whose co-operative spirit this institution stands in strength to day; to you, O State of Indiana, rich in history and richer still in hope; but most to Thee, O blessed Christ, I pledge an inadequate life that within these walls the sons and daughters of our Church and commonwealth shall be trained to face life's realities practically, to face life's doubts fearlessly, to face life's legitimate labor sacredly."

"The Newer Humanities."

"We must deal in college with the spirits of men, not with their fortunes," said President Woodrow Wilson, of Princeton University, in his inaugural address distinguished both for breadth of philosophic vision and for grace of literary form. He thus takes his stand firmly for the humanistic and against the utilitarian ideal of education. But he is confident that this training of the intelligence is also that which fits a man as well for the winning of fortune and participation in the daily work of the world, as for the disinterested service of scholarship. "Learning is not divided," he insists. "Its kingdom and government are centered, unitary, single. The processes of instruction which fit a large body of young men to serve their generation with powers released and fit for great tasks, ought also to serve as the initial processes by which scholars and investigators are made. They ought to be but the first parts of the method by which the crude force of untrained men is reduced to the expert uses of civilization. Behind this high plea for a humanistic ideal lies the conviction that any lower ideal is less practical and less serviceable. It is salutary to have such a doctrine presented at a time when the latest tendency has been to make the college merely a preparatory stage to the professional school.

That this training is incomplete without the study of at least one ancient language and literature President Wilson is fully convinced; but he also believes that our own language and literature and a comprehensive study of one of the basal sciences are equally indispensable. Very happily, as President Wilson lays down the principles which should guide a liberal education, President Schurman, of Cornell, presents in his annual report an actual college course which has been worked out under the conditions most favorable for unhampered growth. Cornell started free from any ecclesiastical or nar-

rowly academic tradition, and frankly committed herself to the elective system. Where other colleges hesitated, she assumed the equal value of studies, trusting the student to make for himself a curriculum in which *litera humaniores* and science should be each duly regarded. Accordingly, the merits and defects of the elective system have had every chance to develop, and the average course at Cornell may be assumed to represent faithfully, if not the education which the American collegian should have, at least that which he prefers.

It is encouraging and a little surprising to find that he prefers very much the kind of course which President Wilson so eloquently advocates—that is, an education which prefers, broadly speaking, the humanities to the scientific and more utilitarian studies. The class of 1901 gave a tenth of its working time to the ancient languages, more than a third to the modern languages, upward of a fifth to history and politics, a tenth to philosophy, leaving one-fifth to natural sciences and mathematics. With all reserves for the misleading nature of these percentages, which undoubtedly cover many eccentric individual cases, there is no avoiding the inference that the preference of the American collegian is as markedly as ever for the humanities over the sciences—only, as President Schurman aptly observes, for the "newer humanities" rather than for the old; and it would be fair to add that students everywhere, and the more radical educators, see in the Cornell course, with its preponderance of modern languages and history, the ideal towards which they are reaching. For them the phrase "the newer humanities" will be a rallying cry.

But the education in the "newer humanities" must be considered not only in its present condition, but in its remoter effects, especially in its reaction upon the schools. For some years past about a third of the students admitted to the Cornell College of Arts have offered both Greek and Latin for admission, as against one-half who offered Latin, with either French or German. Yet, while all but an insignificant fraction of the Cornell freshmen have prepared for college in at least one ancient language, only one-tenth of the working time of the four collegiate years (less than a semester for each student) is given to Latin and Greek. It is evident that the schools which prepare for Cornell University will tend to teach the subjects that their

students mean to continue in college, and the logical outcome would be an education which, from beginning to end, preferred the "newer humanities." In such a course Latin would assume a wholly minor position, while Greek would virtually disappear. Is the American college willing to see the old humanities put upon the basis of, say, Sanskrit, fluxions, or spectrum analysis?

Princeton, for one, is not, and it would be pleasant, did space permit, to reprint President Wilson's tribute to the liberating effect of literatures so unlike our own—so superior in poise and serenity. But this is not the place to fight again the never-ending battle of the ancients and moderns. It is sufficient to have pointed out that the liberal education of to-day shows no sign of rejecting the humanities in favor of natural science, and it may be well to recall that in Dante, Shakspeare, Milton, Molière, Goethe, the student has not only a tolerable substitute for the ancient classics, but has, though at second hand and very partially, the ancient classics themselves, from whom the great moderns derived their chief inspiration. It is conceivable that Maengtion might mean to a modern what Cicero did to Montaigne. And yet there is always danger that the substitutes for the classics may be cheap substitutes—not Montaigne for Cicero, but a smattering of De Quincey; not Molière for Aristophanes, but trivial plays of Scribe and Sardou; not Shakspeare for Sophocles, but miracle-plays and moralities. This is the besetting peril of the new education. For this reason, while frankly admitting that the day is with the new humanities, we believe that the success of the new departure is bound up with the retention of the great culture language, Latin. It is needed as a standard of comparison, to steady the vision of literatures that are still perplexingly near us. A new education that does not give Latin a prominent position will infallibly fall short of a liberal education.—*The Nation*.

Splendid Giving by Roman Catholics.

The new Pope has manifested great interest in the Roman Catholic University of America, at Washington, D. C. He has directed that a collection be taken in every Roman Catholic Church in America, once every year for ten years to come. The first one was taken November 29th, and Cardi-

nal Gibbons reports that the amount received will reach \$100,000. This will give them great assistance in the completion of the two new buildings which are now in process of erection. They are firmly entrenching themselves at the Nation's Capital. If the whole of Methodism could in some such way turn itself for a few years toward the American University, what glorious results would follow! If petty jealousies and rivalries could, for a moment, be forgotten, and this enterprise be looked upon as the crown of the great educational system of Methodism, which it certainly is, not hindering but greatly helping every other school of our denomination, the great project could be quickly put upon its feet. An average of \$20 from every congregation in Methodism, which is certainly putting it low enough to make it certain of accomplishment, would place the institution forever beyond the need of further promiscuous solicitation of funds.

True Words from Dr. Faulkner.

A brief, but concise and readable book, entitled, "The Methodists," has just been written by John Alfred Faulkner, D. D., Professor of Historical Theology in Drew Theological Seminary. In his chapter on Education, occur these very wise and truthful statements regarding the American University:

"The latest educational project is the American University, a purely post-graduate school, founded in Washington, D. C., in 1890, by Bishop John F. Hurst, intended to cap the educational system by an institution which will lay open the immense scientific treasures of the Capital to men previously trained in college. It is greatly handicapped by the almost prohibitory action of the General Conference forbidding it to open its doors until it has a productive endowment, beyond buildings and lands, of \$5,000,000. Action like that would have prevented the opening of every university in Europe or America, for the history of education is the best commentary on the question of the sacred prophet, 'Who hath despised the day of small things?' (Zech. 4: 10).

This same thought was emphasized in the last issue of the COURIER. It is the position which fair-minded people everywhere are taking. The coming General Conference must give relief along this line, and unless they do, they may regret the consequence which may follow.

Bishop Hurst's Library.

Plans are rapidly maturing when this almost priceless private library will be sold at public auction. By the terms of the will it must be disposed of for the benefit of the estate. Gladly would Bishop Hurst have left this magnificent library to the University which he founded—he often so expressed himself—but his father heart went out to his children, and the library, gathered through all the years at such care and expense, was most of all he had to leave them. Only those who know books can form any just estimate of the richness and worth of this library. There have been few better private libraries in America. It is wonderfully valuable in its Americana, including many volumes of almost fabulous worth; rare manuscripts and letters abound; autograph volumes of note are numerous, with many old books, which are worth more than their weight in gold. The library contains 8,000 volumes, and is worth, at a very conservative estimate, \$50,000. To one who knew and loved Bishop Hurst; who knew his heart and purpose towards The American University, it seems like sacrilege to have these treasured volumes hawked by the auctioneer and become forever scattered, going into the hands of the highest bidders. Fifty years from now, for the purposes of a great University, this library will be worth ten times its present cost. It ought to remain intact with The American University, as the Hurst Memorial Library. There is no other righteous thing to do. Friends of the Bishop and of the University should rally at once and make possible this consummation. Is there not one strong man in Methodism who could do it alone? God would bless him in the doing. If not that way, a number could combine and do it. Who will move? The auctioneer hammer will soon fall: it will then be too late; a great opportunity will be lost, and a burning wrong will be done.

Will you not hand this copy of the Courier to some friend after you have read it. It might prove good seed in good ground. We are emphatically in the hands of our friends. Their good words and interest in our welfare means everything to us.

A Valued Trustee Gone.

The death of Hon. William M. Springer, at Washington city, December 4, removes a man of rare character and ability. He was for twenty years a prominent and active member of Congress, representing the Springfield district of Illinois. He was later United States Judge for the northern district of Indian Territory. He was appointed to that position by President Cleveland, being eminently fitted for this work by reason of his thorough knowledge of territorial law. During all the period of his public life he was an active member of the Methodist Episcopal Church, and was in full sympathy with the benevolent and philanthropic activities of the denomination. His wife was the daughter of Rev. Calvin W. Reuter, of Indiana. He was, from the beginning of the work, a Trustee of the American University, and the following resolutions will be passed by that body:

Whereas God, in His all wise Providence, has taken from us Judge William M. Springer, one of our honored and valued Trustees: therefore,

Resolved, First, "That we record our high appreciation of his work as a public official, long and widely known, whose judgment was respected in the high councils of the nation, and whose influence in the legislative bodies of the Republic has had much to do with the progress which has been written in our history."

Resolved, Second, "That we record our appreciation of his worth as a man and a Christian. There was no stain upon his name. His character was above the suspicion of reproach. He instantly won the respect and confidence of those with whom he came in contact. He was loyal to the church of his choice, and exemplified both in his public and private life the sweet serenity and confidence which belong only to those who have made a full consecration and have joined themselves for service with the Lord God Almighty."

Resolved, Third, "That we record our high appreciation of his worth as a Trustee of the American University. For more than twelve years he has served us faithfully. He was rarely ever absent from a meeting of the board. His legal knowledge was always at our disposal, and many of the important enactments of the board were framed by him. The work was on his heart, and to it he gave much thought and labor. We shall sadly miss his wise counsel and the inspiration of his presence."

Resolved, Fourth, "That these resolutions be spread upon our minutes, and that an engrossed copy be sent to the widow and family of the deceased."

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

THE mid-winter Trustees' Meeting of the University, usually held in December, was postponed, because of the absence of the Chancellor, Bishop C. C. McCabe, detained by illness in his family. It is now probable that the meeting will be held February 16th.

THE liberalistic wing of Christianity now has full control in looking after the spiritual interests of the Congress of the United States. Rev. Henry X. Couden, the Chaplain of the House of Representatives, is a Universalist; Dr. Edward Everett Hale, recently elected Chaplain of the Senate, is a leading Unitarian.

THE UNIVERSITY COURIER is sent to every person who has ever made a subscription in any amount to the American University. We are glad to keep those who have manifested substantial interest in our work informed as to our progress. This is our method of having little heart-to-heart talks with our friends. Under the ruling of the Post Office Department, publications of this class, to be entitled to pound rates, can not carry any advertising matter, so that we are absolutely without revenue from this paper, save through subscriptions paid, and the number is not so alarming as to make necessary the employment of additional clerical help. We should be delighted if five or six thousand of you

would send us 25 cents each, the regular subscription price. It should be worth that much, because of the admirable contributed articles it contains on matters of great moment.

THIS paper will fall into the hands of many whose subscriptions to the AMERICAN UNIVERSITY are still unsettled. Some have paid a part of what they owe, others have never paid anything since the subscription was made. Many members of the Spring Conferences of Methodism, soon to meet, made generous subscriptions to the Asbury Hall Fund. Just about half of them have settled in full; others have made a payment or two on account. Some of these subscriptions are getting old. Death has overtaken a good many of the subscribers before they redeemed their pledges to the University. It is no small tax, both in time and money, each year, as is the custom, to send notifications to all who are in arrears. This is done year after year, in many cases, without any response. Why not settle at once and save this trouble and expense? The subscriptions were made in good faith and, of course, will be paid. Methodist preachers always keep their obligations. When the notification reaches you, before Conference, of the amount still due on your subscription, send your check at once and close up the matter. Please keep this in mind. Many subscribers to the State building funds are sadly behind. Will you not cheer us by making prompt payment?

THERE is a prospect that a fine donation will soon come to the University in the form of an annuity. Interest will be paid semi-annually by the University, which will furnish a handsome income during old age for those who advanced the money. This method of giving should be studied by old people. It lessens their burdens.

Worthy of Imitation.

PRESIDENT Benjamin Ide Wheeler, of the University of California, is reported to have dispersed a game of baseball players on the University campus on Thanksgiving day with the following remark: "By playing baseball this morning you are insulting the President of the United States, who has set aside this day for the offering of thanks to the Almighty God. A union church service is now being held in the First Presbyterian Church, a short distance from here, and for that reason, if for no other, you should desist from a game of baseball at the time."

Column of Inspiration.

GREAT GIVING AND DOING.

The late Rev. Stephen C. Frampton, of the Ohio Conference, in his will, gave the Missionary Society \$1,500; Church Extension, \$1,500; Freedmen's Aid, \$1,500; Woman's Foreign Missionary Society, \$1,000; Woman's Home Missionary Society, \$1,000; American Bible Society, \$500.

The terms of the will of the late Henry Klein, a well-known capitalist, of Helena, Mont., have been made known. Besides liberal bequests to relatives, he gives to the Wesleyan Methodist and St. John's Roman Catholic Hospitals, both of Helena, \$5,000 each. The Consumption Hospital at Denver will get \$5,000, as will also the Hebrew Union College, of Cincinnati. Temple Emmanuel, of Helena, will get \$2,500 direct and probably as much more from the individual beneficiaries.

Marks Nathan, the "scrap-iron king," of Chicago, whose will has just been filed, left provision for the erection of a synagogue in Jerusalem. He also left instructions that land be purchased in the Holy City and dwellings erected for the free housing of the families of poor and deserving Jews. Of a total fortune of \$120,000, acquired in the buying and selling of scrap-iron, Mr. Nathan bequeathed \$16,000 to charity. The amount named for the expenditure in Jerusalem was \$15,000. A similar sum was set aside for the erection of a Jewish hospital or asylum for Jewish orphans.

It is said that Drake University will receive some \$50,000 from the estate of the late Gov. Drake, of Des Moines, Iowa.

Mrs. Jane W. Ames, of East Dorset, Vt., has recently given \$5,000 to Syracuse University endowment, making her donations to the same purpose during the year \$13,000.

Dr. D. K. Pearsons has given \$50,000 to the Chicago City Missionary Society on condition that the Society raise \$100,000 for the same cause. This is a new contribution made by this liberal benefactor, and the Congregational Church will soon be in a position to accomplish still greater work in behalf of Chicago's unchurched masses.

The International Young Men's Christian Association Training School has received \$70,000 of the \$125,000 needed for an endowment fund. An unknown friend recently sent \$25,000.

Mr. Henry Salzer promises \$5,000 to the fund of the superannuates of the Northwest German Conference, provided \$11,000 besides is raised. He recently gave \$10,000 to Charles City College.

Yale University has received a legacy of \$100,000 from a sister of the late Governor Harrison, of Connecticut, and it is provided in the will that the university may use the money as it pleases. It would be a good deed if more bequests were left to colleges, mission boards, and other institutions to use as they please.

The Carnegie institution at Washington made sixty-six grants last year for special researches, the amount of money given for these purposes being \$150,000.

President Harper, of Chicago University, says that institution will not receive its usual Christmas remembrance from Mr. Rockefeller, but at a later date will receive a large gift. It came later—\$2,000,000. That's all, God bless the man.

At the recent session of the Pacific Conference of the Methodist Church South, a commission of five was appointed to confer with a like commission from the California Conference of our Church to take under advisement the matter of education within the bounds of the two conferences.

The endowment funds of our educational institutions in this country aggregate \$157,000,000, but only \$15,000,000, or less than one tenth belongs to institutions in the southern States, where one-fourth of our population lives. This is an argument and by some of the more intelligent editors in the South against the law imposing a State tax on such funds.

The freshman class at Syracuse University numbers over 700, which is the most remarkable record made in the history of the institution. Chancellor Day announced recently that the University would receive an annual income of \$6,000 from the estate of the late Mrs. Reid, widow of Dr. John M. Reid, of New York city. This income is to be used for a library. It was Dr. Reid who gave Syracuse University the famous Von Ranke Library. This money is in the form of a real estate annuity, the principal of which is over \$100,000.

THE UNIVERSITY COURIER.
FORM OF WILL FOR
THE AMERICAN UNIVERSITY
WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University" a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect), to "The American University" a corporation in the District of Columbia, for the purposes of said University

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

THE UNIVERSITY COURIER

Published by and Devoted to the Interests of The American University.

VOL. XI.

WASHINGTON, D. C., APRIL, 1904.

No. 1.

Published Quarterly. Office, 1419 F Street N.W. }
Subscription Price, Twenty-five Cents a Year }

Entered December 21, 1902, at Washington, D. C., as second-class mail matter under act of Congress of July 16, 1894

The College of History.

We are glad to present to the readers of the Courier a new photogravure of the College of History, which has just been made. Subscriptions for this building were commenced in 1895; the building was begun in June 1896, and was completed in 1898. The structure cost \$176,000; it is built of Vermont marble, and is one of the finest

and most complete buildings for school purposes in the world. It has been greatly admired by the thousands who have visited it. The building is 184 feet long and 95 feet wide. The architect was W. M. Poindexter, recognized as one of the very

best. The contractor is James L. Parsons, than whom there is none better. He has just completed the magnificent apartment house, Stoneleigh Court, built by Secretary Hay, at a cost of about \$2,000,000. Such men as these don't make mistakes in their building enterprises. The interior of the history building is finished in marble wainscoting, with woodwork of quartered polished oak. The

building is in a perfect condition as when handed over by the contractors to the trustees five years ago. A granolithic water-table has recently been placed around the building, which not only adds to its beauty, but has effectively prevented any show of dampness in the basement, which was slightly manifest in the past in time of heavy beating rains, because of the graveley consistency of the

soil. The building contains forty-two rooms and a magnificent lecture hall. Accommodation in this building could now readily be given to 400 students, and there is no good reason why it should be standing idle. It is completely finished and

THE COMPLETED COLLEGE OF HISTORY.

partially ready for occupancy. Gas-pipes and electric wires are completely installed throughout the building; steam and water pipes and radiators are now in place; toilet rooms are completely furnished; city water is at the door, and sewerage is assured. When will the halls of this noble building echo with the tread of earnest students?

Washington as a University Site.

The reasons why Washington furnishes the best site available for the American University cannot be too frequently stated or too strongly emphasized. If you will carefully study the "whys" in the statements which follow, you will discover how they weave themselves naturally into an unanswerable argument, and should convince anyone at all interested in higher education, of the almost criminal neglect which might be charged to those who see these things, and yet will not be moved by them. It was the realization of these privileges and obligations that prompted the projectors of the American University to set themselves to the accomplishment of their herculean task. They could not do otherwise than they did and be true to their convictions. Why at Washington? Look and see.

Washington is the heart of the nation. The life blood flows out from this fountain. Here our civil, political, and social life centers. It is rapidly becoming one of the greatest and most beautiful capitals in the world.

It is built in the midst of one of the finest landscapes in America—one that becomes to the lover of nature a constant source of pleasure and inspiration.

The city of Washington is without parallel in this country for the excellence of its plan; for the number of its parks, squares, triangles and circles; for the breadth and beauty of its streets; the magnificence of its public structures, and the extent of its adornment with historic monuments and the statues of heroic men.

It abounds in historic associations of priceless value. One sees on every hand the private abodes and places for public activity of statesmen, orators, scholars and scientists who have won immortal honors and added unfading luster to the American name.

As the city stands today, it is hardly equalled by any other for the elegance of its private mansions, and the building of new ones, each vying with the other, still proceeds at a rapid pace. Work is now progressing on a magnificent union railroad station, which is to cost in the aggregate fourteen million of dollars, and will be the most beautiful in all its appointments which can be found in the world. Plans for parking, water-ways, bridges and adornments of every conceivable kind, all on a magnificent scale, to beautify the city, and even extending

into the suburbs, have recently been perfected, which will demand the expenditure of fifty million of dollars to be used through a series of years.

Washington is a desirable place for the residence of advanced students and professors, because of the unequalled proportion of its citizens eminent for culture in science, art, letters and philosophy.

It is no less desirable on account of its metropolitan character. Here are gathered annually, and almost constantly, leading representatives from every hemisphere; not only the statesmen of all sections, but also the representatives of every sort of national organization. It is fast becoming the rallying point for every great interest of the country and the world.

Washington has already an aggregation of facilities and opportunities in the way of legislative bodies, courts, of every class, scientific bureaus, and like organizations, as well as libraries, museums, art collections, laboratories, workshops and other sources of help available, to a greater or less extent, to students, such as is hardly surpassed by any city in the world.

Already the total valuation of the collections, literary and scientific, belonging to the Government and available for purposes of instruction, is over forty million dollars, and the aggregate expenditure for the care and extension of them in the work of the Government is over eight million dollars annually. These collections are now growing in size and importance as never before, and all of them were thrown open to the use of students by Act of Congress, brought about through the appeal of the Trustees of the American University.

The Congressional Library, housed in the most beautiful library building in the world, has now more than a million volumes, and will soon outrank any library to be found on the face of the earth.

The Smithsonian Institution, having relations of exchange with every government institution, and society of importance in the world, is prepared to offer to the university unparalleled advantages in the departments of natural history and the arts.

There are in Washington, in all departments of the Government, thousands of experts in a great number of branches or classes of service, from the shops in the navy-yard to the Supreme Court itself; the whole body of them constituting the most important cluster of men of genius and rare attainments in the world. Hundreds of these men could

serve a great university, either as lecturers and instructors, or by furtherance of its scientific work in some other way.

For all these reasons—for what Washington is, embraces, and represents—there is no place like it in America for the culture and sure growth of a love of country. The students here gathered from every quarter, and here taught, not alone by the university, but likewise taught and molded by the spirit and patriotic influences of the city itself, would in time return to their homes more ardent patriots, the better qualified to serve their country, and more resolute in purpose to protect it from perils of every nature and to promote its highest welfare.

There is no such massing of facilities and opportunities for higher education in any single city in the world than can be found in Washington, and to allow these vast and varied resources to remain unused in any definite way in the interest of science and learning, while at the same time thoughtful and aspiring students are compelled to cross the sea to find that in higher education which they ought to be able to find at home, is certainly the worst economy conceivable, and seems hardly less than criminal.

These are some of the reasons why the American University should be built in Washington, and why thoughtful and influential people, who love their country and their kind, should give it their sympathy and support.

College Men.

AND THE OBLIGATIONS WHICH THEY ARE UNDER TO THE STATE.

President Faunce, of Brown University, did well to seize the occasion of the reunion of the Brown alumni to enforce the obligations of college men to the State. America, he rightly said, has the right to look to its college graduates for sturdy, vigorous citizenship and character. All good education, he added, is education in character. You cannot isolate the mind and educate that, and let the rest of the man go.

This is a familiar principle, yet it needs to be repeatedly emphasized. The college man is under peculiar obligations to the State, because he has had peculiar opportunities. What he pays, or what his friends pay for him, in college fees and term bills, represents but a small part of what his education

costs. Heavy endowments, gifts made out of self-denial and sacrifice, and sometimes gifts from the public treasury, have erected the buildings in which he lives, established the professorships of the instructors who teach him, and provided the facilities for his training. Noblesse oblige. The college man has received a great deal, and he owes something.

Whenever college undergraduates are tempted to paint the town red, or to indulge in silly and riotous conduct which brings discredit upon their college, they should remember the simple truth that the public has a right to expect that they will be not more lawless, but less lawless, than other young men, and that, so far from being able to claim exemption because they are in college, they deserve more severe censure on that account if they make themselves a nuisance to society.

And college graduates who shirk the responsibilities of citizenship, who are too busy or too pleasure-loving to engage in the serious struggles of politics and government, should bear in mind that it was not to train drones or triflers that the community poured out its treasure to give them a college education.

The Modest Beginning of Harvard.

On page 297 of the current Catalogue, the modest foundation on which the College was started is recorded. This foundation consisted in an appropriation of £400 by the General Court of the Colony of Massachusetts Bay, which was supplemented in 1638 by John Harvard's bequest of his entire library and half of his whole property, the latter amounting, we think, to something over £800. The College evidently suffered the distresses of extreme poverty during its early years. An evidence of this condition was left in a vote of the Corporation at that time ordering the purchase of six leather chairs on the condition that there should be enough money in the treasury to pay for them. For many years after the foundation of the College, the tuition of some students was paid in farm produce. This is the story of all institutions worthy the name, and is the only sure road to commanding influence. This is the way it has been with all Methodist educational institutions without exception. To be born with two sets of teeth ready for mastication is contrary to the order of nature, yet this is the sort of birth some insist the American University should have, if born at all.

Editorial Notes.

Mr. Thomas Kent, of Chicago, has just given \$10,000 to the University in the form of an annuity in favor of his niece. The gift was gratefully accepted by the Board of Trustees. Mr. Kent expects to increase his donation to the University a little later.

A strange thing happened recently. The Columbian University of Washington was in need of money to pay for a valuable piece of property which they had just purchased. The American University happened to have \$20,000, which had just been received, for which they wanted a fair interest. The deal was quickly made and the two universities became helpful to each other—one getting the needed money and the other securing a fine rate of interest on the loan.

Many of the annual conferences of Methodists have memorialized the coming General Conference at Los Angeles to remove the \$5,000,000 restriction, and permit the Trustees of The American University, with whom all questions of administration properly belong, to open the institution for work, when in their godly judgment it may seem wise. The Trustees are a conservative body of men, and will not rush into an opening until sufficient productive endowment is secured to make a creditable showing. The present high amount is prohibitive, and would have rendered impossible the opening of any university either in Europe or America. Relief must be had if the university is to have any future. The handicap is too heavy.

We stop the press long enough to say that the Baltimore Annual Conference, now in session, by an overwhelming majority, passed this resolution for the removal of the restriction. The University is within its borders. The members are familiar

with its history and needs, and what this great conference says, so unanimously, on this enterprise in its midst, must have great weight with the Church.

President James, of Northwestern University, made a pleasant call recently at the office of the American University. He has been here many times, and is always welcome. Bishop Hurst discovered his sterling qualities long ago, and often consulted him concerning his educational plans. President James has broad sympathy and wide vision. He thinks large things unselfishly. His scheme for the unification of Methodist educational interests will sometime meet with the recognition which it deserves. It is worthy of serious consideration.

In the will of Mr. James M. Appley, which has just been admitted to probate at Springfield, Mass., a bequest of as follows, is among the provisions:—“Should there be established before the death of myself or wife a college or university in the City of Washington, under the auspices of the Methodist Episcopal Church, I bequeath to said college or university, the sum of \$1,000, the income of which shall be used in the payment of a prize or prizes for the best essay or essays on the Christian Religion or subjects connected therewith.”

The President of De Pauw University, Dr. E. H. Hughes, preached the first sermon in the Foundry M. E. Church, of Washington, on Sunday, February 27th, to the delight of a large congregation. In the afternoon he gave a remarkable address to two thousand men at the Mass Meeting under the auspices of the Young Men's Christian Association. On the Saturday preceding he visited the site of the American University with a company of friends, and expressed the heartfelt wish that a building as beautiful and as satisfactory as the marble College of History, were on his campus at Greencastle, Indiana.

The American University.

SEMI-ANNUAL MEETING OF THE BOARD OF TRUSTEES.

The semi-annual meeting of the Board of Trustees of the American University was held in Washington, D. C., on Tuesday, February 16th. It was a largely attended and harmonious meeting.

The treasurer reported that the debt of \$50,000 on the College of History, and \$9,500 contracted in the purchase of additional land to straighten the line of the University's holdings on Nebraska avenue, had been fully paid, and that \$20,000 of funds in hand recently received, had been loaned temporarily at five per cent, making a difference of \$80,000 in the financial situation. The College

of History is in as perfect condition as when completed in 1898. A gift of \$10,000 from Mr. Thomas Kent, of Chicago, was accepted on annuity. The announcement was also made of the purpose of a wealthy gentleman of Pennsylvania to build and equip an observatory at a cost of \$100,000.

A tribute of respect was paid to the memory of the late Judge Wm. M. Springer, who labored faithfully and zealously for the University for twelve years. Judge Springer's valuable library of 5,000 volumes has just been given to the University. It completely fills one room, and will be known as the "Judge William M. Springer Memorial Library."

Dedication was made of University ground necessary for the extension of Massachusetts avenue and two adjacent streets. One hundred and fifty thousand dollars will be appropriated by Congress to open and grade the avenue to the district line. Already much of the work has been done, now reaching as far as the site of the Episcopal Cathedral Fountain—within a short distance of the University—\$200,000 having been appropriated by Congress and used for the building of a handsome viaduct over Rock Creek. This will make a perfectly straight drive on the handsomest avenue in Washington, from the heart of the city to the grounds of the University, the distance being three and one-half miles. The present journey by street car, with a walk of a half-mile, is about four miles. A company has now under contemplation the furnishing of electric street car service to the grounds of the University. The population beyond the site of the University is increasing at a very rapid rate. Twice in the past street car service to the University grounds has been proposed, but it has been strenuously opposed and prevented by the officers of the University, on the grounds that such improvement would greatly increase the University's already heavy taxes, and that there was no necessity for such service until the presence of students demanded it.

Two additions were made to the membership of the Board of Trustees—Hon. Marlin E. Ohmstead, Pa., and Hon. Charles Dick, Ohio, both members of Congress. The officers of the Board for the ensuing year were elected as follows: David H. Carroll, president; A. B. Browne, vice-president; Charles W. Baldwin, secretary; Charles C. Glover, treasurer. The usual committees were appointed for the work of the year, and the officers of the University continued as followed: Bishop C. C. McCabe, chancellor; Bishop A. W. Wilson, vice-chancellor; Dr. W. L. Davidson, secretary; Dr. John A. Gutteridge, financial secretary, and Rev. Albert Osborn, registrar.

The Board was unanimous in its opinion that actual work should commence as soon as productive endowment sufficient for a creditable opening

could be secured. A strong committee was appointed to look after the interests of the University at the coming session of the General Conference, and there was but one opinion as to what that course should be.

Merging of Washington Universities.

Associated Press dispatches have recently misled the people slightly concerning the consolidation of three universities at the capital of the nation. The average newspaper reporter possesses a vivid imagination, and can without much difficulty transform a mole hill into a mountain. Many, many steps are to be taken before the consolidation proposed can be accomplished. The matter has never had a moment's consideration by the Board of Trustees of the American University. The National University of Washington has nothing but a school of law. Columbian University, which has in the past been known as a Baptist institution, has been in existence since 1821, and has written brilliant history. Many graduates of Columbian University are occupying prominent positions in the City of Washington. President Needham, now with the University, is a progressive man, who is bringing many things to pass. The charter has been so changed recently that Columbian is no longer a denominational institution. It is now seriously proposed to change the name, as it is so nearly like New York City's famous university, Columbia, that much confusion has arisen. It has been suggested to call it Washington, or The George Washington University. No definite decision has yet been reached.

Ex-Governor John Wesley Hoyt has, for some years, been vigorously championing the cause of the University of the United States to be founded and supported by the government. He is widely known, and had given many years of his life to the furtherance of educational ideas. His University of the United States has not yet materialized. He is now turning his thought and energy toward the merging of the three universities at the nation's capital, on a scheme which seems very plausible when presented by him. He proposes that the name, American University, be retained and also in a measure the post-graduate idea. He has unfolded his plans to a few of the Board of Trustees, and has also spoken personally with Chancellor McCabe concerning it. He was, of course, treated with that courtesy which his position and mission demanded, but was given no assurance that any such coalition as he proposed would meet with any favor. It would take much persuasion to induce the Trustees of the American University to drop the denominational feature out of their charter. Thousands of dollars have been given for special and specific purposes, which can be carried out under the present plan, but which could not be accomplished without friction under any union which might take place. While many

of the great denominations are represented in the Board of Trustees of the American University, the leadership has up to the present time been in the hands of the Methodist Episcopal Church. The members of that denomination have been loyal to it in their sympathy and in their gifts. To the end of the chapter it will stand not only for the honor of Protestantism and Americanism, but also for Methodism, and will rigidly adhere to the high purposes of exclusive post-graduate work which was in its beginnings the chief corner-stone.

Woman's College of Baltimore.

The lurid flames of the Baltimore fire revealed a debt on the Woman's College of that city, of almost \$500,000. The college lost none of its property in the fire, but a large number of the trustees, who are reported to have been large contributors to the funds of the college, have suffered serious loss, and will not be able to continue their benefactions.

This college is one of the unique institutions in our American educational life. It has attained national reputation, and the daughters of representative men, of all denominations, have been sent to this school, because of its unparalleled advantages. Dr. John F. Goucher, the president, and his noble wife, have, by their faith and courage and splendid generosity, made possible this magnificent school. They have borne more of the financial burden than they should have been called upon to bear, but they did it gladly and the Church honors them.

It was an impressive hour at the recent meeting of the college presidents, when Dr. Goucher, who had left Baltimore while the fire was still burning, with choked voice told his story. Promptly and properly the college presidents passed the following resolutions:—

Resolved, That we learn with great sorrow of the calamity that has befallen the Woman's College of Baltimore, because of the recent conflagration in that city.

Resolved, That it is our judgment that the Methodist Episcopal Church should undertake to raise in the immediate future \$500,000 to meet the emergency in which the institution now finds itself, and that the president and secretary of this Association be requested to publish this action in the papers of the church.

Resolved, That it is the judgment of the Association that the cause of the Woman's College of Baltimore should be presented to the General Conference for its financial indorsement, and that we hereby request the secretary of the Board of Education to present the matter to the Committee on Education, and through the committee to secure such indorsement."

It was the only righteous course to pursue, and there will be a quick and glad response all over the Church, and this institution will be lifted out of peril. The college presidents practically said to the Woman's College of Baltimore: "You have in twenty years rolled up a debt of \$500,000; roll on, our hearts are with you. Let the Church pay the debt."

A little later they said to the American University: "You have waited twelve years for \$5,000,000: wait on, our hearts are—where?" Suppose that the projectors of the Woman's College of Baltimore had been compelled to wait until they had secured their present endowment and assets before opening a door or calling for a single student, the great probabilities are that there never would have been a Woman's College of Baltimore. But with faith in the enterprise, they commenced, adding building and endowment as it was needed. The opening of the institution gave manifestation of its necessity, and the growth has been phenomenal. The Church must and will lift every dollar of its debt.

American Post-Graduate Students.

An argument against a post-graduate institution was advanced at the recent meeting of the Methodist college presidents, based on the fact that there were but 5,502 students, more correctly 6,665, pursuing post-graduate work in the United States. It is a matter of surprise that we have even as many as that, when the fact is considered that there is not a single purely post-graduate institution in the United States, and that many of the institutions which are attempting to do post-graduate work are not even doing creditable collegiate work. The number attempting, on this side of the sea, to get that which is so inadequately furnished, is surprisingly large. Reliable information reveals the fact that an equal number of American graduate-students are taking advantage of the better facilities abroad, and are pursuing post-graduate work on the other side. Some of them, of course, are there for language, and for the touch which life abroad gives them, and they could not be kept in America even if the same, or better advantages were offered. But the fact, nevertheless, remains that not far from 13,000 American graduates are pursuing post-graduate work. If the American University were open on the large plan proposed, doing exclusively post-graduate work, with the surrounding advantages which the capital of the nation would give to it, and with the educational resources of the Government, in its twelve great departments, in which have been invested nearly \$40,000,000, and for which annually \$8,565,000 are expended for maintenance and enlargement, and if we could get one-tenth or even one-twentieth of the total number, which is certainly within the bounds of probability, we could certainly show some necessity for our existence. Another important fact must not be overlooked. America is becoming a world power. The thought of the world is turned toward us. Attracted by our successful experiment in government, graduate students of all foreign nations are anxiously looking this way, and if a post-graduate university of commanding influence at the fountain head of the nation were accessible, multitudes of such students could be

secured. Many applications which are now on file in our office, bearing foreign postmarks give proof to this assertion. The necessity for such an institution must be apparent to all who have broad vision and full acquaintance with the facts in the case. The greatest educational need of the hour in America is for the building of a great and strong post-graduate university at the nation's capital, which shall be more than the equal of any other such university to be found anywhere.

Congress has just voted \$175,000 toward the completion of a trunk line sewer on Arizona Avenue, in the northwest section of the City of Washington. This was needed for the site of the American University. City water is already at the door of the College of History, so that every needed requirement for the opening and occupancy of the building has been met.

GLORIOUS GIVING.

Boston University has received a bequest of \$625,000 by the will of James Woolson, of Cambridge. The greater part of this amount will not become available for some time. By the provisions of the same will President Huntington and Dr. W. F. Warren receive \$2,000 each.

Dickinson college has come in possession of \$13,000, by bequest of Rev. John Z. Lloyd, recently deceased, a member of Central Pennsylvania conference and a trustee of the college.

Lord Strathcona has given \$20,000 to Manitoba university to extend its scientific work.

Mrs. Annie F. Moore, formerly a teacher in the Altoona high school, has bequeathed \$6,000 outright to the Tuskegee institute of Alabama. After other bequests have been paid, the residue is to be divided between Tuskegee and the Lincoln university.

John A. Creighton has given a further sum of about \$250,000 to Creighton University, a Catholic institution at Omaha, Neb.

The will of Captain D. G. Parr, a wealthy steamboat owner of Louisville, provides \$400,000 for the establishment of a home for aged and indigent women. The will also provides that after the death of the last of Captain Parr's three children his realty, valued at \$500,000, is to go to the home, which is to be known as Parr's Rest.

The Studebaker brothers have decided to erect in South Bend, Ind., a handsome building for the Young Men's Christian Association as a memorial for the five Studebaker brothers. This building will be one of the most costly structures ever built in South Bend. Everything that such a building should contain will be included, such as lecture rooms, gymnasium, dormitories, reading rooms, swimming tank, bowling alleys and baths, the sum of \$250,000 having been appropriated for the building, although it is said that should the necessity arise, more money will be forthcoming.

A Welshman, Mr. Robert Davies, has given the Welsh Calvinistic church £125,000 (\$675,000). The money consists of debenture stocks in two of the great English railways.

W. J. Bryan will install at Salem, Ill., a library to cost \$15,000 in memory of his father and mother.

Bishop Potter has just purchased thirty five acres of shore front land near New Haven, Conn., which he will convert into a fresh air summer home for New York children, in whom he is interested.

The Western Advocate says: "It is announced at Findlay, O., that Mr. Lewis Dukes, a wealthy retired farmer in Hancock county, has deeded his \$10,000 mansion in Findlay to the Elizabeth Gamble Deaconess Home Association of Cincinnati, to hold in trust for the children's ward in Christ's hos-

pital. By the terms of the deed, Mr. and Mrs. Dukes are to remain in possession of the property during their lifetime, and at their death it is to revert to the beneficiaries.

Wm. Shaw of Troy, N. Y., left by will \$10,000 to the Baptist church, and \$10,000 to Colgate University.

By the will of the late John Lyman of Syracuse, the Syracuse university will come into possession of \$100,000.

Mrs. George H. Beckwith of Denver has just erected and presented to the town of Bennettsville, S. C., a handsome public school building.

By the will of Mr. Charles Tyler of Baltimore, Md., \$5,000 is left to the Baptist Publication Society, \$5,000 to the Missionary Union, \$1,000 to Brantly Baptist church, Baltimore.

Miss Mary P. Ropes' will, recently filed for probate in Springfield, Mass., bequeathed \$1,000,000 to education. Harvard, the Tuskegee institute, the Carlisle (Pa.) Indian school, Berea college, and institutions in New York city, Washington, Cincinnati and Urbana are beneficiaries. Miss Ropes' father amassed his fortune in the paint business in Cincinnati.

Henry Phipps, the steel magnate, has given \$20,000 to Johns Hopkins hospital to establish a separate out-patient department for consumption.

The will of the late Peter B. Brigham, of Boston, who left \$5,000,000 toward founding a hospital to bear his name, is sustained by a decision handed down in the United States circuit court.

The will of the late Washington Corrington was filed for probate recently. He leaves his entire estate, which he valued at \$750,000, for the founding of an educational institution at Peoria, to be known as Corrington Institute and University. His estate is to be managed by trustees until it reaches \$1,500,000, when work is to begin.

The will of former Congressman James J. Belden was made public recently. The valuation placed upon the estate is \$5,000,000. Local institutions are given \$325,000, of which Syracuse University will receive \$100,000 and the Syracuse College of Medicine \$50,000. The widow is given \$1,000,000. To Frederick W. Baker, an executor of the will, \$50,000 is left, and Inter-State Commerce Commissioner Martin A. Knapp, the other executor, is given \$10,000.

Under the will of William Wyman, the philanthropist, Johns Hopkins University will receive his estate, valued at more than \$500,000, upon the death of his daughter, Mrs. Heleu Wyman Rollins, widow of Rev. Samuel Rollins. During his life Mr. Wyman made large gifts to the University.

CONTENTS OF THE CENTURY FOR MAY.

Portrait of President Roosevelt	Frontispiece.
The Mother of Parliaments.....	Henry Norman, M. P.
The Last of the Crocaboiches.....	Leon Gaipon.
Little Dog. A Story.....	Gouverneur Morris.
A Belated Recognition.....	Francis E. Leupp.
The Sea-Wolf. V. A Story.....	Jack London.
Spring.....	Alice Williams Brotherton.

History by Camera.....	George F. Parker.
Tolstoi at Twenty-nine, as an Officer in the Crimean War.....	George T. Tobin.
Unhappy Korea.....	Arthur Judson Brown.
Korea, the Bone of Contention.....	Homer B. Hulbert.

Why not Open for Work?

A very large number of the Conferences of the Methodist Episcopal Church have passed resolutions memorializing the coming General Conference, at Los Angeles next May, to remove the \$5,000,000 restriction from their resolution commending the work of the American University, and give the Trustees of University the privilege, which certainly belongs to them, of opening the University for work when, in their best judgment, the time has come. There is grave doubt as to whether the General Conference had either legal or moral right to impose such a restriction in the first place. Its approval in a matter of such national importance was, of course, desired, but all details of work and administration rightfully belong to the Trustees, as in the case of all other Methodist institutions of learning. Conditions have greatly changed since the General Conference at Omaha, twelve years ago. Great gifts were not secured as rapidly as was hoped, and the time of opening has been delayed from year to year. Large success has nevertheless come, and the present assets almost equal those of the great schools of Methodism with a half a century of history behind them, and a great army of alumni pushing their interests.

The Church and the country are demanding that the American University open for work. Large subscriptions are being withheld because no movement

in this direction is being made. People will not keep on giving up to the point of \$5,000,000 without seeing some actual work commenced. Gifts are promised when the doors are opened. Fifteen hundred students have knocked for admission. A great and beautiful building stands unoccupied. Very heavy taxes are being paid, which would be remitted if actual teaching work were being done, enough to half pay a magnificent professor. Productive endowment to adequately provide for several important and popular departments could soon be made available with the money now on hand, and that which is pledged and may drop into the treasury at any time. There will be no undue haste. The Trustees will do only the creditable thing. The necessity for such an institution can only be discovered by opening it. If there is no demand for it, as is boldly asserted by those who are most strenuous in having the \$5,000,000 restriction retained, why waste so great an amount of money and then fail in the end. Why not open? Then great gifts would come. Let the General Conference play fair, giving Methodism, through its official recognition, a chance and a right to share in the glory which the future years will bring, but let it refrain from dictating as to matters of administration which belong solely to the Trustees. This seems a righteous demand, and should meet with hearty approval.

Officers of the American University.

Chancellor - - - - BISHOP C. C. McCABE, D.D., LL.D.

The University and the General Conference.

The General Conference of 1904 is now a thing of the past. The complete record has been written. The American University fared well at the hands of this great body and secured practically all it asked for. The request of the Trustees of the University, backed by the memorials sent up from fourteen annual conferences, that the restriction requiring that five millions of endowment be secured before the University be opened for work, be removed, met with generous response at the hands of the Committee on Education and afterwards by the General Conference as a whole. The arbitrary restriction was removed and all questions of management were left entirely in the hands of the Trustees of the University. Matters were discussed long and fully by the Committee on Education. Four sessions were held, at which only the American University was discussed. One of the evening sessions lasted fully three hours. Friends of the University had opportunity of appearing before the sub-committee which had been appointed, to present all facts in their possession. It was simply a question of the best and wisest thing to be done. The sub-committee, before all the memorials had reached them, brought in a report in accordance with the recommendation which had come up from the College Presidents' Association, and which had also been seconded in the Episcopal address read at the opening of the General Conference; that the approval of the General Conference should be conditioned entirely on the pledge of the University authorities that no work of any kind should be attempted before five millions of endowment had been secured. This report, however, was not satisfactory to the Committee on Education. Dr. J. R. Day, the President of the College Presidents' Association, took occasion to say in a very able speech, that he had discharged his duty as the President of the College Presidents' Association when he had passed their resolutions over to the General Conference, and that in speaking for himself on this matter he believed that the requirement of five millions was absolutely prohibitive and would prevent forever the opening of the institution. He strongly recommended a reduction from five millions to two millions. Amendments and substitutes followed each other quickly, some advocating a re-

striction of one million, but the majority of the committee seemed to feel that this was a matter of administration which belonged exclusively to the trustees; that, as they were responsible for the maintenance of the institution and for the gathering of money, that they should say when the institution should be opened; and that as they had so far managed the affairs of the institution with credit, keeping it free from debt, that they could be trusted with all questions of management, and that no opening, of course, would be attempted until it would be creditable to both the Church and the institution. Nothing but kindly words in the whole discussion were spoken concerning the American University. The college presidents and college professors who spoke, took special pains to express their interest in the welfare of the institution and their desire to see it succeed, and if they did not fall in quickly with the view of the majority, it was simply because they looked at the matter from a different standpoint and felt that ultimate triumph would come more certainly by holding the standard high and not opening until at least five millions had been secured. It is the expectation of the Trustees of the University not to stop at five millions or ten millions, but they have held that five millions were not needed for a creditable opening, and that that amount could never be reached until some opening was effected. The seeming distance to the consummation was paralyzing to all effort. Men of means who desire to see the giving of their money result in some good during their lifetime would not invest it in an enterprise where the time of its opening seemed so far away. Some of the committee were consistently opposed to any university whatever, claiming that such universities in America had been failures forgetting that none had ever been tried at the Nation's Capital, where facilities for real university work are more extensive and valuable than can be found in any other center of this world. This view, however, did not in the least affect the question at issue. The American University had been established and had advanced too far for retreat. The only question was what to do with it. To open up the way of advancement by removing the restriction, or leaving it there to discourage the trustees, paralyze its work, and probably in the end to bring defeat and disgrace. Both a majority and minority report

went from the Committee on Education to the General Conference. The reports were almost identically the same, save that the minority report had no word of cordial approval and commendation, and left the responsibility, rather than the management, with the trustees. It practically sought to withdraw any commendation whatever. The discussion on the floor of the General Conference was short. The minority report was laid upon the table and the majority report was adopted by a large majority. This report was as follows:

First. That the American University has our cordial good will; we believe that it should not be opened until the original condition of \$5,000,000 of productive endowment be raised; nevertheless, we leave its entire management to the Board of Trustees.

Second. That in thus renewing our approval of the American University, we do it with the understanding that the present Board of Trustees shall secure the amendment of its charter so that in the future the Board of Trustees shall be approved by the General Conference of the Methodist Episcopal Church.

A little later in the day, the last one of the Conference, the Trustees of the University were approved by vote of the General Conference, and the following strong resolutions of congratulation and commendation were adopted:

C. B. Graham said: "We have passed on one of the greatest interests connected with Methodism, and we have made no mention in regard to the persons connected with it; and at this late hour we shall only offer as a notice and endorsement the following, which has been endorsed by members of the Conference one by one:

Whereas, Our greatly beloved and lamented Bishop, John F. Hurst, and his collaborators in behalf of higher Christian education, laid in the American University at Washington, D. C., a foundation which, when put into active service, will prove a blessing to a great multitude of our citizens; and,

Whereas, This Christian Institution has met with the hearty approval of the Protestant Churches of America, as shown by their words and works; therefore,

Resolved, That we record our appreciation of the victories accomplished, and emphatically re-endorse the former commendation of this conference of this noble and gigantic enterprise.

Second, That we most heartily endorse the selection of Bishop C. C. McCabe, D. D., LL. D., as Chancellor of this Institution, and cheerfully recommend him and his enterprise to all philanthropists throughout the land as worthy of their contributions."

A determined effort, under the leadership of Bishop McCabe, will now be made to swell the present endowment to two millions, when, with the present completed building, the College of History, and the building of the one now commenced, the College of Government, the institution will be in a position for a creditable opening for work. Bishop McCabe brings to the work a great enthusiasm. He believes in the necessity of the University, and sees in it a healthful influence to meet the advancement of Romanism in the Nation's Capital, and he has determined that the enterprise shall somehow draw upon the Church's heart until the response is sufficient to realize the dream of its founder and its friends,

Bird's-Eye View of General Conference.

WHAT WAS DONE TOLD IN BRIEF SENTENCES FOR BUSY READERS.

The General Conference at Los Angeles, which closed at midnight Saturday, May 28, was one of the most important in the history of the church and marks the beginning of a new era. Among its important acts were the following: It placed six general superintendents upon the superannuated list—Bishops Merrill, Andrews, Foss, Vincent, Walden, and Mallalieu—and fixed the status of superannuated bishops. It elected eight new general superintendents (one of whom, Dr. J. R. Day, afterward resigned)—Bishops J. F. Berry, Henry Spellmeyer, William F. McDowell, J. W. Bashford, William Burt, L. B. Wilson, T. B. Neely, and J. R. Day. It elected four missionary bishops—W. F. Oldham and J. E. Robinson for Southern Asia; I. B. Scott for Africa, and M. C. Harris for Japan. It decided that the General Conference could not, under the constitution of the church, district the bishops, though the bishops could assign one of their number to the same conferences for a quadrennium. It voted not to restore the time limit upon the term of pastors. It refused, by a vote of 441 to 188, to change the law relating to amusements, known as Paragraph 248 of the Discipline, though it adopted a paragraph relating to the same subject to be printed in the Discipline under the general heading of "Special Advices." It provided for the consolidation of the benevolent societies, though it will in all probability be several years before the consolidation is effected by the commission appointed for the purpose. It provided for the unification of the manufacturing plants of the publishing houses, and appointed a commission to adopt and carry out a plan of unification during the quadrennium. By a vote of 517 yeas to 27 nays, it submitted to a vote of the members of the annual and lay electoral conferences an amendment to the constitution of the church, authorizing the General Conference to "elect a bishop or bishops for work among particular races and languages, or for any of our foreign missions, limiting their Episcopal jurisdiction to the same, respectively." This proposition is known as the Merrill amendment. Under it, if desired, a bishop may be elected for German conferences, for European conferences, for conferences in China or India or Japan, for the colored conferences or for Africa or South America. In countries where we now have missionary bishops, the adoption of the amendment would involve only the dropping of the word "missionary." It adopted without a dissenting vote the report of the committee on education exonerating certain theological schools from the charges that they were disloyal to the doctrinal standards of the church. It relieved the American University from the arbitrary \$5,000,000 endowment restriction, leaving all questions as to opening in the hands of the trustees.

It reaffirmed the attitude of the church on temperance and created a church temperance society, auxiliaries of which it is desired shall be organized among young people in every church. It provided for increased effectiveness in the deaconess movement.

The conference was in some respects revolutionary, but the important changes made were not hastily adopted. All were carefully considered in committees and expressed the deliberate conclusion of some of the most thoughtful and devoted ministers and lay members of the church. It will be months, and perhaps years, before the church fully realizes the significance of many acts of the General Conference, but we firmly believe that when the church has adjusted itself to them they will be found to have been wise. The General Conference cost about \$140,000. Of this Los Angeles raised in cash \$25,000, besides providing the place of meeting and certain local expenses amounting to about \$10,000. The church paid through the Conferences \$91,000. The deficit—\$14,000—was advanced by the Book Concern. Special efforts are to be made to secure the amount from Conferences which did not meet their apportionments. One distinctive feature of the General Conference was the close attention which the delegates, individually and collectively, gave to their work from the opening day down to the very last hour of the session. This is all the more remarkable when one considers how many temptations to distraction and scattering abounded in the region about Los Angeles. The seashore is only an hour's ride away, and in the other direction, at an equal distance, are picturesque mountain peaks, with glorious scenery in view, orange groves, palm avenues, vineyards, and all sorts of tropical attractions, alluring in extraordinary measure to those whose lives have been passed in the North and East. Yet, day by day the delegates were in their places in the Conference and at their committee work; and on the last night of the session, after twenty-five days of absorbing toil—much of it carried on in midnight hours, and even the Sabbaths being crowded with evangelistic labor—the body of the Conference seemed to be present, not many vacant seats appearing. The last roll-call showed 602 present. In view of the fact that scores of delegates had been called away by sickness or death in their homes, or by exigencies of one sort or another, and that the adjournment took place on Saturday night, and that railroad and steamer engagements required some to spend Sunday in San Francisco, a night's ride distant from Los Angeles, and in view, further, of the fear that had been haunting the minds of many during the closing week that the body might be left without the legal quorum of five hundred at the end of the session, this final record of attendance becomes all the more remarkable.

It was clear to all who studied the doings of the Conference that the delegates were in Los Angeles not because of the trans-continental pleasure jaunt, nor in view of the attractions of Southern California, but because they had been entrusted with certain duties to perform, and they were in conscience and honor bound to stand by their work until it was finished. This spectacle of honest, earnest, steadfast devotion to duty deserves to be emphasized before the church.

Two Washington Universities.

The Knights of Columbus have sent to the Catholic University a check for fifty thousand dollars to endow a Chair of American History. The check measured ten feet by four in size, and was drawn on the Union Trust Company of Providence for the amount mentioned. The Catholics are contributing largely to their institution. In this they set an excellent example to Methodists with respect to the American University, as THE CHRISTIAN ADVOCATE has often said, which is too far along either to be given up or to be allowed to stand still.

That something should be done is evident if the Methodist Episcopal Church is to maintain its prestige in Washington.—*N. Y. Christian Advocate.*

A handsome Year Book of The American University has recently come from the press. It contains thirty-six pages and is profusely illustrated. The book contains a complete record of the growth of the institution and sets forth its plans for the future. Any friend of the University desiring a copy will be welcome to it on application.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

This issue of the Courier will reach many who, according to their generous subscription, have one or more payments falling due this present July 1st. Notices to this effect have been mailed to all subscribers. Please do not neglect them. Let check or money order come at once. It will greatly simplify our bookkeeping and save us postage. Will you not attend to this promptly? Its coming will greatly assist us, and relieve you from thinking about it. No matter how small the amount may be, let it come.

Philadelphia gives a glad welcome to Bishop C. C. McCabe as resident Bishop. The Philadelphia Methodist says:

"C. C. McCabe is now our resident Bishop. He is not a stranger among us, for he dwelt among us and was one of us during his Secretaryship of the Church Extension Society, whose interests he served with signal success. He is a gentleman of noble qualities, and will prove a very desirable and loving associate with Bishop Foss, who we learn will tarry with us, devoting his time mainly to literary pursuits and in cultivating, fostering and maintaining those local interests which he for the most part created—the City Mission and Church Extension Society of Philadelphia, and the Philadelphia Collegiate Institute for Girls, as well as other interests with which he was vitally connected and deeply interested. These will in no way clash with the work of Bishop McCabe. He will find ample opportunity for the use of his remarkable genius in moving the hearts of the people to the doing of greater and grander things than perhaps have ever been done in Philadelphia, for he is a great inspiration, a great leader of the sacramental hosts of God's elect, who ever march at his command. No burden that can be reasonably expected for him to bear will be shunned or slighted. The ring of victory is on his lips. "Onward and upward" is his rallying cry, and he ever has the trumpet at hand to call for service or sacrifice. Nor does he wait long for reinforcements; he leaps into the enemy's camp a conqueror by his very presence. None dare deny him. What a mighty power he is, dispensing blessings ungrudgingly, caring nothing what sacrifices it may cost him of time, labor or money, if so he can gain a foothold for the Church in any part of the earth. He is the outspoken foe of every evil. He may not accept the methods others may prescribe for him, but none can question his fidelity or honesty. He is one of

God's great captains who has never known defeat, and our people only wait to be marshalled by him in any cause he champions. It is expected that he will take up his more permanent abode with us early in the fall, when a royal reception will be given him, we trust, by our Social Union and all Methodists hereabout."

Up until almost the very hour that the Committee on Episcopacy reported on episcopal residences, which report was on motion accepted without debate, it was expected that Bishop McCabe would be located at Washington. This would have seemed appropriate in view of his relation to the American University. But the powers that be ordained otherwise. The good Bishop, however, is constantly "in the saddle," and possibly being in Philadelphia, which is such a loyal Methodist city, with New York and Washington so easy of access, he can achieve the best results for the great work of higher Christian education to which he has pledged himself.

Greetings to Bishop Wilson.

Bishop Luther B. Wilson. It gives us great joy and satisfaction to pronounce this name this way. We have been mentally doing it for several years, so that we are not totally unaccustomed to it. We were confident that the time would come when the Church would recognize the worth of this manly man and make him one of her general superintendents, and are therefore not surprised at the happenings at Los Angeles. Bishop Wilson has steadily grown in favor with the bishops and preachers of Methodism for some years. He has often been spoken of in times of emergency for positions of trust in the Church. He has been successful and beloved as a pastor and a presiding elder, displaying administrative ability of a high quality. He greatly honored Methodism as the fraternal delegate to the Methodist Church of Canada. He greatly widened his acquaintance as President of the Anti-Saloon League of America, and was so wise in administering its affairs that the prayers and sympathies of this great organization helped largely to swell his vote at the General Conference. The demand was that among the eight bishops to be elected several of them should be from the ranks of the pastorate—men in close touch and sympathy with the needs of the average preacher; men who could be wise without conceit, strong without being autoeratic, scholarly without being pedantic, genial without fawning, an aristocrat without knowing it. Luther B. Wilson seemed in the eyes of his brethren to meet all these requirements, and so he was made bishop. His presence won favor even when he was not well known. He is destined to be greatly beloved, and will accomplish great good for the Church. The Baltimore Conference is jubilant over the outcome, and Washington and Baltimore are vying with each other in according receptions to this noble man and his good wife. They richly deserve it all.

Welcome to Bishop Cranston.

A cordial welcome awaits Bishop Cranston as the resident Bishop in Washington—the nation's capital. We have already had a glimpse of him in a hurried visit, and have, in an imperfect way, shown him a little of the love we bear him. When he comes to us in the Fall we will show him how we do things.

Washington Methodism needs the inspiring leadership of such a man as Bishop Cranston.

We have great interests at stake here. Methodism must keep step with the marvelous development of Washington. New and commanding churches are needed in the rapidly-growing semi-suburban districts. He will, of course, be a warm friend and ally to our great university. He comes to live in the most beautiful and interesting city on the continent. Here he feels the heartbeat of the nation, and is at the center of the civil, political, social, and, to a large extent, intellectual life of the republic. It is a great opportunity for a man, and those who know the genial and friendly Bishop, and are familiar with his statesmanlike ability and his genius for bringing things to pass, feel he is just the man for the place. He is in the prime of life and possesses unlimited capacity for work. He will get a firm grip on every good work in Washington and will be greatly beloved. We anxiously await his coming, and promise him loving loyalty.

The George Washington Memorial University.

Strange things are happening almost daily now in the educational life of Washington. One must needs secure the latest afternoon edition of the daily paper to keep fully up with the procession. A few months ago the Columbian University, which, according to its charter, had been a denominational institution, nominally under the control of the Baptist Church, had its charter changed and became practically an undenominational institution. A few more days passed and the announcement came that at a meeting of the Board of Trustees of the University, the name of the institution had been changed from the Columbian University to the "George Washington Memorial"; that the name "Columbian" would be retained in connection with certain collegiate work, and that the new name would apply to the university, in which graduate work would be done. This change of name was brought about largely to make available for the University the work which had been done by the George Washington Memorial Association in the gathering of money for the building of the George Washington Memorial Hall. This society had not been achieving remarkable success, but felt that through a coalition with the University the work which they had set themselves to do could be better and more

speedily accomplished, and that all they hoped for could be conserved in the connection with the University. Trouble, however, seemed to be ahead. It now happens that the name "George Washington Memorial" has been for some time incorporated, and if the University authorities use it it can only be done after a lawsuit. Many vigorous protests are being made against the using of the name "George Washington" in connection with the Columbian University, the claim being made that it was not a university of this type that George Washington favored and for which he left certain unrealized bequests and about which he spoke so much in his letters, and that to give that name to such a university as is contemplated would be unfair.

The Columbian University has been organized since 1821, and has written a splendid history. It has been admirably handled by its learned and energetic presidents, and has been blessed in its faculty by many noble men. Many prominent men in the business life of Washington have been graduates from this university. Its best days are still to come. Dropping the denominational feature from its charter and enlarging its pathways by uniting with the George Washington Association, it will now be in a position to make demands upon Congress for help, which it is certain to receive, and it will grow into a great institution.

There is now but one university open in Washington floating the denominational banner. The Roman Catholic University has no desire to have its charter changed, taking out the denominational feature, and the flag of the church floats proudly over its rising buildings. Shall not at least one branch of the Protestant church, gloriously aided by others of like faith, hold on to its well begun work, steadily advancing to the high consummation of which its founder dreamed, with the denominational flag floating proudly and triumphantly over the completed work.

To the Pacific Coast and Back.

The General Conference at Los Angeles, California, was an expensive thing for the Church, but it gave multitudes of people an opportunity, some practically without expense, and others at very low rates, to see for the first time many of the great wonders of the country we call our own. Let a few hurried sentences tell how things affected us.

With short time and small means at one's disposal, if the journey to the Coast is to be made in May, let it be out over the Santa Fe, returning by the Southern Pacific, Denver and Rio Grande, and then by any route east of Denver. The Southern Pacific by way of New Orleans, of course, has its special charms in May, and the finest scenery, possibly on any railroad in the world is on the Canadian Pacific. I speak, however, as I reminded you above, of a journey when both time and means are limited. There is no finer train in this country than the "California Limited" on the Santa Fe. The equipment is perfect, and the dining car and eating house service conducted by the Harveys is everywhere recognized as being the very best the country affords by any line of railroad. With observation car, library, barber shop, dining car and luxurious sleeper, what more could be asked? The hours slip pleasantly by, with congenial companionship, and with such surroundings the journey is robbed of its tediousness. To the jingling of the rail one day, when nearing the end of the outward journey, looking back over the comfortable two days which had been passed, the little ditty which follows came to be. It was a spontaneous tribute, as far as poor verse could give, to the joy of all kinds which the journey had brought. The Santa Fe Company pays me nothing for this advertisement, nor shall I make any demand for free passes. I claim no poetic gift, but after a good, hearty meal one afternoon, in the book on the table in the library car, in which guests record the impressions of their trip, to the music of the rail, I jotted down these imperfect measures:

Of all the roads that pierce the West
The Santa Fe is much the best,
Its train, equipment, and its men
Conspire to make the trip a gem
That shines through future years.

It sets up meals fit for a king,
This song all patrons love to sing;
Its linen white, its butter sweet,
With everything that's good to eat;
Set up in splendid fashion.

Along the way such sights you see
As cause all skeptic doubts to flee;
The trees turned stone, the Canyon Grand!
Which shows the strength of God's great hand,
And proves His right to rule.

Stories of ancient tribes and lone
You find here written in the stone;
Their homes found in the cliff or rock,
No need of door with bar and lock;
These came with civilization.

The splendid verdure of the hills,
The silvery trickle of the rills,
The ripening fruit in orchards vast,
The clouds like sails on mountain mast,
Enrapture those who see.

The ocean's roar salutes the ear,
The spires of Angeles appear,
The long sweet journey 's almost done,
I shout for comfort and for fun:
The Santa Fe, the road for me!

There is little of especial interest, in the way of scenery, to the traveler at all familiar with the eastern part of our country, until Colorado has been entered, when mountains begin to break upon the view. Many of these are snow-capped, but otherwise are dark and barren. One who expects here to find the mountains covered with green, so restful to the eye, which may be found on the lower hilltops of the Alleghenies and Blue Ridge, are grievously disappointed. As one advances farther West this absence of green, on these vast slopes, becomes more noticeable until at last the green disappears entirely, save as a dull type of it is found in the acres of sagebrush which spread themselves across the great desert.

The appalling thing is the absence of water. We were hoping to see a river, or at least a brook in that chasm yonder ahead, but when we approach it we find it absolutely dry, and yet giving evidence where, in the time of freshet, it had been swept by a mighty torrent. At certain places we were told that rain had not fallen for three years. Within a few miles of the Grand Canyon it was said that rain had not come for eleven months, but when those Methodist excursionists struck the Canyon the heavens were opened and rain, mixed with snow, came down to gladden the parched earth. Will any one of the two thousand Methodists who spent that Sunday, April 28th, on the rim of the Grand Canyon ever forget it? Nineteen engines and ninety-three Pullman cars crowded the extemporized switches which had been built. The engines were dead, fires having to be extinguished because there was no water to fill the boilers, the water train having been wrecked on the journey up the hill from the main line, and all the water obtainable was that which had to be carried up on the backs of burros from the springs in the Canyon three thousand feet below the rim. A new track had to be built around the wreck and all trains were delayed from twelve to twenty hours. Food ran short in the dining cars. The Bright Angel Hotel fortunately had a good supply of ham and eggs, which were regularly served morning, noon and night at the uniform price of 75 cents per meal. Sleeping cars were without water for drinking and washing purposes, and some of the dining cars on the special trains had to restrict their passengers to two meals a day. What a Sunday it was! The open-air services on the rim of the Canyon will never be forgotten by those who participated in it, and at the vesper

hour, in nearly all the Pullman cars, services were held, with brief addresses, prayer and Gospel songs.

Words can not describe that wonderful freak of nature. No picture ever did it justice. Standing on the rim of the Canyon you look across and see domes and minarets and vast cathedrals tinted with all the colors of the rainbow. In the rare atmosphere of that high altitude it seemed scarcely a mile to the opposite rim, and yet those who know the facts tell you it is fifteen miles across. You look straight down three thousand feet to the valley below you. There is a little group of large tents in which the guides stop to rest with parties on their journey to the river. They look just like blocks of building stone. Stretching down the valley is a ribbon of green. You turn to your neighbor and say, "Look at that beautiful strip of grass"; it looks just like it, and yet, when you descend you find this seeming strip of grass turns into a vast forest of trees from twenty to thirty feet in height. And still below this plateau you must descend two thousand feet by a circuitous and treacherous pathway to reach the roaring river whose action in the centuries gone has cut this awful but majestic gash in nature's face. There were a few hours of glorious sunshine between the snow storms of Sunday and Monday, which permitted fine views of the Canyon. Many persons descended with the guides. The pathway along the cliff is at times narrow and dangerous, but up to the present time no serious accident has happened. Many of the excursionists made the journey to the river and came back enthusiastic over what they had seen, and yet with one accord they ventured the statement that although they would not take a hundred dollars for the experiences which the trip had brought them, it would take much more than that amount to induce them to repeat it. It is doubtful if a more impressive wonder in natural scenery can be found in the world than the Grand Canyon.

The long journey westward across the desert is relieved only by the picturesque Indian villages which numerously abound. Most of them, strange to say, are kept scrupulously clean and present a very attractive appearance. The adobe huts fairly glisten like marble in the bright rays of the sun. In some of the larger villages churches have been built, bearing on their ungraceful steeples the cross, showing that our Roman Catholic friends, who are pushing their work in every direction, have not forgotten these sons of the desert. As the train stops at some of these larger villages it is most interesting to study the features of the Indians who often crowd the platform in large numbers, displaying their wares—rude, but attractive pottery, bead-work of every description, bows and arrows deftly made and exceedingly strong, which would bring joy and delight to the boys at home, and which could be purchased for the small sum of 25 cents. On the arm of one old Indian, fresh from the reservation,

I saw a Navajo blanket which was indeed a beauty. The price asked was \$6.00. Being a tenderfoot without experience I felt the price too high and let the opportunity of my life slip by. I thought that I would have other opportunities to get one of these coveted blankets at possibly a lower price, but I was doomed to disappointment, for not again did I find one as large and handsome which could be purchased for less than \$18.00, and probably then it was a product of Connecticut.

Los Angeles is a wonderful and beautiful city. It has all the push and energy of the East. Its growth has been phenomenal. Its business blocks and hotels are stately. On every street corner, in great letters, can be found the prophecy which is destined to be fulfilled—"250,000 in 1910." Methodism is capturing Los Angeles, as well as the entire Pacific Coast. The twenty-fifth Methodist Church in this City of the Angels was dedicated during the session of the General Conference. The weather during May was delightful, but peculiar. It was cool, without a single drop of rain. At about five o'clock each afternoon a dense fog settled over the city which could not only be seen, but felt. It almost assumed the proportions of a drizzle. Umbrellas were nearly a necessity. With the fog came a chill which demanded wraps. Those who provided against these sudden changes were wise. Many, however, did not, and consequently about every third person you met among the visitors was suffering from a severe cold. This was evidenced by the sepulchral tones in which many of the orators on the Conference floor spoke. Even that blessed man, Bishop Hamilton, who has become so popular in California, and whose four years of experience there should have taught him better, was so hoarse during most of the session of the Conference that he was hardly able to make himself heard when speaking, and everybody knows what a voice he has when he is at himself. The General Conference was entertained in royal fashion. Hazard's Pavilion is by no means a beautiful building, but with the decorations daily changed by the thoughtful ladies of the various Methodist Churches of Los Angeles and the carnations which were freshly placed each morning on the chair of every delegate, it was transformed into a bower of beauty.

There are many points of interest within easy reach of Los Angeles by way of the superb trolley system which has been provided. It is safe to say that no other city equals it in this regard. Pasadena is a perfect Eden. It is doubtful if there is a more attractive town of its size in all the world. It is populated mostly by millionaires, who vie with each other in the artistic finish of their homes, their beautiful and well-kept lawns, their climbing roses, and riotous wealth of tropical foliage. Roses everywhere—they climb the trees on the sidewalk, they hang gracefully over the fences, and clamber artistically along every porch. All the spaces

between the sidewalk and the curbing are filled with geraniums of all colors. It is certainly a Paradise, nesting there in the valley, with great mountains lifting themselves skyward, look whichever way you may.

We must content ourselves with one other little journey which ought not to be forgotten by any one who visits this favored State—the journey thirty miles out in the Pacific to Catalina Island. Here is the fisherman's paradise. The tuna and the yellow-tail are found in great abundance, and the catching of them furnishes most exciting sport. The island itself is bleak and barren. Comfortable hotels, however, which are constantly filled, line the shores of the little bay at Avalon. The one experience here which will leave an impression not soon to be forgotten, is the ride of four miles in a glass-bottom boat through the Marine Gardens to Moonstone Beach. It is the great God-made aquarium of the world. You look through the clear waters of the Pacific to a depth of ninety feet. Rocks at the bottom are piled in all sorts of fantastic shapes and are covered with a silvery sheen. Graceful marine trees, sixty feet in height, with broad leaves and drooping branches, lift themselves out of the depths. Sea cucumbers and porcupines are visible in great numbers. Fish, beyond your ability to count them, are flitting about in every direction—golden perch, and bass, and many other varieties. The scene is constantly changing, but is ever full of wonder to the beholder. God writes His name large, even on the bottom of the sea. This is a ride which one will never forget; don't miss it if you have a chance to take it. At Moonstone Beach, if you are fortunate enough, rough and unsightly pebbles may be found, which, on being taken to the lapidary, can at very small expense be ground and polished into artistic shapes, and these translucent, milk-white stones become attractive souvenirs for the friends at home.

Time fails to speak of the beauties of Riverside, Redlands, Monterey, and that monster of the West, San Francisco. Time and space are left but for two little glimpses. The journey east from San Francisco over the Southern Pacific is full of surprising interest. Irrigation by the Government and by private corporations has rapidly changed the whole country, and the great desert will soon bud and blossom as the rose. Mammoth orchards and luxuriant fields of alfalfa are now visible on every hand.

Salt Lake City should not be missed. It is beautiful for situation. Snow-capped mountains surround it. The city streets are broad and are laid out at right angles. We saw the home of Brigham Young, now occupied by the present president of the Mormon Church, and the palace of Amelia, his favorite wife. The Temple is imposing in its architecture and the Tabernacle, which all may enter, is a marvel in its way. It was designed by Brigham Young, who had little or no training in architecture, and who, it is said, never spent more than three days at school. The acoustics of the building are wonderful. Standing in the rear of the great gallery, two hundred feet from the platform, one can distinctly hear a pin fall held at a distance of two

inches above the altar railing, and every word spoken can be distinctly understood. The one thing, however, relating to this visit which can never be forgotten, was the organ recital in the Tabernacle. This is the largest organ in America and the third largest in the world. It has five thousand pipes, ranging from three quarters of an inch to thirty two feet in length, and cost \$50,000. The organist of the church is a young Mormon, born in Utah, who completed his musical education abroad, and is certainly a master of his art. I can never forget the playing of the old melody, "Ben Bolt." The simple air was played at first. Being repeated, you were absolutely certain it was being rendered as a bass solo by a marvelously cultivated voice, and being repeated again, the soloist seemed to have been joined by a male quartette. The great audience sat spellbound. We were conscious that not only a great artist was at the keyboard, but that he was using a magnificent instrument, and that the acoustic properties of the building added much to our enjoyment.

From Salt Lake City eastward never miss the Denver and Rio Grande. It has been described so frequently that I need not go into detail. The canyon of the Grande River and the Royal Gorge of the Arkansas are simply stupendous. There is lacking the rich coloring found in the Grand Canyon and the artistic shaping of the rocks, but for rugged grandeur nothing could well be finer—cliffs almost perpendicular lifting themselves for two thousand feet—a little river less than one hundred feet in width, rushing and foaming over the great rocks—your train speeding along on a narrow ledge just on the river's edge, with the frowning cliff overhanging the train a thousand feet above. To build this road was a marvelous feat of engineering. Where you reach the backbone of the mountains at Tennessee Pass you are almost eleven thousand feet above sea level. This high altitude affects almost everyone and gives a strange flutter to the heart. Our trip was made memorable by a sad experience which took place on this Pass. A gentleman with his wife and child came into our sleeper at one of the villages in the valley. The woman had the appearance of a consumptive, and as we began the rapid ascent of the mountain she showed signs of much discomfiture and nervousness, and when we reached the high altitude of this Pass she was seized with an attack of heart failure and died in her husband's arms. It was a sad hour. We could but think here among the clouds, however, that the journey to Heaven from this high point was shorter for a weary soul.

God has, indeed, given us a great and wonderful country with a variety of soil, climate and resources. He has blessed us as He has blessed no other people. He expects great things from us in view of all He has done for us. Those who visited the General Conference certainly got such new conceptions of God's power as they viewed His wonders in the West that they will serve Him and their country more loyally and faithfully than ever before.

The Voyage.

The following lines, written by Rev. Dr. J. T. McFarland, the new editor of Sunday-school publications, and printed in the *Daily Advocate*, give a hint concerning his poetical gift:

"I GO not where I will, but must;
This planet ship on which I ride
Is drawn by a resistless tide;
I touch no pilot wheel, but trust.

"That One who holds the chart of stars,
Whose fathom-lines touch lowest deeps,
Whose eye the boundless spaces sweeps,
Will guide the ship through cosmic bars.

"My soul goes not a chosen way;
A current under-runs my life,
That moves alike in peace or strife,
And turns not for my yea or nay.

"Not on the bridge, but at the mast,
I sail o'er this far streaming sea;
I will arrive; enough for me
My Captain's smile and word at last."

The Resignation of President James.

Two and one-half years ago Doctor Edmund James James was elected president of the Northwestern University. At that time we took occasion in these columns to congratulate the trustees of that university on their selection. Dr. James is a man of broad culture and of sane educational ideas. His presidency at Northwestern has been eminently successful, and trustees and faculty and students part with him with deep regret. The type of work which the president at Northwestern must do was not exactly suited to Doctor James. While Northwestern university is rather richly endowed, as Methodist schools go, the necessity is not yet passed for the constant gathering of funds to meet the large current expenses of such an institution, and to plan for the improvement and increase of the material plant. In these latter days institutions of learning elect

presidents not to become teachers, but to become beggars that the institutions may be kept alive. Doctor James is a teacher, a thinker, a planner. He has large conceptions; he is a little farther on than most men. He has the spirit of the pioneer. He had some bold schemes which he had thought out carefully, concerning the unification of Methodist educational institutions. Time and conscience had gone into the planning. Without deliberation and worthy discussion, these schemes were laughed at and ridiculed by educators of the same denomination.

In his new position as president of the Illinois State University at Urbana, Illinois, to which he was unanimously elected, he will be relieved from many petty annoyances which ought never to vex the president of a great educational institution. His salary will no longer depend upon the direct pecuniary results of the enterprise. Neither will he be necessitated to devote any of his time to public or private solicitation of funds to maintain the work. The State provides ample funds to meet these ends. President James will now have opportunity to teach and to carry out the large plans concerning new methods in education about which he has long been thinking. The Illinois State University is to be congratulated on securing one so eminently fitted for its presidency.

Looking for University Presidents.

Two of Methodism's greatest universities are now without presidents—Northwestern University, through the resignation of President James, and Ohio Wesleyan university through the elevation of will be rather hard to fill, for both of them had President Bashford to the episcopacy. Their places }
special equipment for the work. The trustees of }
both institutions are showing great wisdom in not }
rushing into a hasty election. They should deliber-

ate carefully before they make a final decision. The Church is not without able educators, but there is no necessity of crippling one school of the Church by taking away its president for the sake of building up another. Bishop J. W. Bashford went from the pastorate to the university and was magnificently successful. The Church has many able young men, full of enthusiasm and splendidly equipped with all which educational training furnishes on both sides of the sea, who could carry on the advancing work in both of these institutions without any perceptible loss. The important thing is to get the right man. The virtues of many willing candidates are being exploited by their friends. While there may be some slight loss in not having a competent and efficient hand at the helm at the opening of the school year, the trustees are displaying good judgment in the thorough and earnest canvass which they are making. It would be better to have some trusted member of the faculty serve as acting president for the entire year than to rush into a hasty selection which would in the end bring disaster.

The American College President.

Columbia University reports a probable deficit for the coming year of more than \$100,000, most of which must be begged by President Butler from wealthy friends of the university. Not long ago an Eastern scholar was called, at a generous salary, to the presidency of a Western university, and, on his arrival, bidden to go out and collect his salary. Another university president, a noted metaphysician, has recently resigned his position because he found the periodic canvassing for funds too difficult and distasteful. Upon this superior form of beggary Mr. Booker T. Washington, in his remarkable autobiography, casts a very pleasant light, but he was sustained by an uncommon enthusiasm and by the inspiration of a new cause. Even so, the duty of collecting funds was largely incompatible with his function as chief of the Tuskegee School, and when Mr. Carnegie endowed that institution liberally, the gift was applauded largely on the ground that it enabled Mr. Washington more fully to exercise personal leadership and to give up the distracting occupation of an itinerant collector.

Plainly, the business management of a modern college is in many respects incompatible with aca-

demie leadership. As an executive officer, a college president needs to be on terms of easy intercourse with his faculty and graduates, and on terms of respect with his students. This means that he should possess certain qualities of a man of the world. But he should be also the most philosophical mind of his faculty, capable of understanding the educational significance and wider bearings of the studies towards which his professors have necessarily a myopic view. He should be capable of representing his college on public occasions with intellectual distinction. He should be in all senses the finished and well-rounded product of the academic life. Something of aloofness necessarily goes with such an ideal. Our intellectual aristocrat should grace any table at which he may sit, but it must be humiliating to him deliberately to haunt the tables of the rich and systematically to cultivate the acquaintance of those who neither value academic culture nor possess it. A few college presidents are broad enough or sturdy enough to come to terms with commercialism while retaining their academic ideals intact. An Eliot and a Gilman, in a sense, have conquered the general public without flattering it; but it is doubtful these two great university presidents, representing more emphatically the more disinterested studies, for example the human arts, would have had an equal success; while it is certain that in many cases college presidents have undergone a subtle moral deterioration in the pursuit of riches. Worse yet, the undue emphasis placed on money-getting has resulted in the formation of a small but somewhat influential class of university "bagmen," who adopt the vocabulary of culture without grasping any of its informing ideas.

What results when a president of this type shapes his university after his own mind is shown by a correspondent of the Springfield Republican, who, though he writes with some rancor, is evidently a professor in such a college and painfully sure of his facts. He describes an institution in which the president's ideal is money-getting through advertising. By the familiar methods of the syndicate-promoter X University is ever kept before the greater public. This notoriety the president offers to his millionaire patrons in lieu of dividends. Professors are expected, nay, exhorted, to do "popular" things. A succession of press interviews becomes a more valuable asset than a *magnum opus*; a flash-in-the-pan

reputation as a *littérateur* is more highly appreciated than years of faithful service as a teacher or international reputation as a scholar. In this gloomy picture there is doubtless some exaggeration; but it undoubtedly indicates at least a trend towards the commercializing of our larger institutions of learning. One cannot forget that the sage Tolstoy, recalling a meeting with one of our most talked-of college presidents, declared that he was a "barbarian," and utterly incapable of understanding the things of the mind.

If this destructive tendency exists in academic life, we must seek a remedy either in finding presidents who can combine the commercial and academic disposition, or else we must cut presidential duties to suit the men we can get and delegate the surplus duties to others. The latter is the more hopeful course. Indeed, it has been suggested that the college presidency in America should be made largely honorary, like the chancellorship of a British or German university; that the term should be limited, and the executive functions divided between a treasurer and—for purely academic matters—committees of the faculty. This would undoubtedly "decommercialize" the college presidency, but it would constitute a disastrous break with all American traditions. We believe that the president should be something of an autocrat in his proper domain, and that faculty government would be had government; but we are convinced also that every board of trustees should appoint a kind of chancellor of the exchequer, who should have general oversight of the university budget. The office has long existed in the older institutions; it is as much needed in the smaller. This policy would allow the president greater leisure in which to exercise the more personal duties of his office and to revive the traditions of the great presidents of simpler times.

Naturally, no college president of to-day can live in a super-mundane contempt of the main chance. His influence will be potent in inspiring donors, who will naturally value his advice and wish to deal with him personally. All one can ask is that, in the matter of making academic ends meet, there should be all feasible division of labor, and that no college president should be expected to reinforce the qualities of the promotor with the practices of the sycophant.—*The Nation*.

When you have read this issue of the Courier hand it to some friend who might be interested.

Suggestive Educational Facts.

A new edition of that incomparable book of reference, "Who's Who in America," has just recently been issued by Messrs. A. N. Marquis & Company, Chicago, greatly enlarged, and containing various tabulated data which are of singular value. The aim of the book is to give the name and address and a condensed personal history of every man in the United States who has come into any sort of respectable prominence by means of his writings, business success, official or collegiate position, or other relations, so as to make people curious to know something more about him. In the book, which contains nearly eighteen hundred double-column pages of data, sketches are given of 13,204 men, and 1,239 women, a total of 14,443 persons out of the whole adult population of the country, running somewhere beyond fifty million in number. The question, "What was the chief factor by the help of which these persons have come to the front?" is answered by the educational statistics in the Preface, which have been carefully gathered and closely analyzed by the editor of the book, John W. Leonard. Leaving out of the reckoning the women, for the sake of convenient figuring, we find that 11,384 men furnished complete educational data pertaining to their record. The figures show that more than half of these—or, to be exact, just 56 per cent, or 6,379—were graduates of colleges, including in that term the military and naval academies at West Point and Annapolis. In addition, there are on the record the names of 1,663 who enjoyed a partial collegiate course, making a total of almost eight thousand whose college training, complete or partial, was seemingly the fundamental element in their equipment which enabled them to forge to the front. A distinctive quality of these figures is that they were not compiled by any educational specialist bent upon showing that it is an advantage to possess, in the race of life, a collegiate training, but that they appear, in connection with other data, as an essential part of a remarkable record. It is made clear by this record that about three-fourths of the picked men of the country—foremost in every department of life—"the elect"—of millions, conspicuous for their capacity, their influence, their industry, and their achievements, are here indicated as having received their first boost forward from the guiding and helping hand of their Alma Mater.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

The Trustees of the American University will hold their semi-annual meeting at the offices of the University in Washington, December 13th.

Please do not overlook your subscription to the University. It is so easy to delay, postponing payment until some more convenient season. This greatly increases the cares of the office, as well as the expense in the forwarding of notifications. Why not settle the account at once? Send it in and a receipt in full will be forwarded.

If you would like to have the handsome Year Book of the University which has recently been issued, send your name with four cents in postage. The book is handsomely illustrated and is a fine specimen of artistic printing. It gives a full and complete account of the plans and progress of the University.

By the will of Anthony Holler, of Chambersburg, Pa., recently deceased, the University receives a handsome bequest.

Handsome generous donations of valuable books have recently been made to the University.

The fall and winter campaign in behalf of the University will be a vigorous one. Bishop McCabe, the Chancellor, is making his plans for active and aggressive work. Many men and churches are to be reached. No rest will be taken until enough

has been secured to justify an opening of the University in creditable manner. This consummation should be speedily reached. Once open and its reputation established the future will easily care for itself. Let every friend of the University rally to its loyal and enthusiastic support.

Death of a Valued Trustee.

In the prime of his life and in the midst of his usefulness, Ex-Governor Robert Emory Pattison died in Philadelphia, August 1st, aged 54 years. He was the son of a Methodist minister, and was a devoted member of the church of his father. At all times and in all places that fact was made known. He was always loyal to his convictions.

He enjoys the unique distinction of having been twice elected governor on the Democratic ticket in the strongest Republican State in the Union. He had high conception of personal honor and personal dignity, and lived as an example of good citizenship, untarnished both in his private and public life.

He was twice a lay delegate to the General Conference; where he was an active and influential member. In 1890 he was fraternal delegate to the General Conference of the Methodist Episcopal Church South. He was also one of the honored and valued trustees of the American University, and served as a member of the board of trustees of Dickinson College. To all the plans and purposes of the American University he was devotedly loyal. His wise counsels will be sadly missed. It will be difficult to fill his place. Mr. Pattison was one of the most respected and beloved lay Methodists of the church. Both the church of his choice and the country to which he was faithfully devoted have suffered a severe loss.

Embarrassment to Catholic University.

The Catholic University of America in Washington is just now very greatly embarrassed over the failure of its treasurer, Thomas E. Waggaman. The latter has recently been declared a bankrupt. The failure was a great shock to the residents of Washington and was unexpected by a vast majority of the people. Mr. Waggaman had stood high in business circles and had been exceedingly generous, and was supposed to be immensely wealthy. He generously

gave to the American university in the beginning of its work, a very generous contribution which we have not forgotten. We regret very much that the Catholic University is for the time-being embarrassed, and sincerely trust that they may come out well in the end. They are represented by splendid legal talent. Mr. Waggaman had in his possession not far from a million dollars worth of the university's assets. He made a deed to the Catholic University almost covering this amount, but it is now claimed that this deed is antagonistic to other creditors. The schedule of assets recently published shows them to be in excess of the liabilities to the amount of about a million of dollars. His assets, in the estimation of competent judges, are rather those of a speculative than of an intrinsic value. Mr. Waggaman had unbounded confidence in the future of Washington and invested largely in real estate. Much of this is valued in the list of assets at \$1.00 a foot when it could not be easily sold for half that amount. There will also be great shrinkage in the estimate on his personal effects. He was a great lover of art. His home was filled with pictures, statuary, and bric-a-brac of the most costly character. Many of these things will never bring the amount at which they are now scheduled in the assets; so it is doubtful if the Catholic University will ever realize to its full amount the sum in the hands of its treasurer. Mr. Waggaman's business was conducted in a loose way and without method, and now that the facts are all known the failure is no longer a surprise. The unfortunate part is that many working men and women of Washington who had small means entrusted their little savings to Mr. Waggaman for investment. They will sadly feel the loss which must come to them. The basis of a final settlement will be watched with interest.

Welcome to Bishop Cranston.

The reception to Bishop Earl Cranston and his daughters Misses Ethel and Ruth on Friday evening, October 21st, at the Foundry Church crowded that commodious edifice to the doors. The moonlit sky and the quiet equable temperature without fitly environed the hearty and brilliant occasion that gave inspiration and glow to the hundreds who thronged the auditorium and the parlors in their glad eagerness to greet the new resident Bishop and his family. Many clergy were present from Balti-

more and other places to add to the enthusiasm and joy of this first representative meeting of the people with their chief pastor, who comes to lead the Methodist flock and to occupy in counsel and guidance, and in the affection of Christian hearts the place formerly held by Bishop Andrews, and more recently by Bishop Hurst.

The music of the formal service was furnished and led by the Foundry choir, and was a beautiful mingling of devout praise and strong faith. Dr. Ferguson in a fervent and appropriate prayer voiced the thankfulness and desires of the people for the rich blessings of God. The addresses of welcome were given by Dr. Naylor, who presided, by Dr. Nicholson, who as president of the preachers' meeting spoke in behalf of the ministers, and by Mr. Aldis B. Browne, who as president of the Methodist Union represented the laity. The three speakers gave warm and eloquent expression to the strong and ardent feeling of attachment of Washingtonians to the predecessors of Bishop Cranston, and especially to their deep interest in the great educational enterprise which had in his latest years been launched by Bishop Hurst in his labors for the American University. Their words to the incoming Bishop were most cordial and hopeful, pledging loyal cooperation and fidelity in his high and sacred work. The address by Mr. Browne was marked by its compact fitness, directness and strength.

The response of Bishop Cranston was in his best vein. Although the hour was waxing late and the program was protracted beyond general expectation, his easy good nature and genuine humor immediately caught the entire audience before he had finished his opening sentences. His references to the cosmopolitan features of Washington city were models of the finest characterization. A splendid passage was that containing his emphatic and eloquent approval of the direct quality of our Government's diplomacy in dealing with international problems, and of our Nation's challenge to the great powers to come out into the open for the discussion and settlement of all questions touching interests common to the great family of nations. Frequent applause and amens indicated the depth to which he stirred the hearts of his hearers, and of no other parts were these signs of approbation stronger than of his clear and ringing utterances on the American University. His words evinced a deep-seated con-

viction both of the importance and timeliness of the enterprise as the proper outcome and completion of a Christian system of education, and of the duty of the present generation patiently and generously to build and endow this stronghold of intellectual life and evangelical spirit for the defense and future victories of Christian truth. He exhorted every one present to join hands with Chancellor McCabe in his heroic resolve and plans to forward the institution so firmly and broadly founded by Bishop Hurst.

The hour of social intercourse and personal greetings in the parlors was a charming climax of this happy and auspicious beginning of a resident Bishop's dwelling and work among us. Bishop Cranstoun and his family are living in apartments at the Ontario. To them we add our greetings through the types. May their stay among us be long and full of mutual blessing.

The Carnegie Institution.

WORLD'S UNQUALIFIED ADMIRATION AND APPLAUSE
DUE TO THE GENEROUS FOUNDER.

From the *New York Times*.

The Carnegie Institution at Washington is undoubtedly the chief benefaction of Mr. Andrew Carnegie—his greatest gift to his fellow men. The year book, a summary of the contents of which was printed in *The Times* of yesterday, gives the public more definite and comprehensive knowledge than it has hitherto possessed of the aims and achievements of the institution. Mr. Carnegie's gift of \$10,000,000 constitutes an endowment of research. It is not an institution for teaching, but an institution for inquiry, for exploration and discovery in the arts, the sciences, and in those branches of investigation which add to the stock of human knowledge. Funds are liberally provided from the sums annually devoted to such purposes for research in any field, or upon any subject as to which there is a reasonable promise of human enlightenment, and in respect to which enlightenment would be useful or desirable. There is nowhere else in the world so important a source of financial aid and encouragement for scientific inquiry.

The institution has resources amounting to \$10,101,500. The expenses of administration are relatively small, leaving its great revenues applicable to the main purpose of the foundation. For the coming year there is appropriated \$60,000 for ad-

ministration, \$130,000 for "larger projects," \$300,000 for minor projects of research, and \$13,000 for special grants, besides \$100,000 for a reserve fund, which we suppose is maintained as a provision for unforeseen objects which may from time to time be presented as worthy. During the past year aid has been given for the furtherance of research in many special fields. The institution has defrayed the expenses of ethnological investigations among the Pawnee Indians, of inquiries into the evidence of the antiquity of man in America, into the geological conditions in the trans-Caspian region and in Eastern China, into the problem of resistance and propulsion in navigation, into the physiology of nutrition, and among the subjects of study have been marine biology and embryology, which was studied in the experimental station at Naples; besides many subjects in the domain of astronomy and chemistry. Archaeological investigations have been carried on in Greece and Asia Minor, and an investigation has been begun with a view to determining the most favorable point in the southern hemisphere for the establishment of an astronomical observatory. Studies of the sun and the moon are proposed, and historical research is mentioned among the objects encouraged by the institution.

To say that the world has long needed such a foundation, is to say that Mr. Carnegie showed great good judgment in devoting his money to this use. That he was able to devote so large a sum of money to it enhances the utility of the gift. It was only by a benefactor of Mr. Carnegie's great wealth that a foundation could be provided adequate for the great object of the institution.

No man can be so rich, so generous, and so useful as Mr. Carnegie without provoking criticism and engendering hostility. The old story of Aristides illustrates an enduring quality of human nature. Mr. Carnegie has really done so very much good in the world with his money, is striving with such pains and industry to continue doing good, and by reason of the great store from which he draws is able to make his benefactions so numerous and imposing, that here and there voices are raised almost in protest, and men diligently seek occasions for fault finding. Against these manifestations of pettiness there may be presented as Mr. Carnegie's entirely sufficient apology for his existence the great institution at Washington, a gift by which he has deserved the world's unqualified admiration and applause.

Glorious Giving.

Bequests of \$27,600 were received last year by the Maryland annual conference of the Methodist Protestant Church.

Minnesota courts have just declared valid a bequest of \$1,000,000 by Mrs. Wilder, creating a fund for the support of "the worthy poor" in the city of St. Paul.

Mr. Frederick Rindge, a Los Angeles Methodist and business man, whose previous benefactions have been many and generous, has given \$25,000 for Sunday school work among the colored people.

A memorial to Bishop Clark, of the diocese of Rhode Island, will be in the form of an endowment of \$20,000 for the infant ward of St. Mary's Orphanage, Providence. This orphanage was founded by Bishop Clark, and received a great deal of his sympathy and interest.

The directing board of the Moravian Church has recently received from a member a gift of \$78,000, of which \$50,000 is to be applied to foreign missions, the interest on half of it to the maintenance of a training school for missionary candidates about to be established at Bristol; \$10,000 for the ministers' pension fund; and \$18,000 for the boys' school at Pulneck, near Leeds, England.

Charles H. Hackley, Muskegon's millionaire philanthropist, last week presented to the board of education of that city eighty gold bonds, each of \$500, bearing six per cent interest, to be used as an addition to the endowment of the Hackley manual training school, raising that fund to \$400,000. With this donation Mr. Hackley's total gifts to the city of Muskegon in various ways reach \$1,100,000.

According to the Springfield Republican, the cordial feeling which many Americans hold for Russia as the traditional friend of the United States is expressed in an offer of \$50,000 which James Stokes has forwarded the society for the moral improvement of young men in St. Petersburg. One of the conditions named by Mr. Stokes is that \$100,000 more be raised in Russia for this building. There is little doubt but that this will be done, as many of the leading men of Russia are backing the organization. The head of the society is Prince Odenbourg, who is closely related to the Czar.

At a cost of nearly \$30,000 Miss Helen Miller Gould has just built a new club house for boys and young men, to be named the Lyndhurst Club, near Irvington on the Hudson.

James J. Hill, the railroad president, and his wife, gave \$1,500,000 to the Roman Catholic Church toward the construction of a \$3,000,000 cathedral at St. Paul. It was Mrs. Hill's gift a few years ago that enabled the Roman Catholic Church to build the \$500,000 seminary for the students for the priesthood in Groveland Park, St. Paul. Later, Mr. and Mrs. Hill increased this gift by \$250,000.

The late John E. Hurst, of Baltimore, left \$1,000 to the Church Home and Infirmary, and \$1,000 to the Aged Clergy Fund of the diocese of Maryland.

A. C. Stich, of Independence, has given \$75,000 to Washburn College, Topeka, Kan. The money is for a fine arts building as a memorial to his son and daughter, former students, who are dead. Andrew Carnegie recently gave the school \$40,000.

John D. Rockefeller has given to the Johns Hopkins Hospital of Baltimore the sum of \$500,000, and the amount has been accepted by the board of trustees of that institution. This gift is intended to make good the hospital's losses by the recent great fire.

One of the largest endowment funds ever created for a church in New York city has been formed by the will of Smith Lafayette Russell, a retired business man. It will amount to \$500,000, and the testator's plan is along the line of several recent moves to keep alive church interest in the down town district. The Duane Methodist Episcopal church, in Hudson street, on the lower west side, is the beneficiary.

John Blocher, a wealthy Buffalo Methodist, has donated the old Blocher homestead at Williamsville (near Buffalo) and \$80,000 in money for the Home for the Aged. The building, completed and furnished, will cost \$100,000, and Mr. Blocher has placed a condition on his donation that \$20,000 be raised by the public spirited people of western New York. Already over half of that sum has been raised, and the Rev. John Lloyd Jones, the soliciting agent, reports that Syracuse and Rochester people have assured him \$5,000, which leaves \$5,000 yet to be raised in Buffalo.

Sir Donald Currie has donated \$500,000 to University College, London University. It is intended with this sum to build a school of advanced medicine, and it will a so enable the university to incorporate the college in its system.

Rev. Abiel Leonard, bishop of Salt Lake City, will receive \$5,000 under the will of Charlotte A. Mount, who died at New York recently, leaving property worth three quarters of a million. The bequest to Bishop Leonard is to be devoted to the purchase of ground for church purposes.

An Iron Carnegie's latest large beneficence is announced from Pittsburg. It was made known there recently that Mr. Carnegie has created a fund of \$5,000,000 for the benefit of "the dependents of those losing their lives in heroic efforts to save their fellow men, or for the heroes themselves if injured only." Provision is also made for medals to be given in commemoration of heroic acts. The endowment is to be known as "the hero fund," and consists of \$5,000,000 of first collateral 5 per cent. bonds of the United States Steel Corporation. The trust is placed in the hands of a commission composed of a number of well known men.

Miss Mary E. Brainard, of Cleveland, Ohio, has left an estate of \$130,000 to be held in trust by the trustees of Brooklyn and Parma Townships, for the benefit of the worthy poor in both. According to the will, "the proceeds are to be distributed fairly and impartially among and for the benefit of the worthy poor, especially the aged, infirm, sick, and destitute children."

Since Mr. Crittenton established the first Florence Crittenton Mission in Bleeker street, New York, as a memorial to his little daughter Florence, sixty-three other Florence Crittenton missions have been put in operation in other important cities in the United States. All are doing a great and blessed work in rescuing the fallen, and imbuing them with new life and hope. Mr. Crittenton still gives his personal attention to directing the work. The twenty-first annual conference of the movement was lately held in Washington.

Mr. William Halls, Jr., who subscribed \$700,000 for the completion of the Brooklyn hospital on condition that a similar sum should be raised, now announces that he will commence work as soon as \$300,000 are in hand, but that the remaining \$200,000 must be secured also to meet the terms of the gift. There is great rejoicing over his generosity and magnanimity. The amount is secured and work will begin.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University" a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

VOL. XI.

WASHINGTON, D. C., JANUARY, 1905.

No. 4

Published Quarterly. Office, 1419 F Street N.W. ;
Subscription Price, Twenty-five Cents a Year.

Entered December 21, 1902, at Washington, D. C., as second-
class mail matter under act of Congress of July 16, 1894

Scope of the College of Government.

Now that work is soon to commence on the McKinley Memorial Ohio College of Government as decided at the recent meeting of the Board of Trustees, the handsome cut of the building is herewith reproduced. It may fall under the eye of some who have never yet seen it. Those who are familiar with it cannot regret looking upon it again. It is

idea architecturally, and will be one of the most satisfying buildings in all its details, in the entire group of 23 which are contemplated.

In this building, instruction will be furnished on the following high themes connected with the general Department of Civics. Five of the most prominent are:

I. DIPLOMACY—This subject, always of great importance and now assuming proportions far greater than ever before, has no where received the thorough and systematic treatment which it deserves, and no where are the opportunities for such treatment so good as in Washington.

II. INTERNATIONAL LAW—Here, too, would be treated the broad field of those principles of law which in modern times have come to be recognized as forming a world-wide code, ever increasing in dignity and covering the complex relations of all the civilized nations of the globe.

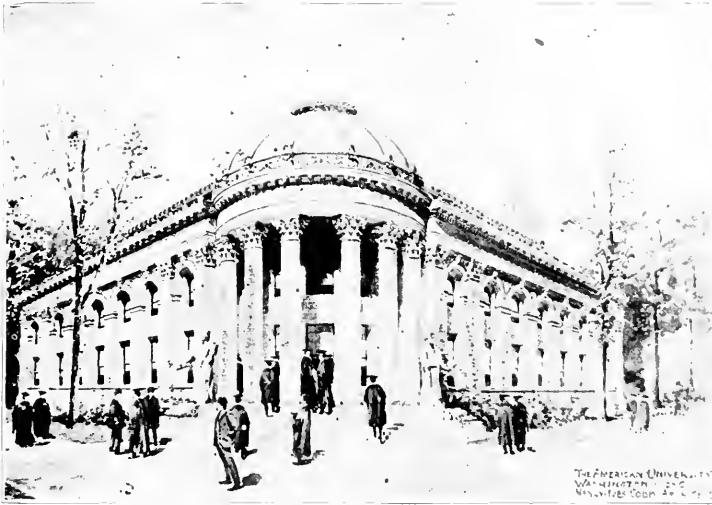

III. ARBITRATION—The growing disposition of the nations to settle disputed questions without recourse to war renders arbitration at once one of the most interesting and advantageous studies. Here in Washington the facilities are the very best for this topic of universal interest and application.

IV. MUNICIPAL GOVERNMENT—Here, too, would be pursued scientifically the government of towns and cities, one of the burning questions of the day, loudly calling for the clear light of historic and scientific investigation.

V. CITIZENSHIP—The duties and rights of the citizen will be a prominent part in this department and will evoke the best efforts of able and patriotic professors.

Many other allied subjects would deserve and receive treatment, making the whole department a strong and vigorous leader and conservator of the best thought of the times relating to the science of Government.

For this noble building, it is estimated that \$250,000 will be needed. A generous donation in marble, from a famous Vermont quarry, has already been made, prompted by admiration for the martyred President and a firm belief in the need and usefulness of such an institution as is contemplated.

McKinley Memorial Ohio College of Government.

The Hurst Collection.

Part I, of Bishop Hurst's Library, consisting of books once owned by or relating to George Washington, and those bearing the imprint of or relating to Benjamin Franklin, was sold in May, 1901; Part II, including Special Americana such as Early Almanacs, Early Juvenile, Writings of the Mathers, New England Primers, and Languages of the Indians of North, Central and South America, and other miscellaneous languages, was sold in November, and Part III, covering General Americana, history and literature, was sold in December.

Part IV, the concluding sale, to occur probably in late February, 1905, in some respects will be the most interesting of the series. It will embrace the remainder of the books, the manuscripts, documents, letters, autographs and prints. Among the books will be the Religious and Theological section, which contains many historical and denominational works. Especially noteworthy are his numerous and rare Methodistica, which would be a valuable prize for any educational institution of that church. We covet some of them for the American University. Part IV will also contain fine specimens of Belles Lettres, some in rich bindings, a valuable and practical collection of Bibliographies, many editions of Esop's Fables and à Kempis's Imitation of Christ; a large number of Aldines, a few Elzevirs and Plantins; some rare first editions as of Dickens, and Milton's Paradise Lost; many Incunables or specimens of Early Printing, including a Gutenberg item or two, several from the press of Caxton and Wynkyn de Worde, and others from Germany, France, Italy and Spain; a fine lot of rare Bibles, and a copy of the sumptuous American Standard Prayer Book.

A fascinating interest gathers about the manuscripts, letters and autographs, which include Persian, Arabic and Samaritan from the East, Mediaeval Latin and Books in Chains from Europe, and items from Sir Walter Scott, Samuel Taylor Coleridge, Robert Southey, William Cowper, Thomas Moore, Mrs. Browning, John Wesley, Adam Clarke, William Wordsworth, Thomas Carlyle, Robert Browning, Charles Dickens, Charles Kingsley, Increase Mather, Washington, Franklin, Lafayette, Francis Hopkinson, Alexander Hamilton, Daniel Webster, Abraham Lincoln, Ulysses S. Grant, Grover Cleveland, Benjamin Harrison, William McKinley, Washington Irving, Nathaniel Hawthorne, Longfellow,

Whittier, Holmes, Bancroft, Beecher, Eugene Field, and many others distinguished in church and state, in politics, letters, science, art and practical affairs.

The value of the library as a whole is indicated by the fact that over \$27,000 was realized from the three sales already made. A few of the items of special worth are Washington's copy of Gibbon's Decline and Fall of the Roman Empire, 6 vols., \$1,626; Washington's copy of his own official Letters to Congress, while Commander-in-Chief, 2 vols., \$2,810; Poor Richard Almanac for 1739 (Franklin Imprint), \$565; Increase Mather's The Wicked Man's Portion, \$250; Cotton Mather's Magnatia, \$345; and his State of New England, \$290; Mohawk Prayer Book (W. Bradford, 1715), \$1,300; Eliot's Indian Bible (2d edition), \$410; Pennsylvania Magazine (1775-6), \$200; Proposed Book of Common Prayer (Phila., 1786), \$190.

While our regret is great that the entire collection could not be purchased for the University or for Drew Theological Seminary, it is a gratification to know that many of the choice treasures have been secured for public libraries—such as the Library of Congress, the Public Library of Boston, the Forbes Library of Northampton, and others. The catalogue of Part IV will soon be issued by the Anderson Auction Company, and can be secured by correspondence with that firm at 5 West 29th Street, New York, where the sale will take place.

Progress of the McKinley Memorial.

Power was given to the Building Committee by the trustees of the University at their December meeting to proceed with the erection of the superstructure of the College of Government upon the foundations and corner-stone already in position. The funds for this purpose have gradually been accumulating. A few donors for other special objects have transferred their gifts, amounting to \$45,000, to this one, and new subscriptions of \$23,000 were quickly subscribed at the trustee meeting. Over one hundred thousand dollars thus available gave the Board a firm basis for entrance upon the second stage in the erection of this important and stately edifice. This step will construct the marble walls, put on the roof and enclose the entire structure. The plans and specifications have been completed and will soon be in the hands of contractors invited to join in the competitive bids for material

and work. The trustees feel confident that, with the actual work begun, there will come additional funds from other sources sufficient to carry the enterprise to a full completion of the interior.

The College of History, so long beckoning for a comrade in rank, will soon have a companion whose beauty and strength will vie with its own, and whose size will exceed the generous proportions of the elder. The place on the campus assigned to this, the second in the coming group, is one of the most conspicuous and honorable. Standing at the inner right angle where the two great quadrangles meet, the College of Government will hold the key position to the tout ensemble, with a front on each of the grand quadrangles, one opening to the north into Massachusetts avenue and the other opening to the east into Nebraska avenue, and thus forming the massive and beautiful bond and architectural center to the double quadrangle. It surely is a most fitting location for the home that is to shelter and nourish the great Department of Government.

Under the generic title of the College of Government there will be a sisterhood presenting in fair array the departments of International Law and Jurisprudence, Diplomacy, Arbitration, Constitutional Law, Municipal Law, Political Economy and others relating directly or indirectly to the general and rapidly expanding field of Civics and dealing with questions of rights and duties, prerogatives and responsibilities of the individual citizen and of the body of associated citizens from the smallest voluntary corporation or township to the broadest federated union of States, and with the manifold legal interrelations of nations in commerce and trade, in letters, in science, in art, on occasion in war, and at all times in the ever-growing arts of peace, destined yet to conquer into silence, if not into absence, the arts of war.

Subscribers to this building who have paid in full will rejoice with us in the new impetus thus given to its substantial realization and will feel prompted to increase their first gifts. So mote it be. Subscribers who have paid in part will also be glad, and we hope will use all possible diligence and haste in completing their well begun gifts. The few who have subscribed and for special reasons have not yet been able to pay anything thereon, will not thereby be robbed of their share in the joy, and we shall expect to receive their installments

promptly and regularly until all is in our treasurer's hands. To the multitude in all parts of the land or of the world, who have never subscribed or paid anything for this purpose, we appeal most earnestly on the ground both of benevolence and patriotism for some gift, large if it may be, small if it must be, for the consummation of this worthy cause.

The subjects to be treated in the McKinley Memorial Building have natural and profound connections with the various departments to be pursued in the College of History. The companionship of the two edifices will not be merely that of architectural harmony, but also that of the inner life and purpose of the whole institution, which might well take its rise out of the nucleus formed in the united activities of the two Colleges—History and Government. How eminently appropriate, too, that the lovers of McKinley from the Atlantic to the Pacific should erect this monument—a living factor to make real and lasting the noble ideas and ideals for which the martyr President always stood in his public walks and private life. How fitting that this Memorial should stand in Washington a practical demonstration under the name of "American" to all visitors from other lands of the perennial value of his broad statesmanship and generous outlook on the domains of suffering humanity as they came under the view of America. Our country, great in the past, was made greater by his splendid leadership of the nation at the juncture which opened to her, without her consciousness of the fact, a most influential, if not the chief place at the council table of the World Powers. To all lovers of native land, whether in this country or in countries beyond the sea, who desire to equip themselves in the amplest measure for the best service to their own peoples, the Protestantism of America, in loving federation with aggressive Methodism, ought to furnish at this political, social and educational center the highest and most complete facilities in the McKinley Memorial Ohio College of Government. The ablest exponents of the foundation principles of American civic life and of their wisest application should here give direction and equipment to thousands who shall become safe guides and models for future citizenship.

Friends of Wm. McKinley, lovers of liberty and of human rights, believers in the name and Kingdom of Jesus Christ, our eyes, our hearts, our hopes are looking to you for aid, for co-operation, for fruition.

Editorial Notes.

Will Methodism and Protestantism make 1905 the most fruitful and glorious year in the history of the American University.

The Building Committee of the University has already asked a number of prominent builders and contractors to submit bids on the continuance of the College of Government.

TREE planting will be the order of the day in the spring on the University campus. An elect lady has just given an order for one hundred, for which she will pay. Those planted by the Bishops some years ago are growing beautifully.

Now is the time to pay your overdue subscription to the Ohio College of Government. As the building advances the money will be needed. Will you not assist in this emergency by making good your pledge?

WITH Massachusetts avenue opened through the grounds of the University, as is proposed by the bill now before Congress, spoken of in another column, the distance from the heart of the city will be greatly shortened. It will be a straight line on the finest thoroughfare in the city, and can be traveled easily in twenty minutes. The writer recently covered the circuitous route which must now be made to reach the grounds from the heart of the city in twenty-five minutes with horse and buggy.

New President for Ohio Wesleyan.

The choice has fallen on the Rev. Herbert Welch, D. D., of the New York East Conference, to succeed Bishop Bashford at Delaware's famous school. We are convinced that no better selection could have been made. Dr. Welch is in the prime of his manhood, being less than forty years of age. He is a graduate of Wesleyan University and Drew Theological Seminary. He has spent much time abroad studying conditions there. He devoted one year to special study at Oxford University, and also made close investigation of the city mission work conducted by the Wesleyans in London. The results of these investigations were embodied in a series of remarkably suggestive articles which appeared from time to time in leading publications.

Dr. Welch is a fine preacher and is credited with unusual administrative ability. He has already spent one Sunday at Delaware, where his attractive personality, his sermons and addresses, captured faculty, students and the town. His work begins with the next school year. We congratulate both President-elect Welch and the great Ohio school, and prophesy an honorable and efficient administration.

Setting Methodists a Good Example.

Pope Pius X has addressed to Cardinal Gibbons a brief relating to the Catholic University at Washington, in which after speaking of the embarrassments of that university he says: "We learn with genuine satisfaction that the bishops, with the approval of all others interested in its welfare, have ordered that a collection be taken up in all the churches throughout the United States annually for ten years on the first Sunday in Advent, or the first convenient Sunday thereafter, with a view of enhancing the dignity and enlarging the influence of this noble seat of learning."

The Roman Catholics fully understand the importance of the university at Washington. There is no more reason why they should be so earnest in its prosecution than there is for a similar earnestness on the part of the Methodist Episcopal Church with respect to the American University. They have begun and they can not afford to cease their efforts until success is absolutely assured. We have begun and we can not afford to cease our efforts until our success is assured.—*The Christian Advocate.*

In Memoriam.

RESOLUTIONS PASSED BY BOARD OF TRUSTEES.

EX-GOV. ROBERT EMORY PATTISON.

WHEREAS, It has pleased Almighty God in His all-wise Providence to take, in the prime of his life and in the midst of his usefulness, Ex-Governor Robert Emory Pattison, therefore,

RESOLVED, First, That we record our high appreciation of the departed who was one of the most beloved and respected laymen of the Church of his father. He was always loyal to his convictions, and at all times and in all places made this fact known. He had high conceptions of personal honor and personal dignity, and lived as an example of good citizenship, untarnished both in his private and public life. Because of his high character and manliness he enjoyed the unique distinction of having been twice elected Governor on the Democratic ticket in the strongest Republican state in the Union. The Church of his choice twice elected him as a lay delegate to her General Conference, where he was an active and influential member. As one of our valued trustees he was loyally devoted to the plans and purposes of the American University, and his wise counsel will be sadly missed. It will be difficult to fill his place. Both the Methodist Episcopal Church, and the country to which he was faithfully devoted, have suffered a severe loss.

RESOLVED, Second, That these resolutions be spread upon the minutes of this meeting and that a copy be sent to the family of the deceased.

CHARLES SCOTT.

WHEREAS, Death has claimed one of our honored and prominent trustees, Charles Scott, of Philadelphia, Pa., therefore,

RESOLVED, First, That we bow with humble submission under the decree of the loving Father in heaven from labor to reward this faithful servant.

RESOLVED, Second, That we shall treasure as a rich legacy the memory of his noble and unselfish life. He lived for others, and both heart and hand were ever open to every needy and worthy cause. God blessed him in his business and gave him large means, but, looking upon himself as God's steward, he poured it into God's work, as represented in the benevolent undertakings of the Church of his choice.

He was a chief factor in raising the money to replace endowments lost to Drew Theological Seminary. To both the Wesleyan University and the American University, of which he was a trustee, he gave handsome gifts. He was intensely interested in missions. Philadelphia Methodism mourns the loss of one of her most useful laymen. In all local affairs he made himself a financial leader in all denominational movements. To the Methodist Hospital, the Preachers' Aid Society, and the Home for the Aged, he gave liberally of his time and money. A Prince in Israel has indeed fallen.

RESOLVED, Third, That we record our appreciation of the loyalty and devotion manifested by the deceased toward the American University as one of its trustees. Until failing health overtook him he was rarely absent from a meeting of the Board. Both by counsel and contribution he gave a substantial proof of his interest.

RESOLVED, Fourth, That these resolutions be recorded in the minutes of this meeting and that a copy be sent to the bereaved family.

Opening of Massachusetts Avenue.

A measure has been recently introduced in the Congress of the United States which is of vital interest to the American University. It consists of a bill for the extension of Massachusetts and Boundary Avenues northwest, in the District of Columbia.

Massachusetts Avenue, as planned by General Washington and Major L'Enfant, is one of the greatest boulevards in the world. It extends from the East Branch of the Potomac in one continuous ascent to the beautiful heights upon which is situated the American University campus. It is the most beautiful residence avenue in Washington.

A great bridge costing \$225,000 has recently been completed over Rock Creek, upon the line of the avenue, thus permitting the extension of the avenue from the vicinity of the bridge through the American University campus to the District line.

The extension of Massachusetts and Boundary Avenues will subserve several great public purposes. It will provide much needed thoroughfares of general travel; it will render accessible an interesting portion of the Civil War defenses of Washington; it will complete the sections of avenue necessary to join together Massachusetts Avenue,

Wisconsin Avenue, Connecticut Avenue and Rock Creek Park; it will accomplish the establishment of that which Washington has heretofore lacked and which many other cities and the world's capitals enjoy, a beautiful and extended system of boulevards for the utility and pleasure of the whole people and admirably suited to the uses of the equestrians, drivers and automobilists. Most important, however, as affecting the interests of the American University, the extension of Massachusetts Avenue will afford direct communication with the heart of the city, greatly shortening the journey and will permit the establishment of public automobile transportation facilities, now greatly needed, thus hastening the time of the opening of our great national educational institution to the students of the world. It will similarly benefit the Episcopal Cathedral enterprise, the Hearst School for Girls and the Harriet Lane Johnston School for Boys, all located upon Massachusetts Avenue.

The present proposed extension of Massachusetts Avenue is made possible by the action of the public spirited citizens, owning land within the avenue, foremost among whom is Mr. Charles C. Glover the treasurer of the university. These gentlemen stand ready to dedicate the land within the avenue to an amount equal to about 85 per cent. of the total value of the land within the avenue.

The estimated entire cost of the condemnation of the undedicated land and of the grading and macadamizing of the avenues, is about \$200,000.

The legislation embodied in this bill is worthy of the support of every member of the House of Representatives and of the Senate. Every friend of the university who will use his influence in behalf of the measure by writing to his Congressmen or Senators, asking of them their support for this bill, can feel that he is not only aiding the accomplishment of that which is essential to the advance of the American University, but is furthering a project which is important to the interests of the people of the District of Columbia and which constitutes a part of the great plan for making Washington the most beautiful capital in the world.

Important Trustee Meeting.

An unusually large number of trustees attended the semi-annual meeting of the Board, which took place in Washington, at the offices of the American University, Tuesday morning, December 13th, and continued throughout the day. Conspicuous mem-

bers present from out of the city were: Bishop Charles C. McCabe, of Philadelphia; Senator J. P. Dolliver, of Iowa; Dr. T. N. Boyle, of Pennsylvania; Hon. Geo. C. Sturgiss, of Morgantown, W. Va.; T. D. Collins, of Pennsylvania, and Mrs. J. F. Robinson, of Rock Island, Ill. A large number of resident trustees were also present.

Many matters of great importance were fully discussed, and decided action was taken concerning the immediate enlargement of the work of the university. It was unanimously resolved that the Building Committee be, and is hereby authorized, to proceed with the continued construction of the College of Government, the foundation of which is now completed and the corner-stone laid. The action of the General Conference in removing the arbitrary restriction and leaving all questions of management in the hands of the trustees is bearing early fruit, and success does not now seem so far away. New and strong hope has been kindled, as was evidenced by the action of the trustees present, who in the space of a few moments contributed \$23,000 for this purpose. Subscriptions amounting to \$15,000, which had been made to other funds in connection with the university work, were transferred by the donors to the building fund of the College of Government. More than \$55,000 is also now available in the fund for this building, so that the total fund will meet all present needs, and the architect, who has already provided plans and specifications for this building, together with the Building Committee, will begin definite operations.

Announcement was made of several generous bequests, which have recently come to the university by will, and a gift of \$25,000 from a well-known Illinois woman was also reported.

The meeting was one of the most harmonious and satisfactory which have been held for some time, and the advanced steps in the matter of building, which have been taken, will be greeted with hearty approval by all friends of this institution. With two buildings completed, eighty splendid classrooms will be available, amply sufficient to care for many students. Enlarged endowments will be secured looking to a creditable opening on the high plans proposed, and later developments will come as the needs demand, as in the case of other institutions.

To fill vacancies in the following new trustees were elected: Bishop Earl Cranston, Washington, D. C.; N. T. Arnold, Ridgway, Pa., and Levi Smith, Warren, Pa.

Glorious Giving.

SPLENDID RECORD OF 1904.

Fifty-nine Millions in Gifts.

For American charities, \$166,993.22 a day. That is the record of the year 1904 up to Christmas Day.

Even this vast sum—given to educational institutions of all kinds as well as to the more strictly humanitarian needs of hospitals and "homes," and at a rate of \$115.96 for every minute of every day of twenty-four hours throughout the 359 which have already passed—even this is not fully complete, in that account has been made of no gift of less than \$5,000. Such a record as this can be only closely approximate.

Even so, the American people, on this day, with peace and good will ruling the land, may congratulate themselves that their nation has given to good causes during the course of this dying 1904, \$58,950,566.

Some highly interesting statistics relative to American philanthropy are furnished in the compilation of figures representing the donations to public institutions in this country during the year just closed.

Our colleges and schools have received \$18,188,783, or nearly a third of this evidence of the generosity of America's successful ones. Again its founder has placed the Carnegie Institute, Pittsburg, at the head of the list, dropping another five millions into its treasury. Next to it comes the Reed Institute of Oregon, which jumped from nothing at all to a very big something through the \$2,000,000 generosity of a woman of the Pacific coast.

A Dozen Lucky Ones.

The next dozen, in order of their "luck," are: Catholic Institute, Washington, \$926,000; Tulane University, \$750,000; Harvard University, \$725,000; Boston University, \$600,000; Cornell University, \$599,000; Conservatory of Music, New York, \$500,000; Clark Institute, Worcester, \$425,000; Columbia University, \$400,500; Tuskegee Institute, \$362,000; Syracuse University, \$350,000; Yale University, \$328,000; Wittenberg College, \$300,000.

Following this total of \$18,188,783 given to educational institutions, come galleries, museums and historical societies with \$8,890,000; churches and allied branches of religious works with \$4,800,000; hospitals, \$2,543,000; libraries, \$1,483,000, and miscellaneous charities, \$16,005,000. These six general items, taken from the total which represents the money given by Americans in 1904 to charitable works of every sort, leaves a balance which went out of the country to do its good; \$52,009,783 stayed at home.

Compared With Last Year.

It is of interest to see how the gifts of 1904 compare in these bulk items with the benefactions made by Americans in 1903. In four departments—hospitals and miscellaneous, churches, galleries and gifts made to causes outside the United States—there has been a gain, but the loss found in the other two a little more than offset this, so that the twelve month closes its record just \$218,217 behind that left by its elder sister.

Here are the comparative figures:

	In 1901	In 1903	Gain & Loss
Hospitals, etc.	\$18,648,000	\$14,396,216	\$4,251,784
*Educational	18,188,783	27,243,667	9,054,884
Out of U. S.	6,940,783	6,551,400	389,383
Galleries, etc.	8,890,000	6,821,000	2,069,000
Churches, etc.	4,800,000	1,571,500	3,228,500
*Libraries	1,483,000	2,585,000	1,102,000
Totals	\$58,950,566	\$59,168,783	
*Loss.			

Some Facts of Interest.

From the complete tables given below several facts of interest may be drawn. In the first place, nine persons have given from \$1,000,000 to nearly \$21,000,000 each, the total of their gifts rising to \$49,947,500, and three others tread so closely upon the million line as to demand admission to this roll of honor with aggregate benefactions of \$2,482,000 more. As was to have been expected, Mr. Carnegie leads the lists—still living up to his announced belief that a private fortune is merely a public trust.

Andrew Carnegie (9 libraries, 5 colleges, 2 clubs, a convalescent home, a hero fund and for excavations at Rome)	\$20,997,500
Miss S. C. Tracy of New York (general charities)	5,000,000
Marshall Field (to the Field Museum, Chicago)	5,000,000
Dr. T. W. Evans, of Philadelphia (to a museum of dentistry)	3,250,000
Mrs. Amanda Reed, of Pasadena (to Reed Institute, Oregon)	2,070,000
James J. Hill (to religion and education)	1,500,000
J. A. Woolson, of Boston (to education in the east)	1,200,000
Henry W. Oliver, of Pittsburg (general charities)	1,000,000
Henry H. Rogers, of New York (to a memorial church)	1,000,000
Mrs. Sarah Potter, of Providence (various eastern charities)	915,000
John D. Rockefeller (Johns Hopkins Hospital and education)	817,000
A. C. Hutchinson, of Georgia (to education in the south)	750,000
Total	\$43,429,500

Names That Are Household Words.

Other names, more or less household words in this land of money kings, which figure in the roster of 1904's benefactors, are J. O. Armour of Chicago, with \$250,000 to his credit; C. M. Schwab and George Foster Peabody, each of whom gave away \$200,000; ex-Mayor Grace of New York and John Hays Hammond, the famous engineer, each \$100,000; W. W. Astor, with \$70,000; J. Lowber Welsh, of Philadelphia, and Zenas Crane of Dalton, Mass., each \$50,000, and James Stillman and Henry Phipps, each \$25,000.

January seems to have been the best month for giving, its total of \$14,524,000 leading easily April's \$12,761,500. November takes third place, with \$9,948,500, and February trails along No. 12, with only \$1,097,783 to her credit.

The New Year promises to eclipse the record of 1904 in the magnitude of its gifts. Mr. Carnegie has already been heard from with nearly \$300,000 for the Maryland Institute of Baltimore which suffered serious loss in the great fire.

Inauguration of President Huntington.

One of the most important and imposing events which took place during the autumn in the educational world was the inauguration of William Edwards Huntington as the President of Boston University. Not less than forty of the leading American universities and divinity schools were represented by their presidents and distinguished members of the faculties. Governor John L. Bates gave an address in behalf of the Commonwealth of Massachusetts. President Charles W. Eliot, of Harvard, spoke in behalf of educational institutions. Bishop Goodsell, in behalf of the ministry, and Prof. Borden P. Bowne, in behalf of the University faculty, made felicitous addresses. Dean William F. Warren, the retiring President, whose name will be inextricably linked with the history of Boston University, gave the charge, beginning with this gracious sentence: "To William the Second, the first of the dynasty brings heartiest congratulations and good wishes." The inaugural address of President Huntington on "The University and the Public" is one of the sanest utterances which have come from an American educator in many a day. It is difficult to content ourselves with quoting two striking passages from this remarkable address. Every word is golden, and the entire address should be read by all interested in education. The passages which follow are in exact line with the arguments which have been used in advocacy of the establishment of the American University:

The present condition of education in our own land by no means justifies the conclusion that America has reached a perfect system, or found the exact definition of education. We are still experimenting; and the empirical method, while it leads to a great diversity in the means used to educate the young, has this advantage—all sorts of disciplines are actually applied. Out of the vast laboratory of schools and colleges, through the inductive process, it may be possible, after sufficient time and experiment, to come to a general agreement as to what constitutes an ideal education. The varied opinions that have been published from one institution and another about the proper length of the college course; the difference in college administration in the matter of elective studies; the debate between the advocates of classical and the champions of scientific study; the relation of collegiate to professional courses (can they be overlapped so as to shorten the entire period of preparation for the life work?)—all these unsettled questions in the educational world make it appear that pedagogy has not yet uttered its last word in higher education. * * * * *

But since that time (34 years ago) there has been a growing demand that in all higher ranges of instruction there must have been special training for the teacher in each special department. It has become a very common equipment for men who seek to do college teaching, and especially for those who qualify for professional instruction, to spend from one to three years at some European university. We are beginning to see American seats of learning offering to graduates instruction equal to any in the Old World, and Europe is likely to feel this honorable rivalry more and more. But teachers have not felt satisfied to take the high places where they need to have a thorough mastery of their subject, unless they have first saturated their minds with the best learning in the Old World. This is a fine trait in the professional class of American teachers. It is not altogether from the competitive principle that this ambition for high qualification springs. It is true that there is a commercial side to the case; the best places will surely seek the best men and pay them the highest recompense. But there is a deeper and finer incentive among American scholars than that of mere pecuniary reward. The very genius of our American people naturally permeates the rank of scholars. What is this genius? It is the determination to be in the front rank of the world's progress. This restless, unquenchable ambition, that the American spirit always and everywhere reveals—to allow no competitors to surpass our own achievements—finds room, even in the quiet seclusion of scholarship, to stir the intellectual aspirations for higher, broader and more exact learning.

Officers of the American University.

Chancellor - - - - BISHOP C. C. McCABE, D.D., LL.D.

Vice-Chancellor, BISHOP A. W. WILSON, D.D., LL.D. *Secretary*, REV. WILBUR L. DAVIDSON, D.D.

Financial Sec'y, REV. J. A. GUTTERIDGE, D.D. *Registrar*, REV. ALBERT OSBORN, B.D.

Officers of the Board of Trustees.

President, REV. D. H. CARROLL, D.D.

Treasurer, MR. CHARLES C. GLOVER. *Secretary*, REV. CHARLES W. BALDWIN, D.D.

Board of Trustees.

Bishop Thomas Bowman, N. J.
Michael Burnham, D. D., Mo.
Hon. Julian S. Carr, N. C.
Bishop C. H. Fowler, N. Y.
Mr. John E. Andrus, N. Y.
S. Parkes Cadman, D. D., N. Y.
Mr. A. B. Duvall, D. C.
Mr. B. F. Leighton, D. C.

class mail matter under act of Congress of July 16, 1894.

Stanford Mourns for Benefactor.

The love and veneration with which the student body of Stanford University regarded Mrs. Stanford has never been so evident as since her death.

Quietly, but sorrowfully, the university life goes on. There is little said concerning Mrs. Stanford's death, but every one realizes that every one else feels as though he had lost a personal friend. Every one reads what the newspapers have to say, but there is little or no discussion as to the cause of her death.

All the students cling to the hope that it was due to natural causes. None wish to acknowledge the shadow of a mystery covering the end of her life.

On the campus all is quiet. The big dormitories are hung with crape. The flags on the fraternity houses are at half mast, and the fraternity hoists, too, are draped in black. All social arrangements have been canceled, all athletic events postponed.

The university, declared for a month of mourning after the funeral, and all entertainments have been postponed until the latter part of April. The junior class voted not to hold its annual ball this spring. Each class has met and sent resolutions expressing the student sympathy and grief to President Jordan and to Mrs. Stanford's brother.

A plan is being considered by which the men will wear black neckties for the rest of the year, and the girls black ribbons. Another plan—to change the college colors from cardinal to red and black for one year—is under consideration.

In Palo Alto, the college town, it is the same. The streets are unusually quiet, flags at half mast, and the homes and business houses are draped in black. Every token of respect and honor is being paid to the memory of the dead founder. This is done, not from a sense of duty, or because of a feeling of fitness, but because each one feels the sorrow of a common loss. There is something infinitely touching about it all. Most of the students are keenly sensitive to the pathos marking the end of Mrs. Stanford's life.

The university, dedicated to the memory of an only son, is truly one of the "flowers of grief." When

Senator and Mrs. Stanford lost their son they decided to give all their time, wealth, and their best efforts to the building of a university. Those who were here during the first years can remember how Mr. and Mrs. Stanford used to drive together, how close an interest they took in all the details of the university life. To them, "The Senator" was as dear as Mrs. Stanford has been to those of a later day, but to the latter day students, "The Senator," like his son, is little more than a name. All that love and reverence has been given to Mrs. Stanford.

How often she has been seen driving alone about the university campus or the estate. Never did she appear but she was greeted with some proof of the students' loyalty and love.

After she had passed the students invariably fell to reminiscence. One recalled a kindness to a poor chap who was ill and without funds. Another spoke of kind words given. Another would recall the "dark days" of the university, when Senator Stanford's estate was tied up in litigation, and tell how Mrs. Stanford pawned her jewels and sold her horses to keep the university's doors open. The students never tired of recounting her good deeds.

But it was when Mrs. Stanford returned from her long absence that the loyalty of "her boys," as she loved to call them, showed itself. The entire student body would be at the station to welcome her. Once she returned from a trip to Japan for rare bronzes to beautify the campus. She reached Palo Alto after nine o'clock at night, but all the students were there to welcome her. Her horses were taken from her carriage and scores of eager hands vied for the privilege of helping to draw her to her home.

It was a clear moonlight night in the early fall, and as the procession moved up the palm-bordered avenue with torches and band in front, Mrs. Stanford sat alone in her carriage, bowing smilingly to right and left while tears of gratitude filled her eyes.

Arrived at her home, she made a brief speech to the students, standing on the veranda steps, and then she opened her house to them, receiving each gladly.

Until a late hour the house and grounds were full of happy students.

In this way the students always cheered the home-coming of their benefactress and tried by their devotion to minimize the loneliness of the childless widow.

Thus many generous souls build their monuments in the hearts of men.

The Hurst Collection—Fourth and Final Sale.

In our January issue it was stated that the sale of Part IV of Bishop Hurst's library would probably take place about the last of February. Our forecast of date, however, did not allow sufficiently for the completion of the catalogue and other preparations, which delayed the event, the most important of the four, until Monday, Tuesday and Wednesday, March 20, 21 and 22, when it came off at the rooms of the Anderson Auction Company, 5 West 29th street, New York. It occupied the afternoons and evenings of each of the three days, and was a most fitting and satisfactory crowning of the series begun in May, 1904. The sum realized from this fourth sale was somewhat over \$29,000, or about \$2,000 more than the combined results of the three preceding.

CONTENTS OF PART IV.

Part IV contained twelve editions of *Æsop's Fables*, and eighty-six of *Æ Kempis' Imitation of Christ*, in various languages; forty-six specimens from the presses of the Aldus family in Venice, five from the Plantin press of Antwerp, and thirteen from the Elzevier press at Leyden; thirty-seven early and rare Bibles; a large, practical outfit of Bibliography, numbering, with catalogues, about six hundred volumes; about fifty biographies; first editions of Hawthorne, Milton, Byron, Dickens and others; ten chained manuscripts of the fourteenth and fifteenth centuries; some choice extra-illustrated books; many volumes having valuable historic associations, such as Samuel Johnson's copy of Dryden's translation of Virgil, Hawthorne's set of Shakespeare, books from Dickens' and Kingsley's libraries, Melancthon's Bible and copy of Horace, and Southey's *Palmerin of England*, used in the preparation of his edition of that work; fifty-one samples of early printing of the sixteenth century; a fine group of Incunabula, or books printed prior to A. D. 1500, numbering sixty-six (inclusive of Bibles), among which are found three copies of Higden's *Polycricon* from the press of William Caxton, the pioneer printer of England, and fine specimens of Gutenberg and Schoeffer of Mainz, Uric Gel of Cologne, Anton Koburger of Nuremberg, Uric Gering of Paris, Anton Sorg of Augsburg, Kessler and Froben of Basle, Jenson, Pagininus, Wendelin "of Speier," and Arrivabenus of Venice, Ketelaer and Leempt of Utrecht, Koblinger of Vicenza, the "R" printer and Flach of Strassburg, John Faure of Lyons, Bartolomeo di Libri of Florence and others; three specimens each from the presses of Caxton's successors of a little later date, Wynkyu de Worde and Richard Pynson, and two from the press of Peter Treveris of Southwark; seventeen items of Erasmus, mostly contemporaneous editions of Froben at Basle (one of Frosehover, Zurich, the printer of the Coverdale Bible of 1550); over two hundred

books of fiction, nine of Eugene Field's works, many collected works; a few select Americana, such as Sandys' *Ovid* and the twelfth part of Hulsius' *Voyages* (Heinrich Hudson); twelve ancient works on Japan; sixty-four issues of the earliest Protestant press, mostly at Wittenberg, written by Luther and Melancthon, with artistic work of Holbein and Cranach; three illuminated devotional manuscripts on vellum of the fifteenth and sixteenth centuries, ten manuscripts in Samaritan, Arabic and Persian characters, a few contemporary Melancthon's, thirty-five curious and beautiful miniature books, several hundred periodicals, several hundred pamphlets, about fifty volumes of poetry, about one hundred volumes of fine bindings, chiefly literature and poetry; one hundred and fifty books of travel and guide books, forty-seven pieces of Colonial and seventy of Confederate currency, five hundred and seventy-five engravings, photographs, portraits, copperplates and maps; six hundred and twenty-eight numbered items of theology, embracing a set of Hampton Lectures for nearly a century, about seventy-five *Disciplines* of the Methodist Episcopal Church, many standard works in history, exegesis and doctrine, a hundred or more early Methodist publications, including many first editions of John Wesley's books and eight books by Samuel Wesley, and last, but by no means least, a superb collection of autograph signatures, autograph letters, autograph documents and autograph manuscripts by celebrated persons of both hemispheres. Among them were specimens of the handwriting of Alexander von Humboldt, Lafayette, John Wesley, William Wordsworth, Count Zinzendorf, Tischendorf, Van Oosterzee, Samuel Taylor Coleridge, William Cowper, Thomas Moore, Sir Walter Scott, Robert Southey, Robert Browning, Mrs. Browning, Garibaldi, Munkacsy, Thomas Carlyle, Benjamin Franklin, Robert Morris, James Kent, Alexander Hamilton, Francis Hopkinson, Benjamin Rush, Presidents Washington, Monroe, Polk, Jackson, Buchanan, Lincoln, Grant, Hayes, Garfield, Cleveland, Benjamin Harrison and McKinley; Holmes, Longfellow, Whittier, Diaz, Jonathan Edwards, Increase and Cotton Mather, Daniel Webster, Stephen Girard, Generals Gates, Scott, Wool, Sherman and Sherridan; Washington Irving, Mrs. Sigourney, William Gilmore Simms, Edgar Allan Poe, Walt Whitman, William H. Seward, Jefferson Davis, P. T. Barnum, Geo. Peabody, Dr. Kane, George Bancroft, Agassiz, Sam Houston, Frances E. Willard, Gerrit Smith, Eugene Field, Edmund C. Stedman, Harriet B. Stowe, D. L. Moody and numerous others.

SPECIAL FEATURES OF THE SALE.

On Monday afternoon there were two high points of interest reached. The first was in connection with the bidding on the early Bibles, when the Paris Bible of Fryburger, Gering and Crantz, 1475 or 1476, went for \$135; the Jenson Bible of Venice, 1479, \$150; the Matthews Bible, London, 1549, \$90; and the Coverdale Bible, 3d edition, Zurich, 1550, \$190—all within a few minutes. The second was at the close when the ten chained manuscripts to the music of the rattling links, the rhythmic voice of the auctioneer, and the lively voices of bidders, were struck off at prices ranging from \$30 to \$151.

The evening session of Monday was marked by two waves of lesser and two of greater excitement, beginning with a moderate one over books from Dickens' library for \$106, the extra-illustrated life of Dickens, by Forster, which brought \$105, and Johnson's copy of Dryden's *Virgil* for \$96. Interest jumped to a high pitch when English presses were struck, and the three pieces from Caxton's press ran up the rapid scale to \$1,400, \$790 and \$675, to be followed immediately by the three Wynkyu de Worde for \$170, \$130 and \$150, while the three Pynsons let the interest down to the level again by bringing \$70, \$40 and \$21, and Treveris made a slight ripple with two items of \$70 and \$35. The second moderate height was reached when Hawthorne's *Famous People*, first edition, went for \$52, Leigh Hunt's copy of Hazlett's *Characters of Shakespeare* for just half that sum, and the Hulsius (twelfth part) for \$37.50. Near the close came the fine enthusiasm caused by the Incunables, which was sustained for a half-hour, while these early specimens from the cradle of the art showed their long hidden faces, and were struck down in lively

fashion, the chief being Gutenberg's Catholicon of Balbus, Mainz, 1460 (partly made up with that probably of the "R" Printer), \$710; the "R" Printer's two items for \$100 and \$105; the three from Peter Schoeffer's press, Mainz, 1473 1474 and 1478, bringing respectively \$260, \$52.50 and \$15; and Ulric Zel closing the scene with his four specimens at \$90, \$115, \$35 and \$27.50.

Tuesday's afternoon session was punctuated by several items of special interest, each succeeding one rising a little higher, and the last being a splendid burst of bibliologic splendor. There was a fine elevated stretch as the sixty four beautiful specimens of the Wittenberg Press came out in stately procession and were retired, one by one, the highest price of the line being reached by Luther's essay on schools (1530), \$47. A few minutes later came three Illuminated Manuscripts at \$25, \$40 and \$41, a choral book or Antiphonal for \$80, and eleven oriental manuscripts from \$3.50 to \$50. Then fifteen minutes later Melancthon's Bible and Horace were sold for \$75 and \$60, and Milton's Paradise Lost, first edition, was struck off at \$75. After twenty minutes of ordinary items, Southey's copy of Munday's translation of Palmerin of England lifted all up as it climbed to \$315. Then for a half-hour there was little to excite, except perhaps the fine Plantin, a Roman Breviary, for \$45, and the eight volumes of Ruskin at \$66. The acme of the afternoon came when Nathaniel Hawthorne's set of Shakespeare (15 volumes, one missing), with his autograph in each, set all eyes agog and many mouths open with loud simultaneous bids which moved swiftly up from \$5 to \$20, to \$30, to \$50, to \$60 and then by a leap to \$100 a volume, or \$1,400 for the incomplete set.

The evening session of Tuesday capped the climax. It began at 7:30 and lasted for more than three and a half hours. It was a severe ordeal for the good natured Morse, the auctioneer, whose voice and enthusiasm failed not through the 294 numbers sold. Various features served to heighten this particular session. Consisting wholly of autograph letters and manuscripts of celebrities, there was frequent opportunity to note the different values on different items of the same writer, the comparative worth of the writings of different authors or public characters, the characteristic signs, or motions, beside vocatives, of the experts at bidding, the high art of the auctioneer in putting bids into the arena without more than a nod or a wink from the bidder, and the swift passing through the line of these most precious relics. We touch here and there the record on items for which we have space.

Thomas Carlyle's sentiment, "Seize occasion by the forelock; hind-hair she has none," in his autograph, brought \$35. The surly Scot was followed by the sunny "Mark Twain," whose lines brought \$7.50. Four items of Coleridge brought \$125, \$105, \$25 and \$5. Fenimore Cooper's Life of Preble, \$230; a volume in Cowper's hand, \$80; a Diary of Jacob Eliot on leaves of Ames' Almanacs, \$400; nine brief manuscripts of Eugene Field went for \$572.50; a letter of Benjamin Franklin, \$52.50; and nine of his signatures, \$57.50; a letter of General Gates, \$45; and two of Alexander von Humboldt, \$14. Electric thrills went through the crowd at the name of Washington Irving and his two manuscripts, Tales of a Traveller and Bracebridge Hall, which mounted up to \$1,100 and \$1,315, respectively, while a letter from Sunnyside brought \$32. Lafayette's letter to Patrick Henry fetched \$50 in short order. A moment later and Lincoln's manuscript, a page from his last annual message, rose grandly to \$150. One of Longfellow's letters then went at \$25, and McKinley's first inaugural, with autograph presentation, \$20. A short lull and Cotton Mather's manuscript sermon (with others) brought \$100. Five minutes more, and Thomas Moore's Epicurean shot up and rested not till it struck \$725. Another five minutes and the weird name of Poe introduced a startling list, beginning with Tamerlane in manuscript, which brought \$801, followed by six other specimens of his neat hand, bringing \$790 and closing with his own copy of Eureka, annotated in his own hand, which soared away to \$530. Ten minutes later Pote's Journal of his Captivity in Quebec brought \$110. A lapse of five minutes and the Wizard of the North is before us, Sir Walter Scott's History

of Scotland, and is eagerly taken after a long run at \$1,600. A letter of Simms at \$36 and eight narrow memorandum books of Southey at \$100 let us down to a quarter of an hour of common things, when we are summoned to a majestic series of documents and letters of George Washington, fourteen in number, which brought \$3,725. One of these letters brought \$1,065—the one to Benjamin Harrison. Another to Governor Brooke, of Virginia, \$465, was secured for the American University. From that high table-land we descended to a lower level on a letter of John Wesley at \$9, two items of Walt Whitman at \$22.50 and \$150, and an autograph of Whittier at \$36. The engravings closed the scene at quarter past eleven, and we rubbed our eyes to see if we had been dreaming.

Wednesday's sales of afternoon and evening were all "Theology," which, while highest in real value, counts for little in exchange for money.

As a general summary of the four sales the following is given:

Part I. Washingtoniana, \$7,844; Franklins, \$5,006.

Part II. Almanacs, \$75; Juveniles, \$20; New England Psalters, \$180; Writings of the Mathers, \$2,852; New England Primers, \$874; Languages, Indian and other, \$4,065.

Part III. General Americana, \$6,270.

Part IV. General Books, Autographs and Manuscripts, \$29,328; a grand total of \$56,514.

In a later issue we hope to present a larger list of items with the prices, valuable for reference.

Some Recent Gifts.

By the will of the late S. H. Chandler, of New Gloucester, Me., a property, estimated as worth \$750,000, was left to the American board unreservedly. By a codicil the property is divided between the heirs at law and the board. The codicil was made after Mr. Chandler was placed under guardianship, and the provisions of the codicil are to be disputed in the courts by the board. The will is so drawn that whatever the sum may be that may come to the board ultimately it can only spend the income of the same. Mr. Chandler was a simple, modest layman, whose wealth had accumulated slowly and quietly.

It is announced that the gift of \$50,000 by John Hays Hammond, of New York, the mining engineer, for a metallurgical laboratory at Yale, has been increased by Mr. Hammond to \$100,000.

The estate of Captain Wm. F. Norton is expected to yield \$250,000 to the Baptist Orphan's Home in Louisville, Ky.

Miss Helen M. Wells of Saginaw, daughter of the late Charles W. Wells, last week presented Saginaw General Hospital with a donation of \$300,000, to be used in the erection of a cottage for consumptives and to provide means for maintaining the same.

Dr. D. K. Pearson, of Chicago, is still remembering the small and needy colleges with splendid gifts. Already he has distributed \$3,000,000, and he says he will continue the good work. May he live long and prosper.

Yale University has received a legacy of \$100,000 from a sister of the late Governor Harrison, of Connecticut, and it is provided in the will that the university may use the money as it pleases. It would be a good deed if more bequests were left to colleges, mission boards and other institutions to use as they please.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson,
D. D., University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

At the North Indiana Annual Conference, after the secretary, Dr. W. L. Davidson, had represented the American University, Bishop Spellmeyer, who was presiding, added a ringing exhortation. He spoke feelingly of his association with Bishop Hurst, and pledged continued loyalty to the great institution which he founded.

During these opening days of spring busy preparations are being made on the grounds of the University for the planting of about one hundred and ten trees, fronting on the line of Nebraska avenue and the driveways and quadrangle, in the vicinity of the College of History. These trees are the gifts of two friends of the University, and will greatly beautify the grounds in coming days. The trees to be planted include the linden, elm, sugar maple, English oak, and Norway maple, which are admirably suited to the soil and climate of Washington.

On March 22 the Building Committee of the University awarded the contract for work on the College of Government, the building to be put under roof. Bids were received from nine contractors who had been invited to compete. The right was reserved by the committee to secure separate bids on the marble to be used in the building. This was done because certain marble men had made promises of liberal donations in view of the fact that the building was to be a memorial to President McKinley.

Competition has been lively in this line, as it would be no insignificant advertisement for any quarry to have its marble in this imposing building at the Nation's Capital. The contract will be closed at once and work commenced. To meet the pressing needs every dollar subscribed towards this building should be paid at once. New and generous subscriptions are also invited.

Gift of a Fine Farm.

Mrs. Jane A. Gibson, of Aurora, Indiana, has just given to the University a deed in fee simple, through Dr. W. L. Davidson, Secretary, to a farm of seven hundred (700) acres lying along the Ohio River, forty miles south of Cincinnati. The farm is beautifully situated, with a water frontage on the river of more than a mile. The scenery along the Ohio is here simply superb. The writer recently drove over the entire farm and was delighted with its possibilities. It is now under the care of three experienced tenants, two of them living in commodious and handsome houses charmingly situated on the bank of the Ohio. There is a forest of about one hundred acres near the center of the farm. There is some hill land, of course, near the river, but much of it is fertile and productive, and is admirably suited for grazing purposes. One hundred and twenty acres are now sown in wheat, fifty acres in rye, oats, and alfalfa, and eighty acres will be planted in corn, with many acres in meadow from which fine hay has been cut. Altogether the gift is a splendid one, and Mrs. Gibson has the hearty thanks of the Trustees of the University. She has been helpful to many good causes and finds joy in giving to worthy objects. She is scattering some of her beneficence during her lifetime and is rejoicing in the progress which her gifts inspire.

A Great Treasure Secured.

In another column is found the most complete and full account of the sale of the library of Bishop Hurst which has been published. We are glad to be able to present it to our readers. It will ever be a source of deep regret that this splendid library could not have been saved to the American University as a fitting memorial to its founder. Every effort was made to induce men of wealth and generous impulse to purchase it for the American University, but all efforts were in vain. Fifty years from now this library will be worth five times its

present value to any great university. It is now, however, scattered forever, selected sections of it having found their way into the great public and private libraries of the world. There was one item with which those who are familiar with the history of the American University were loath to part, and that was the four-page autograph letter written by George Washington, in 1795, to Governor Robert Brooke, of Virginia. The letter was written on Mr. Washington's private letter paper bearing his watermark. The letter is in remarkable condition, enclosed in a morocco solander case. Bishop Hurst bought this letter possibly about 1892, and paid for it \$192. The letter bears on educational matters, and was a prophecy concerning the American University. This letter was really the genesis of this enterprise. Bishop Hurst always counted the letter one of his greatest treasures, and it was so intimately associated with his interest in founding the University that *fac simile* copies of the letter were made and carried with him to many meetings which he held in the interest of the work. Such a rare treasure it was felt should not be allowed to depart from the possession of the American University, if any money could buy it. As an example of the interest of our first President in educational matters, as well as his wisdom and insight, we herewith present the letter in full:

PHILADELPHIA, 16th March, 1795

SIR—Ever since the General Assembly of Virginia were pleased to submit to my disposal fifty shares in the Potomack and one hundred in the James River Company, it has been my anxious desire to appropriate them to an object most worthy of public regard.

It is with indescribable regret that I have seen the youth of the United States migrating to foreign countries in order to acquire the higher branches of erudition and to obtain a knowledge of the sciences. Altho' it would be injustice to many to pronounce the certainty of their imbibing maxims not congenial with republicanism, it must nevertheless be admitted that a serious danger is encountered by sending abroad among other political system those who have not well learned the value of their own.

The time is therefore come when a plan of universal education ought to be adopted in the United States. Not only do the exigencies of public and private life demand it, but if it should ever be apprehended that prejudices would be entertained in one part of the Union against another, an efficacious remedy will be to assemble the youth of every part under such circumstances as will, by the freedom of intercourse and collision of sentiment, give to their minds the direction of truth, philanthropy, and mutual conciliation.

It has been represented that an university corresponding with these ideas is contemplated to be built in the Federal City, and that it will receive considerable endowments. This position is so eligible from its centrality—so convenient to Virginia, by whose legislature the shares were granted, and in which part of the Federal District stands—and combines so many other conveniences, that I have determined to vest the Potomack shares in that university.

Presuming it to be more agreeable to the General Assembly of Virginia that the shares in the James River Company

should be reserved for a similar object in some part of that State, I intend to allot them for a seminary, to be erected at such place as the wisdom of the Legislature shall deem most proper.

I am disposed to believe that a seminary of learning upon an enlarged plan, but yet not coming up to the full idea of an university, is an institution to be preferred for the position which is to be chosen. The students who wish to pursue the whole range of science may pass with advantage from the seminary to the university, and the former, by a due relation, may be rendered cooperative with the latter.

I can not, however, dissemble my opinion that if all the shares were conferred on an university it would become far more important than when they are divided, and I have been restrained from concentrating them in the same place merely by my anxiety to reconcile a particular attention to Virginia with a great good, in which she will abundantly share in common with the rest of the United States.

I must beg the favor of your Excellency to lay this letter before that honorable body at their next session, in order that I may appropriate the James River shares to the place which they may prefer. They will at the same time again accept my acknowledgments for the opportunity with which they have favored me of attempting to supply so important a desideratum in the United States as a university, a equate to our necessity and a preparatory seminary.

With great consideration and respect,

I am, sir, your most obedient and humble servant,

GEORGE WASHINGTON.

His Excellency Robert Brooke,
Governor of Virginia.

The bidding for the letter at the sale was most spirited, as many seemed anxious to possess it. The bid which secured it was \$465, which was made by the Secretary of the University, who went to New York specially to purchase the letter, and gave for it his personal check. Promises had been made by some friends of the University to assist in the purchase of this letter. These promises will, of course, be kept, but there is large opportunity yet for friends to come to the rescue and reimburse the Secretary for the amount he personally advanced that the letter might pass into the archives of the University to become one of its richest treasures. There are in the possession of the University twenty photographic *fac simile* copies of this letter. To those who are willing to give \$25 toward placing this letter permanently in the possession of the University, one of these *fac simile* copies will be sent. It is perfect in every detail and will be appreciated by anyone who receives it. This original letter will grow in value as the years pass by, and when the institution which our far-seeing first President dreamed of shall find its reality in the completed American University, this Washington letter will be chiefest among its treasures. Will you honor the faith and the courage of the Secretary by assisting him in paying for the prize? Send checks to order of W. L. Davidson.

Our Library Again Enriched.

The Elm Park Methodist Episcopal Church was several years ago made the recipient of a luxuriously bound copy of the famous Macklin Bible published in London in 1800. This treasure was recently donated by the same church, through the kind offices of the pastor, the Rev. Dr. Charles M. Giffin, now at Ashbury Park, N. J., to the American University. It is embellished with sixty-six full page engravings, the same number of vignettes, one at the beginning of each book, and forty-seven tail pieces of unique design—a total of one hundred and seventy-nine engravings. They are from designs and pictures of the most eminent artists of England. It is in six large quarto volumes, measuring 14½ by 17¾ inches, on beautiful Whatman paper bearing water mark of 1794, and contains 3,086 pages of elegant printing. The binding is a superb specimen of full russia, richly decorated with many devices in gilt, and well preserved. The typographical beauty and uniformity of this edition of the Scriptures are much enhanced by the novel use of small dots below the first vowels of all the words supplied by the translators and usually printed in italics.

Andrew Carnegie in a New Role.

Mr. Andrew Carnegie, in an address at the annual dinner of the alumni of Stevens Institute, New York City, March 28, stated that interest in the erect on of public libraries, to which he had given widely and liberally during the past few years, was dwindling, and that application for such aid had greatly decreased. He declared that he was now taking much interest in the future of the small college. He expressed the opinion that the young man who goes to the small college has a better chance of getting a good education than the one who goes to a large college. He likes to see a young man excel, not at foot-ball or anything that pertains to the foot, but helikes to see the head come out ahead. In the larger colleges he regrets to see that sport seems generally to take the place of valuable education.

Mr. Carnegie reasons wisely, and is now, in our judgment, beginning to make the best use of his money he has ever made. But for the small colleges the great universities could not exist. Some of the brainiest men we have in public life are the product of the small college. Many a man who has won high renown might have remained "little and unknown"

but for the small college near his home, which afforded him a chance within the reach of his meager means. Money could nowhere be invested to better purpose than in this line of work which Mr. Carnegie has mapped out for himself. His belief in higher education and in original research is evidenced by his splendid endowment of the Carnegie Institution. He now extends his benefactions to the institutions where endowments are meager and salaries are small, but where young men and women of high ambition find their only chance to get a foot-hold on the pathway of knowledge. All honor to Mr. Carnegie in his new role. He gives like a Christian. Many shall rise up and call him blessed. Some gifts he has recently made, in which we have special interest, are \$150,000 to Syracuse University, \$50,000 to De Pauw University, and \$24,000 to Berea College.

College Tuition Fees.

The Yale Divinity School will not, it is announced, establish a tuition fee. The faculty has declared that such a step would mean the reduction of one-half in the number of students. So far as the Divinity School is concerned, the matter is temporarily settled, but the discussion of fees in other departments of the University still goes on briskly. At Harvard some one raises the question at least once a year. Week before last, for example, the *Evening Post* published an account of the movement to secure a large additional endowment for the college proper—\$2,500,000 is the minimum, and \$10,000,000 is mentioned as the possible goal. If Harvard can not get this money, so the argument is often put, the limited income may force the increase of tuition fees. In most other Eastern colleges and universities, the authorities, when casting about for means to make both ends meet, are seriously asking whether the students should not bear a larger share of the burden.

Education costs much more than it did twenty-five or even fifteen years ago. The days when Mark Hopkins on one end of a log and a boy on the other were a first-rate college in miniature have long since passed. The libraries and laboratories which must now be maintained, even in a relatively small college, eat up the income of a million or two. Books are expensive in themselves, and the men and machinery for cataloguing and making them instantly accessible to a thousand students during

fourteen hours of the day are not to be had for nothing. Laboratories with the latest apparatus in chemistry, physics, and all the branches of engineering are in some ways yet more expensive, for while a large number of books are as useful to the student of literature to-day as they were two hundred years ago, the scientific apparatus of two decades ago is valuable chiefly as a curiosity. To keep pace with the strides of modern science would almost drain the purse of Fortunatus. There is not a college of standing in America that could not expend from \$50,000 to \$100,000 annually merely in keeping up the efficiency of libraries and laboratories, and the larger institutions, like Harvard, Yale, Columbia, and the Western State universities, need far more.

Sound instruction cannot be provided by wholesale at cut rates. The expansion of a college, while it may reduce certain per capita expenses of physical maintenance and administration, ought not to affect profoundly the per capita cost of teaching. In a few courses twenty pupils can be handled as easily as ten; but if there is to be anything like personal attention and guidance, the professor in charge of a large course must have a stout corps of assistants to follow with care the work of individuals, correct their reports, theses, and examination papers, spur the lagging, and help the ambitions. A large course not thus thoroughly manned speedily degenerates into a "snap"—an academic Botany Bay. Experience at Harvard and elsewhere abundantly shows that the proportion between students and teachers must be held pretty steady if a university is to be "an alma mater, knowing her children one by one, not a foundry or a mint or a treadmill."

Moreover, the professor should not be asked to give his services for the pleasure of doing good. While we can not accept the view that college teachers are, as a class, in the submerged tenth, heroically upholding a tradition of culture for the benefit of a world which neglects and starves them, we are sure they should be better paid. An increase of salaries from a third to a half throughout the country would be nothing more than justice; and it might, by attracting stronger men, improve the average of breadth and virility in our faculties.

While the demands for money are thus growing more insistent, the rate of interest is always falling. Harvard received 7.82 per cent. on her investments in 1871-72 and only 4.77 in 1903-04; and others college treasurers tell the same story. The relation

between income from tuition fees and income from productive funds is exhibited in the following table which President Charles E. Thwing of Western Reserve University compiled for *Harper's Weekly* from the last report of the United States Commissioner of Education (1902):

Name	Tuition fee in college	Income used from productive funds	Income from pro- ductive funds
Hamilton College.....	\$75	\$1,000	\$88,000
Hobart College.....	80	7,616	18,224
Colgate University.....	60	16,258	48,285
Cornell University.....	100-125	285,281	107,113
Columbia University.....	150	470,217	524,730
New York University.....	100	152,995	50,438
University of Rochester.....	60	13,619	36,908
Union College.....	75	9,000	20,000
Syracuse University.....	75	88,425	32,267

The figures from other States are similar. The student often contributes only from a third to a half of the money spent on his college training. The rest comes from the diminishing interest on productive funds.

As a matter of bare equity, he might be required to contribute more. If the lads who own automobiles and horses and who employ valets could be subject to a special levy—a tax on luxuries—the colleges and the boy as well might gain. A tax on laziness and incompetence is proposed by Prof. J. McKeen Cattell of Columbia in a recent issue of the *Popular Science Monthly*. He would have the students of lowest standing pay the highest fees. These suggestions, however, are more ingenious than practicable. A high fee would not disturb the rich, and, where there are many scholarships, it might not overload the ablest among those of narrow means. There is, however, grave danger of driving away the very persons who profit most by college. Neither Harvard nor Yale, for example, can afford to alienate any considerable number of those serious, hard-working, and intelligent undergraduates who come from what might be called "middle-class" families. They become the alumni of whom in later years the university is most proud. At this present moment they form the cleanest and most wholesome element in the body academic. It is their presence and favorable influence which make multi-millionaires, provided they be not also fools, willing to send their sons to college. Were a university by any stroke of malign fate to become in fact a "rich man's college," it would soon rank, as an educative force, with the New York Stock Exchange or the Waldorf-Astoria Hotel. For a college, as for a man, there is a possibility of gaining the world and losing one's soul.—*The Nation*.

Does Education Pay?

In answer to the question, "Does an Education Pay?" a recent article in *Success* puts it in this forcible manner:

"Does it pay to learn to make life a glory instead of a grind?"

"Does it pay to open a little wider the door of narrow life?"

"Does it pay to add power to the lens of the microscope or telescope?"

"Does it pay to know how to take the dry, dreary drudgery out of life?"

"Does it pay to taste the exhilaration of feeling one's powers unfold?"

"Does it pay to push one's horizon farther out in order to get a wider outlook or clearer vision?"

"Does it pay to learn how to center thought with power, how to marshal one's mental force effectively?"

"Does it pay to acquire power to get out of high and noble pleasures that which wealth cannot purchase?"

"Does it pay to acquire a character wealth, a soul property, which no disaster or misfortunes can wreck or ruin?"

"Does it pay to have expert advice and training, to have high ideals held up to one in the most critical years of life?"

"Does it pay to make lifelong friendships with bright, ambitious young people, many of whom will occupy high positions later on?"

"Does it pay to become familiar with all the lessons that history and science can teach us to how to make life healthy and successful?"

"Does it pay to become an enlightened citizen, able to see through the sophistries of political clap-trap and vote intelligently on public matters?"

"Does it pay to experience the joy of self-discovery, to open up whole continents of possibilities in one's nature, which might otherwise remain undiscovered?"

"Does it pay the sculptor to call out from the rough block the statue that sleeps in the marble, and which shall tell the story of heroism and greatness to unborn generations?"

"Does it pay to have one's mentality stirred by the passion of expansion, to feel the tonic of growth, the indescribable satisfaction which comes from the consciousness of perpetual enlargement?"

"Does it pay to have four years filled with the most delightful associations with cultured people, at an age when ambitions and high ideals have not been dulled or shattered by disappointment, or the unbounded faith in human nature shocked by violated pledges?"

class mail matter under act of Congress of July 16, 1894.

Public Libraries and the Hurst Collection.

While the regret was great that this magnificent collection could not be kept intact and made the possession of the American University, as a memorial to Bishop Hurst, it is gratifying to know that in its dispersion many private collections were enriched, and thirty-one libraries accessible to the public added to their treasures hundreds of valuable volumes. The public libraries which secured selections are:

	No. OF PIECES	No. OF SALE ITEMS
Library of Congress, Washington, D. C.	1,025	354
Boston Public	240	154
Forbes, Northampton, Massachusetts	229	41
Marlborough (Massachusetts) Public	146	10
Watkinson, Hartford, Connecticut	128	54
American University	64	2

Derby (Connecticut) Public	4	1
Cornell University	3	3
Maryland Historical Society	2	2
Providence (Rhode Island) Public	2	1
District of Columbia Public	1	1
New Bedford (Massachusetts) Public	1	1
Total	2,098	757

Of the books from Washington's Mount Vernon library two went to the New York Public; Washington's Account Book of Household Expenses during his second term as President was secured by the Historical Society of Pennsylvania, and Washington's letter to Governor Brooke of Virginia, recommending the establishment of a university in the Federal City, was purchased for the American University.

Of the Franklin Imprints the Library of Congress secured 35, of which 29 were Colonial Laws of Pennsylvania: the Historical Society of Pennsylvania, 21, the chief item being the Poor Richard Almanac for 1739; the Boston Public, 20; the Pennsylvania State, 14, all being Colonial Laws; and the Harvard Law School, 3, two being Laws of New Castle, Kent, and Sussex.

Five New England Psalters were bought by the Boston Public. Of the Mathers, Congress took 8, including Cotton's Soldiers Counseled and Comforted, and Christianus per Ignem; Boston, 4; and the Forbes, 1, Hades Look'd Into. Of the New England Primers the Essex Institute bought 3; Congress, 2; Forbes, 2; and the Boston, 1. Of the native Indian Languages of America, Congress acquired 210; Boston, 82; the Watkinson, 25; and Yale University, 3.

The Aitken Bible; the New England Historical and Genealogical Register (177 numbers); the Sower Bible, first edition; two Incunabula: Schöffer's Decretals of Gregory IX, Mainz, 1473, and one of Wolf's, Lyons, 1500; and an Illuminated MS. of the Fifteenth Century went to the Forbes.

The Roger Sherman Almanac for 1761, the Proposed Book of Common Prayer, Philadelphia, 1786; three of John Cotton's books, 59 early newspapers, the Sunday Service for Methodists, first edition, 1784, and second edition, 1786, Jesse Lee's Short History of the Methodists, and 10 volumes of the Methodist found a home in the Library of Congress.

Columbia University bought the thirteen-volume set of the American Museum. Boston Public captured sixty early Boston and other Massachusetts newspapers, Princeton University took two Incunabula—the "R" Printer's Dionysius de Burgo, Strassburg, 1470, and Peter Schöffer's Turrecremata (Expositio Psalteri), Mainz, 1474. Sixty volumes of Travels went to the Marlborough Public; two letters of Horatio Gates and one of President Hayes to the New York Historical Society; fifteen volumes of General Conference Journals (Methodist Episcopal Church) to Yale University; and sixty-three volumes of the General Minutes of the Annual Confer-

ences, forty-seven being the morocco-bound copies used by Bishop Hurst in his episcopal tours and containing many entries in his own handwriting, came to the American University.

The Bishop parted with two of his treasures at private sale during the last two years of his life—the one being Hawthorne's manuscript of the Blithedale Romance—for \$1,600, and his copy of the Bay Psalm Book of 1640 for \$2,500. He spent many an evening or fragment of a day in fondling the precious volumes, now giving a loving touch to a long-sought and newly acquired favorite, or tenderly opening and by smile or spoken word caressing one long in his possession, as if these dwellers on his shelves were creatures endowed with life. Who will dare to say they were not?

A Central Dome for the Pillars.

The *Central Christian Advocate* of June 7th contains a very suggestive editorial on "An Educational Programme for Methodism," that should be carefully read by every Methodist interested in higher education. While some of the strongly put statements in the editorial may seem radical and sound strangely new to many readers, they have, nevertheless, from time to time been ardently advocated by those who are firm in their convictions that Methodism has not yet measured up to her full responsibility along this line, nor made captive all the opportunities which are open to her.

It was a programme strangely like this that Dr. Edmund J. James, then president of the Northwestern University, proposed at the College Presidents' meeting in February, 1904, and which before that meeting had had rather full presentation in the papers of the Church. He was, however, promptly sat down upon by that august body, and in no very delicate and generous manner either. His treatment on that occasion is one of the answers to the questions as to why he is now the president of the Illinois State University. Some years, however, before Dr. James had the public ear, some views which he advanced, and which Dr. Spencer has so admirably set forth in his editorial, were advocated by the founder of the American University and by those who have been associated with him in its growth and development. They had been saying over and over again to every conference in Methodism and at great educational gatherings wherever liberty

was given to speak, the very things set forth in this editorial. Many of the expressions even sound strangely familiar. Dr. Spencer's pen has done such a fine bit of work in massing facts and putting all in such concrete and attractive shape, that we propose quoting largely from the editorial, stopping occasionally to add a word of exhortation. He begins in this fashion:

Has not the hour yet struck for the Methodist Episcopal Church to formulate and proceed to carry into effect a well-articulated programme of education? Such a programme as yet the Church has not. The educational system of Methodism at the present time is that of individual pillars intended to be the support of a common dome which shall lean on each, be the logical conclusion of each and the glorification of each, but which pillars as yet have no such central dome, and consequently are more or less incomplete and significantly unrelated to each other.

Coming at once to the point, the lack of Methodism at this moment is a great *modern* university of post-graduate schools. We have noble institutions; we have expanding institutions; but is it not time now to make haste and equip at least some one of our universities with the money necessary to produce a great modern university as that word now means? We are at the present time in the illogical and incongruous position of assuming that education should be Christian—yes, in a sense denominational, and that is right—we build academies leading to our colleges; but we build colleges leading to—what? We pour out our money to build and maintain academies and colleges on a given theory, and then, at the critical moment, we turn our graduates over to other institutions for the most strategic part of their education. Nor does it end here: we have to go to those other institutions for the men to teach in our own schools.

The truthfulness of this entire statement is apparent to all. To bring about this glad result there must be some sacrifice; there must be some death of personal ambition and pride. The trouble is that each individual college is magnified beyond its real worth as related to the whole and that each *pillar* feels that it is worthy to be exalted into the central dome, as Dr. Spencer felicitously puts it.

The editorial continues:

Another point: Our half-hundred colleges and universities now existing in this land need a great modern university to supplement and co-ordinate their work. *Our colleges and universities are embarrassed by debt. They are not able to buy the finished inventions by which the latest researches in the various "ologies" are now elucidated.* Consequently there is sometimes—nay, often—a restlessness on the part of the best students in them. If we had such a great modern university, specialists in these departments could be loaned for a fortnight's lectures at the various colleges, taking with them apparatus or whatever, thus supplementing and putting the finishing touches on what was already being done in the various laboratories. This is not Utopian. It is perfectly practicable. It is only an added function of what is already demonstrated in university extension. It is being done by the great universities. Every college president will see that this is not one atom visionary. And how it would glorify the smaller college and university! How it would give dignity, worth, completeness to the daily work of the college and university! And how it would interweave our Methodism, give it solidarity and personality in its education and character-making!

This point is well taken. It is truly out of the

question to expect the ordinary college or the ordinary university to provide the appliances which are now necessary to the proper pursuit of post-graduate work. It takes money to do this and an immense amount of it, and even our strongest and wealthiest universities, with millions at their disposal, have found themselves unable to adequately furnish what is needed for this important line of work. One of the strong arguments for the establishment of the American University has been on this ground—that the Government had expended in the way of help to post-graduate work in the fourteen great literary and scientific departments, more than fifty millions of dollars, with annual appropriations of more than eight millions for enlargement and development. To all of these every access has been granted by Congress. They could with propriety be counted among the assets of the American University at their full worth. There is no such massing of help for higher education in any single city in the world. Take all which has been expended along these lines by a dozen of our greatest and best universities in America, and the amount would not equal that which has been expended at the capital of the nation for treasures, which practically belong to us without the expenditure of a single dollar.

Again he says:

Another point: The Methodist Episcopal Church should have this great modern university to fulfill its obligation to America—and the world. We prefer to believe in the entire separation of the Church and State. In such a social scheme we set ourselves in appreciation of what the State does to give us the blessings of freedom—to make the largest, fullest possible, free and patriotic constitution to humanity. We ask no favors—except that we be let alone—and we profess to proceed then to repay the blessings we enjoy, by building Christian colleges and universities, and sending forth Christian scholars—Christians with the professions, schools, trades—to give America and the world the high idealism, the high service, the high social standards, of what Methodism recognizes and follows in her Lord and Savior Jesus Christ. And to do this we ought to have the finished dome over all of a great modern university.

Where much is given much is expected. Methodism owes a great deal to the world. The only way by which any single denomination can give proof of its right to existence is by doing something which no other denomination is doing or attempting to do. It has been a good while since Methodism has done anything distinctively great for the world. In the days of the pioneer when the revival fires burned on the frontier, she did a distinctive work and gave full proof of her right to existence. In the dark days of the Civil War, when President Lincoln said that

the Methodist Episcopal Church sent more prayers to heaven and more men to the field than any other denomination, she was doing a unique and distinctive work, thereby proving to the world her right to existence. Is it not about time she was getting into line again and giving herself to some great and unique undertaking, giving evidence of her right to existence? Nothing would bring more honor to the Church and more glory to God, than to make one grand rally, every Methodist heart on fire with zeal for the cause, and set this mighty dome atop of our present splendid educational system.

The editorial then well says the following:

There are, all told, 484 universities and colleges of liberal arts in the United States, with about 164,000 students in all departments, 78,000 being in the collegiate and graduate departments. That is to say, one-eighth of all the colleges and universities in the United States belong to our Church, and nearly one-tenth of all the college students are in these our institutions. We submit that as these students, graduating from our various academies, colleges, and universities throughout the world, are forming their plans for completing their preparation for their life-work, the Methodist Episcopal Church should be able to provide such a possibility of preparation, and thus prove herself, under God, the kindly, sufficient alma mater, to shape their ideals and baptize their career.

Methodism should have such a great modern university. It owes it to itself. It owes it to its age. We believe the college and university presidents would all fall in line for promoting such a programme. Several have talked the matter over with us, and without exception they have declared that the programme is wise, opportune and vitally necessary. It would relieve them of burdens they now carry; it would correlate and glorify their work; it would fix the status of the college and fix the sum it should seek for endowment. It would perfect the educational plan of Methodism in America and the world.

Now as to location. If there be a better place for such an institution than Washington, the capital of the nation, where the heart-throbs are felt and where all civil, political, and social activities center, and for that matter all educational activities (for it is rapidly becoming the greatest educational center in the world) then let it be planted elsewhere. If the Church can afford, after the struggle of a dozen years; after the purchase of one of the most beautiful campuses for the planting of a university which can be found in the world; after the erection of two splendid marble buildings, unapproached on earth in their appointments for educational purposes; after the accumulation of more than two millions of dollars, given by those who in their hearts believe that Protestantism and Methodism needed just such an institution at the heart of the nation—to let this great movement at Washington die out, then let the end come quickly, so we can locate some other place, more suitable to the needs

of such an undertaking. If such a place can be found, then let us move on and occupy it. The hour has struck and the move must be made.

There is no need and no necessity for more than one such institution in Methodism at present. The "pillars" now will not support more than one such "central dome." It will engender more or less friction to establish even one such institution. To attempt three or more would stir up much jealousy and bitterness, all of which would be most harmful to the general cause. When will our college presidents become broad enough to see and realize that an institution of this scope and character does not in the least come in competition with them, and that there is no room for jealousy? The closing lines of Dr. Spencer's sane editorial, which bring out this thought in telling fashion, are given below, and with this quotation we leave the matter on the hearts of all who read these columns:

It should be said, by way of emphasis, that so far from infringing upon the colleges and other universities scattered like beacon-fires throughout the Nation, such a scheme as has been outlined above would add to their attendance, to the economy of their maintenance, to the prestige of their diplomas, and certainly to the solidarity, the unity, the prestige of our entire educational scheme.

May Trustees' Meeting.

The semi-annual May meeting of the trustees of the American University was recently held in Washington, D. C. A large number of trustees were present and much important business was transacted.

A check for \$10,000, from a lady friend in Chicago, reached the university office the morning of the trustees' meeting, with a promise that \$15,000 additional would be paid July 1. Announcement was also made of the gift of a farm of 700 acres, in a good state of cultivation, and with splendid buildings, located in Indiana, on the Ohio river, forty miles south of Cincinnati. The gift is unconditional and the farm is valued at from \$20,000 to \$25,000. Announcement was also made of a generous bequest for the university in the will of Charles W. Slagle, of Baltimore, recently deceased.

The trustees approved the action of the building committee in awarding the contract for the completion of the superstructure of the McKinley Memorial College of Government, at a contract price of \$137,729. The same kind of marble is to be used as that in the completed College of History, which

came from the famous Columbian quarries, near Rutland, Vt. Work will begin within a few days, and, under the terms of the contract, is to be completed within a year.

The board elected two new trustees—Rev. Dr. J. G. Bickerton, of Philadelphia, and Rev. Dr. Franklin E. E. Hamilton, of Boston—to fill vacancies.

During the afternoon members of the board visited the university site to inspect the building operations and the grounds, which have recently been beautified by the planting of more than a hundred trees of various species and beds of artistic shrubbery.

No action was taken on the proposition which has recently been made looking toward an affiliation with the George Washington University.

Death of Doctor Burnham.

Again we are called to the sad duty of recording the decease of a member of our Board of Trustees, the Rev. Dr. Michael Burnham, late pastor of the Pilgrim Congregational Church of St. Louis, and formerly of Springfield, Mass. He departed this life on April 15, 1905, at Denver, Colo.

His services as trustee of the American University began in 1893, and for twelve years he has been deeply interested in the progress of the institution. Though busy and burdened with the cares of a large and prosperous pastorate, he kept in living touch with the currents of thought and discussion in the educational realm, and was especially drawn to the field of the higher education as the legitimate fruit of Christian faith, particularly of the essence and spirit of Protestantism. He made a notable and impressive address on the American University, March 17, 1899, in Union Methodist Episcopal Church, St. Louis. One sentence deserves to be written in letters of gold: "The teaching of any institution that makes Christianity the acceptance of Jesus Christ as Saviour, and the obedience to him as Lord, is worth all the universities on both sides of the water, however scientific they may be considered."

Dr. Burnham was a broad-minded thinker, a warm-hearted friend, a faithful pastor, an able preacher, and both an advocate and an exemplar of the noblest and highest type of Christian manhood. His tongue spoke clearly and strongly. His life still speaks with the mightier eloquence of character.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

It is currently reported that the trustees of Northwestern University at Evanston, Ill., have elected Dr. A. W. Harris, now president of the Jacob Tomb Institute, Port Deposit, Md., to the presidency of the university, and that he has accepted. Dr. Harris is worthy and well qualified for this great responsibility. He stands in the front rank of America's brilliant educators and is a genius in executive ability. Northwestern is to be congratulated in her patient deliberation and her wise choice.

We present to our readers a third article on the sale and disposition of the Hurst library. These articles have been prepared with loving care, and will be almost invaluable to all bibliophiles. It was natural that in the columns of THE UNIVERSITY COURIER should appear the fullest account published of the almost unparalleled sale of the superb library of the illustrious founder of the American University. It will be interesting to discover how widely these books were scattered, and how many of the rare treasures were secured by the leading libraries of the country. The final article in the next issue will tell of the price secured for some of the books and manuscripts.

The Lane-Johnson School for boys—a memorial school—one in the splendid Episcopal Cathedral system in Washington, is now in course of erection, and will be a handsome and commodious building. The Phoebe Hearst School for girls, a part of the

same system, is now in successful operation, filled with earnest students from all parts of the country. The cathedral itself, one of the most commanding and beautiful ever built by this denomination, which can justly boast of so many artistic and attractive church edifices, will soon be built. It will be an added crown to the Capital City. This denomination is properly representing herself at the nation's center. This group of noble buildings is in a beautiful grove at the intersection of Massachusetts and Wisconsin avenues, just a short distance from the grounds of the American University.

Many subscriptions to the McKinley Memorial Ohio College of Government, which were made in numerous towns throughout Ohio during the past few years, are now being paid. Notices have been sent to every subscriber urging prompt payment as every dollar will be needed as the building advances. The response is most gratifying. This paper will reach all who have subscribed. If you know yourself to be in arrears, will you not kindly at once send check or money-order? This will greatly cheer and help us.

The secretary of the university, who purchased the autograph Washington letter at the sale of the Hurst library, full mention of which was made in the last COURIER, has up to the present time received in donations \$326 toward paying for the same. The letter cost \$465. The letter bears on educational matter and was the genesis of the American University. It was prized by Bishop Hurst as one of his choicest treasures, and is to be retained as a memorial to him. A photographic *fac-simile* copy of the letter will be sent to anyone contributing towards the purchase. The secretary would be thankful for your check in any amount to assist him in this financial burden which he personally assumed.

The biography of Bishop John F. Hurst, written by Rev. Albert Osborn, who for many years prior to the death of Bishop Hurst, was his constant companion and helper, is now on the press of the Methodist Book Concern, New York, and will be issued in the early fall. It will be illustrated and will be a triumph of the printer's art. This faithful and loving record of a great and useful life will be read with interest by the many friends of the departed Bishop.

If you have idle money and are uncertain just where to place it; if you want it to yield you a fair and certain income while you live and accomplish magnificent results when you are gone, write the secretary of the American University, 1119 F Street N. W., Washington, D. C., and a little booklet will be mailed you which will give you many facts and help you to a wise and restful decision.

Andrew Carnegie and Dr. D. K. Pearson still continue their generous benefactions to the smaller colleges. Their gifts are always conditioned on the raising of amounts largely in excess of that which they give—a wise plan. Both of them are doing a noble work.

William Jennings Bryan has also become the helper of the small college in dispensing a fund which was placed in his hands for educational purposes. He recently gave a nice little slice to West Virginia Wesleyan University. May his tribe increase.

Splendid Gifts for Northwestern.

These are the days of great gifts for educational purposes. A remarkable announcement was made at the recent commencement at Northwestern which will bring joy to every friend of that great institution. Recent gifts given for endowment have aggregated \$1,000,000. Eight hundred thousand of the amount came from six individuals. One, whose generous benefactions have endeared him to all, gave \$350,000; another gave \$200,000; one gave \$150,000; another \$50,000, and two \$25,000 each. The entire amount, with the exception of one contribution, comes from members of the board of trustees. Dr. Thomas F. Holgate, who has been the acting president during the year, has shown himself a master of details and every interest has steadily advanced. The total enrollment of students for the year reached 3,813.

The New Building Advancing.

Building operations have commenced in earnest at the university grounds. Scores of teams are busy delivering materials. The marble is now on its way from the quarry in Vermont. The contractors have a full force of workmen engaged to push the work as rapidly as possible. Under the terms of the contract the work is to be completed within one

year. It will be one of the most attractive and beautiful buildings for school purposes ever erected, besides being an appropriate and significant memorial to the martyred President. It is desired that every friend of the lamented McKinley shall have some share in this work. If you have not already subscribed toward this building, will you not send something generous at once? If you have given, can you not send something additional? Your gift is needed and will find instant use. You will cheer those who are earnestly pushing this great work, and will make an investment which will pay you many fold.

Self-Sacrifice of College Professors.

The following fine sentiment is from the admirable inaugural address of Dr. Herbert A. Welch, just made president of Ohio Wesleyan University:

"For the scholar to give up his bookish seclusion, to put aside many a problem that he would solve, and many a discovery that he might make, in order to give himself to the service of his students, often obtuse and indifferent as they are, is no light task. The pleasures of uninterrupted study and experiment and composition draw him; but our professors make the sacrifice. They understand that the world can more readily spare the additions to its knowledge which they might contribute, than it can spare the manhood they can give. When the day's work is done, it is the methods, the love of learning, the spirit, and the ideals which they have imparted that will count for the world's enrichment. So from the heart of many such a man has gone up in substance the same prayer which Van Dyke as a writer prayed: 'Lord, make me respect my material so much that I dare not slight my work. Keep me from caring more for books than for folks, for art than for life. Steady me to do my full stint of work as well as I can, and when that is done stop me, pay what wages Thou wilt, and help me to say from a quite heart a grateful Amen.' In these men, then, who are anointed for this high service—the strong for the weak, the wise for the ignorant—we put the genial above the cynical, the sympathetic above the sarcastic, the intellectual stimulant and guide above the task-master, and above all the man, who by a noble personality, can communicate the inspiration which shall become a flaming torch in the life of his younger brother."

The College Small But Fit.

The accomplished Latinist, Professor Morris of Yale, speaking at the Williams Commencement dinner, shook the idols of that typical small college rather sharply when he reminded it that, Topsy-like, it was growing into a large college. He added that his hearers should welcome the change, as he did, and give over the futile attempt to remain small; trying rather, in full consciousness of inevitable increase of numbers, to maintain their traditional social and academic life. His forecast is fully borne out by the statistics. Thirty years ago the small colleges of the East—Williams, Lafayette, Brown, Bowdoin, Amherst, Dartmouth, Hamilton, Union, Rutgers—averaged somewhere about 200 students each; to-day, with few exceptions, these colleges number about 400, while Dartmouth with over 700, and Brown with over 900, have passed numerically out of the class. In another aspect, the small colleges of to-day have about as large an attendance as the large colleges of a generation ago, and only the multiplication of new institutions—an unlikely event—will save the small colleges from becoming virtually extinct as such.

That, many feel, would be a pity; for there is not merely a relative but an absolute difference between an academic body of 300 and, say, one of 500 students. In one case there is considerable uniformity of experience, in the other extreme diversity. With classes of one hundred and fifty, or so, the divisional system breaks down, and undergraduates, instead of all coming under the instruction of a few professors, are distributed to a multitude of underlings in the academic hierarchy. At this point, too, the homogeneity of classes of about one hundred or less gives way to the more diversified activities of clubs, fraternities, and the like. So that the peculiar social and academic training which constitutes the stamp of the college tends to become blurred, and in the end we might expect to see the Amherst, Williams, or Bowdoin graduate as little redolent of his origins as, say, the bearer of a *Reifezeugnis* of his gymnasium. Or, putting it in other words, the organization of a college of 500 men is necessarily much that of a college of 1,000 or 2,000, and uniformity of organization reacts upon the product—the graduate.

Now, we are not unwilling to admit that a compensating gain of larger numbers and broader activities does make up in some measure for this transformation of a peculiarly American institution, but it would be unfortunate, we are certain, that the only survivors of this historic type should be such colleges as are not small by choice, but by reason of poverty or denominational association. There is, we are convinced, a field for a group of colleges which should be small by preference—aristocratic, if you will, but aristocratic along intellectual lines. Imagine a college which admitted not more than 300

students, and provided the traditional curriculum, in which the classics, mathematics, and philosophy held the chief place. Suppose the course to be purely disciplinary, and arranged absolutely without reference to the future callings of its students. Such a college would seek in its small teaching force—twenty would be a sufficient faculty—primarily character and ability in the classroom. In all matters it would set quality of instruction before quantity of subjects and courses. Science it would teach, but chiefly in its philosophical bearings. All the men would pursue the same courses, but the contact between professor and pupil would be so close that the ambitious undergraduate might be carried in any subject far beyond the minimum requirement, while in the companionship of men of wide culture many subjects—the literatures of England and Europe, a fair acquaintance with history, all the painful small beer of the new-style curriculum—would be acquired almost without effort. For it may be assumed that the man who knew not only Greek paradigms, but the Greek drama, would find his way easily to Shakespeare, Molière, or Calderon.

Utopian as this fancy may seem, nothing stands in the way of its realization except expensiveness and the difficulty of getting vitality *ex cathedra*. As for the money, people will pay for what is clearly good value; as for the danger of uniting abilities, and calling the conglomerate a faculty, good ability can be had when the cause is worth its while. Kings at Cambridge and Balliol at Oxford find no difficulty in securing dons worthy of their great traditions. Plutocracy—the undoubted bane of our older colleges in the East—would hardly invade a college that admitted only honor men, while by a prudent allotment of free scholarships the tendency to merely social aristocracy would be offset. Indeed, the enthusiasm and personality of its teachers would constitute them admirable mentors for the sons of the wealthy. One can imagine an atmosphere—it exists in some of the English colleges—in which the vulgar ostentation of wealth would be impossible. On the part of the professors would be required the conviction that simplicity and discipline are the ends of education. With them it would lie to prove that Greek and Latin have never worn out; that only the tradition of teaching them has decayed.

Such a college would, we believe, soon create a place for itself, through the conspicuous efficiency of its graduates in active life. Witness the Japanese students of the Buddhist books who plan brilliant campaigns, or the Oxford honor-men in classics who rule distant provinces of the Empire. To establish a college on this basis should attract a benefactor with an eye to the original. Meanwhile, any of the older colleges which, renouncing the vain competition with the universities, should elect to remain small on this basis, ought to win some better fame than that of an interesting survival.—*The Nation*.

FORM OF WILL FOR

THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University" a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Officers of the American University.

THE UNIVERSITY COURIER

Published by and Devoted to the Interests of The American University.

VOL. XII.

WASHINGTON, D. C., OCTOBER, 1905.

No. 3

Published Quarterly. Office, 1419 F Street N.W. }
Subscription Price, Twenty-five Cents a Year. }

{ Entered December 24, 1902, at Washington, D. C., as second-
class mail matter under act of Congress of July 16, 1894.

Facts Concerning Mr. Rockefeller's \$10,000,000 Gift.

The General Education Board, to which Mr. Rockefeller has given ten million dollars as an endowment fund, the same having been paid over on October 1 in cash or in income-producing securities, was established in February, 1902, under a national charter. One million dollars was at that time given by Mr. Rockefeller, designated for educational work in the South. The board was allowed to distribute the principal for common schools and secondary education. Mr. Rockefeller was so well satisfied with the exercise of its discretion by the board as to make to them this great gift, the income of which is to be distributed perpetually. The present board is Robert C. Ogden, George Foster Peabody, Wallace Buttrick, Starr J. Murphy, Frederick T. Gates, Daniel C. Gilman, Morris K. Jesup, Walter H. Page, Albert Shaw, John D. Rockefeller, Jr., Hugh H. Hanna, William R. Harper, and E. Benjamin Andrews. The first four in their order are chairman, treasurer, secretary and executive officer for the South and Southwest, and secretary and executive officer for the North and West. William R. Harper and E. Benjamin Andrews are University presidents; Daniel C. Gilman is ex-president of Johns Hopkins University; Albert Shaw is the editor of the *Review of Reviews*; Starr J. Murphy is counsel for Mr. Rockefeller; Frederick T. Gates is his special secretary; Morris K. Jesup is president of the Chamber of Commerce in New York City; Hugh H. Hanna is a distinguished publicist of Indianapolis, and Walter H. Page is editor of the *World's Work*.

The General Board has made this statement:

Both gifts are alike available for denominational schools, as well as for those which are non-sectarian. While the funds may be employed for denominational schools, they will be employed without sectarian distinctions.

No special denomination will be particularly favored, but the funds will be open to approved schools of all denominations, although they can not be employed for giving specifically theological instruction.

In distributing the funds the Board will aim especially to favor those institutions which are well located and which have a local constituency sufficiently strong and able to insure permanence and power. No attempt will be made to resuscitate moribund schools or to assist institutions which

are so located that they can not promise to be permanently useful.

Within these limits there are no restrictions as to the use of the income. It may be used for endowment, for buildings, for current expenses, for debts, for apparatus, or for any other purpose which may be found most serviceable.

This gift is peculiarly adapted to the situation. The conditions of Mr. Carnegie's large gift exclude denominational schools from the benefits.

We direct attention to the genuine sagacity displayed in the statement: "No attempt will be made to resuscitate moribund schools or to assist institutions which are so located that they can not promise to be permanently useful."

This is the admirable summary given by the New York *Christian Advocate*. Mr. Rockefeller still continues to do great things in a great way. The barking at his heels, the unjust and wicked caricatures which have disgraced the columns of many newspapers, has not seemed to disturb him. Had he been less of a man than he is the malicious attacks upon him would have caused him to withhold his hand from all philanthropic work. His only answer is larger and larger gifts bestowed with a wisdom which reveals him to be both a student and a lover of humanity. All honor to the man for the good uses to which he is putting his wealth. Before he is done giving who can tell what strong currents of usefulness may be set in motion which will flow on forever.

Hymnals, Old and New.

A new hymnal is announced by the Methodist Book Concern, a book which must soon find its way into all Methodist churches, North and South. A volume which reaches so many people—over four million members, with an equal number of adherents—is an educational force to be reckoned with; to hundreds of thousands it will be a hand-book of poetry, music, and religion. In Methodist—as in other non-liturgical—churches, the Bible lessons and the hymns are the most elevating part of the service. In neither prayer nor sermon can any preacher of the denomination hope to offer such a stimulus to

mind and soul. Nor can the minister take offence when members of his congregation flee from the commonplace inconsequence of his discourse, and take refuge in the pages of the hymnal. Hosts of sincere worshippers find church tolerable because they can close their ears to the droning exhortation, and commit to memory a hymn or two.

This we say, in spite of the fact that so much religious poetry is neither religious nor poetic. Hymn-books are overloaded with stuff which has nothing to recommend it but doctrinal soundness. Fervor of emotion and beauty of diction are absolutely wanting. In this matter, however, there has in recent years been considerable improvement. The late Rev. Charles S. Robinson, for example, compiled a hymnal which was a decided advance on those in general use. The Episcopal Hymnal, published about ten years ago, marked another step forward; but it contains too much—679 hymns. The new Methodist Hymnal has 717; but it supplants a collection containing 1,117—an appalling mass of mediocre verse. The difficulties of discarding any hymn, once omitted, are apparent. However banal the words or flat the jingle, they have pleased some people, have become hallowed by searching of heart, high aspiration, hope of eternity, and sorrow for the dead. The joint commission, which saved but 477 of the old hymns and added 210 new, has therefore shown uncommon firmness.

Of course, not all the new are recently written; they are drawn from all sources, ancient and modern. The whole of the last century, with Heber, Keble, Newman, Bonar, Montgomery, Faber, and Neale has produced hardly 240 worthy hymns. Two of the new hymns, Tennyson's "Crossing the Bar," and Kipling's "Recessional," are sure to provoke adverse comment. Both are solemn and in a way devotional; but "Crossing the Bar" seems almost too elaborately metaphorical, too artificial, to make a direct and telling appeal, while the "Recessional" owes something of its vogue to the fact that it isn't a Barrack Room Ballad. Earnest souls have accepted it as proof that the profane Kipling of "Fuzzy Wuzzy" has reformed, and is bringing fruits meet for repentance.

The world is yet waiting for a volume of hymns on the scale of Palgrave's "Golden Treasury of Songs and Lyrics," the choicest and nothing else. The number of selections would probably range be-

tween two and three hundred. The task has been more than once attempted, but never with great success. No denominational hymnal can supply the want. The work is compiled with an eye to the traditions and temperament of a sect. The keen theologians who pass upon the work scent Arminianism, Socinianism, or other vile heresies in the most innocent and odorless syllables. As a critic of this Methodist Hymnal notes, "Hymns, flawless in themselves and eminently congenial, say, to Presbyterian or Congregational worship, might not meet the demands of the Methodist spirit of worship." The men who undertake a small anthology of hymns, then, must be blessed with a catholic and unprejudiced taste.

The phrase "spirit of worship," just quoted, suggests another limitation. All hymns are religious verse, but all religious verses are not hymns. A metrical statement of the doctrine of the Trinity or the theory of atonement may be as valueless for purposes of worship as a metrical statement of the proposition that the square described on the hypotenuse of a right-angle triangle is equal to the sum of the squares on the other two sides. Indeed, too many of the hymns written in periods of religious controversy have been weighted down with doctrinal theory. John Wesley himself, in the preface of his collection of hymns, dated 1779, boasts that these hymns "contain all the more important truths of our most holy religion, whether speculative or practical," "illustrate them all," and "prove them both by Scripture and reason; and this is done in a regular order." That, indeed, is the defect of the book: it contains too much that is merely expository, argumentative, or hortatory. Take, for example, two stanzas:

"Lovers of pleasure more than God,
For you He suffer'd pain;
Swearers, for you He spilt His blood,
And shall He bleed in vain?"

"Misers, for you His life He paid:
Your barest crime He bore;
Drunkards, your sins were on Him laid
That you might sin no more."

These lines might easily be matched in all of the older denominational hymnals.

Some of the most inspiring hymns were the product of the early ages of faith. Nothing of the sophisticated Victorian era has touched their simplicity and vigor. When hell was a pit of physical torment and heaven a city of pearly gates, the

Christian's fears and hopes were absolutely definite. For Bernard of Cluny there was in all reality a "Jerusalem, the golden, with milk and honey blest," a "sweet and blessed country, the home of God's elect"; and Bernard's cry came from his heart:

"For thee, O dear, dear country,
Mine eyes their vigils keep;
For very love beholding
Thy holy name, they weep."

No vague remarks on ethics in this—no thin generalizations about the pleasure of doing good, or about joining the choir invisible. The hymn-book that shall gather up the best of this passion of worship is yet to be made.—*The Nation*.

Special Items in the Hurst Collection.

We present herewith in tabular form a list of the more notable books and manuscripts of the Hurst Collection, with the prices they brought at the sale in New York:

I. FROM LIBRARY OF GEORGE WASHINGTON.	
Buffon's Natural History, 2 vols.	\$132 00
Gibbon's Decline and Fall of the Roman Empire 6 vols.	1,626 00
Jefferys' Typography of North America and the West Indies	130 00
Locke on the Human Understanding 2 vols.	650 00
Mawe's Universal Gardener	230 00
Sentimental and Masonic Magazine. 5 vols.	330 00
Vallancey's Essay on Fortification	335 00
Volney's Ruins	195 00
Washington's Official Letters to Congress while Commander-in-Chief of the Continental Forces. 2 vols., London, 1793, edited by John Carey, with marginal notes and manuscript by Carey bound in at end.	2,810 00
Washington's Account Book of Household Expenditures during his Second Term as President, kept by Lear and Dandridge.	525 00
II. FRANKLIN IMPRINTS.	
Cato Major (Cicero on Old Age), 5 copies \$50, 46, 42, 31, 29	
Laws of New Castle, Kent and Sussex, 3 copies. \$185, 130, 35	
Narrative of Massacre in Lancaster County, 2 copies, each	25 00
Poor Richard Almanac for 1729	595 00
" " " for 1744	85 00
" " " for 1748	42 50
" " " for 1752	45 00

This is the fourth and concluding article printed in these columns concerning the sale of this famous library. For the sake of book lovers we have gone into the minutest detail. What unlooked for prices some of these rare treasures brought. This record of prices will be of great value to all who buy or sell literary curiosities. What a shame that those who might have done so did not save this matchless collection to the American University?

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

In this issue is printed an interesting article from *The Nation* on "Hymnals, Old and New," with special reference to the Methodist Episcopal Hymnal just issued. While not fully agreeing with all said, it is interesting to know what one of our widely read and ultra-critical journals has to say on the subject.

The Secretary of the University is still a little more than \$100 short on the payment which he made of \$465 for the autograph letter of George Washington, bearing on educational matters and of vital importance to the American University, purchased at the sale of the Hurst collection. Friends have come to the rescue from time to time with checks helping toward the payment of this letter, which has been donated by the buyer to the University. If other friends are willing to assist, checks in any amount will be very thankfully received. To those who contribute to help in this matter a handsome fac-simile copy of the Washington letter will be sent. It is doubtful if any further appeal will be made along this line, but the Secretary can hardly afford himself to stand for the balance which is still due. Let a few friends come to the rescue. Make checks payable to the order of W. L. Davidson.

A handsome little booklet has just been issued by the University authorities on annuities, entitled "Safe Investment and Splendid Philanthropy." It

unfolds a plain business proposition by which you can provide a life support for yourself, wife, children or dependents, and at the same time perform a service of transcendent importance to humanity. The plan proposed exempts you from current taxes, relieves you from care and anxiety, and enables you to become the executor of your own estate during your lifetime. A fair rate of interest is guaranteed with ample security behind it. If you are at all interested in a plan of this character, the little booklet with full information will be gladly mailed you on application.

It seems almost certain that the next Congress will order the opening and grading of Massachusetts avenue from Wisconsin to Nebraska avenue at the site of the American University. The Commissioners of the District of Columbia are heartily in favor of it and will recommend it in their report to Congress asking for appropriations. The hard and efficient work which was done last year will not be forgotten by the forthcoming Congress. The matter would doubtless have had favorable action at the hands of the last Congress but for the many other appropriations which were demanded and the treasury deficit which caused Congress toward the close of the session to move with great caution.

A Royal Gift.

A check for \$15,000 in favor of the American University has recently been received from Mrs. Gustavus F. Swift, of Chicago. This is the final payment on a splendid gift of \$25,000 made within the year by this noble woman. Her generous husband had planned for still larger things concerning the American University, but death called him before he had fully matured his plans. His good wife, understanding his heart and purposes, remembered the benevolencies in which he was interested, and tried to carry out, as far as she could, his wishes concerning them. This gift has been an inspiration and will be used in the advancement of the McKinley Memorial College of Government, now in course of erection.

A Suggestive Example.

The public press states that the Carnegie Technical School in Pittsburg expects to open its

doors this season, but seventy-two hundred persons, from all parts of the world, have already applied for the privilege of enrolling themselves as pupils at the institute. From foreign countries most of the applicants are full-grown men who desire to come to America to learn our methods of doing business. The number of applications from France and Germany exceeds those from any other country. Japan is represented by several. Quite a number from Russia have applied, and a few from China. Many applications have come from the Philippines. The Educational Commission has requested an enrollment for twenty pupils. The Board of Control is embarrassed by the enormous number of applications, and their decision is published, which is, that they will receive pupils from Pittsburg and Allegheny first, then from the State of Pennsylvania, then from the other States of the Union, leaving the foreign countries until last. This, of course, is in harmony with Mr. Carnegie's primary purpose.

This typifies exactly what would happen at the American University if it were open on the high plane which is contemplated, namely, with a corps of instructors as able and brilliant as the world affords, with all the splendid accumulations of the Government nearby and ready for use. This is the day of the specialist. In the competitions of to-day men cannot hope for success unless they are fitted and prepared by special study, aside from that which comes from the regular routine of school and college discipline. More than 13,000 American students are pursuing post-graduate work, preparing themselves by unusual application for special careers. The number of foreign students applying for admission to the Carnegie Technological School of Pittsburg would be more than duplicated here at the Nation's capital, with the American University once open for work. Hundreds of applications are now on file. The eyes of the world are turned toward America since she has become a world power, and students abroad, attracted by our successful experiments in government, desiring to study our sources of power at the fountain-head of the Nation, would come to Washington for investigation when they would go nowhere else. That vision is indeed dim which can not see glorious possibilities of success in such an enterprise as is here contemplated. Let us hurry on and realize the success which awaits us.

Andrew Brown Duvall.

The death of Andrew Brown Duvall in September while at sea on his return from England, after a brief respite from his official burdens, has left a large vacancy in the home where his heart centered, in the church where his powers found a consecrated use, and in the city where his whole life had been spent, and in the service of which as Corporation Counsel he had for several years given signal proof both of his ability and fidelity as a popular official. Added to the domestic and ecclesiastical relations, and the public functions which he has nobly fulfilled, was his active and continued membership in the Board of Trustees of The American University since its incorporation in 1891. For fourteen years he has faithfully discharged the duties of his position, serving on the Executive and Auditing Committees during the whole period, and for nine years as a member of the Building Committee. He gave generously of his valuable time and helpful counsel to the interests of the institution. He was on most intimate terms with Bishop Hurst, who loved him for what he was, a pure and warm-hearted friend. The qualities of candor, ardent love of the truth, a rigid but cheerful conscientiousness and adherence to duty, a happy aspiration toward the ideals of life, made him a delightful associate and companion. His absence is painfully felt in hundreds of hearts which he had won to himself. The benediction of his life abides among us as a sweet remembrance and a stimulating force to the highest endeavor.

Progress on the New Building.

Scores of workmen are now busily engaged in the erection of the College of Government on the foundation which was previously laid, the cornerstone of which was set in place by President Roosevelt. Car loads of marble are being received daily from the quarries at Rutland, Vt. Mountains of brick, sand, and structural steel surround the foundation walls. Under the terms of the contract the building must be under roof and enclosed by the first of next June. The building is a marvel of beauty, architecturally, and will cost when completed something more than \$250,000. It is to be a memorial to the late President McKinley, who was intensely interested in this building and the work of the University. The grounds are full of activity during these fine fall days, and the advancing work

brings great joy to the hearts of those who are interested in this great enterprise.

When this new building is completed, with the College of History already done, there will be available eighty-two (82) class-rooms, enough to amply provide for a great number of students. It is hoped that the productive endowment will by that time be so much increased that a creditable opening can be attempted in two or three important departments. From that time on the University may grow by evolution, as all other great universities have done. Buildings will be erected and opened for work as the necessity demands. This seems to be the course of wisdom.

A Righteous Court Decree.

Judge Freas, of the Orphans' Court at Wilkesbarre, this month handed down a decision by which the executors of the estate of Mrs. P. L. Bennett are required to pay \$20,000 to the American University, under the terms of the gift which she made in November, 1898. The executors have been contesting the claim. The facts in brief are these: In a letter to Bishop John F. Hurst, under date of November 25, 1898, Mrs. Bennett subscribed \$25,000 for the American University, first payment to be made when the corner-stone of the Pennsylvania Hall of Administration was laid; the second when the roof was on the building; and the third and last when the building was completed. In July, 1901, Mrs. Bennett sent her check for \$5,000 on account of her subscription, leaving \$20,000 still unpaid. When this amount was paid she suggested to Dr. John A. Gutteridge, financial representative of the University, that she desired to see the work advance, and therefore this payment was looked upon as a waiver of the original terms of the subscription, as nothing had been done at that time towards the erection of the Pennsylvania Hall of Administration, although plans for the building had been drawn and submitted for that specific purpose. The court held that a good consideration was shown for the promise in question; that it is not void for uncertainty; and that the trustees of the University have reasonable time in which to fulfill their part of the contract. The judge therefore awarded the sum of \$20,000 to be paid by the executors to the American University under the terms of the subscription.

We feel very confident that this is just as Mrs. Bennett would have it could she speak out of the

skies. She led a noble life and left a large amount to worthy organizations.

Of a necessity laws must be very stringent concerning the settling of estates, else many unworthy schemers might reap unmerited harvests and rightful heirs be robbed of that which properly belongs to them. This is the first contest in court which the American University has ever had, and they undertook it with great reluctance. They want only that which rightfully belongs to them and which is cheerfully given.

In all of this is a lesson which people should read. When a gift is made, which might mean a contest in case of death, let the terms be so carefully and distinctly worded that no misunderstanding can possibly occur, and no other meaning aside from that which the donor intended can by any possibility be read into it. Better be your own executor—give while you are living and realize the joy and blessedness which is promised to those who give. Thus you prevent the possibility of having your plans miscarry—you relieve many heart burnings and prevent many disagreeable legal squabbles. Some one should write a book on the Joy and Duty of Becoming One's Own Executor, and put it into the hands of every benevolently-inclined person in the world.

NOTE.—Lack of space and the small number of payments coming in from time to time have prevented a more frequent publication of this Asbury list.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University" a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

The Burden of the College President.

The duties and qualifications of the president of a modern university were discussed by the educators who gathered recently at the inauguration of Dr. Edmund J. James as president of the University of Illinois. The ideal president must evidently be a scholar, teacher, disciplinarian, organizer, administrator, financier, diplomatist, and accomplished writer and speaker. Such, at least, is the inference from an interesting address on the subject by Dr. Andrew Sloan Draper, President James' predecessor, and now Commissioner of Education in Illinois. All College presidents fall short of the ideal in one point or another, but the successful ones must possess both solid attainments and superficial accomplishments. The day has long since passed when a broken-down preacher can be retired to the innocuous ease of a college presidency.

The average man does not realize how much we demand of our college presidents. The college—to say nothing of our few real universities—is no longer a boarding-school for two or three hundred boys of from sixteen to twenty-one. A large faculty of specialists must be steadily recruited and kept in harmonious and economical activity. Buildings and grounds worth several millions of dollars, elaborate libraries and laboratories, must be maintained in a high state of efficiency. The college administration must have close relations with alumni throughout the country, and it must be fittingly represented on many public occasions. However duties may be divided among deans and committees of trustees and faculty, the final responsibility for the smooth running of the machine is laid upon the shoulders of the president. To adjust expenditure to income, to make the college a centre of the best intellectual and moral influences, to be socially acceptable to men and women of widely varying interests—all these things, we can readily see, are rigorously exacted of the head of a college.

He has other burdens which are less apparent even to trustees, faculty, alumni, or undergraduates. Trustees, many of whom are prosperous bankers and

manufacturers, sometimes regard a college as a business enterprise. If the annual deficit is not too large, if the teachers are busy and not disagreeably notorious, if the students are not smashing the property, the venture may be reckoned as fairly profitable in its kind. Each member of the faculty is inclined to look at college from the point of view of his own courses. If his department is steadily expanding, if he can secure appropriations for necessary instruction, books and apparatus, and if he is thus able to attract the best students, the president is everything that heart can wish. No undergraduate and relatively few trustees, professors, or alumni fully grasp the notion that the radical difficulty of the much-tried president's position is this: he is conducting an extensive experiment in idealism in a community which asks chiefly for immediate material results. What is more, his failure may mean distress and possible disaster, not for himself alone, but for the faculty and students who are embarked with him. The individual professor becomes unproductive, unable to keep abreast of his science, and as a result a single department suffers from temporary weakness, while the strengthening of the rest of the college may more than outweigh the damage; but when the president is unproductive, every department is weakened.

The church, too, is an organization devoted to an ideal, but no clergyman, unless he be a bishop, can be compared in importance with a college president. Every year, in this city of New York, some minister virtually confesses bankruptcy. He gives up his pulpit to a successor, or his little church may actually cease existence. One congregation more or less among so many is not an irreparable loss. But if President Butler of Columbia, Chancellor MacCracken of New York University, or President Finley of the College of the City of New York, were so to conduct his office as to impair—or even fail to advance—the standing and influence of his institution, the miscarriage would be conspicuous and wide-reaching in its results. A preacher can say: "Here is my doctrine; thus and so I expound it. If you

prefer another creed or a more complaisant prophet, go in peace. I will talk to empty pews." But the college president can not take the attitude of *Athenasius contra mundum*. He need never surrender his principles, but he is doomed to many sacrifices of personal taste and preference. He will be fortunate if he have such clearness of vision and force of character that he can always discriminate between preference and principle. When he sticks for mere preference, he alienates supporters on whose aid he may legitimately rely. When he first persuades himself that a principle is nothing but a preference, he begins to degenerate into a sycophant and time-server.

How powerful the temptations, none but he can ever know. The recent insurance investigations have shown us how hard it is for men supposed to be fortified by intelligence and character to resist the allurements of money for themselves. They contrive some sophistry to excuse theft and quiet conscience. College presidents also are but human. They do not, however, want the money for themselves, but for a noble cause. They are not scheming to filch it by excessive salaries, crooked accounts, or preposterous travelling expenses. Their only fault is to crook the pregnant hinges of the knee. The welfare of the institution is a huge thing—and 'tis a great price for a small vice. When, therefore, we recall the revelations of venality among men high in public confidence, when we remember how ignorant and unreasoning the patrons of education often are, the wonder is that more colleges do not, as Senator Dolliver put it, "smell of Oil."—*Nation*.

Donations of the Year 1905.

The year that has passed has been an eventful one from the standpoint of benevolences. The banner year in this respect was 1901, when the total amount of benevolences by direct donations and bequests fell a little short of \$124,000,000. Last year only \$46,000,000 was contributed to libraries, colleges and charitable institutions. America's philanthropists, however, gave a good account of themselves during the last twelvemonth. The donations for the year 1905 amount to \$104,586,422. Of this sum the donations are \$63,075,012 and the bequests, \$40,484,635. Educational institutions received \$49,638,357; \$3,139,365 was applied to charity;

\$6,011,250 went to religious work, while more than a million dollars was donated to libraries.

Andrew Carnegie succeeded in giving away eight million dollars more than he gave last year. His contributions toward the world's betterment in 1905 are nearly twenty million dollars. He has provided at least six churches with splendid organs, has founded fifteen libraries, and has remembered 144 colleges. What we should do without such men as Carnegie, Rockefeller, and D. K. Pearson is a significant question. Mr. Rockefeller's principal donation was that of \$1,000,000 to Yale University. The General Board of Education is richer by \$10,000,000 on account of Mr. Rockefeller. Mr. Pearson has donated \$300,000, mostly to struggling colleges in the South and Northwest. His money, while the amount is much smaller than that of his fellow philanthropists, probably has been appreciated even more and applied frequently to a better advantage than the Carnegie or Rockefeller millions.

While fewer notable persons have died during the last year, a number of wills are to be noticed. A list of the most important follows:

Jane Stanford, to Stanford University, \$3,875,000; Mrs. Samuel Colt, to city and charities of New Haven, Conn., \$3,000,000; Stephen Salisbury, Worcester, Mass., to art and education, \$3,000,000; Peter L. Kimberly, Chicago, Ill., to charity, \$2,300,000; Isaac J. Wister, Philadelphia, Pa., to Wister Institute, \$2,000,000; James C. King, Chicago, Ill., to found Old Men's Home, \$2,000,000; E. M. Paxson, Philadelphia, Pa., to Princeton Theological Seminary, \$1,750,000; W. F. Milton, to Harvard College, \$1,125,000; B. F. Ferguson, Chicago, to municipal art, \$1,000,000; M. A. Dupsic, Philadelphia, Pa., to Jewish College, \$1,000,000; Margaret A. Jones, New York, to charity, \$1,000,000; James Millikin, Decatur, Ill., to education, \$1,000,000; Joseph E. Gillingham, Philadelphia, Pa., to charity, \$1,000,000.

What a record of noble giving this is. No account is here taken of any gift which does not pass the million mark. This is the only age in the history of the world when such giving would have become possible. This record, good as it is, should be largely outdone next year. Millions are multiplying themselves as never before, and to give them away is the only true way to keep them.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

WHEN you have read this issue of the COURIER, will you not hand it to some friend who might become interested through its reading in the work of the American University?

WORK is still in progress on the College of Government. The open winter has permitted the contractors to continue the work up to the present time, and splendid headway has been made. The structure is now advanced to the second story. During the uncertain months of February and March, when freezing weather might interfere with the setting of the marble, which is a delicate job, work may be suspended. All who see the building greatly admire it.

THE Trustees of the University, resident in Pennsylvania, met at Philadelphia on January 17th, to determine on the advisability of beginning work on the Pennsylvania Hall of Administration. After full discussion a resolution was adopted expressing the conviction of the committee that the erection of the Pennsylvania Hall of Administration was necessary to enable the University to begin its work, and recommending that a committee be appointed to secure the funds for that purpose, work to begin as soon as enough money or pledges are secured to put the building under roof.

This paper will fall under the eye of those who have subscribed to various funds in connection with the work of the University. Many of these subscriptions should have been settled long ago. We are most anxious just now for those which have been made in such large number throughout the State of Ohio toward the College of Government, which is to bear the name of that State, and which is to be a memorial to President McKinley. As the work advances every dollar subscribed is needed. If you know yourself to be in arrears, will you not at once send draft or check covering the amount due? We need a multitude of new subscriptions to help complete this Ohio Building. If this building is to carry the name of the good State of Ohio, then the people of that State must erect it. If you have no share in it at present, will you not, for the honor of the State, and for the love you bear the last martyr among our Presidents, send a generous donation to assist us in this noble work?

To raise \$100,000 in America for the support of higher classical studies in Rome is probably harder than to raise a million for some project of commercial or industrial education at home. Yet the good news that this has been done was announced last week from Ithaca. It has taken five years of persistent effort to do it, and now the American School of Classical Studies in Rome passes from the time of trial to an era of assured support. It has been one of the only two schools of higher scientific learning sustained by American generosity on the Continent of Europe; but it has had to struggle hard, first for its life, and then for due recognition. All the time it has gone quietly about its work, living frugally, husbanding its energies, and winning year by year the increasing respect of the Italian Government, the Vatican, and the German, French and British Schools. It has produced a small group of trained investigators and museum experts. It has sent back to our schools and colleges nearly one hundred and fifty instructors, newly vivified and alert from contact with the quickening influences of the greatest teacher of ancient history—the Eternal City. It has won its way for the best of reasons—it has proved its right to live. And the success already won by economy and well-directed hard work should lead to greater things. Its endowment should be enlarged and a permanent home provided for it.

The Biography of Bishop Hurst.

Johnson was no less fortunate in his Boswell than Hurst in his Osborn. It is safe to say that no more fascinating and readable biography of any bishop of the Methodist Episcopal Church has yet been written than that of Bishop John F. Hurst, which has just been dropped from the press, written by his loving friend and companion, Rev. Albert Osborn, who for a score of years traveled by his side and was a part of his life.

The sympathetic treatment, the literary touch and finish of the author, the mechanical execution of the printer, and the prodigious accomplishments of the subject of the study, all conspire to make this work a model of its kind. It will be read with interest and profit, not only by those of his own denomination, who knew and loved Bishop Hurst, but by all who enjoy tracing a life pathway in which success has stalked, and who believe that the arena of life is still filled with the possibilities of desperate daring, terrific sacrifice and undying renown.

The seventy-six (76) chapters crowded into five hundred and nine (509) pages tell the story of a remarkable life, looked at from many points of view. As one reads the amazement grows, that in one year less than man's allotted time on earth, such a mass of worthy work could be accomplished by one man. The diary, from which copious extracts are made in the early chapters, shows the mettle of the man and constitutes the most interesting part of the biography. The real man is there revealed—he talks out of his heart, and lets us into his struggles and his victories, with the faithful chronicling of his failures as well. The reading of this record would be a great inspiration to young men beginning the work of the ministry. He had much to overcome in reaching the high seats of power, but by an indomitable will, an unswerving perseverance, and an abounding faith in God, he came off more than conqueror. Work was the secret of his success. He was at it constantly and never lost a moment. The record of what he did is amazing. From a teacher at Ashland at \$300 a year and board, to the Bishopric of a great church seems a long journey. Yet he made it in twenty-six (26) years and never once lost step. As author and book collector his record is unapproached in Methodist annals. The crowning work of his life, the founding of the American University, is

graphically described. The great sorrow which crept into his life is treated with admirable delicacy. The whole story of this remarkable life is told in fascinating style and enslaves attention from cover to cover. It is published by the Methodist Book Concern and is sold at \$2.00.

Semi-Annual Trustees' Meeting.

The Board of Trustees of the American University held their semi-annual meeting in Washington City, December 13th, to hear reports and review the work of the year. A large number were present.

The Chancellor, C. C. McCabe, reported an increasing growth of sentiment favorable to the University. Progress was reported upon the McKinley Memorial College of Government, now in process of erection on the campus near the completed College of History.

An excellent bust in plaster of Bishop John F. Hurst was exhibited and drew from the board a cordial commendation and a vote of thanks to the artist who made this donation to the university, Miss Josephine O. Weeks, of New York City. This bust will likely be cast into bronze or marble, and will be placed in one of the buildings of the university.

To fill vacancies in the board, three were elected trustees: Bishop Luther B. Wilson, of Chattanooga, Tenn.; G. W. F. Swartzell and Dr. W. L. Davidson, of Washington. The same university officers were elected for another year.

Plans relating to the opening of the university for instruction were discussed in a general way, preparatory to positive action at a subsequent meeting of the board. It was decided to plan for opening when the second building should be completed. In addition to the receipts of the past six months, which have been made public from time to time, other donations of a most hopeful character are promised within a short time, among them a marble observatory building.

A committee was appointed looking toward the erection of the Pennsylvania Hall of Administration.

After adjournment a number of the members of the board visited the site to inspect the new building in its progress. It is being constructed of Vermont marble, and has already advanced as far as the top of the windows of the first story. Under

the terms of the contract it must be under roof by the first of next June.

A committee of the trustees, by appointment, had a very pleasant interview with President Roosevelt, who is one of the trustees of the university, and expresses great interest in the development of the work.

The Troubles of the Rich.

A startling array of facts of the requests made upon those who are known to be enormously wealthy has been obtained by Dr. T. Osbaldeston, a well-known physician who has been interested in the subject for some time. He communicated with Miss Helen Gould, whose extensive charitable work makes her an authority on the subject.

In reply, Miss Gould sent the physician a carefully prepared statement, which illustrates the avalanche of begging letters and requests for various kinds of aid from all sorts and conditions of men, which Miss Gould receives in an average week.

There were received an aggregate of 1,303 letters, asking for a total of \$1,548,502. They covered no less than eighty-one distinct subjects, mostly connected with efforts to separate Miss Gould from some of her money. The requests range from a demand of \$1,000,000 to form a colony in Cuba, to \$8 to get a watch out of pawn. It is fair to presume that all men and women of wealth, who are benevolently inclined, have experiences similar to Miss Gould's. It is little wonder that they decline personal interviews and employ secretaries to whom all calls for gifts are referred. If personal interviews were permitted the wealthy would have little time for anything else, and their peace of mind would be destroyed. They can not be blamed for the position they have taken. It is a long journey these days to the office of a millionaire, and few there be that make it. Weariness overcomes the traveler in his encounter with the long line of subordinates, which must be passed before reaching the seat of power, and disheartened the quest is abandoned. A subordinate never absolutely reflects the mind of his master. He is a paid servant and is subject to personal prejudice. Many worthy applications for help are pigeon-holed by subordinates, which, if they fell under the eye and had a chance to touch the heart of the person for whom they are intended, would bring generous responses. If peo-

ple of wealth were just a little more easy of access and ready to hear personal representations from properly accredited officials, many noble causes would not be left to languish as they are. They have been fooled so often that they look with suspicion on every new application. Unfortunately many unworthy causes appeal to them—societies and institutions of every character, which seem to have been organized to meet no real want, but largely for the purpose of providing a few officials with salaries. This has made the wealthy cautious as to their gifts.

What marvelous generosity the recent years have witnessed. All honor to the noble rich who are pouring out their treasure for every worthy work. They are rewarded in the tasting of that blessedness which comes to every one who lives for others.

During these days of unparalleled commercial prosperity many meritorious causes will seek to get on a sure footing. Let those who are able and willing to give, listen to the call of every cause which has in it the promise of usefulness, lest they miss an opportunity which, if accepted, would bring life-long and eternity-long joy. The trouble is not in the giving—that is easy—but to know just where to give to make it count for the most.

The Transmutation of Values.

Man, who is himself a composite of the material and spiritual, finds one of his highest prerogatives, and hence one of his highest responsibilities, in the power to transmute the lower values of life into the higher. The ascending series of nature by which one's mind is led from the units of the elemental mineral kingdom, through the complex and orderly organisms of the vegetable world and the lower forms of animal life, up to the most highly organized and keenly sensitive human body, furnishes the field for the collection of data out of which have been constructed the great systems of science embracing the sum total of human knowledge of the material world. This same series of an ascending physical scale is also a most vivid illustration and analogue of another ascending series in which man may become the prime factor, under a beneficent divine order, in the creation of high and permanent values out of the right and benevolent use of the lower and evanescent. In the application of his

physical, mental and moral powers man makes character for himself and sets in operation forces that contribute to the formation of character in others.

The Great Teacher's command to his disciples to make unto themselves friends out of the use of the "mammon of unrighteousness" appeals to thinking men who recognize the transient character of all worldly possessions and earthly relations. The cup of cold water rightly given issues in an increase of the capacity of the giver to enjoy the river of life flowing from the throne of God. The kindly word of truthful and merited appreciation may turn the tides in a struggling life and seal the success of some noble soul in rising to leadership in good works among his fellows. Dollars put into the training and equipment of youth for the highest walks in useful living shine with a brilliance beyond that of burnished gold or sparkling diamonds; for they are transformed into the jewels which will flash in immortal beauty and splendor when all money shall have become dust and ashes in the cinders of a burned out world. Happy the man and the woman who see the opportunity thus to bring out the evolution of the high and eternal values of this mortal existence, and thrice wise and blessed are they who lay hold upon every such opportunity to make for themselves a welcome into everlasting habitations, and to add to the sum of human achievement.

Money wisely bestowed for the education of the youth of our land becomes the channel through which the benevolent heart of the giver is transfused into intelligence, skill and good will in the life careers of highminded thinkers and teachers, and multiplies itself again and again in its vitalizing streams of personal character and influence in the successive generations of students who are thus lifted to higher planes of thought and action. Who can compute the increment of power, of value and of joyous reward accruing to the man or woman who endows in perpetuity such a fountain of good for the people of the coming centuries?

A Bust of Bishop Hurst.

At the time of the death of Bishop Hurst, many expressed the hope that at some time his body might rest in the grounds of the American University. This was a wish to which he had given frequent expression. In connection with the report of

the funeral service, a suggestion was made that at no distant day a suitable mausoleum should be erected to his memory, which in the future days might by tablet, tomb and bust, become the Westminster Abbey of American Methodism. This beautiful and worthy thought caught the attention of a friend of the Bishop, who had been interested in his writings and had known of his intense interest in the University. This friend expressed the wish to Bishop McCabe, as Chancellor of the University, that he might have the pleasure of donating a bust of the Bishop for the purpose suggested. The offer was gratefully accepted, and many of the photographs of the Bishop in different poses were secured from the family and forwarded, together with a death-mask, to the sculptor. The mask proved of very little service as it did not represent the Bishop in his full vigor and as all but his most intimate friends remembered him. The work was undertaken practically, therefore, with only the flat surfaces of the photographs and a faint remembrance of the features to work into the study. Distinguished sculptors, notably Houdon, refuse to model except from life, being unwilling to risk their reputations on work based on the flat. Many months of patient application and many modifications wrought out a bust in clay which the Bishop's lifelong friends, Drs. Battz and Upham, were asked to view. Their opinion was highly favorable as to the naturalness of the work. After the finishing touches, the bust, put into plaster, was placed on view at the New York Methodist Preachers' Meeting, and elicited high praise from a number of the able art critics of that body, and warm words of commendation found their way into resolutions. The cast has recently come into the possession of the University authorities at Washington, and is being greatly admired, not only by the members of the immediate family, but by many visitors who intimately knew the Bishop. The Secretary of the University, Dr. W. L. Davidson, gave much time and thought to this work while it was in progress, and expresses the hope that at no distant time it may be put into marble or bronze, for permanent preservation, by some one who honors and loves the memory of Bishop Hurst.

It is but just to say that the sculptor who put such loving care and thought into this work, is Miss Josephine O. Weeks, of New York City, who did her finishing educational work with William Ordway

Partridge, the sculptor of many celebrated pieces erected in various parts of the country. It was in his studio that the work was executed. The sculptor of this bust has given numerous evidences of the rarest gift of the plastic art—that of catching human features. The poise of the head, the mouth, the nose, the eye, and the prominent forehead, as revealed in the bust of Bishop Hurst, are very true to life. The artist's name will be mentioned many times in connection with this generous gift.

William Rainey Harper.

Calm heroism marked the closing scene in the life of this eminent scholar, successful teacher, able administrator and devout Christian. Early distinguished by his attainments in the world of letters, he won his way by careful and thorough labors to an acknowledged leadership in biblical scholarship in America, and to a just and wide recognition in Europe as a foremost authority in the Semitic languages and literature. His great service as an author to the realm of sacred letters, and to the general cause of education in the phenomenal renaissance and development of the University of Chicago, has given the popular impression of a much longer life than the half century of his stay among men. The quiet courage with which he carried his work quite up to the time of his exit was a fitting and beautiful climax to his energetic and productive career. He was a man symmetrical in character, and is enshrined in the hearts of thousands who knew and loved him. The principles, to the elaboration and defense of which he gave the strength of his mind and heart, were harmoniously and effectively embodied in his own acts. The mental stimulus he has imparted to the age is an unwasting force for future good, and the example of his humble and honest search for truth will to many be a perpetual incitement to a similar quest.

Splendid Philanthropy.

The American University is to become one of the most influential educational forces in the nation. It is to stand exclusively for postgraduate work in the greatest capital in the world. Here the heart-

throbs of the nation are felt, and here all forces center. The vast scientific and literary accumulations of the Government, costing more than \$50,000,000, are by order of Congress open to students, and are a legitimate part of the assets of the American University. No such massing of helps toward original research can be found in any other city on the globe. The University puts a premium upon character as well as scholarship, and will stand squarely for Protestantism and Americanism. It will be the crown to our educational system and will be an increasing inspiration to every college and educational institution of lower grade. Its mission is to provide what is not now adequately provided on this side of the sea, and to fit aspiring men and women for high and splendid careers. Its necessity grows more apparent with the events of every day. Its marble buildings are rising on the beautiful campus of ninety-three acres overlooking Washington. Endowments provided by gifts, bequests, and annuities are growing until the total assets reach beyond \$2,000,000. Vast sums are still needed to make possible the high purposes of the institution. Money invested here is effectually invested for the service of humanity.

Perhaps you are engaged in business so that you can not prudently withdraw any considerable sum from your working capital to give on our Annuity Plan, but you contemplate doing something for the University in due time—in your will, if not by annuity or direct gift. Permit us to urge that you make at least a tentative will at once, embodying your wishes concerning your estate in the event of death from sudden illness or accident. This is the part of prudence, even though not one dollar should come to the University. Such a will can be altered at any time, and in a very few minutes, or superseded by an entirely new will if conditions radically change. This insures you against a miscarriage of your life plans. It forestalls litigations and dissipation of property. It sets your mind at rest.

Any further information you may desire respecting the institution or our Annuity Plan which guarantees 4 per cent. during your lifetime will be cheerfully given in response to a line addressed to the Chancellor or Secretary, 1419 F Street, N. W., Washington, D. C.

THE UNIVERSITY COURIER.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Officers of the American University.

In Memoriam.

A TRIBUTE TO ANDERSON FOWLER.

Above the waves of you blue midland sea
Nigh where Columbus had his humble birth
Departed one whose life had growing worth
Ere we had thought Heaven needed such as he,—
Rare spirit, gentle, strong, brave, pure and free,
Serenely doing good on all the earth.
Our hearts though heavy with the sudden dearth,
Now rise in hope of union that shall be.
Full sails were his, and steady, favoring breeze,
On life's broad ocean as the port he neared.
With Taylor's Pauline pace in step to keep
Love leaped in him the limits of all seas,
Embraced all lands, and myriad sad ones enered.
Rest, soul, in Christ; thy dust in God's own deep.
Washington, D. C. —ALBERT OSBORN.

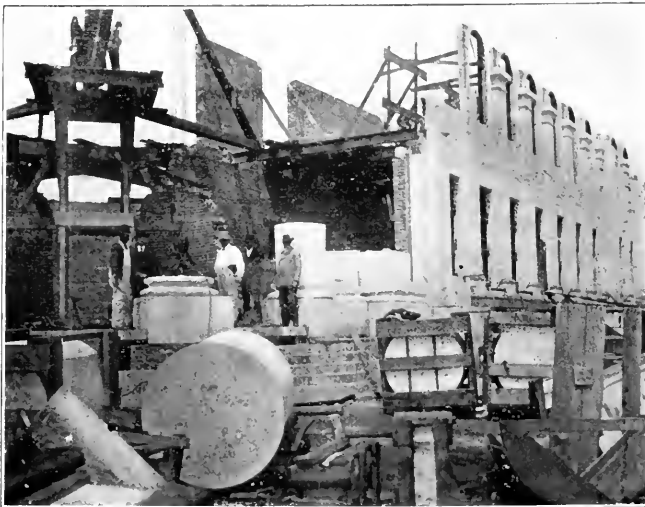

Progress on the New Building.

Work is progressing finely on the College of Government. The window frames in the second story are now in place and an army of men are daily at work. No more beautiful marble ever went into a building than is going into this one. Each one of the blocks come separately crated from the distant quarry at Rutland, Vt. The great marble columns for the portico are now being delivered. They are four feet in diameter and weigh five tons each.

The building will be under roof by July 1st. It is greatly admired by all who see it. The architectural design is perfect in every detail. No more beautiful building for educational purposes will be found anywhere. It will be a worthy and significant memorial to President McKinley—the chief one which the nation can, or will, build. He was greatly interested in the University.

The good State of Ohio is also to have the honor of the name of this building, and many of her worthy citizens have already made large contributions towards it. More money will be needed to thoroughly complete the building. Will you not have some share of it? Your gift is needed now. Send in your check in any amount. The people of Ohio who are to be honored in the name of the building, should help make the work easy. No object more truly worthy can possibly appeal to them.

They have done nobly, but some have not been heard from as yet. Let there be an immediate grand rally. Bishop C. C. McCabe, the chancellor of the University, and a son of Ohio, of whom the whole State is proud, will be glad to receive and acknowledge any gifts. Money invested here will pay large interest for all the years to come.

Corner View. Photograph taken April 25, 1906.

Washington's Leadership in Books.

We live in a book-making, a book-gathering and a book-reading age. The collecting of books in libraries, which are in a great degree accessible to the general public, is a process of enlightenment and education of which the National Commissioner of Education has taken note in his report for 1903. Very interesting as are all the factors entering into his account of public, society and school libraries of 1,000 volumes and over, there is one in which we find especial significance and cause for gratulation, not only for the people of Washington city, but for all Americans who, in the interest of a high and pure patriotism, rejoice in the actual headship of the Capital city in educational, scientific and literary equipment, as well as in the social and political life of the nation.

Taking the number of books in these libraries to each 100 people as a basis of graduation, we discover that the District of Columbia leads the grand procession of the States of the Union, with 925 books to each 100 of our population. The density of population to the area covered, of course, inures distinctly to our advantage in comparison with States of large rural regions, but with all due allowance for this inequality, there remains a large measure of leadership in this priceless boon of books. Second in the line comes the old Bay State with 256. The third in this honor is New Hampshire, with 213. Connecticut marches fourth in rank, with 191, and Rhode Island is close behind, with 187. Then the Green Mountain State takes her place with 163. The seventh position is proudly filled by California, richer now in facilities for education than in gold, with 137, and the old Pine Free State in immediate touch, with 131. New York holds ninth place, with 119, and Maryland takes the tenth, with 105.

Colorado and Nevada, hand in hand, jointly occupy the eleventh place, with 82, leaving number twelve vacant. Montana strides along happy in being number thirteen, with 74, and New Jersey holds her banner of fourteen, with 73. Her sister, Delaware, displays her sign fifteen, with 70, while the Keystone State marches in dignified content as number sixteen, with 69. Ohio, next in order, shows well with 66, and treading on her heels come Michigan, with 63, and Illinois with 62. The twentieth in this line of letters is Wisconsin,

with 58, with Wyoming just in the rear, with 56. Minnesota's rank is twenty-second, with 51, and the twenty-third is opulent Iowa, with 47. The Sunflower State blooms out as twenty-fourth, with 46, and the land of the Hoosier Schoolmaster files by as twenty-fifth, with 45. Again, from the Pacific comes Washington as twenty-sixth, with 40, and tripping behind is Nebraska, with 38. Missouri and Utah, side by side, next appear, with 37. Thirtieth in the lengthening line, comes Oregon, with 35, and haughty Virginia follows with 27. South Carolina, Kentucky and Louisiana next march three abreast, with 26, while South Dakota comes along alone as number thirty-five, with 25. Arizona and Idaho are paired with 23, while New Mexico and Tennessee are also yokefellows, with 22. North Dakota and North Carolina divide the glory of fortieth, with 19, and Georgia alone claims number forty-two, with 16, and Florida and West Virginia, neck and neck, keep close company with 15. Arkansas comes next with 14, and Texas crowds on with 13. Alabama and Mississippi, in sisterly embrace, come on in common possession of number forty-seven, with 12. Oklahoma holds the forty-ninth place, with 10, and lo! the poor Indian (Territory), in blanket and feathers, passes before us fiftieth, with 2.

Another valuable computation tabulated in the same report is that of the number of population to every library. In this series New Hampshire has the place of honor, one for every 2,498; Vermont is second, with one for every 2,916, and the District of Columbia comes third, with one for every 3,258. The order then is Maine, Connecticut, Massachusetts, Rhode Island, California, Colorado, Nevada, New York, Montana, Wisconsin, Iowa, New Jersey, Kansas, Michigan, Minnesota, Delaware, Wyoming, South Dakota, Ohio, Utah, Illinois, Idaho, Indiana, Nebraska, Pennsylvania, Maryland, Oregon, North Dakota, Washington, Arizona, Missouri, New Mexico, Florida, Virginia, North Carolina, Tennessee, South Carolina, Kentucky, Louisiana, West Virginia, Texas, Alabama, Georgia, Mississippi, Arkansas, Oklahoma, and Indian Territory. *A. C.*

Asbury Memorial Hall.

Recent payments on Asbury subscriptions are as follows: \$55, Milton Mahin; \$50, W. C. Clemons and Wilbur M. Nelson; \$25, J. R. T. Lathrop and J. G. Bickerton; \$20, J. E. Jacklin; \$18, Frank B. Lynch; \$10, J. H. Lozier, C. M. Thompson, W. G. Koons, and H. S. Thompson; \$5, O. S. Metzler, Daniel Haskell, and A. H. Thompson.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

A NUMBER of the Spring Conferences have been visited in behalf of the American University and kindly receptions have been accorded the representative.

LET all who have subscribed to the American University promptly meet their payments. Please do not delay in this matter. It will give you ease of mind and it will greatly relieve the office force of the University in the detail work of notifying delinquent subscribers.

IF you are interested, and will send in your name and address, we shall be glad to send you a handsome little booklet on "Safe Investment and Splendid Philanthropy," which outlines an annuity plan which has many attractions. Those who are anxious to place money where it will be safe and yield a fair increase during life-time, and then continue paying good interest forever, will here find the plan unfolded.

EARNEST efforts are being made to have the present Congress authorize the extension of Massachusetts avenue at least to the grounds of the American University. The land necessary has practically all been dedicated, and the extension can never again be made at less cost than now. Many

members of both Houses of Congress who have been interviewed, are heartily in favor of the plan. The distance between Wisconsin avenue, to which point Massachusetts avenue has now been opened, and Nebraska avenue, on which the University fronts, is not great. This extension is bound to come, if not this year, then next, which will be in ample time for our actual needs. The fact that the northwest section of Washington will this year likely be granted \$100,000 for a 100-acre extension to beautiful Rock Creek Park, and a vast amount for sewer extension, makes further appropriations for that section difficult to secure. The growth and improvement in that direction is phenomenal.

A NOTABLE departure in education is announced in Switzerland. At Zurich an astronomical observatory for popular use is under construction, and will be opened this summer. The idea is to extend the knowledge of the most ancient of all the sciences by revealing the wonders of the heavens as seen through a high-power telescope to any person who pays a small fee, and it is expected that schools and societies will avail themselves fully of the privilege. The observatory, whose dome rises to height of 130 feet over the town of Zurich, is well equipped, the largest telescope having a twelve-inch aperture.

Anderson Fowler.

IT is the occasion of unusual sadness and seems passing strange that we must add to the list of our departed friends this name that so long and so recently stood for vigor, energy and activity in many lines of labor and service. His death occurred on February 9th, after a brief illness, on shipboard in the harbor of Genoa, while on a journey to Palestine and Egypt, undertaken in the hope of benefit to Mrs. Fowler's health. Among many official connections with various institutions and societies, we record with special pleasure his membership in the Board of Trustees of the American University from 1893 to 1902. His practical wisdom born of experience, his generous and brotherly spirit, and his strong and liberal hand united to make him a valuable helper in laying the foundations of the University. On one of his business trips to Washington he took a half of one of his precious days for a personal visit to the grounds

and a careful examination of the site and the College of History, and thus prepared himself for important suggestions. Possessed of a stalwart frame, a clear and active brain, a large and loving heart, he furnished in his own personality a living link between English and American Methodism. While hoping soon to look upon the earthly Jerusalem, he has suddenly answered the call to enter the gates and enjoy the home eternal of the Heavenly City.

University Club Dinner in the West.

Seventy college men sat down to a most delightful banquet at the Silver Grill in Spokane on the evening of March 20. The dinner was given by the University club, of this city, which has 160 members, though only organized a few weeks. Men who have been out of school forty and forty-five years, mingled with the young fellows who graduated last year; joined in college songs and college yells, and did their share in entertaining. Practically all the largest colleges in the country were represented. Frank T. Post, St. Lawrence University, 1883, officiated as toastmaster. J. Z. Moore, Miami University, Michigan, 1867, responded to "Auld Lang Syne;" B. B. Adams, Michigan, 1899, to "The Functions of the University Club;" Dr. H. B. Luhn, "College Spirit;" J. A. Tormey, Wisconsin, 1895, "Team Work;" W. S. Gilbert, Michigan, 1899, "Spokane, the City Beautiful;" W. H. Stanley, Williams, 1902, "Auf Wiedersehen." A. M. Murphy, Amherst, 1887, for the board of trustees, reported that there were known to be two hundred men in the city eligible for membership. With an entrance fee of \$25, the club would have \$5,000 with which to furnish the new club room in the building which is being erected for it, and with dues at \$2 a month, would have \$4,800 a year for current expenses. The distinction of being the oldest graduate present went to Judge Norman Buck, Lawrence, 1859. Others well to the fore in this particular were Judge J. Z. Moore, and J. J. Brown, Michigan, 1868.

Among the universities which lead in membership, are Harvard, Michigan, Stanford and Chicago. The club has one member from the Dublin university, and the university of Munich. J. D. Sherwood, a Harvard man, is president, and W. H. Stanley, of Williams, is secretary.

Advantages of Washington for Advanced Educational Work.

The scientific investigations of the Government are conducted on a scale, involving an annual expenditure of something like eight millions of dollars, that can not in any way be approached by the most wealthy university, and represent a total investment of upwards of fifty millions for the establishment and development of libraries, laboratories, museums and collections. Compared with these enormous resources, the wealth of Harvard or Yale or Chicago, or any other university in this country, or abroad, sinks into mediocrity.

While Congress has not yet deemed it expedient to establish an organized institution under the direction of the National Government for the systematic public use of its wonderful educative facilities, it is, nevertheless, not unmindful of the fact that they belong to the people, and are designed for the ultimate benefit of the Nation and the diffusion of knowledge among men. In token of this, Congress passed the following resolution in 1892, specifically placing the literary and scientific collections of the Government at the disposals of student.

"Whereas, large collections illustrative of the various arts and sciences and facilitating literary and scientific research have been accumulated by the action of Congress through a series of years at the National Capitol; and

"Whereas, it was the original purpose of the Government thereby to promote research and the diffusion of knowledge, and is now the settled policy and present practice of those charged with the care of these collections specially to encourage students who devote their time to the investigation and study of any branch of knowledge by allowing to them all proper use thereof; and

"Whereas, it is represented that the enumeration of these facilities and the formal statement of this policy will encourage the establishment and endowment of institutions of learning at the seat of Government, and promote the work of education by attracting students to avail themselves of the advantages aforesaid, under the direction of competent instructors; therefore,

"Resolved by the Senate and House of Representatives of the United States of America, in Congress assembled, that the facilities for research and illustration in the following and any other Governmental collections now existing, or hereafter to be established in the city of Washington for the promotion of knowledge, shall be accessible, under such rules and restrictions as the officers in charge of each col-

lection may prescribe, subject to such authority as is now or may hereafter be permitted by law, to the scientific investigators and to students of any institution of higher education now incorporated, or hereafter to be incorporated under the laws of Congress, or of the District of Columbia, to wit:

- One. Of the Library of Congress.
- Two. Of the National Museum.
- Three. Of the Patent Office.
- Four. Of the Bureau of Education.
- Five. Of the Bureau of Ethnology.
- Six. Of the Army Medical Museum.
- Seven. Of the Department of Agriculture.
- Eight. Of the Fish Commission.
- Nine. Of the Botanic Garden.
- Ten. Of the Coast and Geodetic Survey.
- Eleven. Of the Geological Survey.
- Twelve. Of the Naval Observatory."

It is obvious without further discussion that the advantages thus offered to students in Washington can not be equaled elsewhere in America. There is scarcely a branch of human activity that is not in some degree recognized by the National Government. In the archives of the State and other Departments are to be found the extensive accumulations of original historical documents and data which are invaluable to students of history, political science, economics, sociology and allied topics of research; while the great Library of Congress, the Public Library of the District of Columbia, and the many highly specialized libraries attached to the various departments of the Government are in themselves exhaustless sources of knowledge. The Librarian of Congress, speaking on this subject, says:

"There are thus in the city of Washington *thirty-four* governmental libraries freely available for research. These libraries now contain in the aggregate over two million books and pamphlets, and over a half million other articles literary in character—manuscripts, maps, music and prints. If we add to them the contents of the District Library and of the libraries of private associations and institutions * * * we shall have a total, not merely greater than is to be found in any other city of this size in the world, but one which in proportion to population, represents several times as many volumes *per capita* as exists for public use in *any* other city in the world.

* * * * *

"To-day the Library of Congress is a collection, including duplicates, of over 1,100,000 books and pamphlets and half a million other articles. It is housed in a building devoted to its sole use—the largest library building in the world, the most commodious, the most efficient in equipment for the

work which it has to do; a building which provides for ample classification and display of the material, for reasonable growth, and for a multitude and great variety of service; a building which may accommodate a thousand readers at a time, and differentiate them to their best advantage."

And besides these great literary compilations there are the technical, industrial and scientific collections of the National Museum, the Museum of Naval Hygiene, the Smithsonian Institution, the Army Medical Museum, and the various departmental museums, containing extensive series of specimens of great value to the student of anthropology, ornithology, archeology, mineralogy, geology, paleontology, biology in all its branches, or any one of a multitude of technical subjects, while in the Patent Office are the models and records of the thousands of inventions that have contributed so materially during our national existence to modify the conditions under which we live, and to give to America its exalted rank in the industrial and mechanical progress of the race.—*Clifford Howard, in "Washington as a Center of Learning."*

The Pacific Slope Horror.

THE awful calamity on the Pacific slope has given heartache to the civilized world. While we were still reading of the frightful devastation in Southern Italy, through the eruption of Vesuvius, a horror infinitely worse in all its harrowing details, came upon our great and growing metropolis at the Golden Gate. What the earthquake had not marred and twisted and ruined, the devouring flames consumed, until the proud city was fairly blotted out of existence. Think of a thousand squares of a busy and beautiful city reduced to ashes, and 300,000 homeless people, without food and water, huddled together like sheep in the public parks. History hold the record of few scenes more pathetic. The silver lining to the dark cloud is the spontaneous and generous pouring out of money by the millions, to meet the immediate needs of the sufferers, and the messages of sympathy which have come from all parts of the world. In these strenuous and selfish days, we often loose faith in humanity, but a great calamity like this reassures us that there is still a great deal of heart left in the old world.

A cleaner, better and more beautiful San Francisco will arise out of the ashes of the old, and this

disaster, which now seems so appalling, will in the days to come be called a "blessing in disguise."

The commerce of the world is soon to be transferred from the Atlantic to the Pacific. The magnificent bay at the Golden Gate is to become the busiest and most important bay in the world, and San Francisco will eventually be the chief American city.

We grieve over the loss which came to the beautiful Leland Stanford University. For years they have been building in matchless fashion, and were just entering upon active work when the earthquake damaged these superb buildings to the extent of \$4,000,000. President David Starr Jordan, with characteristic courage, wires that all damages will be repaired and work proceed on the large plans contemplated.

The Unity of Knowledge.

In relation to human wisdom, there has ever been a confusion of tongues. Two or more camps of thinkers have arrayed themselves against each other, contending for warring principles.

Beginning with the earliest Greek philosophers down to the present time, there has been a constant swing of the pendulum from one extreme to the other. A Thales declared the fundamental reality from which all changing things are derived, to be water; Anaximenes declared, with as great vehemence, that it was air; while Anaximander declared it to be neither, but an indefinite, infinite somewhat. A Democritus conceived the world as a material composite, made up of an infinite number of atoms, homogeneous in quality and varying only in size and form; while Plato conceived the real world to be spiritual—a world of metaphysical ideas.

It will thus appear that both materialism and spiritualism have their roots deep in the thoughts of the past. Materialism rests more on the direct testimony of the senses, and admits of experimentation and exact observation; whereas spiritualism or idealism rests more on the higher demands of reason and the living spirit. The tenets of the one are supposed to be more readily credible, because its materials are primarily such as may be seen with the eyes and handled with the hands, and as a body of knowledge it has particularly arrogated to itself the all-conjuring, but somewhat dubious

term Science; the other, attempting to interpret facts and principles with a final reconciliation of the whole according to the demands of thought, not by sight, but by insight, as a body of knowledge has been called Philosophy.

From these two psychological methods of approach have resulted the contending interests, which, in modern times, have culminated in the so-called conflict between science and religion, between physics and metaphysics.

There can be no question, however, but that the world as a whole is a harmonious and unitary existence. Its ongoing and continuance demands a fundamental and constitutional unity. It appears that here all things must work together for good as a sum total. Either this or the world would come to an end. The good must be triumphant that the world may exist at all. In the face of earthquake, storm and pestilence we are prone to question the benevolence of nature, but this is because our eyes see only the temporary calamity, instead of being able to realize the great drift and final end. If this end were but clear then all else would appear as good and benevolent. A supreme and underlying good alone can make the existence and duration of the world possible. If this, it be held, is an assumption, the answer is that, to reason, it is an absolutely essential assumption. This was the intuitive conviction of Socrates, and is the mature judgment of reason. The world must be a unity to be intelligible.

But even if the world be a unity and harmony, our knowledge of it has been far from it. Knowledge, so-called, is a human product. It is largely an attempted explanation or interpretation of the world-phenomena. Its aim is to discover and observe the exact facts of phenomena, orderly arrange and classify them, and finally to make a rational and harmonious interpretation of the facts. The rationalizing of the facts is the supremest end of knowledge.

Unfortunately however, the facts of phenomena are so complex in character and so hidden from human view, that exact observation becomes well-nigh impossible and their interpretation a matter of greatest difficulty. The way of knowledge is one only of assiduous striving.

An interesting psychological phenomenon is observable. In the realm of religion, the so-called liberal thinkers are given to making light of the

most commonly accepted tenets of faith. This seems to rest on a superficial conception of the grounds of belief, as well as a tendency of mind to hold all things in abeyance, indeed, ever to preserve a negative rather than a positive attitude towards knowledge. Yet, strange to say, in the field of the most problematical, where the race is most slow to believe, these same liberals are most swift positively to declare, as if they would reverse the whole order of human intelligence and rebuke it both for its common faiths and in the same breath condemn it for its unbelief and incredulity. They seem to hold that most that is believed is folly, and that which is not believed is wisdom. There is an old saying that if we believe not in gods, we will believe in ghosts, which comes not far from fulfilment here. For example, a recognized leader among liberal clergymen has recently classified a belief in the resurrection of Christ as the most accentuated superstition; but in his attempt scientifically to fortify his defense for the "resurrection hope," presumably that of a life beyond the grave, he gives the most unqualified indorsement of the vagaries and inane claims of so-called modern Spiritualism as being established beyond a doubt, and tacitly implied that any who reject its hair-brained pretensions to the establishing of an experimental demonstration of the immortality of the soul are very intellectually belated. So great is the faith of unfaith!

As between the physicists and metaphysicists, an interesting current movement towards what may be regarded as an approach to a unity of view and knowledge is of more than passing interest. Professor Asa Gray declared that he did not believe in the permanency of species, because he had made and unmade so many of them. One might say the same relative to the terms and fundamental conceptions of physicists. Science, in almost every field, has been made and unmade so often in the modern world that one might dispute its claim to the term science at all.

Up to very recently the final unit of the material sciences has been the atom. This supplanted the old corpuscular theory, only itself to give way to a brand new theory, namely that of electrons. This may be characterized by noting that instead of the atom, a no-longer-divisible extension of undynamic matter, as the material unit, this atom is now divided into numberless points of force called electrons. The im-

portance of this shift on the part of physicists is in the fact that a more dynamic conception of the unit of matter is recognized and found to be obligatory.

But here it is patent how near an approach this new theory of electrons is to the most approved metaphysical conceptions. The electrons as unextended points of force are so closely akin to the metaphysical conception of the purely spiritual as to be distinguished only by the terminology or point of view. As non-spacial and phenomenal they approach the metaphysical conception of the material unit as being only phenomenal manifestations of points of force.

At this point, however, two possible metaphysical conceptions prevail—the ideal and the real—the one holding that the unit of matter is only phenomenal and having no reality in itself, but is at last only a manifestation or form of the Divine energizing; the other maintaining that the unit of matter has a created existence, and therefore a reality in itself, like the finite spirit.

The merits of the two suggested metaphysical conceptions are not a matter of present discussion. It is evident, however, that in either case the new physical theory is a close approach to the metaphysical. The idealist might contend, with a show of right, that as non-spacial the electrons must be in essence of what he calls spiritual nature, and as manifestations of force of the nature of intelligence. The realist might hold that the electrons, to be real, must have a distinct entity, which would be congenial to general physical theories. In either case the practical effect is the same.

It must be always borne in mind that the facts are the same back of all theories; the interpretation of the facts is where the doctors ever will disagree. But it is evident that the disagreement has been brought down to closer quarters, if indeed we are not in sight of complete harmony. The conflict is not really between science and religion, or physics and metaphysics, but between scientists and religionists and physicists and metaphysicists. The world is a unity; for the final unity of knowledge the outlook is encouraging.

WILL you not hand this copy of the Courier, when you have read it, to some friend

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

The Woman's College of Baltimore.

Our hearty and sincere congratulations are extended to the president, the faculty, the trustees, the alumnae, the students, and the patrons of the Woman's College of Baltimore. The steady, patient, persistent, wise, and until recently, quiet campaign for the extinction of the debt of a half million dollars, has been crowned with a most complete and gratifying success—first made public on June 5th by President Goucher in his Commencement address. In this notable achievement even the most earnest advocates of co-education can not fail to rejoice, while to those who believe in the separate collegiate training of women the event is one that thrills the heart and wakens new hope and inspiration. The institution stands for the highest and best methods, ideals and equipment for that education of young womanhood which qualifies for the broad and intelligent recognition of the opportunities of life, for the most powerful moral and religious impulses toward the fulfillment of the various functions of cultured women in the social, the educational and the spiritual realms, and for the practical and benevolent application of truth in theory to the actual conditions found in the diversified activities of human life.

The deliverance from the bondage of debt, with its oft recurring clank of chains and clink of "interest due," will bring an untold measure of relief to the administrators of its finances, and will open the way to an enlargement and a strengthening of the various departments of the college. May this hour of emancipation be prolonged into a life-long freedom from the "previous condition of servitude," and introduce an era of large and liberal provision for the maintenance and growth of the young institution which has, in spite of the trammels of debt, already vindicated its worth to the church and the country. May the perils of prosperity be as safely met and passed as have been those of burdensome oppression, amounting almost, if not quite, to hardship and ad-

versity. To the alumnae of this noble college the American University will look for an important proportion of its post-graduate body of students, and for steady support in the planting and maintenance of the highest standards of intellectual, moral and religious effort and life.

Exit Dr. Harris, Enter Dr. Brown.

After seventeen years of distinguished service as Commissioner of Education Dr. William T. Harris last month resigned his office, and Dr. Elmer E. Brown, professor of the theory and practice of Education in the University of California, was appointed his successor. Dr. Harris, born in Connecticut in 1835, left his class at Yale during his junior year to teach in St. Louis, where he remained for twenty-three years, serving successively as teacher, principal, assistant superintendent and superintendent of public schools. His published reports during the thirteen years of his superintendence from 1868 to 1880 were models of their kind, and some of them at the Paris Exposition of 1878 won for him special honors and recognition from the French Government. Though compelled in 1880 by ill-health to give up his wearing work in St. Louis, he continued to give attention to educational problems, and represented the United States at the international congress of educators at Brussels. At the Paris Exposition of 1889 he again was the American representative of education, and on his return assumed the duties of his appointment as Commissioner of Education. Although Dr. Harris has nearly reached his seventy-first birthday, his vigor of body and strength of mind are such as to make us expect still farther contributions to both the theoretical and the practical departments of his own loved realm. He has achieved monumental results in the promotion of the literature, the philosophy, the scope and the effectiveness of education in America, and his impress is upon the minds and hearts of numberless people who rejoice to call him a friend and helper.

To Dr. Brown we extend hearty greeting. Already widely known by his labors and his writings, especially by his notable volumes, "The Origin of American State Universities," and "The Making of Our Middle Schools," his new national office with its unmeasured opportunities for service to the cause he cherishes, will bring him to a focal position in the expectant gaze of his fellow countrymen. To each of these fellow-workers in their high vocation of trust and power for good we say our "Hail,"—to the one a congratulation on noble achievements, and to the other an earnest wish for the highest success.

Aspects of Comparative Literature.

The appointment of a professor of comparative literature at Harvard, after the chair had remained vacant for several years, is a matter of more than academic interest. The new incumbent, Professor Schofield, is pre-eminently a mediævalist. He has published numerous ingenious studies in the field of legend and folklore. After the fashion of his master, the lamented Gaston Paris, he traces the affiliations of legends and stories through all the versions in what may be called the culture tongues to the crudest variant in the remotest *patois*. Such study deals chiefly with matter that is not literature at all in any but a loose sense. It is primarily an investigation of the interrelations of the stock subjects of mediæval story-tellers—a branch of historical science. It deals mostly with the least important manifestation of the mediæval spirit, and regards as literature any document whatever that affords a clue to the history of a legend. Such studies are of an engrossing sort, and require that extraordinary discursive reading and retentive memory which Professor Schofield exemplifies so well. Occasionally, work of this kind assumes a form that may itself fairly be called literature. This was the case with Gaston Paris, and is with M. Bedier; they are almost the only mediævalists possessed by the comparative idea who themselves have contributed to modern letters.

We have no intention of denying to the literature of the Middle Age a certain place in humane letters. Yet if one excepts Dante, Petrarch, Boccaccio, and Chaucer, there is scarcely a mediæval text between the First Crusade and the fall of Constantinople a

knowledge of which is in any sense indispensable to culture. The sinking of the rest would lose us much interesting reading, and would efface in the period prior to the true Middle Ages a fascinating legendary world; it would, however, leave no very important tract of the human spirit uninterpreted. Whatever criticism of life there is in mediæval literature as a whole is vague and casual. Its form is relatively monotonous and inexpressive. The great emotions it professes to invoke, it seldom realizes with any poignancy. Except in a few lyrics, the structural sense of the Middle Ages is weak and faulty, in singular contradistinction to the architectonic character of its social order and its actual achievement in monumental building.

In fine, no student who has not wholly lost his sense of literary proportion approaches a mediæval writer with the reverence appropriate to the great masters. No reader of Virgil has anything very serious to do with Chretien de Troyes, or Benoit de Ste.-Maure. Indeed, most writers of the twelfth and thirteenth centuries had a very correct apprehension that they fell not only far below the Virgilian, but also measurably beneath the Ovidian standard. For this reason it would be matter of regret if Harvard were to restrict "comparative literature" to instruction in what is literature at all only in the slighter and less significant sense. The authorities at Cambridge can not, of course, hope to develop an adequate department of comparative literature along any such narrow lines.

In any case, there is a growing dissent from the purely philological view. To an expanding school of students, best represented, perhaps, by the late Joseph Texte, comparative literature deals primarily with humane letters and with the direct or reciprocal influences of literary cultures. Texte, for example, thoroughly traced Rousseauism from its mixed French and English origins to its effects upon all the nations of Europe. At Columbia, Professor Woodberry founded courses in comparative literature which embraced particularly the literary internationalism of the Renaissance. His pupils have published comprehensive treatises on such topics as Renaissance criticism and the influence of the Spanish upon the English drama. Professor Saintsbury's portentously big and learned "History of Criticism" is an attempt to trace the en-

tire history of European taste in literature. Such studies have the obvious advantage of bringing the investigator into close contact with great literature. No one can have studied minutely the history of any literary influence since the Renaissance without covering a considerable portion of the field of humane letters. Furthermore, the implications of such study force one to travel the main routes of human intelligence from Grecian times to our own. No one can deny the utility of such studies for our university students. They should produce men of wide and sympathetic culture—ideal incumbents of our college chairs of literature.

It is evident that one may have threshed out the quiddity of a score of mediæval legends without having come into stimulating contact with the literature that to-day counts for culture. A personality like that of the late Francis J. Child, combining the widest reading and appreciation with minute specialization on material seldom literary, must not of necessity be rare. No one will understand us as depreciating such investigations as resulted in the "English and Scottish Popular Ballads." They furnish an admirable example of industry, insight, and method for all scholars; they open up to the popular appreciation a *genre* of peculiar freshness and charm. Yet the drying up effect upon most men of these minutely historical and extra-literary studies is well known. We can not produce really educated teachers of any literature by confining the studies of their best years to what is barely literary at all.—*The Nation*.

Mid-year Trustees' Meeting.

The semi-annual meeting of the trustees of the American University was held May 16th, at the offices of the university in the Glover Building. President David H. Carroll, of Baltimore, presided.

Among others who were present were Bishop Charles C. McCabe, of Philadelphia, chancellor; Bishop Earl Cranston, of Washington; Dr. T. N. Boyle, of Pittsburg; Dr. Charles W. Baldwin, of Baltimore, secretary of the board; Dr. J. Wesley Hill, of New York; Senator J. P. Dolliver, of Iowa; Mr. C. Price Speer, of Chambersburg, Pa.; Mr. George F. Washburn, of Boston; Mrs. J. F. Robinson, of Rock Island, Ill.; Mr. Aldis B. Browne, Mr. Thomas W. Smith, and Mr. Charles C. Glover, treasurer, of Washington; Dr. W. L. Davidson, secretary of the university; Dr. J. A. Gutteridge, financial secretary, and Rev. Albert Osborn, registrar.

The reports of the officers, especially of the chan-

cellor and the secretary, indicated a broadening and deepening of the public interest in the enterprise. The holdings of the university, especially those of real estate, are steadily enhancing in value.

Vice-President Fairbanks was elected to membership in the board to fill the only existing vacancy. Among the reports from the committees, that on the Pennsylvania hall of administration was to the effect that work on this building should be begun as soon as enough money is secured to put it under roof.

The central point of interest was the McKinley memorial college of government, now in process of erection on one of the most eligible parts of the campus, at the junction of Nebraska and Massachusetts avenues. Important movements in both public and private improvements in that part of the District indicate the certain growth of the city in the near future and a most beautiful environment for the university.

The walls of the college of government are now up to the tops of the windows of the second story. The construction of the massive and pillared entrance is well under way. The material is marble from the Columbian quarries near Rutland, Vt., the same as that used in the completed college of history. The roof will be put in place within a few weeks. Because of its key position in the group and the highly important departments it is to shelter, this building will be somewhat more ornate in finish than its companion, but the same Grecian simplicity will mark the architecture of all. After luncheon several of the trustees visited the site in automobiles and examined the new building.

The New Building Advancing.

The walls of the College of Government are now almost completed and the contractors have a large force of workmen getting the rafters in place for the roof. Each new stone dropped into place reveals more clearly than ever the superb architectural beauty of the building. No picture can possibly do it justice. It is a poem in marble. All who see it are enthusiastic in its praise. It will be the most majestic and satisfying building of its size in the capital city, where handsome buildings are so numerous. In the early fall the building will be fully enclosed and under roof. Generous friends will doubtless make possible the finishing of the interior, and then with two splendid buildings ready for occupancy, with eighty-four class rooms, amply sufficient to meet the needs of hundreds of students, plans will speedily be made to open the university and begin active work. The glad day will soon come and the faith of those who have loved it and worked for it will be fully justified.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

To Dr. Wilbur P. Thirkield, the new President of Howard University, we reach the right hand of welcome and fellowship. We believe his election to be one of the most fitting events in the history of this noble institution.

MANY subscriptions to the Ohio College of Government fall due with the current month. Notices have been sent to all who are in arrears. Prompt payments at this time will help greatly in meeting the heavy expenses on the new building. Will you send check as soon as your eye falls on this item, if you know yourself to be in debt to this fund?

Chancellor McCabe and Secretary Davidson recently spent a pleasant Sunday at Bethlehem, Pa. The secretary occupied the two important Methodist pulpits of the city, preaching to immense audiences, while the chancellor rested. Both were the guests for a part of the Sunday, of John Fritz—a noble and generous man—whose inventions and long years of service in the iron and steel industry have made the name of Bethlehem famous. His palatial residence is a model of beauty. Mr. Fritz is now eighty-four years old, and is still actively engaged in pushing many enterprises. He has the love and confidence of everybody in Bethlehem. His has, indeed, been a noble life and “many shall rise up and call him blessed.” His enduring monument is the splendid Fritz Memorial Church—in honor of his mother—in which he invested

\$80,000, and in the success of which he is deeply interested. Such a life is full of brightest inspiration to young men.

Massachusetts Avenue to be Extended.

We are glad to be able to report that the Congress just closed appropriated \$25,000 for the extension of Massachusetts Avenue to the grounds of the American University. For three years we have been working heroically for the needed improvement. It means everything for the University, but as we are at present the chief beneficiary and are not yet open for work, it was a little difficult to make an impression on the “powers that be”—especially in view of the fact that so much had this year been appropriated to sewerage, streets and parks in the same general neighborhood.

But for the steadfastness of some loyal friends in both houses of Congress we must have waited another year.

The amount now appropriated will by no means complete the work, but it will make a fine start, which was all we wanted at present. This will insure further appropriations until the work is completed. When the government puts its hand to the plow it never turns back. This will bring to and through our grounds, close to its northern border, the finest residential avenue in Washington. Three-quarters of a mile will bring the avenue from a point to which it is now opened at Wisconsin avenue to Nebraska avenue at the University. It will make a perfectly straight drive from the heart of the city to the campus with easy grade and will shorten the distance by fully three-quarters of a mile.

It is proposed to install automobile service on the whole length of this avenue as soon as the new Union Station is completed. The auto journey from the White House can easily be made in twenty minutes.

This is certainly a great victory, and those who worked so faithfully for it are being warmly congratulated. All improvements, which must precede the opening of the University, are being consummated, one after another. This is a prophecy of what will happen on some glad day, which is not far away. The Episcopal system of schools, not far from us, is also greatly benefited by this appropriation for the extension of the avenue.

Strong Plea for a Great University at the Nation's Capital.

At a large gathering of Cornell Graduates, recently held in Washington, that brilliant scholar and educator, Andrew D. White, the first President of Cornell and ex-ambassador to Germany, gave forceful utterance to many facts which crystallize themselves into a mighty argument for the necessity of The American University.

The feature of Dr. White's speech was the advocacy of the establishment of a great university in Washington, the capital city. After relating the growth of Cornell he turned to that subject, saying, in part:

"When I used to speak to the graduating classes at the university I advised them not only to be loyal to Cornell, but to be loyal to their State universities. I believed that the whole system of education lay in the State universities.

"Another warm desire is the establishment of a great representative university in Washington. Years ago I remember publishing three articles on that subject, and in them I gave several reasons for such a move. In glancing over the articles a short time ago I discovered that the reasons were today as strong as they were twenty years ago, nay, even stronger than when I promulgated them. In some way I believe one is coming. I do not expect early help from Congress, I will say. But I hope that there is a man who is large enough, broad-minded enough and financially able to give to this country such an institution. I remember in the early days of Cornell I told Mr. Cornell that there was a fine mathematical library for sale for \$5,000. He did not feel able to respond himself, but he said to me: "Somewhere there is a fellow walking around who wants to give us that library." And there was, and we got the library, which was the nucleus for the library of over 300,000 volumes now located on the hill of Ithaca.

"One of the most unfortunate things for the Washington University was that it was referred to by certain people as the center and culminating movement of the continent. That was unfortunate, for many who had supported it up to that time withdrew their support then. I do not want it to dominate the others, nor to be superior to the others, but to follow the same general lines of the others. I need not point out to you the advantages of the establishment of a university here, as to the beauty, as to the library facilities, as to this being the center of scientific men, for you know all these advantages.

"Although I have a desire for the promotion of science, of art, and of literature, that is but dust in the balance when compared with another argument, one which originated with Washington himself—

the political reason. Think and reflect on the present condition of the country and you will notice that there is a peculiar circumstance that is not satisfactory. You will notice throughout the country, above a certain line, the country is being filled with the highest appliances for education—the public libraries, public schools, colleges, universities, etc. They have developed so much in fact that men are coming here from abroad to receive education which they cannot get as well abroad. For instance, an eminent professor of law in England deliberately brought his son to this country to receive his legal education. There is growing up, then, north of the imaginary line a higher phase of education—a higher appreciation of art, literature and science. But south of that line, where there are men of equal abilities, the men have not the same facilities, have few libraries, few schools. There is a gulf forming between the cultures of the two sections. Look at what happened in Russia. The Russians are at heart not a bad people, but they hated Finland and the Baltic provinces, and they took away every semblance of self-government from those countries. The reason was that one section thought that it was better than the other. The greatest guarantee for the future welfare of this country is something that will bring the north and the south together. The southerners used to come north to school in large numbers, but that is not being done to so great an extent now.

"But a university of Washington would call its students from both the north and the south, and with the combination of the best in the civilization of both sections a propaganda of all that is best would sweep over this country.

"There are other reasons for such a university. Washington is a great scientific and literary center and is becoming an art center. In this capital city the members of Congress should be made to feel that atmosphere which stands for the highest in art, literature and science. The finest dinners which I attended in this city were those that brought together the leaders of art, science and literature, with the representatives of the people in Congress. The law-makers are influenced by environment. I hope that you will live to see this idea carried still higher, in the university it should be free from sectarian or political control, devoted to art, literature and science in the uplifting of the American people. It will be a great and good thing, this national university. I am not in favor of calling it that. Call it the University of John Smith if he'll give you \$20,000,000 for the establishment of the university."

American is its name. It has made a glorious start and is well underway, and the man is now living who, seeing its necessity and possibilities as outlined in Dr. White's address, will fully endow it and start it on its work.

Some Noteworthy Commencement Utterances.

From the mass of commencement wisdom now about we seize some representative passages as specially deserving attention.

PRESIDENT HOPKINS AT WILLIAMS COLLEGE.

"The scholar in politics in this democratic age is more worthy of admiration than the scholar in his cloister—scholarship and service—scholarship for service—the service of the Republic and the service of man."

PROFESSOR WILLIAM NORTH RICE AT WESLEYAN UNIVERSITY

"The English college aimed to produce a cultured gentleman. The German University aims to produce an investigator. The combination of the two ideals in our modern American institutions will yield a result better than either of its sources."

PRESIDENT HUGHES AT DEPAUW UNIVERSITY.

"Learning should not become introspective, critical, selfish; it should be always transferred into genuine power. Roosevelt, Kidd, Wordsworth, and Phillips all blamed the scholar for the failure to cast themselves into the heat of civic conflict. All four of the urgers of political activity were themselves college men. Their word should have weight with all graduates, sending them out with the idea that learning shall be converted into civic power."

PRESIDENT CRAWFORD AT ALLEGHENY COLLEGE.

"The old order is changing and the view that the question of morals enters into all life and all life's activities is securing a wider acceptance. It is coming to be understood that the man who makes claim to moral virtues can not confine the sphere of his moral activities to home and Church. He must make it include the business office and the club. If morality means what we say it means, it must be brought down into the market place. The only adequate safeguard in the leadership of a nation is in the unimpeachable character, practical wisdom, and noble purpose of the men who fill offices of public trust and responsibility. And if such men as these constitute the only safeguard in the leadership of a nation on its political side, they are also the only safeguard of a nation on its commercial side."

PRESIDENT WELCH AT OHIO WESLEYAN UNIVERSITY.

"The question is not what station you hold in life, but what spirit is in you. There are two underlying principles in this world: the principles of mastery and of service. Let us not be so foolish as to deny that ambition for conquest has led the human race very far. But there is another principle at the heart of civilization, the principle of brotherly service, and without that principle men, no matter how rich, strong, or comfortable they may be, become merely a pack of animals fighting over the bones flung to them by nature. Yet, despite our boasted civilization, despite its great strides in the spirit of service, this principle has not found general acceptance among men. This great law of life that makes for success is the law of service. We are bound together with the people of every country, every color, every condition, and the day will come when, wherever tears fall, wherever bodies are crushed and broken, there shall be found a deliverer, a brother, to serve the lowest and neediest. But it will be the costliest world accomplishment. To win a triumph of love means that you must bow and allow others to crush or crowd you in the struggle. Nothing makes the world what it ought to be without the shedding of blood."

PRESIDENT RAYMOND AT WESLEYAN UNIVERSITY.

"We make too much fuss about wealth. If in some magic airship we could sweep over all the States today, we should see below us the farmer, the carpenter, mechanic, young men and young women, children and youth, mature man-

hood and womanhood. These are the people I see from our airship, 75,000,000 of them, scattered over the continent. Billionaires, none; multi-millionaires, few; millionaires, not enough to make a small town. I have no hesitation about the searching investigation, the urgent legislation of the time. It all indicates another moral renaissance. These great money-making organizations stand for the forms of progress, but they also represent the brutality of progress. Wealth is too much in the field of thought. You can not put into its vocabulary the values which Jesus came to make current. Jesus does not speak in terms of wealth. He keeps to the high level of personal relations. He is forever after that nice sense of relationship that ought to exist between God and man and between man and man. His Sermon on the Mount is alive with the relationship of persons. The righteousness which He requires must exceed the righteousness of the Pharisee—it must be vital, not formal."

GENERAL STEWART L. WOODFORD AT NORTHWESTERN UNIVERSITY.

"The three great needs of the nation are education, reverence for law, and observance of truth. * * * Some corporation officials behind their artificial authority commit acts that they would not consider as individuals. The corporation has grown to be a power, and it was born under the protection of the law. It holds property because the law guards it. Its every venture is safeguarded by the sanctity of the law. An officer of a corporation who, to seek increase of fortune for larger individual, personal enjoyment, who tramples on the law, who uses his position and influence to evade the law, is a traitor to the dearest and best interests of the republic."

"The corporation has assumed a power in this community and throughout the entire republic which it does not hold elsewhere in the world, and yet it is but a creature of the law. No corporation was born into the world because of itself. It has no power to transmit to another its life. It exists because the people decreed it. It has no inalienable, personal right. It exists to do things the individual can not do, and it is for the good of the community. The community was not made for the corporation, but the corporation for the community. We are trained to believe that the corporation has no soul. By experience we are taught that its officers sometimes do things they would not do as private persons, that they are inclined to skulk behind their artificial authority. What I would ask of you is to put your influence in the years to come not to destroy the corporation but to compel the corporation to obey the law."

BISHOP McDOWELL AT LASELL SEMINARY.

"The modern graduate is expected to have, and should have, the power to think broadly and with absolute accuracy, as nearly as the human mind is able. Clear thinking is one of the rarest things in this world, and yet one can hardly go straight without such thinking. Nothing is so dangerous as an ignorant good man, for his goodness floats his ignorance. Many minds are like the dome of an observatory, through the narrow openings of which the telescope is pointed in a certain direction. When pointing in one direction all other parts of the universe are invisible, but instead of moving to other subjects as does the dome, the minds of these people remain fixed on the one subject irreverently and irreligiously excluding all others. We obtain the truth through the medium of our prejudice. 'Spectery glasses' are abundantly provided us, not that we may see things as they are, but that may be distorted. We are presented with purple glass platforms in politics instead of plate glass, through which many a yellow man looks purple. Our world of thinkers are the saving remnant which must take upon themselves the task of seeing that such matters are corrected. The nation can go astray as easily as an individual. Public sentiment lies indifferent for a long period of years, and then when abuses are pointed out it becomes hysterical; this does not tend to sound judgment. We hear talks, loads of talk, but clear thinking has become so scarce that a sober man becomes scarce because of its absence."

The modern graduate is also expected to have a distinct social feeling. Philosophers are the product of schools, philanthropists the products of humanity. The most pressing wants of humanity have made their imperial demands upon the trained mind. The scholar of the past has been prompted to hold himself aloof from humanity, but the day of the academic retreat has passed, the public library taking its place. The scholar now looks upon the 'Man with the Hoe' in a different light, grids up his loins, and goes down into the slums to help his brother."

CHANCELLOR DAY AT SYRACUSE UNIVERSITY.

"All ages have been thrown up into the nineteenth and twentieth centuries and we are living in the universal times, —met in every department of life by the facts, forms and fancies of other continents, of other people, of other ages. In all of our considerable cities the four corners of the earth are represented. We are in the track of the nations of the world. The old world on our East, the older world on our West, we are the Mecca to which the tribes of the earth have come up. The forces of today are too mighty to be directed by the presence of one man—the forces with which God built the universe which have been put into the hands of men. Great co-operative interests are not the product of human avarice nor of grinding indifference to popular rights. The very laws of nature by which we use steam and lightning and chemical and vital forces have made them. They are the result and the movements of a law with phenomena as unmistakable as any law in nature. The application and control of these mighty forces over such tremendous areas and for such amazing results is impossible to the individual. He may discover them, but men of supreme executive ability and capital must come in and develop them. The inventor is helpless until these men come to his relief. The economist of a century ago had no conception of times like these and much of his philosophy is not applicable to such magnitudes and their forces. * * * It is the corporation that has assembled the material, furnished the capital in great banks, financial trusts and projected enterprises that make the thrift of the country and give employment which individuals or small companies could not have done. The corporations which we sometimes thoughtlessly curse are the workingman's best friends. Let those who hate corporations go back to the canal boat, the little railways, the stage coach and a dollar per day of wage."

PRESIDENT SCHURMAN AT CORNELL UNIVERSITY.

"The vice of the age is that men want wealth without undergoing that toil by which alone wealth is created. Among the rich and well-to-do business and professional classes 'grafting' has become so common that the very idea of commercialism has become a by-word and a reproach. We are dealing with the virus of a universal infection. The whole nation needs a new baptism of the old virtue of honesty. The love of money and the reckless pursuit of it is undermining the national character. But the nation, thank God, is beginning to perceive the fatal danger. The reaction caused by recent revelations testifies to a moral awakening. At heart the nation is still sound, though its moral sense has been too long hypnotized by material prosperity. Without honesty and fair dealing, no society can hold together. Dishonesty is the parent of anarchy."

PRESIDENT ROOSEVELT AT GEORGETOWN UNIVERSITY.

"I believe in athletics; but I believe in them chiefly because of the moral qualities that they display. I am glad to see the man able to keep his nerve in a close baseball game; able to keep his courage under the punishment of a football game, or in a four-mile boat race; because if the boy really amounts to anything and has got the right stuff in him, this means that he is going to keep his nerve and courage in more important things in life. If your prowess is due simply to the possession of big muscles, it does not amount to much. What counts is the ability to back up the muscles with the right spirit. When you come into after life, I can say no more than to wish you to copy the motto which should be the motto of every boy who plays on a college eleven: 'Don't flinch, don't foul, and hit the line hard.'"

Vice-President of the United States on the American University.

Vice-President Fairbanks in a strong and admirable address delivered before the General Conference of the Methodist Episcopal Church, South, where he went as Fraternal Delegate representing the Methodist Episcopal Church, said the following fine and timely things concerning the American University.

"It may not be inappropriate to the occasion to speak a word in support of the American University, in the success of which all Methodists should feel a particular interest. It is not strictly a Methodist institution, yet Methodists are in the majority in its management and control. The Methodist Episcopal Church has taken a leading part in its construction and endowment. It has placed upon it the seal of its approval. If the institution shall fulfill the hopes of its founders, it will be fraught with great good to the entire Christian Church, and to the country as well.

It will be of especial advantage to the cause of Methodism, north and south. A great institution of learning, fostered by Christian denominations at Washington, should prove to be a powerful influence for good. Such an institution will enjoy exceptional advantages. Its professors and students will have access to the nation's libraries, great now and destined to be the foremost in the world. There the opportunities for literary and scientific research will be unsurpassed. Many millions have been spent and will be spent by the government in support of its libraries and in broadening the opportunity for development in every branch of human knowledge."

THE commencement season just ended has produced an unusually prolific crop of D.D.'s. How cheap the title has become!

THE Carnegie Institution, which is accomplishing a great and noble work, will erect in Washington a laboratory for certain lines of original investigation, costing \$80,000. This will greatly add to the sum total of original work being done at the Nation's Capital, and under the charter is a part of the assets of other institutions existing here.

WHEN visiting Washington do not fail to call at the office of the American University, 1419 F Street N. W. You will be gladly welcomed, and some one of the office force will be most happy to take you out and show you the grounds and buildings. It is one of the sights of the Capital you ought not to miss.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Officers of the American University.

Chancellor - - - - BISHOP C. C. McCABE, D.D., LL.D.

Vice-Chancellor, BISHOP A. W. WILSON, D.D., LL.D. *Secretary*, REV. WILBUR L. DAVIDSON, D.D.

class mail matter under act of Congress of July 16, 1894.

The New Building and the Future.

Work on the new building, the College of Government, is advancing in a satisfactory manner. Practically all the marble is now on the grounds. The cornice is at present being put in place. The roof is assuming shape and before the holidays the building will be enclosed. It is a mammoth and beautiful structure. Nothing in the capital city can compare with it as to graceful lines and artistic finish. It is, after all, as simple as it is impressive. In this lies its charm. The marble is of the finest quality. It comes from the famous hills of Vermont. The architect and builders have done their work well, and the building committee of the University have carefully noted every step in the progress of construction. Multitudes of visitors to the city during the past few months have inspected the building and have universally expressed satisfaction with it. Those who come for the first time are filled with wonder and amazement at what they find here. The same is true of those who have not been in Washington for some years. Constant advancement has been made. A beautiful macad-

amized thoroughfare, broad and straight, runs along the entire eastern front of the ninety-three-acre University campus. Water mains have been laid and sewerage is in process of construction. The entire frontage of the campus on the avenue has been beautifully graded and fenced. The slope is graceful and pleasing to the eye. Multitudes of trees recently planted are already beautifying the landscape. The marble College of History, stately and

magnificent, fills the eye of the beholder, approaching in any direction, long before he reaches it. Its rare white marble on a clear day glistens in the sunlight. From its summit the whole city is at your feet. The gilt dome of the Congress-

McKINLEY MEMORIAL—OHIO COLLEGE OF GOVERNMENT. NOW IN PROCESS OF CONSTRUCTION.

ional Library, in which are housed the rare treasures which are part of the assets of the American University, is certain to attract earliest attention. The stately Washington Monument, if the atmosphere be right, looks like a silver shaft leaning up against the sky. The splendid buildings of the Episcopal Cathedral system seem but a stone's throw away. The vast and magnificent country seats of John R. McLean and Chas. C. Glover, beautified at immense expense, and which are to be held intact and undisturbed for

decades to come, skirt the campus. Sugar Loaf mountain, forty miles away, is plainly visible. There is no obstruction in any direction, and the eye travels a circumference of many miles crowded full of magnificent landscape. There is no other such viewpoint in the capital unless it be the summit of the Washington Monument.

The building is fully installed with gas and electricity. Steam pipes and radiators are in place. Toilet rooms are complete. With a few interior furnishings and the erection of a central heating plant which is contemplated in the general scheme, the building is ready for instant occupancy. The ample hallways, the Tennessee marble wainscoting, the rich and massive quarter-oak woodwork, the forty-two bright and commodious class-rooms all constitute this one of the finest buildings for school work ever erected.

It cost \$176,000, but could not to day be duplicated for \$275,000. The marble in this building was purchased at a bargain rate. Brick or stone would have cost about as much. From the beginning the trustees decided on marble as most in harmony with the dignity of their scheme of work and the immortality which they felt certain would abide with the University.

The new building, now rapidly advancing, will contain an equal number of class-rooms, making eighty-four in all. This will be quite enough to adequately provide for the needs of such number of students as might reasonably be expected in the opening years. Two or three popular and important departments could be opened, then in a sensible way development could follow in the line of necessity. Whatever is urgently demanded could be provided. This is the law of university growth everywhere. To make haste slowly in matters of such great moment is always wise. But the time is now nearly here for the enlargement of the endowment and the utilization of the equipment already provided. One building would not have been sufficient for a creditable start. Two will be ample. The new avenues opened and opening give easy and comfortable access to the grounds. Time had to be taken to bring these things about. They have come and make possible and feasible the beginning of work on such lines as are indicated above. Such beginning would bring fresh inspiration and silence eavil. Enormous amounts now paid for taxes would be

saved to the treasury, and Protestant Christianity would no longer hang its head in shame as if contrasts its higher educational work at the seat of Government, the best equipped capital in the world, with that being done by the Roman Catholic Church.

The University of Paris.

The University of Paris is the greatest educational institution in the world, and if you want to know all about it, ask the concierge who sits behind a counter at the entrance of the main building and has a tongue that can express her thoughts at the rate of 500 words a minute. She is a jolly, fat person, and her experience with the students has given her a knowledge of human nature that is undoubtedly of value to the institution as well as to herself. Cross her hand with silver and you will get more information than all faculties combined could give you. She may not be so deeply versed in philosophy and mathematics as the rector and the dean, but she knows a lot more about the students than they do, and it is only necessary to set her going and give her time. You will not be able to ask any questions unless you choke her off, and the length of the interview will depend upon the time at your disposal.

She told us that the number of students was about the same yearly, averaging 15,000, but of late there was a large increase of women and a corresponding falling off of men. Last semester more than 10,000 women students matriculated. There are so many women, she said, that they are keeping the men students away, and Dr. Siard, the rector, is making holes in his brain trying to think of some way to get rid of them. About half the women are foreigners. They come from all over the world, Europeans being largely in the majority.

The French girls, she said, are more frivolous, and do not take so deep an interest in their studies as the foreigners, who are pleasant and cheery companions, but are very serious. Russian and Polish girls are especially serious, and most of them are very poor. They take up literature, medicine and the applied sciences in order to qualify themselves for teachers and for physicians. Russians are more numerous than any of the races except the French. Next come the English and Americans, but she

cannot tell the difference between them. Very few of the English-speaking girls are young or attractive, and, with a sly wink at my handsome companion, she remarked: "I don't think they would interest you." As a rule, American girls have more money, dress better and live better than the European students, but they do not have so much respect for the faculty, and are not so careful to obey the regulations. They are more independent and know how to take care of themselves better than European girls.

Many of the students are not serious. Some of them seldom attend the lectures, but pay their fees, which amount to \$10 or \$50 year after year and year after year, until they reach middle age, and never do anything but hang around the cafes. They enjoy student life and have no ambition to do anything else.

There is a "committee of patronage" for foreign students, and it has an office at which they can obtain information on any subject. The French parliament votes a subsidy every year to enable this committee to pay the fees of worthy foreign students who distinguish themselves. This committee can also obtain reduced rates upon all French steamships and save them 30 per cent. or more in their traveling expenses. There is also a bureau of information, especially for English-speaking students. It is established in a house immediately opposite the university and the secretary is always there to give information. A Franco-American committee composed of university professors in France and the United States was founded in 1895 to bring the students from America to Paris and to encourage French students to go to our institutions.

There are various other associations for similar purposes. The Scandinavian students have a club, the Catholic students and the Protestant students have each associations to bring together and look after the temporal and spiritual interests of members of those faiths, and there is an association to facilitate the work of students generally, to improve their material conditions, to offer them intellectual and moral encouragement, to secure them reductions in the prices of books, magazines and clothing, and to assist a worthy man in borrowing money if he gets into a tight place. The Young Men's Christian Association looks after American and English students carefully also, and the American

Art Association, started some years ago by A. A. Anderson, of Cincinnati, furnishes a rendezvous for those at the Beaux Arts.

Mr. Anderson, while he was a student, saw the need of some such place for American students to meet instead of at the boulevard cafes. He hired a cheap house; other students and several members of the American colony joined him, and the club was organized. The next year Rodman Wanamaker, a son of the great Philadelphia merchant, and his business representative in Paris, offered to pay the rent of a larger building. They found an old palace next to the mint, where Napoleon lived when he was a lieutenant in the army. They fixed it up luxuriously, but the fine furniture and imposing surroundings made the students uncomfortable. So Mr. Wanamaker leased a less pretentious building in the Latin quarter and moved down there.

There is a restaurant where the boys can get their meals at cost prices, a garden where they can loaf and drink their beer, a library where they can read and study and find the home papers, a big gallery in which the American artists give a sale exhibition every year, an amusement room where they can play cards, chess, and other games, and other apartments. Mr. Wanamaker pays the rent, and, as president of the club, takes an active interest in its affairs. Paul Bartlett and Leo Mielziner are vice-presidents. The club is self-supporting. The members pay small fees, and to make up the usual deficit gives a yearly entertainment, usually a minstrel show, which is attended by everybody in the American colony, and the treasury receives a percentage on all pictures sold.

In addition to the social features, courses of lectures are arranged each winter on art, history, and other subjects, and several eminent European artists and university professors are always ready to respond to invitations to speak. There are classes in music, language, and athletics, and a wholesome atmosphere is created, which is especially important to newcomers.

After the exposition of 1900 the municipal council at Paris presented the Government of the United States a plot of ground on the border of the Champs de Mars for the site of an American Art Institute. The grant stipulated that unless the United States Government erected a building at an expense of

\$50,000 or more within five years the land should be forfeited. Congress refused to accept the offer. Last summer the people interested made a final appeal for an appropriation of \$250,000 for a building, but Speaker Cannon and the members of the House committee said "No!" They argued that the Government was under no obligation to support American students in Paris or to provide a school for them. Congress has nothing to do with such things, and the most that the leaders of the House were willing to offer was a charter similar to that granted the American Academy at Rome, an institution for the same purpose, which has an endowment of \$800,000 from private sources.

Congress having definitely neglected the offer, after six years of delay, President Roosevelt instructed Ambassador McCormick to make the proper explanations to the municipal officials and decline their gift with thanks.

There are at least 2,000 American students in Paris, studying music, art, architecture, medicine and the sciences chiefly. Most of them are young people of small means. They live in the Latin quarter, in the neighborhood of the university, in the older part of Paris, imitating the traditional customs of the French students and their Bohemian ways. Student life in Paris is unique and unlike that of any other country. You can get a good idea of it by reading "Trilby." It has its pleasures as well as its privations; and while there is a great deal in the habits and customs of the Latin quarter that cannot be approved by sensible fathers and mothers at home, and should not be encouraged, a student who refuses or neglects to adapt himself or herself to them might as well stay at home. And it would be a great deal better for girls to do so.

There is nothing in university life in Paris that cannot be found in the educational institutions of the United States, except the Bohemian way of living, and to a young person of weak character and amiable views about morals it is a dangerous experiment.—*Wm. E. Curtiss, Washington Star.*

National Museum of Art.

Since the Smithsonian Institution at Washington is now adjudged to have the powers of a national

museum of art, its hesitancy in accepting the splendid proffer of Mr. C. W. Freer's collection becomes fairly ludicrous, if, after all, merely a natural result of being an art museum *seus le savoir*. Justice Stafford's decision rests upon the clause in the charter which reads that the institution "shall have custody of works of art, the results of curious and foreign research." The decision was rendered *apropos* of the disposal of the late Harriet Lane Johnston's collections, which were to be deposited in the Corcoran Gallery, "until such time as there shall be established by the United States Government a national art gallery." A friendly suit on the part of the Smithsonian Institution brings out the fact that the national art gallery already exists. It is highly significant that this decision has been sought by the Smithsonian Institution, for it shows that its regents desire this power, and are prepared to meet considerable new responsibility.

That responsibility is a fairly serious one, involving as it does not merely the construction of suitable museum buildings, but also the gathering of an especial staff. It would be a misfortune to make a false start by rendering the art exhibits a mere extension of those in ethnology, and certainly there will be small incentive to leave works of art to the Smithsonian until one may be sure that they will be as well installed and as learnedly catalogued as the general scientific collections. All these considerations have, presumably, been weighed by the regents, and one must expect in the near future the announcement of appointments which will give to the Smithsonian the confidence and prestige enjoyed by the art museums of New York and Boston. The advantages of a national museum of art at Washington need no argument. Perhaps no other American city has so many cultured residents, commanding leisure enough to enjoy such collections; certainly no other city has such a constant supply of tourists, both American and European. No place could be more appropriate for a great historical collection of American art including contemporary examples. We trust the Smithsonian will make its own the project of an "American Luxembourg," upon which other museums have labored with only too little success. If a judicial attitude in this delicate matter of buying works of living artists can anywhere be attained, it surely should be at Washington.—*The Nation.*

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

The University telephone is Main 5559. If visiting friends will call us up we shall be glad to show them any courtesies in our power.

The Commissioners of the District of Columbia, through their Engineering Department, are now formulating plans for the extension of Massachusetts avenue as ordered by the last session of Congress. Great care is being taken as to the proper grade which should be established. Some work has already been done. The opening of this avenue is greatly needed, and will be the consummation of persistent work, giving direct route from the heart of the city to the University grounds. It comes just in time, as we have not greatly needed it until the present.

New friends are constantly being made for the University, who give evidence of their friendship by generous gifts. Many cheering gifts in various amounts have recently been received. The story of the growth and possibilities of the University appeals to men when they can be induced to take time to listen to it. It has a fascination which wins men. There is nothing more satisfying than to give a gift to a worthy cause—men are casting about to see where the bestowal of the wealth will yield the best returns. These are the days of magnificent giving. A safe and satisfying investment, is to provide equipment for the mental and spiritual training of men for all time to come.

Two Trustees Pass Away.

By an unusual coincidence two members of the Board of Trustees of the American University departed this life on the same day, August 4, 1906, the one, Hon. Norman T. Arnold, at his home "Bonifels," in Ridgway, Pa., and the other, Daniel B. Wesson, at his palatial city home in Springfield, Mass.

NORMAN T. ARNOLD

was forty-nine years of age at the time of his death, but these years were filled with useful deeds which would have brightened a record of three-score and ten. Professing the Christian life at the age of twenty-two, he carried into his career as a lawyer the principles of his religion and into his business life the same vigorous adherence to righteousness. On his time, his counsels, and his means the church and the cause of charity made frequent calls and received helpful response. He delighted and was successful in teaching a senior Bible class. Humble in spirit and simple in his tastes, he was often summoned to positions of honor and trust. He served as a trustee of the University from 1901, filling the vacancy caused by the death of the late ex-Governor Robert E. Pattison. He was deeply interested in the work of the University, and informed himself by careful examination for the expression of intelligent opinions. He lived nobly and died bravely and peacefully.

DANIEL BAIRD WESSON

was a native of Worcester, Mass., and reached the ripe age of eighty-one years. Early in life he showed mechanical and inventive talents of an unusual order, and became so enamored of his work that at the age of eighteen he bought of his father the last three years of his minority for \$150, so that he might join his elder brother, Edwin, in the manufacture of small firearms. He was prominent not only in the development and improvement of the Smith and Wesson revolver, but also contributed much to the perfecting of the Winchester rifle. Mr. Wesson was a man of rugged physical build and of unwearied business industry and moral integrity. The later years of his life were given largely to the personal care of his wife, who was in feeble health, and whose death, occurring only seventeen days before his own, greatly broke his strength and spirit.

They were both connected with the Congregational Church. He was a strong advocate and steady promoter of temperance among his employees and in the community. He has been a trustee of the University since 1892, and gave evidence of his interest in the institution by the gift of \$25,000 soon after the charter was granted. He is survived by two sons and one daughter. He has given to Springfield the Wesson Memorial Hospital and the Wesson Maternity Hospital, leaving by will \$650,000 to these two practical charities, which will most effectually perpetuate his name in their sweet ministries to suffering men and women.

A Socialist College.

This is a late and somewhat significant movement. The Rand School of Social Science has just been opened in New York City with an attendance of ninety. It numbers in its faculty certain Columbia professors who might be in better business. This salt may delay quick decay. The teaching will of course be socialistic. If zeal be tempered with discretion, some good may come of it. The movement is growing too rapidly to be put out of business with a sneer. Some articles in the creed of the Socialist demand patient investigation. The rantings of the demagogue have brought the whole scheme into disrepute. It is not all bad, and if the able men of this faculty shall hold to a sensible middle way, it will do good if it merely disabuses people of crude imaginings about the socialistic movement.

Bequest for Boston University.

Boston Methodism lost a loyal friend and a generous giver when Edward H. Dunn died. He did great things in his lifetime. A large bequest has been made to Boston University.

His will was duly filed in the Probate Court of Boston, and its provisions became known to the public. Many private bequests (aggregating about \$30,000) are made, including one to Harvey N. Shepard, Esq., of Boston, of \$5,000, and one to Bishop John W. Hamilton of \$500. The remainder of the estate is given to the trustees of Boston University, to be disposed of as follows: \$2,500 to the First Methodist Episcopal Church, Temple Street,

Boston, for general current expenses, payable in \$100 quarterly installments until the full amount is paid, without interest; \$50,000 for founding a professorship to perpetuate the memory of the testator's son, and to be called the "Danforth Richardson Dunn professorship;" \$60,000 (or balance of estate if less than that sum) for the general uses of Boston University. Of any balance remaining one-half is to be paid to the Preachers' Aid Society of the New England Conference, and the other half to the New England Deaconess Home, Training School and Hospital in Boston.

Among the minor bequests are \$200 gifts to each of four boys who were named after the testator. Rev. Daniel Dorchester, Jr., D. D., receives his watch and chain. His library and bookcases are given to the Boston School of Theology, and are to be placed in the reception room in that building. The will is dated November 4, 1904.

The Smaller Colleges.

Dartmouth College finds herself in an almost awkward position this fall. She has all at once grown beyond her power of assimilation. A freshman class of 340 men has just entered the institution—a far greater number than ever before—and the authorities are at their wits' ends to take care of them. The dormitories are filled to the brim, and the private houses of the village of Hanover are taxed to their utmost.

Only last June President Tucker told the alumni of the college's need for more dormitories, and declared that Dartmouth's growth was impeded because there were actually not residences enough to provide for new professors and instructors. Now comes this big class of 340, more than 400 per cent. larger than those of only fifteen years ago, to further complicate the situation.

Dartmouth's experience is being matched, in kind, all through the small colleges of the East. Every one of them is growing handsomely, and the sign is an excellent one. It shows that the college training is much more general than a generation or two ago, and that the value of the small college as a peculiarly powerful factor in the making of a man is more thoroughly recognized.

These minor institutions are now almost without exception growing at a more rapid proportional rate than the larger institutions, and the day is not

ar distant when some of them will "catch up," not only in numbers but in all the other essentials that make a college strong. There is room enough and glory enough for them all.

How to Give.

Give until you feel it. The giving of a crust of bread to a passing beggar, which, if it were not so disposed of, would find its way to the refuse heap, is not an act of charity which will count for anything in the enlargement of character. Yet this is the low plane on which many give and miss entirely the joy which might be theirs, wrapped up in the promise "It is more blessed to give than to receive." "The love of Christ constraining" is not only the highest and worthiest motive of Christian service, but of giving as well. To do it for His sake should somehow mean a loss that can be felt; a sacrifice that hurts; a surrender that pinches. To give up some pleasure, that the cost of it may be devoted to some noble work is the only kind of generosity that makes the heart glad and the conscience quiet. The gift need not be large to be worthy, but it should be just a little larger than your need. Again we say give until you feel it. Many gifts of from \$1 to \$5 have come to the University. They were given by those who could illy spare even that amount. It meant a little curtailment in some personal comfort. All honor to such. If the work were not so vast it would be fine to have it built just this way. Better, far better, have ten millions give \$1 each than to have one give \$10,000,000. What a loss of sympathy and prayers this latter plan would mean.

Others out of their abundance have given \$100 to the University, and with that gift have tried to satisfy their conscience. The gift was only a bribe to conscience. It cost nothing and was never felt. It was, of course, thankfully received, but it did not greatly enrich either the treasury of the University or the heart and life of the giver. We are longing and praying for some unexampled illustration of glorious giving; when some man or woman in to whose lap God has poured unmeasured wealth, as a loan for time, shall pour it all into the building and equipment of this superb University, as a gift to God and humanity, for all eternity, and

thus attain immortality on earth as well as in heaven. Such giving is worth while. It means something. Try the practice of giving until you feel it and see what rich new joy will be yours.

Plutoeratic Colleges.

Most of our Methodist Episcopal higher schools need larger endowments than they now possess, and they are not likely ever to get more than they need; but there are certain colleges and universities in this country which have reached, or are fast approaching, the point where they are mere plutocrats. The building of a private fortune by industry and care is a good thing, but when a man's wealth passes a certain sum it becomes a mere burden, or, still worse, a taskmaster. There are colleges which announce yearly the receipt of vast sums of money. They already have their millions of invested funds, and buildings costly and ornate. No institution can do well more than a certain given amount of work. There is a point beyond which if a college grows it is wasting both men and money, and it seems like a shameful mistake to keep pouring gold into the coffers of already plethoric institutions just because the current of giving has set their way. We confidently believe that the smaller colleges in our country are to-day doing vastly better work in turning out really educated men and women than are these so-called great institutions of learning. They do more for their students in the way of drawing out and cultivating their individual powers, and that is education. In the plutocratic colleges the vast enterprises and the high-priced professors and the huge endowments will be impressive, but it is in the smaller Christian institution with fair endowment that the real work for the people is being done.—*Pittsburg Christian Advocate*.

Bishop McCabe was 70 years old on October 11, 1906, the opening day of the North Dakota Conference over which he presided. The Conference made an occasion of it, arranging that President Robertson, of Wesley College, should extend greetings. It was a happy hour. The address was most felicitous. Among other good things said in the greeting is this: "You are suspected of patriotism. Somehow the intimation is abroad that you love the flag and the country over which it waves."

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

MEMORIAL NUMBER.

Our Charlemagne of Song.

1836 CHARLES CARDWELL McCABE. 1906

Of heart and hope and song our Charlemagne,
Urged ever on to help his fellow men,
Rests at the goal of threescore years and ten.
Crown, robe and palm are his; our loss, his gain.
He sang a sweet, strong, buoyant, victor strain;
Aroused and led the church by voice and pen
Rich gifts for Christ to make once and again;
Light, humor, life, he spread amid war's pain:
Enslaved a "Bright Side" while in Libby's gloom,
Made it a servant to his silver tongue,
And turned its glory into golden love.

Goodbye, dear Chaplain. Angels cry: "Make room.
Now comes a soul whose heart has always sung.
Eternal welcome to the choir above."
—ALBERT OSBORN.

Chancellor McCabe.

Twice within four years these ominous black lines have called the eye of readers of the COURIER to loving tribute on the passing of two Chancellors of the American University. We have been strangely and sadly bereft. In May, 1903, after a lingering illness, Bishop Hurst, the founder and first Chancellor of the University, passed on to his reward. In looking for his successor all eyes turned at once to Bishop McCabe, who was the Vice-Chancellor, and who had always manifested great interest in the work. Bishop Hurst himself had chosen him as his successor. He was heard by the writer, on more than one occasion, to say to Bishop McCabe, "Chappie," as he always lovingly called him, "You must take my place when I am gone." For four years he gladly and diligently served as Chancellor. He had abounding faith in the success of the project. He was fettered somewhat by the many obligations he had assumed for other objects before he took the University fully on his heart. He worked faithfully and well and won many friends to the cause. Had he lived he would have succeeded here as he did everywhere else. His slogan, "\$5.00 each from 1,000,000 people" would have roused Protestantism. "The workmen die, but the work goes on." What shall we say of this knightly soul?

He was the most widely known and most ardently loved man in Methodism. It would be impossible to gather together a half dozen well informed Christians in any part of the country without discovering that one or more of them had met and heard Bishop McCabe and spoke of him in loving remembrance.

He traveled more miles and spent more nights in sleeping cars, twice over, than any man ever identified with the official life of the Methodist Episcopal Church.

He has personally secured more money, for a wider range of worthy causes, than any other man in the history of Methodism. He went through the church like a cyclone, shaking the golden fruit from every bough of generosity. He was simply irresistible as a special pleader—no audience could withstand him. His musical voice, in which there was also a touch of pathos; the tender, apt and moving stories gathered out of his wide experience, always swung the crowd his way and gave him what he wanted. Think of what he did—\$100,000 for Ohio Wesleyan University, as a beginning, when only a young man; \$100,000 for the work of the Christian Commission in the dark days of the Civil War; multiplied thousands for Church Extension, until he could sing with fervor and power the glad song, "We are Building Two a Day." Metropolitan Church in our own Washington City, and the church at Salt Lake City, in the heart of Mormonism, saved from the sheriff's hammer, with scores of others not so prominent, through his personal giving and work. A million of increase for missions under his superb leadership. In his great heart was born the battle cry, "One Million for Missions," and the Church came up to the high standard set and then went far beyond. Thousands he collected and gave to South America where his heart seemed oftenest to wander—buying lots and building churches and schools. Japan, China, Alaska, Porto Rico, and many other mission fields were the recipients of the lavish gifts his faith and work made possible. Think of all this prodigious outcome as the result of one man's work. It is unique in Methodist annals. It is a record to make the angels smile. Men and women gave to him because they loved him and believed in him. Such confidence was reposed in him that vast sums were often made available for him, to be used as he deemed wise. He taught men and women all through Methodism how to give and the joy there was in it, who, but for his good influence, might have been close and penurious. For this one thing the Church owes him a great debt of gratitude. He had marvelous faith both in God and in man. If the call for funds was urgent he never hesitated. He borrowed the

money needed on his own note, which was honored in any bank, relieved the need and then pleaded with friends and secured the money to lift the note. This he did hundreds of times. He was always generous with his own funds. No check book was signed more freely. He never asked others to give to a cause to which he himself had not contributed. He headed the list and handsomely too. His heart readily responded to every needy call. It would take volumes to tell of the little, but significant, things that he did. Let one suggestive and typical incident suffice. He was presiding at a colored Methodist Episcopal conference in the South, covering large territory. Investigation revealed the fact that many ministerial changes were needed for the good of the work—pastors had been remaining too long in the same churches, until they had outlived their usefulness. They protested against removal, claiming that on their meagre salaries they could not stand the expense of moving. Bishop McCabe proceeded to make ten changes of pastors and personally paid the moving expenses of all of them.

He was an ardent patriot. No wonder they wrapped the Stars and Stripes about his bier and buried it with him in his grave. He passionately loved his country and was willing to lay down his life for it. In 1862, when freedom was at stake, he left the pulpit, to which he had just been appointed, to become the Chaplain of the 122d Ohio Volunteers. To the soldiers he was an evangel of mercy and an angel of light. He inspired them to holy courage and righteous living. At the battle of Winchester he was taken prisoner and held four months in Libby Prison. Although sick with typhoid fever a share of the time, no happier prisoner ever went into confinement in that grim and ghastly building. Here was a chance for a display of his blessed and abounding optimism. The sick and dying and discouraged needed help. His coming was like a sunrise. Men who were there talk of it to this day. On the wings of holy song he lifted the souls of the dying men to heaven. He cheered the despondent and gave new courage to those who had well-nigh abandoned hope. He wrought a miracle. What Florence Nightingale was in the Crimea, that Chaplain McCabe was in Libby. As the dying soldier crawled to kiss the shadow made by the Angel of the Crimea, as she lovingly passed among them, so dying men in Lib-

by with their latest breath blessed the Chaplain for his goodly offices and smiled upon him until the light of their eyes went out. He made the prison a palace to them. The unusual experiences here gained gave him his greatest power in after-life. He bound them together in that marvelous lecture, "The Bright Side of Life in Libby Prison," which for forty years has been one of the classics of the American platform. It has been delivered more than 1,700 times in every part of the nation, and did more than anything else to widen the good man's acquaintance and power. People never seemed to tire of it and he never seemed to tire in the giving of it. Only a few months ago in New York City he gave it to a \$1,000 house, and the night before he was stricken with death he had given it at Torrington, Connecticut. Its delivery brought him multiplied thousands of dollars, all of which was used in meeting the obligations he had assumed for great Church enterprises, save where the lecture was given gratuitously for the benefit of some needy church. His ardent patriotism and love of country brought him into close touch with many of the nation's leaders. He was on terms of close intimacy with General Grant, President Garfield, President McKinley and President Roosevelt, and frequently consulted with them on matters of highest importance.

He was a matchless orator—not in the finish and literary quality of his sentences, nor in the logical construction of a discourse according to the rules of the books, but in his ability to stir great audiences, to move them at will from laughter to tears, and to win from them absolute acquiescence to the proposition he was advocating, he was without a peer in our Methodism, if not in all the world. The effect of his speech was often electrical. He swayed conferences and vast audiences on great occasions, as storms sway the forests. He was a master when he came to playing upon the harp strings of the human heart.

He was a tireless worker—he never spent an idle moment. His correspondence alone was a man's full work. He tried to keep up with it by working on the train while traveling, and often well into the night. He did not know what rest meant. He was warned by physicians that the pace was killing him. To which he replied, "I must be about my Father's business." He could not say "No" to an

invitation where the need seemed urgent. Advantage was taken of his generosity and his brethren did not spare him, even when they knew he had passed his threescore years and ten and needed to husband his declining strength. Had a little more consideration been shown him, and had he heeded the advice of physicians and friends, he might have been with us ten years longer.

He was happy in his death. We might have wished for consciousness at the end so that such strong and forceful words as he could have uttered should have been left as a legacy to the Church; still, these were not needed. His life for forty years has been an open book, read and known of all men, and what he said and did, for long years to come, will cheer men and women on their way. He died just as he wished to die—in the harness and tugging at the load. He was quickly rushing from one engagement to another when the end came. His eye was undimmed and his natural strength was still unabated. There had been no great perceptible loss of physical or mental powers. Nearly all his plans had been gloriously carried out, and without pain he gently fell on sleep. His faithful wife, for whom he first called when stricken, sat by his side reluctant to let him go, yet ready to submit without murmur to the will of God. Their married life was ideal. She has been remembered in the prayers of the entire church. I am sad and lonely when I think I shall never look on that kindly face again, nor hear that musical voice in holy song or exhortation. His face was a benediction, and from his deep-set, wonderful eyes, which once seen could never be forgotten, looked a tender and loving heart. He has earned the rest of Heaven. He will need no costly monument to record his deeds or to give immortality to his fame. It will be enough that on the polished surface of the marble shaft which will mark the spot where he rests, shall be inscribed the significant name, "Chaplain McCabe." That was his love name, and so the people knew him and called him, even after he had been elected to the bishopric. He built his monument in human hearts. His name will live on the lips of men for a thousand years, and in the far-off judgment "many shall rise up and call him blessed."

A Memorial to Chancellor McCabe.

The voice which pleaded for others is hushed. Thousands have been the recipients of his benefactions. He is held in loving remembrance by vast multitudes, who would rejoice to find some substantial way in which to manifest their appreciation of what he did for them, and to keep his name alive in the memory of men. Tombstones crumble and are but the decaying decorations of the graveyard. The names of John Harvard and Stephen Girard would long since have been obsolete but for the great institutions of learning which bear their name.

The church owes a debt of gratitude to Bishop McCabe which it can never fully repay. What form shall his memorial take? Could he speak from the skies and were our ears attuned to the interpreting of angels' speech, he would say "let a building in the plan of the American University bear my name, where for all the years to come men and women shall be trained and equipped to fight life's battles and leave their impress on their age. To this great work I pledged my loyalty and love, and planned to give my later years unremittingly to this cause, until the dream of its great founder had been realized." This was his thought on earth so often expressed to friends, and is still his thought in heaven. Thus he would speak could we but hear him.

Shall not his legion of loving friends make possible at once this worthy and significant memorial—a

stately marble building from whose halls trained students shall go out to bless the world? Let the contributions, large or small, begin to flow. Let all who have been helped by the supreme faith and enthusiasm of this prince among men have some share in this memorial which love shall build. Make checks payable to the American University and send to 1419 F St. N. W., Washington, D. C. Gifts will be acknowledged by receipts and printed in the COURIER.

Winter Trustees' Meeting.

The semi-annual meeting of the Board of Trustees of the American University, which was recently held in Washington City, was unusually well attended by members of that body from various parts of the country, including the Vice-President of the United States, Charles W. Fairbanks, and Senator J. P. Dolliver, of Iowa, both of whom took large part in the meeting and pledged themselves to loyalty to the cause in which they are so deeply interested. The only shadow on the hour was the distressing news which had come concerning the beloved Chancellor, Bishop C. C. McCabe. A telegram of sympathy was sent and prayer was offered for his recovery.

Appropriate resolutions were passed bearing on the death of two prominent Trustees, Daniel B. Wesson, of Massachusetts, and Norman T. Arnold, of Pennsylvania. The Rev. Dr. W. R. Wedderspoon, of Pittsburg, was elected to membership on the Board of Trustees. Gratifying progress is being made in the erection of the imposing new building, the College of Government, which is now going under roof. The opening and grading of Massachusetts avenue by Congressional enactment, to the grounds of the University, was also the subject of congratulation.

The present officers of the University were all re-elected for the ensuing year. A number of new gifts were reported. Those in attendance were: Vice-President Charles W. Fairbanks, Senator J. P. Dolliver, of Iowa; Bishop Earl Cranston, of Washington; Rev. Dr. Charles W. Baldwin, of Baltimore; Rev. Dr. David H. Carroll, of Baltimore; Rev. Dr. J. G. Bickerton, of Philadelphia; Rev. Dr. T. N. Boyle, of Pittsburg; Rev. Dr. J. Wesley Hill, of Brooklyn; C. Price Speer, of Chambersburg; Judge Thomas H. Anderson, C. C. Glover, A. B. Browne, B. F. Leighton, Thomas W. Smith, G. W. F. Swartzell, John E. Herrell, of Washington; Rev. Dr. J. A. Gutteridge, Financial Secretary; Rev. Dr. J. B. Polsgrove, of Carlisle, and Rev. Albert Osborn, Registrar.

Rev. Dr. W. L. Davidson, the University Secretary, was absent through illness. Resolutions of sympathy were sent by special committee to his home.

Choice Tributes to Bishop McCabe.

The most human of men.—*Morton C. Hartzell.*

* * *

It was a sermon to look at him.—*Dr. Frederick Sheets.*

* * *

A heroic character, a spiritual statesman.—*Dr. J. P. Brush,ingham.*

* * *

The "Great Heart" of Methodism.—*Dr. Edwin Locke,Topeka.*

* * *

Prince of God and brother to every man.—*E. E. Shafer, Dakota City, Neb.*

* * *

The Joshua of our modern Israel's host.—*Dr. Jesse W. Jennings, Omaha, Neb.*

* * *

He blessed not only our communion, but our common Christianity.—*Dr. Robert E. Jones, Southwestern Christian Advocate.*

* * *

There was contagion in his faith. And there was good cheer in it and hope.—*Dr. George B. Winton, The Christian Advocate (Nashville.)*

* * *

The most militant Methodist of this generation—a man of mighty faith, of jubilant enthusiasm and of tireless energy.—*Dr. Nathaniel Laccock, St. Louis.*

* * *

He had the love of John, the faith of James, impulsive as Peter, with the endurance of Paul. A spiritual dynamo.—*Dr. J. J. Bentley, St. Joseph, Mo.*

* * *

As brave and fearless as the Chevalier Bayard and as tenderly sympathetic, generous and self-denying as Sir Phillip Sidney.—*Bishop Willard F. Mallalien.*

* * *

A plumed and valorous warrior of the cross, a glorious defender of the church, a knight indeed of the order of faith, love, and all abounding joy.—*Dr. Liston H. Pearce, Baltimore Methodist.*

* * *

He was brimful of life; if he had not overflowed so readily he would have been dangerously full. . . . The great deeps of his nature were rich in fathomless kindness.—*Dr. Charles J. Little.*

* * *

He brought the world on his heart, and he put it on the hearts of the preachers as perhaps no man ever did in connection with our Methodism or any other church.—*Bishop John M. Walden.*

* * *

A dauntless leader of men in war and in peace, a churchman and bishop without a peer, a magazine of energy, a reservoir of love, a fountain of inspiration.—*Dr. James M. King, Philadelphia.*

* * *

His love of country was an absolute passion with him. With equal intensity he loved his church. His devotion both to country and church was tremendously whole-hearted.—*Bishop William F. McDowell.*

* * *

The great office which he held, far from removing him from sympathy with the lowly, served to bring him more than ever in debt to the humble and the helpless.—*Dr. John D. Hammond, Methodist Episcopal Church South.*

As Chancellor of a great University in prospectu he gave the impression not so much of the demand for scholarship as the need of such an institution to make strong a great Church.—*Dr. John M. Moore, Nashville, Tenn.*

* * *

MCCabe saw that the world's woes would all be healed by the gospel—the gospel and the outcome of it, American ways, American customs, and American arms. And so he stood forth, seeing world-wide.—*Bishop Henry W. Warren.*

* * *

He cheered and comforted his comrades in Libby prison, sang himself into millions of hearts in peace, built churches from Cape Horn to Alaska, and on this his first Christmas in heaven is doubtless walking around with Bishop William Taylor, singing one of Charles Wesley's hymns.—*St. Louis Christian Advocate.*

* * *

There is an optimism of temperament; there is an optimism also of faith. Bishop McCabe was an optimist both by temperament and by faith. . . . In his genial presence sordidness was ashamed. Rich and poor alike met his appeals with generous devotion.—*Dr. David D. Thompson, Northwestern Christian Advocate.*

* * *

In his life so affluent in sympathy and helpfulness, he entered into the sorrows of others, ministered to the needy, aided the struggling and abounded in good cheer. His unaffected simplicity of manner and speech, and spontaneous consideration of others, gave a wellnigh resistless charm to his life.—*Dr. J. G. Bickerton, Philadelphia Preachers' Meeting.*

* * *

How the strong adjectives clamor for a place in the eulogy we pronounce over our departed friend. He was a manly and holy man, sincere, versatile, impulsive, ardent, enthusiastic, sympathetic, cheerful, affectionate, magnetic, outspoken, loyal, brilliant, courageous, persistent, and always lovable. Our dear McCabe was a sort of incarnate Christmas.—*Bishop John H. Vincent.*

* * *

His big heart and breezy Western spirit might make short work with inconvenient forms or precise technicalities, but they stood him in good stead for affecting helpfully and powerfully the souls of those about him. Probably no one in this generation has done as much to promote systematic beneficence in the church, both by precept and example, as Bishop McCabe.—*Zion's Herald.*

* * *

No biographer in a hundred years could gather up for the register of words and deeds the thick strewn acts of service, the apt sayings, the timely songs, the imperious commands, the pathetic pleadings, the thrilling appeals, those unheralded and unrecorded manifestations of light and heat in a great heart, whose fires never burned low.—*New York Methodist Preachers' Meeting.*

* * *

A strange composite was he of absolute conservatism on the one hand, and of triumphant radicalism on the other. O matchless leader, shall we never hear thy magic voice that was as potent to smite the hearts of men until they poured out penitential sorrow as to smite the greed and selfishness of men until they poured out streams of benefaction for the good of the world?—*Bishop David H. Moore.*

* * *

After he became a bishop he did not care so much for a seat in the war council or board of strategy as for a place on the firing line. He did not write many books, but he wrote a lot of checks. His check book would tell the most remarkable tale of ministerial benevolence our country has known. He was not always careful to save the law, but always eager to save the world.—*Bishop William F. McDowell.*

The Bishop's endowments were traceable largely to his Celtic ancestry; his impulsive energy, his ardent love for home and friends and fellowmen; the optimism which glorified all that he did. His way of working was characterized by intuition rather than logic; by a genius for work; by magnanimous bravery, which gave him courage to speak his convictions anywhere.—*Bishop Edward G. Andrews.*

* * *

His passion for directness and dispatch was born out of his intense desire to serve God and his church in the saving of men. . . . His heart was attuned to tenderness, and his speech carried marvellous persuasiveness. . . . Glorious optimist, heroic leader, masterful pleader, invincible champion, evangel, patriot, philanthropist, Christian, with heart for every cry of want and courage for every conflict.—*Bishop Earl Cranston.*

* * *

He knew more people, was known to more people, and had more friends than any man in the country of any calling. He was unquestionably the most personally popular man in the church. His singleness of purpose, deep devotion, intense earnestness, transparent simplicity and sincerity, cheerful optimism, marked ability and great warm heart made him the unequalled leader.—*Dr. Charles W. Smith, Pittsburg Christian Advocate*

* * *

If any man had the right to say, My one ambition is to serve God and my fellowmen, he was that man. He was an inspiration, find him where you might by day or by night. His delight was to do the will of his Master. . . . He was a many-sided man. His great, warm heart responded to every claim made upon his generosity, and his catholic spirit made him every man's friend.—*Dr. S. W. Thomas, Philadelphia Methodist.*

* * *

In Bishop McCabe we had the gospel preacher, the magnetic platform orator, the rapturous singer, the fervid evangelist, the missionary leader of world-wide vision, the peerless financier, and the dauntless advocate of the most ambitious educational enterprise in the history of our church. It is given unto some men to possess some of these talents, but to our fallen leader were given all these in remarkable measure.—*Bishop Joseph F. Berry.*

* * *

He was a lover, to his nation gave
A lover's heart, the bravest of the brave;
Followed her flag with prayer through shot and shell,
For her laid down in Libby's reeking cell;
Then, through the years of peace spread far abroad
The sweet love story of the Son of God;
Carry the form, the clay, the casket by,
The lovers of mankind can never die

—*Rev. Alfred J. Hough, Groton, Vt.*

* * *

It has been a quality of the South that it could bear the truth of the darker days of its history told when the story was set in the speech of utter frankness and justice, and this was done by the Libby prisoner. After he became a Bishop in the Church, his ecclesiastical duties brought him still nearer to us, and we came to know the warmth and genuineness of his nature, and found them to be beyond even the careful guess we had ventured.—*Dr. H. M. DuBose, The Epworth Era.*

* * *

He was gifted with the genuine hortatory function, the way from his tongue to the heart of his hearers being a simple, straightforward path which his picturesque, arousing, and fervid words well knew how to take. Along with this gift went also the endowment of humor, keen, delightful and irresistible, as well as a penetrating insight into human nature and a personal experience in faith and prayer,

whereby he was brought into alliance with both heavenly and earthly powers. *Dr. Jesse Bowman Young, in Christian Advocate (Nashville.)*

* * *

A great and good man. . . . He knew men, and knew how to rule and govern them. . . . He was an intense American, and believed that this land of ours is better than any other land beneath the sun, and that the Methodist Church is the best church going, and was never afraid to say so. Of course, he loved all the churches; he was too big and broad to do otherwise. But he loved the Methodist Church as the very breath of his nostrils and bride of his soul. . . . God's own apostle of sunshine and song, hail and farewell.—*General James F. Rusling, Trenton, N. J.*

* * *

A revolving light on the coast of Methodism has been extinguished. . . . He was so unlike any of the rest of us that we are without a unit of measurement. Perhaps it is not too much to say that he had more and greater gifts than any man in the church at this time. . . . He had this peculiarity, that whenever he touched a great cause it adhered to him and did not escape from his heart. . . . Carrying all the great interests with which he had been identified, he seemed like a pack-horse whose load almost concealed his presence, and yet he moved like a racer, hardly touching the ground in his speed.—*Bishop Charles H. Fowler.*

* * *

His joyous, musical temperament, his intense loyalty to his country and to the kingdom of God, his warm sympathetic heart, his quick and luminous wit, his optimistic vision, his torrent of good feeling, made up a personality which was unique and powerful. . . . The man in the song, behind the secretary, clothed in the functions of the Bishop, was always dominant. . . . He broke down and broke through all conventionalities when they seemed to bind his restless, aggressive spirit. . . . His leadership like his faith was impatient of delay, impetuous and almost audacious. . . . He was concrete sympathy, energy, and enthusiasm.—*Dr. Freeman D. Board, California Christian Advocate.*

* * *

One of the most versatile of men, of a stamp peculiar to himself—a variety that we might well pray to have oftener repeated. . . . He was the Prince Rupert and the Phil Sheridan of the Church cohorts, and his verve and brilliant leadership never failed him. . . . Like Roosevelt in the nation, he made himself felt continually. . . . His comradeship was an inspiration—his good spirits and his fund of anecdotes making the life of any company. There was in him a certain overflowing vitality and irrepressibility which overleaped conventionalities of routine. . . . He spent his life in exhausting labors for the kingdom—for the sake of Jesus and humanity.—*Dr. Levi Gilbert, Western Christian Advocate.*

* * *

He had, among other great gifts, that which one so seldom finds in this tired age, the enthusiasm of Christianity. His face alone was a benediction. Wherever he went he seemed to make all things new. In his presence faith in human nature revived and the atmosphere above him became fragrant with hope. . . . Men tell us that Jesus Christ passed away nineteen centuries ago and has never returned. Yes, but here was one of his beacon lights, standing on a headland far away from Palestine, and in a distant age, yet illumined by the electric stream of that great dynamo which passes, invisible to baser minds, through the ground and overhead, until it finds some sympathetic point from which to irradiate the darkness of material civilization.—*Bishop Alexander Mackay-Smith, Philadelphia.*

* * *

A remarkable life has closed. It stands without a parallel in the history of the Methodist Episcopal Church, rich in

life-treasures as that history is. Many men have risen to places of distinction and power among us, but none other has held the peculiar place in popular affection which he enjoyed for many years.

Whatever he did was done with the whole heart, mind, soul and strength. The passion for service possessed him. . . . He was an apostle of optimism. . . . Surcharged with a happy earnestness, the fire of his enthusiasm passed quickly from heart to heart, and burned its way from soul to soul. . . . He was a leader who always led. His place was on the firing line. . . . His clarion call was always heard where the fighting was hardest. . . . Radiant in his optimism; contagious in his cheerfulness; compelling in his gentility; in active sympathy with every phase of the work of the ministry; with an ardent love for the church, and an intense devotion to its interests; with a burning enthusiasm for the work of evangelism, and a whole-hearted and invincible confidence in the efficiency of Methodism to perform this royal service, and with a purpose to do for every man and for every church the best that could be done—these and many other qualities of heart and mind enshrined him in the hearts of the brethren.—*Dr. Stephen J. Herben, The Epworth Herald.*

* * *

He was every inch a soldier. To the people of this nation in recent years he came to represent more than any other man the memories and patriotism of the war. He pervaded the whole land with his presence and his lecture, as neither Gough nor Beecher ever did with any single lecture of theirs. No better evangelist of patriotism has come up and down kindling the fires of pure and radiant devotion. Bishop McCabe was an orator, one of the most victorious and irresistible. As by hypnotism his voice subdued men to his will. He was a magician with an audience. As the magician goes up and down the aisles, taking out of the coats the things that people did not know were there, so this man could go through his congregation and gather out of pockets and strong boxes resources that they hardly knew they had at all until he took them out of their pockets and put them into his. . . . He was himself a great lover, and love begets love. He was a multi-millionaire measured by the number he loved and was loved by. . . . A happy and fortunate man in his life and in his death. . . . High up there the nation sees the name Chaplain McCabe, identified with the liberties of the nation and with the story of patriotism in the land. Happy in the church in the range of his usefulness, in the variety and length of his services, in the number of various offices he filled, in the efficiency of the whole, the large and splendid efficiency with which he filled them; in the fact that his name stands in the great line of the noble men who have won Episcopal honors and rendered Episcopal service in this Methodist Church. . . . Happy in his death! Is it not fit that the soldier should drop in the ranks, rushing from one engagement to the next, and that the last vehicle that he rode in should be the ambulance that picked him up where he dropped and took him to the hospital? Happy in his death! Brief was the twilight. . . . Peace after battle. Peace after the long march. Peace after the charge, for his life from first to last was like the charge, always for some great cause, always for humanity's sake, a charge from one engagement to the next; a charge it was. The finished charge, and all is peace.—*Dr. William F. Kelley, New York.*

* * *

Napoleonic in his power of rapid movement and kindling enthusiasm, but by no means deficient in tactics. . . . His conversational powers were unusual. He was ever buoyant and humorous, and a perfect illustration of the meaning of the phrase "warm hearted." He was almost destructively frank. . . . He was always luminous. Every one knew what he meant. In business meetings he spoke little and abhorred many speeches and long debates. Whenever he rose in such bodies as the General Missionary Committee, all the members and spectators were alert, for none could forecast what he would say. In him were blended the spirit of the poet, and a gift for short cut logic. His short cut logic had the effect of wit, but was not wit. . . . His

tact in meeting every sudden emergency was only equaled by his ability to state an old truth in a new way. . . .

A witicism and shrewd statement, a sudden shot as from a bow, an appeal for the underlying feeling for his cause, or, last but not least, a song, have been known to carry the ecclesiastical ship from its moorings, or at least from the course that the captain and pilot had planned. But his greatest power was the confidence felt that he would do anything for his cause and that he loved his church with his whole heart. . . . Judged by the whole results of his work as a bishop, he was in a marked degree successful. . . . His kindness of spirit was the chief sign by which he conquered. . . .

In the making of appointments his insight in many instances did the work of the highest reflective statesmanship. . . . Bishop McCabe was an excellent accountant and a very accurate business man. For accuracy in accounts he had no superior and few peers. Every dollar that was given to him personally for the many causes that he espoused was accounted for to those who gave the money. . . . The pathetic and moving eloquence of Simpson never produced greater effects than did sometimes the intimate but not familiar, the natural but not uncultivated, manner of Bishop McCabe. His ability to cause the audience to see the scene he described was unparalleled. . . . To his other gifts must be added an intuitive knowledge of human nature. . . .

When his soul was moved his voice caused his speech to resemble a song, and when he was singing, the staccato notes of the same wonderful instrument seemed like a musical declamation assimilating musical sounds as nearly as possible to ordinary speech.—*Dr. James M. Buckley, The Christian Advocate.*

* * *

The sweet singer of our Israel, our Navarre, our evangelist, our princely giver and our incomparable inspirational leader.

. . . Dearly, dearly is this bond-slave of Jesus Christ beloved; always the sweet and silent benefactor; always the cheery optimist; always the hero; always dauntless before any discouragement—how many lives have his words and his songs touched to tears, to new hope, to invincible fidelity, and integrity! Never was a man in Methodism so loved. There have been others who possessed the gift in a remarkable degree, but with Charles C. McCabe it was a gift beyond measure. . . . His life had its minor chords that sounded at times to the favored few; but we at all times detected their echo in the tones with which he strengthened his brethren and lifted for others the hands and the hearts that hung heavily down. He believed in the "bright side" of things, and of that "bright side" he spoke, preached, sang, and it was counted of him for strength in that he confirmed the faith of others—the faith that not only believes, but acts as if it believed—the faith that sacrifices, lives, hopes, and awaits the glorious outcome. . . .

Being a true patriot, he laid up the trophies of war when the war was over. He loved his Southern brethren. He loved those who had fought him. He was a patriot who could pay the highest tribute to the valor of those who wore the gray. He had no scars. His extended hands held branches of concord. . . . He was after goals too much to always stop to calculate the rules of the game. He was fair. But he wanted to go. He had been a soldier. He wanted to march, and for the Captain of his salvation he wanted to march at double-quick step. . . . It was in his brain a possibility that, barring and interfering with no other institution in the church, the American University at Washington, with all the scientific and library and human resources of the Capital, would rise the sublime dome over all the pillars in which our educational system, in its individual colleges and universities, would be correlated and unified. . . .

So long as rivers run to the sea, so long as tides seek the shores, so long as mankind shall cherish what is generous, courageous, self-forgetful, faithful in character, so long as men love the gospel message and the gospel song, so long will men be glad that at the age of fifty-nine Charles C. McCabe was chosen and consecrated a bishop of the Methodist Episcopal Church. His name shines with a soft but perpetual light as the Master walks by.—*Dr. Claudius B. Spencer, The Central Christian Advocate.*

THE UNIVERSITY COURIER.

FORM OF WILL FOR

THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Officers of the American University.

A New Putting of an Old Argument.

Honorable John Barrett, who has been the representative of the United States in several of the South American republics, and who is now the Director of the Bureau of American Republics, and who is manifesting deep interest in the aggressive work now being put forth by the George Washington University in Washington city toward its enlargement, was recently interviewed by a reporter of the *Washington Post*. He spoke strongly and wisely as to the necessity of a great and commanding university at the nation's capital. He advanced, to this end, many of the arguments which, time after time, have been used in the columns of the *Courier* and in public speech the country over, concerning the aims and objects contemplated by the American University. Mr. Barrett gave such clear and definite statements to these important matters that we feel like quoting in detail what he said and then commenting on the same. Mr. Barrett said:

"It is remarkable, in view of the present movement to promote the interests of George Washington University, that everywhere in foreign lands I have heard surprise expressed that there was no great national university in the capital of the United States. We have little idea how well known this city is among foreign peoples. In many parts of the world where the names of New York, Boston, and Chicago are never spoken, there is knowledge of the Capital City named after the first great man of this country.

"The name of George Washington is one with which to conjure in all portions of the world. It carries a magical significance not only in Japan and India, but in Africa and South America.

"If once I have heard a foreign king, prince, or potentate express the opinion that education and civilization in the United States should reach its highest point of consummation in the city of Washington, I have heard it said a score of times. Were you to travel around the world and ask the leading men of foreign nations where they would expect to find the greatest university in North America, they would say that would surely be in this city."

How true this is. The capital of a country is always the place for a great university. It is so in the capitals of Europe. Why not in the capital of our country? Here where our civil and political power centers. Here where the heart throbs of the

nation are felt. In this capital which is destined to be, if it is not already, the most beautiful and attractive capital of any nation on the globe. More men well known in the realm of science and literature can here be gathered together instantly than in any other city of the world. There is no other city where can be found so much in the way of helps toward higher education. The great Government collections now open to students have cost the Government nearly \$60,000,000, and more than \$8,000,000 are annually expended in enlargement and maintenance. This all becomes the actual assets of a great university doing business at the nation's capital, and it is not strange that the leading men of foreign nations, in looking for a great American university, should expect to find it in the capital city of America. This expectation is humorously and more fully emphasized in a further incident which Mr. Barrett relates:

"How vividly do I remember that one of the leading princes of India, during the time I was attending the great Durbar at Delhi, in the winter of 1902-3, asked me about Harvard University, and remarked that he intended to send one of his sons there in order to get the advantages of a university that was located in the capital of the United States! The one institution of learning associated with America of which he had heard was Harvard, and the one city that he recognized as typical of our culture was Washington. He consequently assumed that Harvard was here. When I told him that it was located near Boston, several hundred miles from Washington, he expressed surprise and doubt as to whether, after all, he would send his son to Harvard. This is not told as any reflection on Boston, but as showing what is expected of the national capital."

As to the expectation of finding such a university at the nation's capital, Mr. Barrett further says:

"All over South America, which is famed for its devotion to education, the great universities are located in the national capital, and during my stay as United States Minister in this part of the world, I repeatedly was asked by representative men why it was that Washington, the Capital City of the United States, with all its unequalled advantages, did not have a national university that would attract students from all over the world. It was impossible, in short, for these men to conceive how the American people had neglected such a splendid opportunity. More than once, moreover, I was reminded by South American students of our early history that George Washington, in his will, had provided for such an institution, and they thought it strange

that our people had never carried to completion the mighty conception of our Liberator."

The autograph letter in which George Washington, the far-seeing prophet, pleaded for the establishment of a great university in Washington, giving his reasons for the same, and in which he made promise of the gift here referred to, for the establishment of such a university, is now in the possession of the American University. It was purchased by Secretary Davidson at the sale of the Hurst library for \$165, and is one of the treasures which is guarded with jealous care. This letter is the genesis of the American University. It was written to Governor Brooke, of Virginia, one hundred and twelve years ago, and up to the present time its advice has been unheeded by the people of this great republic. Our Roman Catholic friends have been doing their part splendidly and have been building largely and well. The Columbian University, and later the George Washington University, have been doing a needed and helpful work. But the great university contemplated by George Washington is something more and greater than these. It should be a university exclusively for post graduate work to take advantage of the unrivaled facilities in the governmental collections referred to above, and to utilize so far as possible the splendid capabilities of the great men along every line, who are available for service in this capital city. To this end a campus of ninety-three acres, comprising the most beautiful and commanding site in the District of Columbia, has been purchased and paid for by the citizens of Washington. One magnificent marble building has been completed and is ready for occupancy; a second marble building is under roof; and assets to the extent of two million dollars have been accumulated since the inception of the work. The Board of Trustees, comprising representatives of the leading religious denominations, includes some of the best men in the nation. The entire country has been appealed to for assistance to establish in the name of Americanism, here at the nation's capital, a true and great university which will be an honor to the Republic and as great an institution in every sense of the word as can be found on the face of the earth.

Mr. Barrett further says, in relation to the attractiveness of such a university to foreign students:

"Again in China I heard more than one man, who stood for the highest thought in Asia, express profound astonishment

that our National Capital did not have in its limits a great national institution of learning, which would invite graduate students from all over the earth. Both from what these Chinese gentlemen said and from the remarks of the statesmen of South America and India, I gathered the impression that hundreds of young foreigners would attend such a university if it were located in the capital city of a country which to them typified modern and successful progress in education, as well as in material accomplishment.

"I venture to say, therefore, that were George Washington University to-day an institution known far and wide, it would have among its many thousands of students no small proportion from Asia, South America, Europe, and Australia. What better influence could there be to strengthen our prestige and standing abroad than to have in attendance at George Washington University representative young men from all the leading countries of the world, and especially from those which are looking to us to set an example?"

To this fact we have frequently given emphasis. There are already on file in the office of the American University applications from more than fifteen hundred students, many of them from foreign countries, desiring to know if the University is open for graduate work and expressing a desire to pursue their studies at the capital of this nation. Our successful experiments in government have attracted the attention of the whole world, and foreign students of culture are anxious to make close study of our methods and find the reasons for our greatness. They can best do it at the center of things, and there is no question but that thousands of foreign students would be attracted to a commanding university at the national capital. It is also a fact that probably fifteen thousand American students are at present pursuing post graduate work, and many of them are in the universities abroad simply because they cannot find what they want in the universities of their own country. Many of course would still go abroad for the sake of language and art, but the vast multitude would stay at home if they could find the work and training they want on this side of the sea. Some are attempting post graduate work in American institutions which are hardly doing creditable collegiate work. The small college has its place and is doing a magnificent work. The universities with exceptional and extensive courses and fine appliances and other opportunities in some lines for graduate work, are also doing a magnificent work. Millions of treasure in these later days are being poured into their enlargement by men and women of heart and wealth, but the commanding American University is still to be built, one that shall stand for that which is highest and best in education and which in its equipment and faculty shall not be excelled by anything in the

world, and the place for its building, without any question, is here at the capital of the nation. Why some of our large-hearted philanthropists do not become so consumed with the need and the real worth of this movement and link their names with it for all time to come, passes all comprehension. Will not someone hear the call and see the possibilities of a glorious harvest, and add the amount of endowment needed to make possible the immediate opening of this great work which has already achieved such successes and which promises so much for the future?

George Washington University in Transit.

Before erecting any buildings upon the five acres of the Van Ness Estate, purchased a few years ago for a new site, the George Washington University has recently sold this fine tract near the Potomac to the United States Government for \$250,000. On it is to be placed the Bureau of American Republics, whose building has been provided for by the gift of \$750,000 from Andrew Carnegie. To secure room for such expansion as President Needham desires, he and his trustees have turned their eyes away from the plains to the hills in search for another and ampler site than the one just sold. "Oak Lawn," owned by the Dean Estate, at the northeast corner of Connecticut and Florida Avenues, is favored by many; but some think it too small—its area being about nine acres—while the cost would be about \$800,000—or \$90,000 an acre. Meanwhile a quiet search is in progress for other available and suitable sites.

The quest for money to purchase a site has been an earnest and systematic one, in which President Needham and the faculty, the trustees and the students, the alumni and the citizens of Washington have cooperated vigorously for several weeks. Subscriptions payable in three annual installments have been secured, amounting to about \$140,000, towards a total of \$400,000 announced as needed, in addition to the funds produced by the sale of the former site and some special conditional subscriptions.

We offer our congratulations upon the evident decision to come up to higher ground, for we never thought well of the Van Ness property as the habitat of a university seeking the higher planes. Upon

those who must decide where to locate the institution, now that it has no adequate site, has come a difficult problem. On the one hand is the pressing need to hold or increase the present numbers of the student body accustomed to and in a measure dependent upon the easy access furnished by the central location in the city; and on the other is the beckoning arm of the ever growing capital calling to the outskirts of the city as the vantage ground of the future, supplying the space for growth and the healthful air of the hills. We hope that those who are directing the flight of the George Washington University in its present interesting phase of *in transitu* may find a safe and permanent resting place; and we would not be displeased to find it a neighbor to ourselves on the Northwest Heights. Success, Doctor Needham, to you and your many helpers!

National Educational Association.

Los Angeles expects over 30,000 visitors to the National Educational Association Convention, which is to be held in that city July 8th to 13th of this year. Elaborate preparations are being made for the entertainment of the excursionists, not only by Los Angeles but by nearly every community in the State. The trains will be met at the State line by members of the Reception Committee, who will greet the visitors with California fruits and flowers. The railroads have made exceedingly low rates. From Chicago and intermediate points the rate will be one fare plus \$2.00 for the round-trip. In the State the rate for California side-trips will be one and one-third fares for the round-trip from Los Angeles and San Francisco to interior points of the State. Stop-overs will be granted at any point enroute. These tickets will be sold to the excursionists and any friends accompanying them. California has become the all-the-year-round playground of America. The beach and summer resorts, with their unexcelled hotels, will offer an inducement to the excursionists to make this trip their summer outing, as the tickets are good for final return until September 15th. Los Angeles is the center of an electric railway system of nearly 700 miles of inter-urban and 175 miles in the city, which gives cheap and easy transportation to the resorts of Southern California.

At the Convention, the principal addresses will be made by some of the most distinguished scholars of Europe and America.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

The last Congress made generous appropriations for Massachusetts avenue, and its opening to the grounds of the University. This will be of immense value to the Institution. The entire frontage on Nebraska Avenue has had electric light service installed by the District authorities.

LET all subscriptions to the American University be promptly paid; many are now overdue. This is the case especially with many made to the College of Government, the building now in process of erection. Every dollar promised is needed to meet the monthly payments due the contractors. Do not delay but send what you owe at once. It will greatly help just now.

It has been decided that the next General Conference of the Methodist Episcopal Church, meeting in May, 1908, will be held in Baltimore. This seems most fitting—the city is beautiful and Methodism is here strongly entrenched. Many unique historic events in connection with Methodism took place in and near this city. A strong committee of influential men are already at work preparing for the Conference. The proper care of the colored delegates is one of the largest problems which confronts them. Washington will, of course, be visited by

every delegate. We shall put the American University into readiness to receive our guests, and trust that every attendant upon the great Conference will come and look us over; you will be given a cordial welcome.

The College of Government is advancing rapidly. The pleasant spring days make active work a possibility. The roof is now being put on and the beautiful and attractive building is taking to itself form. Architecturally it will be one of the most attractive structures in the city of Washington where beautiful buildings are so numerous. All who see it express admiration and delight with it. Not later than the first of July the exterior will be entirely completed. \$100,000 will be needed to finish the building. Some subscriptions have already been made toward this, others are needed. This is to be a memorial building to President McKinley. The great marble pedestal has just been put in place, on which his statue is to stand. This will be the most appropriate and significant memorial erected to the martyred president. His friends and the friends of higher education throughout the Union should have some share in the building of this memorial, and subscriptions in any amount will be gladly received.

MEMBERS of the Washington Conference of the Methodist Episcopal Church, and friends, to the number of one hundred and fifty, on the invitation of Secretary Davidson, visited the grounds of the American University, on the afternoon of March 30th, the Conference at that time being in session in Washington city. Two special cars were chartered for the occasion. The day was perfect and the visit a memorable one. The buildings were inspected, and the entire company stood on the roof of the College of History and feasted their eyes on the magnificent landscape which is visible from this point. A pause was made in the large lecture hall of this building and a brief, but impressive, service was held. All joined heartily in singing "My Country, 'Tis of Thee," after which prayer was offered by Rev. D. W. Hays, followed by a brief address by Secretary Davidson, outlining the plans,

and aims of the University. The visitors manifested much interest in the mammoth Peate reflecting lens which is awaiting mounting; the growing library with its 15,000 volumes; the bust of General John A. Logan; and the wardrobe of the historian Bancroft, which is one of the treasures of the University. A matter of special interest to this company, however, was the table and chairs once belonging to Senator Charles Sumner. The afternoon was delightfully spent and will not be soon forgotten by those who made the trip.

Bishop FitzGerald's Translation.

Unusual pathos attends the recent death of Bishop James N. FitzGerald at Hong-Kong. Having attended the Jubilee of missions in India at the close of 1906, he had officially visited and inspected the Methodist Episcopal missions of that country, when, on his way to Malaysia and China, his daughter, Cornelia, suddenly died on March 1st, at the island of Penang in the Straits Settlements. With his invalid wife, a surviving daughter, and his son Ray, who is blind, he was preparing to embark for America by way of the Pacific, bringing the precious dust of the departed daughter for sepulture in the home land, when he himself sickened and succumbed to an acute attack of pleurisy, a month after Cornelia's decease. The whole church laments this loss of one of her most talented and faithful sons, while a multitude of friends in and about New York, Minneapolis and St. Louis feel this stroke with singular keenness. He brought to the Episcopal station and office a well-balanced personality, a trained mind specially well versed in the law and informed on the various missionary enterprises of Christendom, and a high consecration to a life of service. A lofty ideal marked his administration both in the clear grasp and in the courageous utterance of truth. His impress is upon thousands to whom he ministered in the spirit of his Master. His going leaves upon his colleagues grave responsibilities whose added weight will be felt by minds and hearts already too heavily burdened until the choosing of more bishops a year hence shall bring them relief. To the honored names of Kingsley and Wiley, who died while on Episcopal tours in the Orient, is now attached that of FitzGerald.

The Memorial to Chancellor McCabe.

The earnest call for this memorial, which was made in the last issue of the COURIER, has met with some response. A few of the papers of the church made generous reference to it. A number of letters have passed between the University office and interested friends concerning the form the memorial should take. Many suggestions have been offered. None of these seem more feasible or appropriate than that before proposed—a building which shall cost \$100,000, to bear the name of the honored and beloved Bishop—who did so much for others and who should not quickly be forgotten. This is a definite task set, and should be easy of accomplishment, if gratitude is alive and love does not forget. To ally the various conferences to the work, through specially appointed committees, seemed a hopeless task, and did not meet with encouragement where proposed. The calls for benevolence are many on the church through the regular channels. Individual work and giving must erect the memorial, if the end sought is to be accomplished.

A souvenir campaign seems out of place and needless in the securing of a memorial to a man so truly good and great and so widely known and loved. It must be free and spontaneous—prompted by a desire to keep alive the name of this good man, and also to help a great cause which he loved, and to which he gave devoted service. No coaxing should be needed. The simple opportunity offered should instantly enlist a thousand warm personal friends of this departed hero, who could easily make possible this memorial. Perchance some noble man or woman touched and inspired by the holy influences which radiated from this great leader will do it all alone. We wait and pray. Alas, how soon the dead are forgotten.

Bishop McCabe's life was one of the most unique and picturesque and successful ever lived in the history of Methodism, yet no publisher seems willing to undertake the printing of his biography without a guarantee. Can we forget him and permit his name to become but a dim memory? No, a thousand times, no! Let his body rest in the National Cemetery at Arlington, as is now contemplated, among the nation's patriots, and on the companion hilltop let a building bearing his name proclaim him forever one of God's Heroes.

A Strong Testimony.

Dr. Richard D. Harlan, son of Associate Justice Harlan of the United States Supreme Court, and formerly President of Lake Forest College, has this to say concerning the necessity and importance of the establishment of a commanding post-graduate university at Washington:

"The plan for establishing a great university at the National Capital is older than the nation itself. It was vigorously pressed by James Madison and Charles Pinckney in the Constitutional Convention of 1787. President Washington himself, in a letter written in 1795, urged it upon the attention of the Commissioners of the District, and he again earnestly advocated it in a speech to both Houses of Congress in 1796. His private letters during the closing years of his life also abound in proofs of his absorbing interest in the project.

"How near this plan was to the heart of George Washington is finally shown in that remarkable and long-neglected paragraph in his last will and testament, in which he lifts up before the American people a splendid vision of a great university at the Capital of the nation, in which 'youths of talent' from 'all parts of this empire' could acquire 'knowledge in the principles of politics and good government,' and thereby lose those 'State prejudices' and 'local jealousies' * * * which, when carried to excess, are never-failing sources of disquietude to the public mind, and pregnant with mischievous consequences to this country.

"The magnificent government libraries, scientific collections, apparatus, and laboratories—which perhaps could never be duplicated in an educational institution at any other locality, even at the expenditure of many millions of dollars—would offer extraordinary advantages to the advanced student in applied science, independently of the libraries, laboratories, &c., of the university itself.

"Washington is rapidly approaching the point when, in a large sense, it will be the educational as well as the political Capital of the nation. Witness the Smithsonian Institution, the Bureau of Education, and the great scientific and technical bureaus of the general government; witness the Carnegie Institution of Washington and the Carnegie Foundation for the Advancement of Teaching, whose principal offices are to be removed to Washington; witness the increase in the numbers of scientific and literary men residing at the Capital.

"The one thing lacking in this much desired direction is the development of a great university for graduate work, along the lines in which the Capital of the nation offers such unique advantages."

Many Wellsprings and One Geyser of Beneficence.

The year 1907, now three months old, bids fair to outdo all its precursors in the amounts of money given for education and public charities in America. An encouraging fact is that while a few have given vast sums for the benefit of their race, the stream of minor gifts of more moderate size has continued its steady flow. We note with pleasure that an anonymous friend has added to the endowments of the University of Pennsylvania, \$100,000—a case of "strength to strength." Our friend and helper, Mr. Samuel W. Bowne, of New York, has given to Syracuse University \$100,000 for a Hall of Chemistry, which will appropriately bear his name. The Rev. R. S. Johnson, of Florissant, Mo., unites with Mr. and Mrs. R. A. Johnson, of Milwaukee, in presenting to Marquette College, of the last-named place, \$110,000 for a new building. Mr. William T. Evans, of Montclair, N. J., has presented to our National Gallery of Art, here in Washington, about fifty fine paintings valued at more than \$100,000. Columbia University in New York has received from the Misses Stokes, in memory of their father and mother, a new chapel costing \$260,000; and from sources not made public, \$1,000,000 has come to the Teachers' College of New York, which will now have a new building. Mrs. T. J. Emery, of Cincinnati, has donated to the Art Museum of that city an endowment of \$100,000. Mrs. James B. Oliver, of Pittsburg, has given \$200,000 to South Side Hospital in that city. By will, Mrs. Caroline Galland, of Seattle, Wash., left \$1,500,000 for charity. Mr. Andrew Carnegie has continued steadily his gifts for libraries, colleges and church organs, and presents \$750,000 for the home of the Bureau of American Republics, near the Corcoran Art Gallery in this city. He has also added to the endowment of Carnegie Institute, at Pittsburg, \$6,000,000—bringing that permanent fund up to \$10,000,000.

A second group of benefactions is that which marks the beginning of the distribution of the estate amassed through many years in Wall street by the unique and anomalous Russell Sage, whose widow seems to have wisdom and strength adequate to the task imposed upon her as the almoner of her departed husband's wealth. She has given to two institutions in Troy, N. Y., in which she and Mr.

Sage were personally interested, each \$1,000,000—the one being the Emma Willard Seminary, and the other the Rensselaer Polytechnic Institute. Mrs. Sage has also donated to the New York University about fifteen acres of land valued at \$300,000, to the International Committee of the Young Men's Christian Association, \$350,000 for a new building, \$75,000 to the Protestant College at Beirut, Syria, and \$150,000 for a new building for the Sailors' Home and Institute in New York. More significant of her broad outlook on the world of need is her recent establishment of the Sage Foundation, endowed with \$10,000,000, the income of which is to be used for improving the social and living conditions in the United States. The magnificent gift she accompanies with a statement that, "The means to that end will include research, publication, education, the establishment and maintenance of charitable and beneficial activities, agencies and institutions, and the aid of any such activities, agencies and institutions already established. It will be within the scope of such a foundation to investigate and study the causes of adverse social conditions, including ignorance, poverty and vice, and to suggest how these conditions can be remedied or ameliorated, and to put in operation any appropriate means to that end."

The New Year's present of John D. Rockefeller to his favorite, the University of Chicago, was \$2,917,000, and a week later \$3,000,000 as an endowment for the benefit of retired professors. The General Education Board (Rockefeller Endowment) has recently awarded to Millsaps College, Jackson, Miss., \$25,000; to several colored schools, not named, a total of \$12,500; to Lafayette College, Easton, Pa., Morningside College, Sioux City, Iowa, Beloit College, Beloit, Wis., Bowdoin College, Brunswick, Maine, and Colorado College, Colorado Springs, each, \$50,000; to the University of Wooster, O., and Wabash College, Crawfordsville, Ind., each, \$125,000; to the Princeton University, \$200,000; and to Yale University, \$300,000.

If the preceding list may be termed wellsprings, the following might be called a geyser of beneficence. The promise of John D. Rockefeller on February 5th, through his son, John D., Jr., of the gift on or before April 1st, of thirty-two millions to the General Education Board—making with his two earlier donations, a total of forty-three millions—is a

case of bewildering benefaction in the world of education. This latest gift to the Board is divided into two portions—one-third of it to be set aside as a principal fund, the income from which only is to be used in the work of the Board, and the other two-thirds is available for immediate, early and gradual distribution. The responsibility thus put upon this administering group of men is the heaviest thus far ever placed on any educational board. To place twenty million dollars wisely among the colleges and universities of the United States, and yearly to hand over to the same another million, the income from the endowment, now about twenty-one millions, will require the very highest sagacity and fidelity and a most expert knowledge of conditions and tendencies in the broad field thus covered. The Board has already accepted the vast trust and indicated in part what the main governing principles of its policies will be. One is that a good college may be secured in every American city numbering a population of 100,000 or more; another will be a sympathetic cooperation with the several religious denominations in strengthening worthy colleges already established; a third, the massing of its gifts on endowment rather than a distribution for current administration; and fourth, the conditioning of gifts upon the raising of similar, or, in most instances, much larger sums by the friends of the institution helped.

We hail this unexampled gift with pleasure, believing that it will promote throughout the country a wider and deeper public interest in the higher education, and stimulate a larger percentage of the youth of the nation to accept the privileges and responsibilities of the training and equipment furnished in our colleges and universities. *A. C.*

Asbury Memorial Hall.

Payments received since publication of last list are as follows:—

§200—Emily H. Berry for General John S. Berry; §100—Mrs. Leslie Gay, by L. F. Gay and T. D. Collins for J. P. Hicks; §75—G. W. Huddleston; §45—J. R. T. Lathrop; §25—R. A. Brown, W. A. Chadwick and Samuel G. Snowden; §20—Joseph A. Chapman; §19—Stanley O. Royal; §15—Frank G. Mitchell; §10—Thomas Hamby, C. A. Stockwell, Kate E. Piper, for George J. Piper, dec'd, M. W. Clair and wife, and H. S. Thompson; §7—C. G. Cummings; §5—M. E. Ketcham, J. D. C. Hanna, Miss H. H. Beason, and J. H. Goodrich; §4—Joseph Henry; §1.65—A. M. Lumpkin; §3—F. H. Huentsberger; §2—M. J. Naylor; §1—Joseph Wheeler and J. T. Owings.

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

Entered December 24, 1902, at Washington, D. C., as second
class mail matter under act of Congress of July 16, 1894

Franklin Hamilton, Ph. D., becomes Chancellor of the American University.

The Trustees of the American University at their semi-annual meeting May 15, after mature deliberation, elected to the Chancellorship of the institution Franklin Hamilton, Ph. D., of Boston, Mass. To take up the mantle dropped by the scholarly Hurst and the beloved McCabe might well cause any man to hesitate and consider, so it was not until June first that Doctor Hamilton sent his acceptance to the Board of Trustees. He comes to the work in the strength of his manhood and with the assurance of hearty cooperation on the part of many influential friends with whom he consulted. His task is a large one, but that he will win is the firm conviction of those who know his capacity for work and his ability to bring to a successful conclusion any task to which he fully consecrates his splendid talents. As soon as he can make suitable close of his important pastorate in Boston he will remove his residence to Washington and enter actively upon the duties of his new office, devoting to it his entire time and energies.

Doctor Hamilton is the youngest son of the Rev. W. C. P. Hamilton, of the Pittsburg Conference of the Methodist Episcopal Church. He was born in Pleasant Valley, Ohio. He is the brother of Bishop John W. Hamilton, of California, and of the Rev. Dr. Jay Benson Hamilton, of Walden University.

He graduated from the Boston Latin School in 1883, where he took the Old South Prize as essayist. He graduated from Harvard University in 1887. During his course at Harvard he won both the Bowdoin and Boylston Prizes; was president of the Harvard Daily Crimson; and became a member of the Phi Beta Kappa. At the 250th anniversary of the founding of Harvard he delivered the oration for the undergraduates, the alumni address being given on the same occasion by James Russell Lowell. He was elected as class orator and selected as one of the commencement speakers. He served for a time as one of the professors of Greek and Latin in

FRANKLIN HAMILTON, PH. D.,
CHANCELLOR OF THE AMERICAN UNIVERSITY.

Grant University. He graduated from the Boston University School of Theology in 1892, where he was also one of the commencement speakers. He spent nearly three years in postgraduate study at Paris

and Berlin. At the latter place he was a favorite pupil of the celebrated Ferdinand Piper, with whom he engaged in special researches in early Christian archaeology. He has traveled extensively in Europe and speaks several modern languages. He received his doctorate in philosophy at Boston University in 1899, in the field of Speculative Philosophy. On joining the New England Conference he was appointed to his first pastorate at East Boston. He then served for five years at Newtonville, Mass. Since 1899 he has been pastor of the First Methodist Episcopal Church at Boston. He has acted as University preacher at Harvard University twice, and has written extensively for magazines and journals. In 1901 he was granted leave of absence from his church, and with his family made a tour of the world. On this journey he was away nearly a year and a half, much of this time being spent in the Far East. While he was in the Orient he made a special study of Native Religions and Christian Missions. Mrs. Hamilton is the daughter of the Honorable Edward L. Pierce, the biographer of Charles Sumner. They have two sons. Among Doctor Hamilton's library treasures is one of the best private collections of *Wesleyana* in America.

A Voice from the Pilot House.

Ringing Bugle Call from the New Chancellor.
Franklin Hamilton, Ph. D.

Nearly a score of years ago the founders of the American University set themselves to realize a dream. This dream was the establishment at the nation's capital of a national university, a school which should be in keeping with that destiny of the land to which the Father of his Country already had heard divine voices calling. From that hour to this the work has gone on. Two immortal men we lament, who gave themselves to the task of realizing this ideal. These "died in faith, not having received the promises, but having seen them afar off, and were persuaded of them, and embraced them"—John Fletcher Hurst, Charles Cardwell McCabe—the tireless scholar and the sweet singer who hath not left his peer. First unto them be salutations and congratulations. Choice and master spirits, *animi fortunati et illuminati et beati!* They wrought well. We have entered into their labors. The Divine eye seeth where and what seed they sowed and when it shall spring unto harvest.

Let none repine at the seemingly laggard footsteps of Progress. What school, save such as have risen from specific magnificent endowments; what school, without teachers and without students, within so short a time has achieved such material advancement? "God buries His workers, but carries on His work." Mark here how true this apothegm. The grounds of the American University, with the buildings already erected thereon, give promise of the noblest university site on the continent.

When this spot was selected, who foresaw that straight toward it would trend the future expansion of the city of Washington at its best? Soon the mere money valuation of the University grounds will be almost incredible. When Washington shall have become the capital of humanity, what world-strategic importance will attach to this site!

When first it was determined to fulfill the dream of the great President by building the university which in vision he had seen, who could have forecast that this act would so appeal to the imagination that others would catch it up in emulation? When not a few at first questioned and hesitated because of the bigness of the project, who could have imagined that they, inspired by their own response to a supreme opportunity, would become the firmest friends of the enterprise? Surely one greater and wiser than man was here, and we know it not!

No, let none repine. We are building for the centuries. Foundation work here needs to be broad and deep. The builders must be canny and wide-visioned. It took nearly seven hundred years to build the Cathedral of Cologne. In less than a hundred years, says the director of the census, the estimated population of the present United States exclusive of all insular possessions, will be nearly three hundred and twelve million. The school which has that day in mind must be born great, both in ideas and in ideals. A university which then shall open wide its hospitable gates, and to those vexed and wandering generations shall offer fitting lessons of inspiration and toleration, must spring from a liberal comprehension. It must have its roots by the great waters. Its tents must be the stars.

"Let not him that girdeth on his harness boast himself as he that putteth it off." Sounding promises shrink often to empty achievements. No place or time is this in which to set forth policy or

plans. Suffice it to say that the new campaign in behalf of the American University will be irenic. We only pray that the eyes of the blind may be opened and that the ears of the deaf may be unstopped. Divine voices still are calling. We know nothing of the past save what has been wrought through great tribulation. We are of the future. We believe that this University has the gift of the stars. The responsibilities which now are upon us shall serve only to steady us and to hold us to duty. "Blessed is the man who has found his work."

Let the patrons and friends of this school of the future; let builders of hope who crave a part in lasting achievements; let all who would help to lift America to that high place where her very name shall be synonymous with intelligent liberty and unfettered truth, let these rally to the standard uplifted, let these be patient, let these be courageous, and lend a hand. And at the heart of this nation we will build a university which shall include all that is highest in patriotism, all that is best in genuine philanthropy, all that is noblest and most Christlike in Christianity." Loyalty, sympathy and prayers can make the American University "the foremost institution of its kind in all Christendom."

On his grassy sunlit slope beside the Potomac sleeps the great Virginian. Forever by sweeps, tawny and silent, the river, moving with eager face set toward the sea. Thus, without haste, and without rest, shall press onward into the wideness and gladness of its heritage the bark to which has been committed an immortal cause, and which is freighted with the hopes and faith of increasing multitudes. He who has been summoned to put his hand to the task only can make his own the vow of the pilot Palinurus—"O Neptune, you can save me, you can sink me if you will, but whatever comes I will keep my rudder true."

If you have money to give outright which will pay large dividends for all time to come in aspiring lives lifted into highest usefulness, write The American University and we will put you on the track of such an investment. If you have money, the income from which you need during your lifetime but which you would like to have used after you are gone in as worthy a work as any to which money was ever given, write for our safe and generous plan.

Benefactor and College.

A great deal has been heard from various sources of the responsiveness of American educational institutions to their material prosperity. Baldly put, it is suspected that such a university as that of Chicago cannot teach economics without sniffing the air for the scent of Standard oil. This charge—it is more than a suspicion—coupled with the supposition that honorary degrees are bought with the coin of benefactions from the rich, has done much to destroy a faith which was once unquestioning in the disinterestedness and full sincerity of our extra-public schools.

The result is probably good for the colleges. The more the body of parents insist upon knowing of their operation the more rigorously will the management be held to the highest standards. But it is unfortunate if that result is to be obtained through an unfounded suspicion, and the testimony borne by Prof. John J. Stevenson, of the University of New York, would indicate that such was the case. In the *Popular Science Monthly* he writes:

"Some newspapers have much to say respecting subordination of professors to millionaires who have given large sums to colleges. The writer has found none of this among professors and he has yet to find the giver who has shown desire to meddle with 'professorial freedom.'"

The failure of the donors to "show desire to meddle" with the teaching of professors is not so important as Prof. Stevenson's statement that he has not found among his colleagues any subordination to millionaires. Few men with sense enough to amass great fortunes would have so little judgment as to interfere openly in the teaching of a school to which they gave liberally. There would be a thousand times more force in suggestion or in the mere expectation of favors to come than could ever lie in expressed desire. Many who cannot be driven are easily led. But if one who has been in close touch with American universities all his life, who has known intimately scores of professors, who has been and is now a factor in a great college, can bear testimony that he has seen no undue regard for the sensibilities of benefactors, as does Prof. Stevenson, he can be assured he has done much to dissipate the suspicion which called his testimony forth.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

THE new crop of D. D.'s is fast ripening in these June days. The harvest promises to be abundant.

We have mailed to every subscriber to The American University a notification of the amount still due. This is the case especially with those who are behind in the payments on their subscription to the new building, the Ohio College of Government. Many of these were due July 1. Together with the notification an earnest letter was sent, begging for prompt payment in view of the large amounts due the contractors. Some subscribers are four or more years in arrears. Some have what they feel are good excuses, others are without excuse. A very few are repudiating their subscription. The number is very small. A few others are protesting that their subscriptions have been fully paid—when our books show otherwise. These are kept with great care and a receipt is always sent for every dollar paid us; if receipts can be produced we are glad and are ready to apologize. The trouble lies in the fact that with subscriptions of small amount which are allowed to run on from year to year without attention, one payment of three having been paid a half dozen years ago, the memory can hardly be trusted in the matter. One payment is easily magnified into three, and the subscriber is grieved at the

annual coming of the notification. We are sorry to have to send it, but this is our only method of keeping in touch with our many subscribers who are in arrears, and while our books show an amount due and no receipts are returned to show us in error, the notification will have to be sent. All could easily settle *now* if they would. This would mean great relief at both ends of the line. Will you now heed our earnest appeal made in this time of need and settle in full?

A Tribute to Chancellor McCabe.

This appreciation was passed by rising vote at the Trustees' meeting of the American University, May 15, 1907, and ordered spread upon the minutes, and a copy sent to Mrs. McCabe:

The fear under which we assembled at our last meeting, five months ago, that we might not again look upon the benign countenance or hear the soulful tones of our beloved Chancellor, Bishop Charles Cardwell McCabe, was a week later deepened into a great sorrow by his death. Our present meeting offers the first opportunity since his decease to voice the feelings of our hearts and to record the esteem in which we hold him and his work.

A member of the Board of Trustees from the beginning, he has shown a growing and intelligent interest in all phases of the progress of the University for fifteen years. His service as Vice-Chancellor for three and as Chancellor for four years has been a hearty and faithful devotion to the cause of higher education. Performing to the full his high and onerous duties as Bishop and putting himself readily and constantly into responsive and responsible relation to a multitude of local and individual causes which appealed to his judgment and sympathy, he also took resolutely and enthusiastically the burdens of the chancellorship. His personal liberality and efforts for the University have been productive of much benefit, and the seed he has sown will yet show many fold in the harvest. His plans were large, and he longed for a few years beyond his three score and ten in which to bring them with their ripe results to the feet of the Master. Yet to the final call, which summoned him from the lower to the higher planes of active service for his Lord, he made quick and glad answer.

His great faith, based always on carefully gleaned information; his great heart, a refuge and a full flowing fountain of help for a host of needy ones; his open mind, fertile in expedients and gifted with practical sagacity; his ready discernment of men, coupled with a charity that never failed; his royal power as a master of assemblies in the interest of every good object; his winning personality and pure character, embodying all that was lovely and of good report; these all knit our hearts to him as a brother and friend. His departure leaves us with an unusual sense of loneliness.

To his surviving wife and son in an affliction and bereavement greater and keener than our own, we tender our prayerful sympathy; yet feel assured that the record of his noble life and inspiring example, the consolations of the gospel which he preached and illustrated, with its sure hopes of posthumous fruitfulness in this world and a lasting reunion in the next, and the presence and solace of the divine Comforter, will cheer and strengthen both them and ourselves for such living as will be in accord with his own sweet and heroic spirit and help toward the consummation of a pure and righteous peace on earth.

SEMI-ANNUAL TRUSTEES' MEETING.

On May 15th the mid-year gathering of the Trustees of the American University was held in Washington City.

Those present at the session were Bishop Willard F. Mallalieu of Boston, Mass.; Rev. Dr. David H. Carroll of Baltimore, President of the Board; Rev. Dr. Charles W. Baldwin of Baltimore, Md., Secretary of the Board; Rev. Dr. Wilbur L. Davidson, Secretary of the University; Rev. Dr. Franklin Hamilton of Boston, Mass.; Rev. Dr. J. Wesley Hill of New York; Rev. Dr. J. G. Bickerton of Philadelphia, Pa.; Rev. Drs. Thomas N. Boyle and W. R. Wedderspoon of Pittsburg, Pa.; Mrs. J. E. Robinson, Rock Island, Ill.; Mr. George F. Washburn of Boston, Mass.; Mr. Charles C. Glover, Treasurer of the University and also of the Board of Trustees; Justice Thomas H. Anderson of the District Supreme Court, Mr. Aldis B. Browne, Mr. Benjamin F. Leighton, Mr. G. W. F. Swartzell, Mr. Brainard H. Warner,

Mr. John E. Herrell, Rev. Dr. John A. Gutteridge, Financial Secretary of the University; Rev. Dr. J. B. Polsgrove of Carlisle, Pa.; Rev. Albert Osborn, Registrar.

The following sent regrets on account of necessary absence: Vice-President Charles W. Fairbanks, Senator J. P. Dolliver of Iowa; Senator Charles Dick of Ohio; Bishop Charles H. Fowler of New York; Bishop Luther B. Wilson of Chattanooga, Tenn.; Bishop Alphaeus W. Wilson of Baltimore, Md.; Bishop John H. Vincent of Indianapolis; Rev. Dr. A. J. Palmer of New York; Representative George C. Sturgiss of West Virginia; Mr. Levi Smith of Clarendon, Pa.; Mr. C. Price Speer of Chambersburg, Pa.; Rev. Dr. J. O. Wilson of New York City; Justice Louis E. McComas of the Court of Appeals of the District of Columbia, and Mr. Julian S. Carr of Durham, N. C.

Encouraging reports were presented by the Secretary, Dr. W. L. Davidson, and the Financial Secretary, Dr. J. A. Gutteridge. A paper in memory of Bishop McCabe was adopted by a rising vote. It appears in full in another part of the issue. The building committee reported the new building—"The College of Government"—rapidly approaching completion under the present contract, which encloses the handsome structure. The roof is now on and the massive dome over the great front portico is being finished with elaborate copper ornaments. There is no finer building in the city of Washington. It is greatly admired and praised by all who see it. The chief business of the day was the election of Dr. Franklin Hamilton of Boston, Mass., as the Chancellor of the University. His portrait and a brief sketch of his life appear in another column. Much time was given to the consideration of a plan to establish a medical department and hospital in connection with the University. Final action was deferred. Announcement was made by the Secretary of several legacies recently reported. Luncheon was served at noon in the University offices, and at the close of the afternoon session a large number of the Trustees in automobiles visited the site of the University and inspected the new building.

The attendance at this meeting was unusually large, and much business of far-reaching importance was transacted.

The American University.

A legal opinion handed down by one of Washington's best known attorneys.

Knowledge is Power. The spirit of research and investigation, the increasing desire for higher intellectual development grows with the development of civilization. The spirit of the age is not altogether absorbed in commercial conquest, for in the Providence of God men are developing in increasing numbers to whom the call for highest usefulness to their fellowmen in the open arena of life far outweighs their thirst for gold. Colleges and universities wherein the broad foundations of knowledge are laid abound throughout the land. Their work and achievement are beyond praise. They meet the educational demand and in a very practical way. The college-bred man enters the competition of life from such institutions equipped far beyond his fellows whose educational opportunities have by forbidding circumstances been more limited. Such men make in increasing numbers the captains of an ever industrial age, and their brain development finds practical application in a thousand fields. But there are others to whom the call for deeper research and the desire for higher scholastic attainment comes with irresistible force. These men seek and must find the opportunity for more advanced study. The American University will supply that need. The essential condition for matriculation therein will be the possession of the college degree; its curriculum will embrace only post-graduate study. In that restricted and higher work it competes with no other institution granting less than post graduate degrees. Its full ambition can be satisfied of course only when ripened age ranks it with the old world universities of like character, but nothing mundane becomes old which does not have beginning. Its beginning may consume even three score years and ten, but those who lay its foundation are building for the centuries.

Its location at the Nation's Capital is most appropriate in every way. Our national life is yet young, measured by the standard of mere political age, but at the Nation's Capital centres more and more with each passing decade these radiating influences which mould and develop the intellectual, social and civil life of a people whose virility is still unabated; for we have not yet reached the conservative age of

statehood when our people live, move and have their being in other than a consuming nervous haste. Here, however, is found a wealth of basic opportunity for higher research. Our Government has for many years been wise enough to provide in increasing volume the treasures of literature and research from all lands and in manifold ways. The Congressional Library is the most complete of any within our borders. The whole field of the animal, vegetable and mineral kingdoms has been exploited and the tangible results are here in prodigal variety. There is no capital of Europe more abundantly supplied with greater treasures of brain, or greater variety of specimen and development in earth and air and sky. Congress has by special act opened all this storehouse to the free use of students. Such an endowment, measured by money alone, represents an expenditure of many millions and the work still goes on. Whatever special field of investigation the post-graduate student may wish to explore, Washington, through its public treasures, affords in literature and in material exhibit a primary workshop of inestimable value.

The University is not and will not be sectarian in any narrow sense, nor will it be non-sectarian in any mere material sense. The founder—the great-brained Bishop Hurst—and his successors in control, believe in reverent and fullest measure in God as creator of all things, and in His providence over all things, in His presence in all things, both of matter and of mind. They do not fear the results of scientific research in the deepest study of nature and of man, nor will they inculcate a theology narrower than the simple Gospel of the divine Master applied to all human need. Its Board of Trustees represent all denominations of Protestant faith. They admire the growth of the great Catholic University upon the eastern hills overlooking this great Capital city, and pay deserved tribute to the faithful men who there pursue the higher study of mind, men, and matter, and indulge only the largest faith and highest hope that the American University may engage with it in friendly rivalry for the necessary development of the intellectual life of Washington, and the benefit which will follow therefrom, both to us as a nation and to all men everywhere.

The conception of the American University, its foundation and its success, are but the successive and necessary steps in a faith which holds fast to

the great things it has already accomplished, and moves forward to the certain consummation of the greater things which are yet to be.

ALDIS B. BROWNE.

The New Building.

The College of Government, as to its exterior, is about completed and will within the next few days be passed by the contractors over to the Trustees. The massive marble building is being pointed and cleaned. A few finishing touches on the rich ornamentation of the huge copper dome is all that remained to be done. Save for a strike which was recently ordered among the copper workers of the district the work under the present contract would have been completed before the issue of this paper. The contract price for the enclosing of the building was \$145,000. This amount is close to the cost in view of the increase in the price of labor and materials since the contract was let. At least \$100,000 will be needed to complete the interior. As this noble building is to be a memorial to President McKinley who had everybody for his friend, it would not seem difficult to secure the needed amount. The pedestal on which the statue of the martyred President is to stand is now in place. This will be his most significant monument. The completion of this building is one of the needful things to be accomplished before the University can open for work.

The College of History now fully completed hardly offers the accommodations needed for a creditable opening of the institution, but with the completed College of Government about eighty commodious class rooms would be available for use—quite enough for the beginning. The new building is architecturally perfect. Its lines are most pleasing to the eye. Those who see it have nothing but words of admiration. The marble of which it is entirely built is from the famous quarries at Rutland, Vermont, and is without flaw. Every block which did not measure up to the specifications was rejected. The corner portico with its immense marble pillars over-capped by the graceful dome gives a finish to the building which completely satisfies. There are larger and more expensive buildings in Washington, but even now, without the landscape gardening about it to give it the proper setting, every visitor

is heard to exclaim, "that is the handsomest building in Washington." When completed it will house the College of Law, and among the departments will be Constitutional Law, Science of Government, Diplomatics and Civics. We appeal to all friends of Christian education, under whatever denominational banner, and to all lovers of Protestant America, for co-operation in the great work of establishing The American University, which shall conserve and promote all the interests of our country and our common Christianity. The influence of its work will not be limited but will be world-wide. Thousands of aspiring students from all lands will come for study to the greatest capital of the world, which Washington is certain to be. It should be a real joy for one of means to have some share in a work so important and far-reaching. How could any one better perpetuate beneficence and name than by a princely gift, to build a college, or endow a chair in an institution at the Nation's Capital of such order as The American University?

A University of Universities.

The Rev. Alexander Hill, of Rotterdam, N. Y., in a letter published in the *New York Tribune* May 6th, voiced in admirable fashion the thought which from the very beginning has been uppermost with the founders of the American University. He says:

"The sentiment of a grateful patriotism would prompt true Americans to bring to pass Washington's dream of a national university. But a more practical reason than sentiment is the fact that Washington is incomparable as the ideal location for such an institution. The rich scientific and literary collections of the Government, and even more, the departments of the actual Government—House of Representatives, Senate and Supreme Court—render the city a unique place for the highest education. But the effort should be not to establish 'another' university on lines similar to those of existing ones and thus a rival to them, but to gain the cooperation of such universities as Harvard, Yale, Princeton and others, to make a University of Universities."

"May George Washington's dream be realized, not in the erection of an imposing group of architectural monuments on the banks of the Potomac, but by the founding of a center of the highest education manned by men whose very names shall make it not only the final goal of every American student's ambition, but the Mecca toward which the scholars of the world shall wend in constant pilgrimage."

FORM OF WILL FOR
THE AMERICAN UNIVERSITY

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

The Power of Small Gifts.

All have heard the story of the great monastery which held concealed in one of the stones of its walls a list of the benefactors whose gifts had made possible the erection of the sacred retreat. In the

long centuries, the monastery falling into ruin, this stone was found and opened. There on a parchment was found written in long columns the names of those who had given of their affluence,—the lords and squires and merchants and dames,—that the building might be completed. And at the end of all were found these words, "Let also Hilda, the begging woman, be not forgotten, for she brought thread wherewith to sew the sanctuary curtains."

This sense of immortality of a small gift to a great cause comes home to us as we note the record in the list of the first endowment gifts to Harvard

University. After John Harvard had made his immortal benefaction of half his small patrimony and two hundred and sixty books, the record reads as follows: "The colony caught his spirit. Among the magistrates themselves two hundred pounds was

subscribed, a part in books. All did something, even the indigent. One subscribed a number of sheep; another, nine shillings worth of cloth; one, a ten-shilling pewter flagon; others, a fruit dish, a sugar spoon, a silver-tipped jug, one great salt, one small trencher salt, &c.

MCKINLEY MEMORIAL—OHIO COLLEGE OF GOVERNMENT

Contract to put under roof just completed at cost of \$155,000. \$10,000 needed to finish the building. This photograph taken September 27, 1907. See article on page 6.

From such small beginnings did the institution take its start. No rank, no class of men, is unrepresented. The school was of the people."

Let no one hesitate to be written down as a benefactor of the American University through fear that small gifts may not be appreciated. It is the spirit itself of the gift which will win immortality.

What We Now Plan To Do.

In answer to many inquiries which are being made concerning the University we take this opportunity of stating what we now plan to do. We have before us as the clear line of immediate duty two definite things:

First. Every effort will be concentrated to completing the McKinley College of Government building. This will require about \$140,000. Who will give it? Who will be one of two, or five, or ten, to give it? The amount soon will be covered. We only need some one to set the example and to give inspiration by a gift which will be worthy of the enterprise and the opportunity.

Second. Determined and continuous effort will be made to gather an endowment. To this end we are forming a national partnership, offering shares in a co-operative Endowment Alliance at \$5 a share. One or more shares can be taken each year for one, three or five years. A certificate will be issued to each share-holder. Every friend of Christian Education, every lover of our country's welfare, is besought to become a share-holder in this co-operative Endowment Alliance. This gives opportunity for even the poor among us to help a little, making it the People's School. Write at once to the office for information or to enroll yourself as a share-holder. This Endowment Alliance will be carried to the end, without haste but also without rest, until success crowns our labor and the American University is opened.

These things can be done. They will be done! To repeat again the memorable words of Bishop McCabe,—“The Church can do it! We are being educated to attempt great things for God!”

What Our Workers Are Doing.

The plan of visitation for the Fall Conferences has called on the concerted activity of three of our workers simultaneously in different fields. Conferences are being visited in the interests of the University over a wide area.

Dr. Davidson, who will also carry on a special work in the middle west, visits the following conferences: Erie, Cincinnati, Northwest Indiana, Northern Ohio, East Ohio and Indiana.

Dr. Gutteridge presents the cause to conferences farther west as follows: Iowa, Norwegian-Danish,

Des Moines, West Wisconsin, Northwest Iowa, Chicago German, Minnesota, Wisconsin, St. Louis German, Nebraska, Northern Minnesota, North Nebraska, Upper Iowa.

Dr. Hamilton attends the following conferences: Detroit, Michigan, Central Illinois, Illinois, Southern Illinois, Ohio, Central German, Central Ohio, Kentucky, West Virginia, Pittsburgh, Rock River, Central New York, Genesee.

Registrar Osborn is in charge of the office during the absence of Dr. Davidson and Dr. Hamilton. All correspondence with the office will receive prompt attention at Mr. Osborn's hands.

Feathers for Flight.

“I could build a better University with one million dollars in Washington than with ten millions in any other city.”—President Harper.

“In no city as in Washington can so large an audience of learned men be secured on so short a notice.”—*Professor Tyndall.*

“There is no city in the world where scientific study can be pursued to so great advantage as in Washington.”—*Professor Balfour of Oxford University.*

“The importance of the object at which you aim cannot be too forcibly stated, and I hope that the result may be a University equal to any in the world.”—*George Bancroft.*

“The movement should receive and I hope will receive the effective support and sympathy not only of all the members of your great Church but of all patriotic people.”—*President Harrison.*

“Washington is to be to the New West what Paris has been to Europe and the past. Washington is becoming the intellectual center of the whole Western Hemisphere.”—*U. S. Minister Dawson.*

“It is because we believe that America will give a Christian Protestant civilization to the world, and because we believe the American University will help to carry out God's providential plan, that we pledge it our earnest prayers and our heartiest support.”—*Bishop Bashford.*

“I see on the summits overlooking the Capital of this greatest of nations an opulent group of stately buildings—forming a suitable city of letters, while over the dome of her great science hall the outstretched arms of the cross and the waving folds of

the stars and stripes catch the first beams of the Atlantic sun."—*Bishop Fowler.*

Not a few who at first hesitated at the building of a great National University in Washington now are coming enthusiastically to our support. From all over the country from far-seeing and influential men and women we are receiving letters pledging the American University their ardent backing.

"If a man were to visit this earth in the year 4000 he would find a trust placed in the charge of a school or university more carefully conserved than any other interest committed to mankind. He who helps to found a school opens a fountain of perennial flow and blessing. He secures for himself a commemoration more honorable and more enduring than is found in an Egyptian Pyramid."

Library and Museum.

The necessity will never be upon the American University to provide museums, libraries and such other helps to advanced education as is upon other institutions of like character elsewhere. The vast accumulations of the Government in every line of possible research, housed in the fourteen distinct departments of Washington, and in which the Government has invested more than \$60,000,000, are at our doors and are to all intents and purposes part of our actual assets. No other city in the world furnishes such helps to higher education. This is the unique distinction Washington possesses as the seat for such an institution as is contemplated in the American University. What other universities put into accessories we can put into professors. That is what that sane educator, President Harper, meant when he said that with \$1,000,000 he could build in Washington a better university than could be established in any other city for \$10,000,000.

It goes without saying, however, that there must be working libraries in various departments, well selected and easy for ready reference. Museums under our own roofs, with unique objects of interest from the entire world, will give dignity to the work and zest to the toil of the student. These have grown rapidly in the past years through the gifts of generous friends. The General John A. Logan Memorial Library (3,500), the Judge William M. Springer Memorial Library (5,000), and other book

gifts from many quarters bring the total number up to nearly 15,000. A recent addition is a rare Macklin Bible, illustrated, in seven volumes, printed in 1800. In the museum the cabinets are being filled with rare minerals and curios, which have come from various sources. Standing about are objects of fascinating interest and almost priceless worth—the desk used by Edwin M. Stanton during his term as Secretary of War; the dining table and chairs of Senator Sumner; the wardrobe and manuscript file of the historian, Bancroft; an heroic bust of General John A. Logan; a handsomely carved historic chair made from the beams of City Road Chapel, London, where John Wesley preached, brought over by the British delegates to the Ecumenical Conference of 1891, used by the presiding officer, and afterwards presented to the American University; an authentic portrait of Bishop Asbury, painted on wood, an unusual treasure; and last, but not least, the desk used by Bishop McCabe during his term as missionary secretary. The recent gifts from Chancellor Hamilton and Mr. Boogher, mentioned elsewhere in these columns, will add great interest to the collection we now have.

Bear in mind that any really rare thing you can send us for library or museum will be gladly accepted, and acknowledgment will be made in the columns of THE COURIER. Write a line concerning it before you send it.

Strong Letter from the President of Drew.

August 27, 1907.

MY DEAR CHANCELLOR HAMILTON :

It affords me pleasure to bear testimony to the high value of the American University as a part of the great educational system of our country. It is connected with our common Methodism, comprehensive in its plans, and proposes the highest educational advantages. Its nearness to the great libraries and museums of Washington affords special opportunities for scientific research, and the ample grounds and fine buildings already secured are a pledge that will meet the wants of our people and contribute to personal as well as to national progress. I wish you eminent success in this great work committed to your charge.

Very sincerely yours,

HENRY A. BUTTZ.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D. D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorials.

An admirer of Bishop McCabe has offered to give the University a bronze bust of the Bishop on marble base. It will indeed be a treasure.

Mrs. Russell Sage, whose lavish but discriminate giving has pleased both earth and heaven, has recently given \$100,000 for the new Teachers' College of Syracuse University.

If you think of some of your friends whom you feel would be interested in reading this suggestive issue of THE COURIER, send their names to us and we shall gladly mail them copies.

At the recent session of the Erie Conference, after Secretary Davidson had presented the cause of the University, President W. H. Crawford, of Allegheny College, offered a strong resolution approving the University and pledging the Conference to its loyal support, which was unanimously adopted.

Attention is called once more to a suggestive little booklet on Annuities, which has been prepared by the University officers. It is worth your reading, if you have money which you desire to leave working to some good purpose after you are gone, but the income from which you must have during your lifetime. Write to the office for the booklet; it outlines a safe investment which should appeal to you.

John Fritz, famous for his perfection of armor-plate processes, recently celebrated the eighty-fifth anniversary of his birth at his home in Bethlehem, Pa. He began life as a blacksmith in 1838, and in his long career has been identified with almost every important step in the process of making iron and steel, which has resulted in an increase of the American product of a million tons in 1838 to upward of 25,000,000 in 1906. Mr. Fritz has for many years been a Trustee of the American University. He has contributed generously to it and has promised still larger things.

Those who have not settled in full their generous subscriptions to the American University should take up the matter at once. The delay is annoying at both ends of the line. The office force is under the necessity and expense of sending annual statements which oftentimes must be followed by letters of explanation. The subscribers are annoyed by what they look upon as "duns" and sometimes resent it by replies which would not look well in print. Some have permitted so many years to elapse since paying anything on their subscription that receipts have been destroyed and memory has dimmed. They think some things which are not so, as our books which are carefully kept reveal. The situations are sometimes painfully embarrassing and of course we usually get the worst of it. We cannot force and can only plead with subscribers to keep their sacred pledges. It is quite another matter when financial disaster, sickness or other calamity intervenes to prevent payment, as is frequently the case. Here we gladly exercise all needed patience. Why Christian men and women, when things are going well, will not promptly keep their financial pledges to such a worthy enterprise is hard to understand.

Comments of Press.

The Church is abundantly able to carry forward the American University.

Dr. Hamilton bears with him the good will of the entire Methodist Church and of all the Protestant denominations. The Washington Roman Catholic University has immensely increased the power and prestige of that denomination in educational matters. The successful establishment and operation of the American University means much to the nation at large.—*California Christian Advocate.*

A Sure Basis for Methodist Union.

The union of the two great Methodisms, north and south, would be the most significant event which could happen in the religious world. It would silence the cavil of the skeptic and hasten the millennium by a thousand years. It would be the most striking answer to our Lord's prayer "that they may be one" which Christendom has ever heard. It would be an object lesson to the world which would make for righteousness. The causes which led to division lie buried in the grave of the past. Old hatreds and bitternesses have been forgotten and forgiven. For a score of years good men and women in both camps have been praying for a reunion of the two great bodies. Some substantial progress has been made, and the next generation will witness the glad consummation. We now have the common hymnal and catechism. Is there not some other common ground on which we could stand—engaging in some heroic task for the uplift of humanity which would call forth the holy impulses of every heart, and thus bind us more closely together? If the two Methodisms would join in the establishment of the American University at the Capital of the nation no more certain basis of union could be found.

There is a strange new educational awakening in the South. It is a significant fact that there are less southern students at Yale and Harvard, in proportion to the student body, than there were before the civil war. Chicago University has the largest southern patronage, where the city itself and the University have grown up since the dark days of '61. Washington is the gateway to the South; it is practically a southern city; it is the heart of the nation. Bishop Alpheus W. Wilson, one of the most honored men of the Methodist Church South, is the beloved Vice-Chancellor of the American University. The press of that great church and her leading men have again and again declared in favor of the University and the pressing need of its establishment. Dr. W. W. Martin, formerly of that body, for some time held official position with the University. Thus already the interest of both branches of the Methodist Church has met in this great enterprise with happy results.

Both have commanding schools of which they are justly proud. Vanderbilt and Syracuse, Emory and

Northwestern, and many others which could be named, have written splendid histories, but Methodism is entitled to something bigger and better than any thing she now has; something which will not diminish the luster of the institutions of learning she already fosters, nor interfere one iota with their success, but will be the crown to her educational system, and place the Church in that position in the educational world where she rightfully belongs.

A magnificent beginning has been made, but the hearty and united efforts of Methodism, which up to the present time has had the leadership in the movement must in the name of Protestantism complete the work, if it is ever accomplished.

It would give us as a denomination a standing in the religious world which nothing else could give and furnish an additional and convincing proof of our right to existence.

Engaged in this common task—our love and sympathy, prayers and means flowing towards it, there would be born a basis of union more substantial than any yet existing, and the reunited church would through *its* University march out hand in hand—one church to accomplish still greater things for the Master.

Museum of Religions.

Objects of Religious Interest Presented by Franklin Hamilton.

16. Leaves of sacred laurel of Apollo from the shrine of Delphi, Greece.
17. Prayer Banner from Buddhist Dagoba at *Anuradhapura*, the sacred city of Ceylon.

Progress on New Building and Its Present Needs.

On another page we present a fine picture of the McKinley Memorial—Ohio College of Government, showing the building as it is at present. It is nearly under roof, at a cost of \$155,000. But for a strike among the copper-workers, which has greatly hindered the contractors, Richardson & Burgess, and annoyed our faithful superintendent, J. B. Hammond, all would by this time have been completed. As it is, only a little work remains to be done on the dome, and the picture shows it nearly perfect. It is greatly admired by all who see it. There is no handsomer school building anywhere, and nothing more attractive architecturally will be seen in the Capital City, where so many handsome structures have been built. Something over \$140,000 will be needed to complete the building, and that the real work of the University may begin it is desirable that this work should be pushed at once. If Ohio is to carry the name and have the honor of this building her citizens of wealth should bestir themselves and make larger contributions to this special object than have yet been received. This memorial to the honored son of Ohio, the martyred McKinley—the most worthy and significant which will anywhere be raised to his memory—should appeal to Ohioans both in and out of the State.

Every effort will now be exerted by all representatives of the University to secure funds to complete this building. This is the one thing which must be accomplished at once. Ohio will be visited; public meetings will be held; men and women of wealth will be appealed to for help; the Press will be interested, and nothing omitted which promises success. Gifts large and small for this memorial building should come rapidly. Who will send? Make checks payable to the order of The American University.

Gifts from William F. and Eliza A. Boogher.

The University Museum of Methodism has been recently enriched by the gift of a silver hunting-case watch, once owned and used by Bishop Thomas A. Morris, twelfth bishop of the Methodist Episcopal Church, until his election in 1836 to the episcopacy, when he was presented with a new gold watch and soon thereafter gave the silver one to his son, the

Rev. Francis Ashbury Morris, of St. Louis, Mo., a preacher in the Methodist Episcopal Church, South. Mr. William F. Boogher, of Washington, obtained the watch from the latter in 1881, and presented it to the American University on July 30, 1907. He has also recently given to the University library ninety-one engravings, including some valuable portraits, the subscription paper and plans for a Methodist Episcopal Church at Buckeystown, Md. (1828), the manuscript letters of Jonathan Willson, of Montgomery, Md., to Ignatius Davis, of Mt. Hope, Frederick County, Md., from 1795 to 1804, more than one hundred foolscap pages on slavery and other topics; five manuscript pages on a Brief History of the Wesley Family, by the Rev. George John Stevenson, the well-known Methodist historian and antiquarian, of London, and eleven letters and six post-cards from Dr. Stevenson to Mr. Boogher (1881-1885) relating to the celebrated Stevenson collection of manuscripts of Adam Clarke, Henry Moore, John Fletcher, John and Charles Wesley, and others; a letter each from Dr. Benjamin St. James Fry and Bishop H. N. McTyeire; thirty-five educational, twenty-eight; religious, twenty-four Methodist, and thirteen historical pamphlets; also full sets of the official reports of the Expositions at Vienna (1873, 4 vols.), Philadelphia (1876, 11 vols.), and Paris (1878, 5 vols.). To his sister, Miss Eliza A. Boogher, of Mt. Pleasant, Frederick County, Md., we are indebted for three engravings, one being that of the Bishops of the Methodist Episcopal Church in 1873, and for twenty-one copies of the minutes of the Baltimore Conference of various dates.

A Sane Editorial.

The following is taken from a just and discriminating editorial by Dr. J. M. Buckley in *The Christian Advocate* of August first. After paying a fitting and deserved tribute to Chancellor Hamilton, some things are said strongly and forcefully to which the Church should listen. No editorial pen has of late more accurately and convincingly outlined the true situation. It is now up to the Church to save its honor and increase its prestige in the religious world. Of Chancellor Hamilton he says:

“We know of no one better qualified as an individual or by his studies and travels for this most

important post, and congratulate the trustees and friends of the University and the Church on his election.

Being neither in the inexperienced period of youth, nor in that of lessened capacity in which minutiae and routine absorb declining strength to the exclusion of originality, he should be able to energize, to encourage and, after a little specific experience, both to guide and lead. His achievements in school and the University will be a powerful stimulus to students. His success in the pastorate will aid him in diffusing a religious spirit throughout the institution in every stage of its development; and his powers as a speaker will gain him a hearing.

The American University has an inclusive name. By implication it indicates the spirit of Methodism as connected with the great country which has monopolized the title—America. Its establishment was talked of before the new Chancellor was born, but the ever-increasing enterprises, to serve the ever-expanding nation, which were starting, made it impossible for the time.

When Bishop HURST became resident Bishop at Washington he gave to the project of the University his whole heart and so much of his strength as to wear him down, and to abstract an undue proportion from the time and energy ever greedily demanded of the Episcopal office. Midway in his career there it became obvious that he was unable to maintain popular enthusiasm at the height which it had reached. While his personal enthusiasm diminished not but became almost all inclusive—so that he looked at the Church and the nation through the University—his plans became numerous, his suggestions something derived from ratiocination rather than intense concentration upon things as they were, until under the pressure he literally broke down. This and his death produced a period not of entire cessation, but of hesitation and uncertainty.

The election of Bishop McCABE as Chancellor was based upon the fact that his persuasive powers and his apparently unlimited elasticity would grapple the situation and draw, drive or hurl the cause upon the conscience and heart of American Methodism. But his own warm heart was heavy with bearing scores of suffering people, an indefinite number of struggling schools, a still larger and ever-increasing number of necessary churches, and the continent of South America, of which he carried in his mind every station, every preacher and every enterprise. Under such a multitude of drawings, hither and yon, his work for the University was frequently interrupted. Often he debated whether to resign his place in the episcopacy, but something pulled his heartstrings, saying, 'It was the CHURCH that placed you here.' He was exhausting himself without knowing it, and his death was like a great

tree, full of ripening fruit, falling before a lightning stroke.

The American University was not started in haste. It had the full recognition of the General Conference.

The bishops unanimously appealed to the Church in its behalf.

The Methodist Episcopal Church, South, stretched forth a cordial hand, and its bishops gave it their support and counsel.

It is located in the Capital of the United States. Other denominations have seen and are utilizing the facilities of Washington as the seat of a university, especially that ever wise body, the Roman Catholic Church.

The American University has an unsurpassed property.

Many gifts, bequests and pledges have been made, all based on the fact that Methodism is committed to the completion.

Should it fail, the prestige of the Church will be diminished and—what is more important—its honor tarnished.

Tell it not in Washington, publish it not in the streets of the hundred cities of the land, that Methodism, after laying so substantial a foundation, is not able to finish, and all who behold it begin to mock, saying, 'This great body of Christians and progressive educators began to build and are not able to finish.'

We bespeak for Chancellor Hamilton an open door into the hearts and churches of those who claim to have united 'the pair so long disjointed, KNOWLEDGE and VITAL PIETY.'

Making Haste Slowly.

All great undertakings necessarily move slowly. The mushroom grows up in a single night, to be trampled to death in a moment by a thoughtless child. The great oak requires a hundred years to so spread its branches that it can give adequate shelter to lowing herds and heated husbandmen. The Cathedral at Milan was commenced in 1380, and has never since been without scaffolding and the noise of workmen. It has niches for ten thousand statues. Four thousand of them still are empty.

Give great things a chance to grow. Do not despair. Do not find fault and criticize. The American University will be in its infancy a thousand years from now, and its growth up to the present, in view of all the circumstances, is one of the marvels in the educational world.

A Remarkable Coincident.

Editor University Courier :

The fine face of the new Chancellor of the American University, as it looks forth from the page of the July issue, recalls what now seems very significant and almost prophetic.

In the winter of 1889-90 something like a score of Methodists were in Berlin, Germany, pursuing courses of study, mostly at the University. As a rule they were loyal to our chief church in Junkerstrasse, the pastor of which took the kindest of interest in them. He was wont to invite them occasionally for the cheer and home-news-telling of an evening at his parsonage.

Such took place some night in January. Before going thero to the writer had received and devoured his *Christian Advocate*, and had read the announcement of Bishop Hurst's purchase of ninety acres of land in the suburbs of Washington, and the launching of the project for the American University.

Naturally during the evening the writer retold

the story, with varying wonderment and response on the part of the company. The undertaking seemed to strike most deeply the thought and emotions of a tall, fine-faced, broad-shouldered young Harvard Methodist, whose geniality and open-mindedness always made him the focus in any company. Again and again during the evening did he revert to the subject of the project, until at length it was proposed by him that we should send to Bishop Hurst an address of congratulation. He was asked to prepare such, and it was signed by those present, and by others found afterward. Being a voice from Methodists across the water and so situated, Bishop Hurst acknowledged the receipt of the same with peculiar pleasure.

That event was nearly a score of years ago. That writer and prosperer was Franklin Hamilton, now the successor of Bishops Hurst and McCabe, the third Chancellor of the American University.

Yours truly,

WILBUR F. STEELE.

COLLEGE OF
HISTORY.

Picture of Site and Present Buildings of the American University.

The above picture, just taken, gives a bird's-eye view of at least ten acres of the University grounds and shows the relative position of the two buildings—the College of History and College of Government. It also shows beautiful Nebraska avenue, graded and macadamized, along our entire eastern frontage which improvement has brought us both electricity and water. Our grounds have been graded, in the main, as the picture shows, to the avenue, and have been fenced. \$11,000 has been expended in this work.

The remaining eighty odd acres of the campus are beautifully related to the plot shown above. Hill-lock and dale are mingled in just proportion. The slopes bend gracefully eastward toward the city and westward toward the Potomac and the far-off mountain peaks. Commanding knolls stand waiting for buildings. If it were possible to have the camera catch in its sweep, for a single picture, every inch of the campus, all would exclaim, as those who have seen it have done, "there is no such site for a university in all the world."

The above picture will give some slight idea of the contour of the grounds and the advancing buildings and their relation to each other. It shows that something is being done. Under the picture we indicate several objects of peculiar interest. Fort Gaines, the first fortification thrown up about Washington for its protection during the civil war. It was garrisoned by Pennsylvania reserves. The University grounds are in the form of a keystone. These facts should give Pennsylvanians great interest in this work. We treasure, and should like to preserve, the old farm-house, where it is certain, from reliable testimony secured, George Washington has stopped on more than one occasion.

Come to Washington and investigate for yourself that which cannot adequately be described, and realize that "the half has never been told," concerning the rare beauty of these grounds and buildings.

"Torch-Bearers Whose Light Will Never Die."

Harvard University recently celebrated the three hundredth anniversary of the birth of John Harvard. The climax of the celebration was reached in a Grand Night Carnival of Lights. A report of this carnival says: "In the dark Stadium, with only Harvard men and a few invited friends as witnesses, the celebrators, bearing torches, marched this way and that in strange figures, sang old songs, and then, forming a great shining H that covered the whole field, watched and cheered the fireworks. Then the whole company filed out on the marshes behind the Stadium, and, making a big circle around a bonfire, sang again until the logs sank in a shower of sparks, and 'Fair Harvard' ended the spectacle. The whole affair was of a barbaric splendor, unique among anniversary celebrations."

Before setting out for the Stadium all had assembled in the college yard. There President Eliot standing with bared head on the steps of Holyworthy Hall, with the light of hundreds of torches in his face, delivered a short eulogy on the young founder of the university. "John Harvard," he said, "originated a great and enduring movement among his people, and this stream of education started with that young, sick, dying minister. It is absolutely characteristic of the American people that this stream of education has continued to grow and spread." Then, appealing more directly to the company before him, President Eliot continued: "Young men, some of you to-night are bearing torches. John Harvard was a torch-bearer, and his light never will go out. I hope every one of you will be light-givers of freedom and education. Now we are going over to the Stadium to light another light in honor of John Harvard. The light he lit is immortal."

Where in all our history could be found a better illustration of the immortality that is assured to one who helps to found a school of learning? In commenting upon this John Harvard Anniversary, the "Boston Herald" says that the generous young divine unconsciously reared for himself a prodigious memorial. Compared with such a university as Harvard, the editor adds: "What is a shaft of stone even though it tower as high as Washington's in the national capital, or a work of art like the Taj Mahal in India?"

The name and example of the founder of a school gleams like a rainbow above life's rushing tide. Unerringly it arches the obliterating flood of the years. Other names pass away. Other memories fade. But the name and memory of such a benefactor will offer a world of promise, so long as the sun shines and the waters fall.

Such a life is indeed a torch-bearer whose light never will die. The light which it lights is immortal. More is known to-day about John Harvard than is known of almost any other early settler in America. And that kindred spirit, who sang at the great banquet held in the memory of John Harvard, voiced the feelings of all his hearers when he said of the young torch bearer who lighted the light of Harvard University:

"Yes, thou art known; we feel, we see thee near us,
Though Art be blind, though History be dumb,
Down through the centuries thou com'st to cheer us,
Even as of old the saints of God have come.
* * * * *

"Seer of visions, breaking through the ages,
Dreamer of dreams that wake the living soul,
Preacher of love, whose bounties are thy pages,
Prophet of God, whose nation is thy scroll—

Thou who mad'st glad the solitary places,
Thou who hast set the generations free,
Look on thy struggling children's lighted faces,
Teach us to love, to triumph and to see."

Practical Stewardship.

During his recent visit to this country, in the most pregnant sermon, perhaps, that he preached, the Lord Bishop of London uttered a note of warning to people of means in this land, which it would behoove us all to heed. The Bishop was laying stress on the principle that "all wealth is a stewardship, for the use of which the possessor eventually must give account."

We quote his own words. They are of infinite suggestion. "You are not your own. Nothing that you have is your own. We have not learned the Christian religion if we have not learned the lesson of stewardship. My home has been the home of the Bishops of London for thirteen hundred years. Suppose I should say that it was my own, and that the Bishop's income of fifty thousand dollars a year was my own. I would be called a madman. The man who thinks he owns what he has in his keeping is no less a madman. This applies

alike to the boy and his pocket money and to the millionaire and his millions. Disregard of this trust is the cause of all the social evils of London and New York. If every man considered himself as a steward, there would be no object in dishonesty. Stewardship would do away with the tyranny of capital. * * * The rise of bitter socialism, the new terror of Europe, is due to the neglect of the elementary principles of the Christian social religion. * * * And the same great message must be applied to all the other gifts and possessions which a man has, his influence in the world, his natural gifts, his talents."

Tide Marks of Progress.

Rev. J. W. McNeil, D. D., Presiding Elder of Mt. Vernon District of the Southern Illinois Conference, has adopted for his district the plan to ask every member on his district to give a penny a day during this coming year to help in building the American University. Dr. McNeil's name deserves to be written down in gold. Would that every Presiding Elder in the church might take upon his heart this privilege of bringing to his people an open door for beneficence to the American University. A penny a day from each member of the Methodist Episcopal Church for a single year would build all the proposed buildings for our institution and leave six million dollars for an endowment fund.

Miss Elizabeth Pierce of Boston and Washington has offered to loan and later bequeath to our University the family hall clock of Senator Charles Sumner. She has proposed to do this beautiful thing in order that there may be kept together so far as possible the belongings of the great statesman. The University already possesses the dining room-table and chairs of Mr. Sumner.

Rev. Lewis E. Luzzell, of Baroda, India, has promised to aid in collecting for our proposed College of Missions objects and symbols illustrating India's ethnic religions.

Mrs. Elizabeth St. John Matthews has renewed her promise to make for the University a life size bronze bust on a marble pedestal of Bishop McCabe. Mrs. Matthews took the death mask of Bishop McCabe. She soon will begin the preliminary modelling for the bust.

Every gift made to the University will have prompt acknowledgment in the COURIER.

The Call for a National University.

A joint committee of the National Association of State Universities and of the National Educational Association recently adopted a recommendation to Congress, calling for the establishment in Washington of a National University, to be supported by the Federal Government.

Is this not simply another illustration of the far-seeing wisdom shown in the foundation of the American University? Is it not an acknowledgment by the highest educational authorities of the country that the American University was called into being by a need for just such an institution? One of the public prints, in criticising this action, rather jeeringly suggests that "the great National University founded and administered by the Federal Government never is but always is about to be." And the suggestion is added that possibly the explanation for the non-appearance of such a university is that there is no guarantee that it would do any work which existing institutions are unable to perform.

We take issue with this sapient editor. All educators are aware that never was there such need as today for a properly constructed university which shall be able to utilize aright the unparalleled resources at our national capital. With unlimited funds it would require one hundred years to bring together the collections now existing at Washington which are the treasures of the nation. No such scientific and literary collections are massed in any single city on earth. Even in a century, with money untold, those treasures could not be duplicated. They are unique. The opportunity for their gathering is past. All the collections of all the other universities in this land combined in time will be surpassed by the equipment of this one city of Washington. And this matchless and ever-growing wealth of educational resource now is open to the will of every properly accredited student at the capital.

The method by which the future National University is to be constituted is a mere secondary question of detail, which in time will take care of itself. We who are advocating the National University idea all stand shoulder to shoulder in the one firm belief in its need and in unconquerable faith in its final accomplishment.

Editorial Notes.

— THE colors of The American University are red, white and blue.

— A NEW high-water mark has been made in gifts to benevolences in the year just closed. The grand total reaches the magnificent sum of \$125,356,973. This is at the rate of about \$15,000 for every hour. The world certainly grows better.

— THERE is being organized a Hurst-McCabe Memorial to commemorate the two bishops who have served as Chancellors of the American University. A professorship will be endowed in the name of each. A full statement and plan of this Memorial will be published in our next CORNER.

— A GENEROUS friend has notified us of her willingness to donate to the University various interesting mementos of Bishop Newman and of others who have been makers of Methodism. Such gifts are appreciated peculiarly by us. They will be preserved in our fireproof College of History building.

— PHILANTHROPISTS like Mr. Frederick Weyerhaeuser, who just has established at Yale University a Professorship of Forestry, are far-seeing. They realize that Christian education is the agent which is to be the true transmuter of values. Whatever may be the field in which the university is to work, whether with chemist's crucible or in the attempt to make the material wealth of the earth an unfailling min-

ister to man's well being, still it is the university which is to prove itself the great magician. For the university can take men's work and men's gold and can transmute them into learning and culture and piety and all else that make for social altruism and a higher conception of civic duty.

— ONE of the Fall Conferences has set a good example for all others in passing the following resolution:

"Recognizing the opportunity that now is open to the American University to serve as a bulwark of Protestantism and Americanism, and to set before the whole nation a high ideal of true Christian University training, we extend to this enterprise our heartiest commendation and endorsement. We hope for the immediate completion of the McKinley College of Government building, and pray that the hearts of our people may be opened to the need of such an endowment for this central school that it may begin that distinctive graduate work for which its founders have been planning and building."

— THE visitor to Washington in these days is struck by the numerous noble buildings of national interest and character which now are being erected. One of the Caesars found Rome built of brick and left it built of marble. Washington is rivalling the city of the Caesars. It is becoming an imperial metropolis built of white marble. Some of these buildings, such as the National Museum, will be a part of the equipment of the American University. How fitting that the structures rising on our University Hill are of snowy marble! None ever shall say of us that we have not builded well, or that we have been unmindful of our high destiny.

— WE now are beginning an extended campaign to raise an endowment, by means of which actual work of instruction may be begun. We are seeking for those who are willing to endow professorships bearing their own names, and others who will endow scholarships, and still others who will establish fellowships. How better could you identify your name for all time with things which are to endure, than by linking it to this national school of Christian learning through a gift which shall help to open the University and set in motion its tide of influence which only the ages can measure?

— THE part which the Roman Catholic Church will play in the educational domain of the National Capital may be imagined from the fact that already there are ten great buildings connected with the Catholic University. They are the institutions of the Paulists, the Marists, Holy Cross College, Caldwell Hall of Theology, the university building for Arts and Sciences, the Apostolic Mission, the Lay Dormitory, Trinity College for Women, the Dominicans and the Monastery of the Friars Minor of St. Francis. And another building is about to be erected. Are not the Protestants of this land ready to awake and emulate the zeal of these Catholic churchmen?

— THAT Prince of Philanthropists, Andrew Carnegie, has added \$2,000,000 to the ten million dollars endowment fund of the Carnegie Institution of Washington. In a letter which Mr. Carnegie wrote to the president of the Carnegie Institution announcing this gift he expressed himself as perfectly satisfied that the institution is going to realize not only his expectations but his fondest hopes. The trustees replied to Mr. Carnegie thanking him for the broader opportunity which his philanthropy was giving them for investigation, research and discovery, and the application of knowledge to the improvement of mankind. The Carnegie Institution is about to erect a new office building in the city.

This new gift of Mr. Carnegie is only one more illustration of the increasing richness in educational advantages of the city of Washington. For, under the Carnegie charter, all the institution's liberal provisions for original work and research are a component part of the assets and life of every other educational foundation at Washington. The American University, therefore, is to share the advantages created by this new Carnegie benefaction.

What Our Workers Are Doing.

Since our last report the work has been carried on under a systematic plan of apportionment. Dr. Gutteridge has made two trips through Pennsylvania and West Virginia securing aid for our cause. He has interviewed many people who expressed interest in the work and promises have been made of gifts in the near future.

Dr. Davidson has made two trips through Ohio and West Virginia. He has addressed several

Preachers' Meetings and preached in various churches presenting the cause both publicly and in private.

Dr. Hamilton has worked mainly in New England and New York, and is endeavoring now to perfect a financial policy which will prove an uninterrupted source of supply for the Current Fund of the University.

Mr. Osborn has remained in charge of the office during the absence of the others. He has cared for the correspondence and has revised the records and working details of the office. He also has carried on the Publicity Campaign, setting forth the purpose and claims of our enterprise.

Installation of President Thirkield.

The fifteenth day of November, 1907, was a real letter day in the annals of Howard University. The formal installation of Dr. Wilbur P. Thirkield as President brought a rare assemblage of distinguished persons and a program of addresses exceedingly rich and high in quality. President Roosevelt, Andrew Carnegie (who happened in), the British Ambassador, James Bryce; Secretary of the Interior, James R. Garfield; United States Commissioner of Education, Dr. Elmer E. Brown, and Dr. J. E. W. Bowen, President of Gammon Theological Seminary, Atlanta, were the speakers. Dr. Thirkield also gave an eloquent and effective address on the Meaning of Education. We extend our cordial congratulations to him upon the new life apparent in Howard University, and particularly upon the recent gift of \$50,000 by Mr. Carnegie for a new library. Dr. Thirkield has made a fine impression upon the people of Washington during his first year's actual service as president of Howard.

Gift of Mr. Frank X. Kreidler.

Real estate gifts have been many and valuable to the American University. The latest comes from Mr. Frank X. Kreidler, of Nebraska, Pa., who sends a deed for five valuable lots well located in University Heights, a sub-division not far removed from the grounds of the University. Mr. Kreidler paid in the neighborhood of \$5,000 for these lots some years since, and as improvements are rapidly being made in that section of the District, the lots will surely increase in value. The gift is greatly appre-

ented and Mr. Kreidler has added another golden link to his long chain of benefactions. The gift is to be applied to the McCabe Memorial Endowment. Would not the opening of the New Year be a good time for many to remember this great work by sending deeds for lots, house or farm? Some who have no ready money might help the work in this way. We should turn the gift to noble uses.

Strong Approval by Senator Dolliver.

At the session of the Northwest Iowa Conference recently held, Senator Jonathan P. Dolliver took occasion, after the presentation of the work of the University by Dr. John A. Gutteridge, to say some strong things regarding the work which greatly impressed the conference. Coming from such a source the words have great weight. He said: "For many years I have been a Trustee of the American University, and at the beginning I must admit that I had a prejudice against a Central University. My association with Bishop McCabe changed my mind and convinced me of the wonderful possibilities and the great future of the institution at Washington. The great libraries are there, and it is well that the Methodists of the country should have their great University there. It has a magnificent tract of land which in the lifetime of many who hear me will be worth from five to ten millions of dollars. There is, however, no hurry about its growth. Foster all smaller institutions and they in time will feed the big University with students. It is my prediction that the institution at Washington will in time prove the greatest triumph of Methodism. The people have more money than ever before, and are going to put a lot of it in such institutions."

Death of Judge McComas.

The sudden death of Justice Louis E. McComas, of the Court of Appeals of the District of Columbia, on November 10, 1907, removes an honored member from the Board of Trustees of the American University. For nearly fourteen years his name has stood with others in that relation. He has well and faithfully served this District twice in periods of judicial office, the first time as Justice of the Supreme Court, and his native State, Maryland, thrice as one of her Representatives in the National Congress and once as one of her United States Senators. He

was a graduate of Dickinson College, and a professor of international law in Georgetown University, and received the doctorate of laws from both institutions. He was a man of marked intellectual qualities, and of unimpeachable character. He is greatly missed in the many circles where he was a welcome and active member. He won many firm friends. His dust rests at Hagerstown, near his native town, Williamsport, Maryland. His memory is a pleasant one and his record good.

To his surviving wife and daughter we extend our sympathy in their great sorrow. His noble spirit and lofty aims will be a heritage of comfort to them as they are a stimulus to us.

"Concerning the Collection."

In accordance with the encyclical of the Pope ordering it, the annual collection for the Catholic University at Washington was made not long ago in all the Roman Catholic churches in the United States.

Concerning this collection Cardinal Gibbons, who is chancellor of the Catholic University, sent a letter to the bishops throughout the land. In this letter he said: "To become in reality what its name implies the university needs a fund of at least two million dollars. At present we have only \$550,000. The remaining \$1,450,000 should soon be raised. We have in prospect, on a reasonable expectation, \$150,000, thus leaving \$1,000,000, which I sincerely trust will be obtained by earnest efforts in the near future. The proposed endowment of \$2,000,000 would mean an annual income of \$80,000. In comparison with the revenues of the older universities in our country this is not a large amount."

Have we not here an example and a far-reaching suggestion concerning the needed endowment for the American University? Had we been in Washington first, and had our efforts been crowned with such opportunities for help as are evidenced in this letter of Cardinal Gibbons, would not the Roman Catholics have said of us "They have done wisely and well. They are far-seeing! They have known their day of visitation?"

The Expanding Museum.

One of the large central rooms of the College of History has been fitted with handsome cabinets, where at least for the time being, until a special build-

ing shall be erected, all objects belonging to the museum in any department can be displayed.

In our last issue mention was made of the valuable gifts received from two sources. Some time has recently been given to filling the cabinets and the results are surprising. The collection is more varied and interesting than was anticipated. Unique things have come from many thoughtful friends, and their massing and cataloguing has revealed their rare worth. We beg friends who read this item to remember us with such gifts in this line as would be valuable in our contemplated work. One cabinet has just been set aside for the loan collection made by the courtesy of Mr. J. B. Hammond. It includes a brick from the foundation of the house in which George Washington was born; revolutionary musket and other weapons of defense used both in the war of the Revolution and the civil war; spear used in John Brown's Raid; large collection of money in circulation during the civil war, and many other articles of interest and of various historical connections.

Concentrating All Gifts to Buildings in College of Government.

A letter has recently been sent to every one who has subscribed to any contemplated building in the plans of the University asking them to make payment of their subscription at once, and permit the use of the money for the time being in the completion of the College of Government. The letter embodies these important facts: Upon the completion of the McKinley Memorial Ohio College of Government we shall have facilities sufficient for the opening of the American University for actual work. All other building plans ought to be held in abeyance until this structure is completed. It will require about \$140,000 to do this.

In pledges to the McKinley building and other proposed buildings we have subscriptions amounting to \$121,300. If all these outstanding pledges could be utilized on the building now being erected it could be pushed to speedy completion. To compass this end it is asked that those who have subscribed to other buildings shall temporarily, not permanently, transfer their subscriptions to the College of Government building, that we at once may be enabled to finish it, and thus make ready for the opening of work. A sacred pledge is given to return the money

thus diverted for the time being to the channel for which it originally was intended. An early payment of every subscription is imperative. Upon you it now depends whether the McKinley College of Government building shall be pushed to immediate completion and the way made for the opening of the University. A new era for the American University is dawning. For nearly a score of years there has been struggle unceasing. But faith is about to be justified and heroic toil rewarded. We are preparing to open for work. The church and the country demand this. Students are waiting. The vast and unlimited opportunities of this great capital are beckoning us. Every subscriber to any building fund will be glad to assist in this happy consummation under the plan proposed. We must unite in one thing and do it, and not dissipate both our energies and funds, and at no distant day there shall be seen completed on its ridge beside the Potomac the second noble and classic white marble building of the American University.

Books Received.

Miss Abbie Mills, of Los Angeles, formerly of Iowa, known as a writer and helper of the churches for many years, has sent us a copy of her new book "Grace and Glory," a neat duodecimo containing 361 pages of mingled prose and verse. To Professor George B. Merriman, late of Rutgers College, and once a school friend of "Chaplain" McCabe, we are indebted for six volumes of scientific interest: Thomas Young's Natural Philosophy and Mechanic Arts, London, 1807 (2 vols.); A. Privat Deschanel's National Philosophy, Translated by J. D. Everett (in four parts), N. Y., 1872; I. Todhunter's The Conflict of Studies and other Essays, London, 1873; Thomas Henry Huxley's Lay Sermons, Addresses and Reviews (3d edition), London and N. Y., 1871; and De Volson Wood's Luminiferous Ether, 1885, pamphlet.

Asbury Memorial Hall.

The following payments have been received since the publication of the last list:

\$100—Jesse L. Hurlbut, George Gaul and estate of P. R. Hawxburst; \$50—John H. Miller; \$30—J. R. T. Lathrop; \$25—W. M. Nelson, W. J. Thompson, Gladstone Hohn and N. L. Bray; \$5—A. H. Thompson, George S. Spencer and Eugene Weaver, Jr.; \$2—J. E. Rudisill.

Form of Will for The American University, Washington, D. C.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

ANNUITY PLAN OF THE AMERICAN UNIVERSITY.

We offer a plain business proposition which provides for a life support for self, wife, children or dependents giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, may do so, and receive in return an annuity bond legally executed and yielding a life long income at fair per cent., payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Officers of the American University.

Chancellor - - - - FRANKLIN HAMILTON.

Vice-Chancellor, BISHOP A. W. WILSON, D. D., LL. D. *Secretary*, REV. WILBUR L. DAVIDSON, D. D.

class mail matter under act of Congress of July 16, 1894

The Old Historic Farmhouse.

Here is presented an interesting picture of an historic old house standing on one of the commanding knolls of the University campus. It is but a stone's throw away from the site of old Fort Gaines,

also on our grounds, the first fortification thrown up for the protection of the Capital City during the civil war. These reminders of the struggles and glory of the past we desire to preserve.

The old farmhouse has weathered the storms of possibly a century and a quarter, and is a relic of the old colonial

days. The date of its erection cannot be definitely settled. It stood there when the Murdocks owned the property in the late days of 1700, then passed to the Davis's and through them to Bishop Hurst, and then to the Trustees of the American University. Some of the Murdock heirs still live, and insist that there is more than tradition to attest the fact that George Washington was an occasional guest in this house, and at least on one occasion spent the night in its "prophet's chamber." While there is no written evidence to substantiate this, the carefully preserved traditions which have come down from generation to generation, in direct family line, give

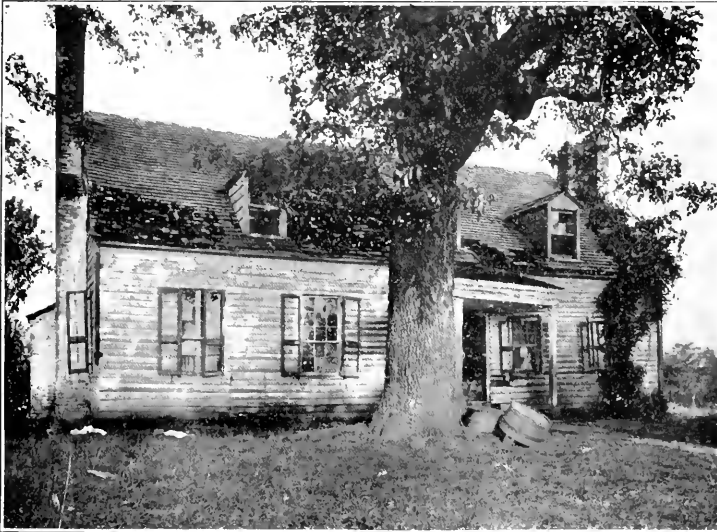

a real historical setting and interest to the incident.

The old house is weather-beaten, and is slowly crumbling into ruins. Unless speedily restored its decaying timbers will give way and nothing will be left but a heap of rubbish ready for the torch.

One of the chief glories of the Capital City is its

historic houses, recalling the splendid achievements of the past, restored and preserved with loving care.

We covet the keeping of this historic house on our grounds, which would become one of the meccas for every tourist and a shrine for every lover of liberty. Such a building, with such

OLD FARMHOUSE IN WHICH WASHINGTON LODGED ON AMERICAN UNIVERSITY GROUNDS.

associations, on the grounds of the American University, recalling to memory the man who by his words gave largest inspiration to the building of the University, should not be allowed to pass away.

Our architect has drawn plans by which the building could be beautifully restored at a cost of \$2,000, and turned into a dormitory accommodating twenty students, or could be used as a hall or museum. It could thus, at small expense, be made to serve a double purpose for all the years to come.

Whose name shall be linked with this restoration in behalf of the University? The one who repairs it may have the privilege of naming the building,

New Gifts by Will.

In the will of the late J. C. Brader, of Nanticoke, Pennsylvania, the American University is remembered with a bequest of \$500, which, by the kindness of the executor, Mr. George C. Brader, will be paid very soon. For such practical and wise beneficence we are grateful, and commend Mr. Brader's example to others who desire to place a part of their fortunes where it will be doing good when they have ceased their personal activities.

We are glad to learn that in the same State a noble friend of our enterprise has incorporated in a will a new provision of \$5,000 for our work. Thus our assets slowly but surely are growing. These evidences of cooperation are most encouraging. We are confident that many others will thus likewise multiply the good deeds of their lives in an unending series of helpful influences on high and broad lines through the generations to come.

Gifts from Our Trustees.

Dr. David H. Carroll, Chairman of the Board, has recently given \$1,500 toward the McKinley Memorial College of Government, completing his subscription of \$5,000. The Hon. George C. Sturgiss, Representative from West Virginia, has also given for the same building \$1,000. For special purposes we have received \$5 from Bishop J. H. Vincent, Indianapolis; \$25 from Dr. T. N. Boyle, Crafton, Pa.; and \$50 from Dr. J. G. Bickerton, of Philadelphia. Our trustees are men of action as well as of counsel.

Other Gifts for the McKinley Memorial.

\$30, Harley Barnes; \$10, F. Edith Wyatt, Robert George; \$5, George S. Gymn, W. J. Springborn, O. M. Stafford, Jr., W. T. McNutt, Ella L. Robbins; \$3.85, W. C. Ambrose; \$2.25, H. A. Adams and wife; \$2, cash, Winifred Stafford; \$1, Mrs. L. Allen, Ella Krueger, K. F. Stafford, Olive M. Stafford.

Receipts for Asbury Memorial.

Since our last issue the following have been received:

\$50, Henry Bridge; \$25, F. G. Mitchell; \$10, J. F. H. Harrison; \$6, W. F. Cotton; \$3.33, J. H. Nutter; \$2, C. S. Sprigg, J. A. Blake; \$1.35, John Thompson; \$1, George W. Coon, J. W. Jefferson.

The Call to Generosity.

In a recent meeting of the London Congregational Union, Montagu Holmes appealed to his hearers for a nobler standard of liberality. He said: "In the Apocalyptic Vision we read that the Lamb who was slain is acclaimed by the hosts of heaven as 'worthy to receive riches.' From whom? Surely from the men and women for whose salvation the Lamb was slain. For our encouragement to give He, the slain One, now graciously condescends to receive our riches, and as He stands waiting for them—think of that—He declares it is more blessed to give than to receive. I am convinced that we want a radical change in our conceptions of Christian giving. I am glad to say that owing to the example and teaching of a saintly father, I resolved at the beginning of my business life to consecrate one-tenth of all I earned, which at the time was ten shillings a week. In the Apostolic Church, I believe, the gift of a tenth was a condition of membership. And one sometimes is tempted to wish it were so with us. The question is not 'what can we spare?' but 'what does God expect from us?' If we will give what God expects from us He, in return, will give all that we expect from Him, and infinitely more; yes, more than we ask or think. But it is for us to take the next step. The true spirit of liberality frees Christian people from the tyranny of the love of money which is one of the cruelest and most hardening tyrannies under which men groan."

If this spirit could spread throughout the Christian Church in America, how easy it would be to build the American University!

Contributions to Our General Fund.

The following generous contributions have recently been made to our General Fund: John S. Huyler, New York, \$350; A. B. F. Kinney, Worcester, Mass., \$50; B. F. De Klyn, New York, \$25; Hon. W. Murray Crane, Dalton, Mass., \$25; Laurus Loomis, New York, \$25; F. M. Strout, Portland, Me., \$20; Horace Benton, Cleveland, \$10; Mrs. Isabella W. March, Los Angeles, \$5.

Mrs. H. F. Kendall, of Painesville, Ohio, has contributed \$10 toward Endowment, and Charles Connell, of Sharon, Pa., has given \$15 for the Hall of Administration.

ROBERT BOYD WARD.

A Newly Elected Trustee.

Robert Boyd Ward is about fifty-five years of age, was born in the city of New York, and has resided in Pittsburg for the past fifty years. Before reaching his majority he was engaged with his father in the manufacture of bread. About thirty years ago he entered into business for himself and has established a large business in the city of Pittsburg. He is President of Ward-Mackey Co., manufacturers of bread and crackers.

Mr. Ward joined the Methodist Episcopal Church at an early age, and has been a member of Emory Church for thirty years, about half of which time he has been President of the Board of Trustees. He is also President of the Methodist Episcopal Church Union, and was recently elected delegate to the General Conference which meets in Baltimore.

Mr. Ward is now on a brief trip to Europe.

The Hurst-McCabe Joint Memorial.

One professorship in the College of History is more than amply provided for by the gift of upwards of \$100,000 by a Christian woman who

wishes the chair to be named in honor of her grandfather. The trustees have heartily approved the plan to raise \$200,000 as an endowment for two more professorships in the same department, in memory of our first two Chancellors, Bishops Hurst and McCabe. A fine beginning has already been made in the gift by Mr. Frank X. Kreidler, of Nebraska, Pa., of five lots of land in the District of Columbia, valued at \$1,800. Each of these great leaders deserves the honor proposed, and the long and sympathetic union in love and labor that signalized their lives will be appropriately prolonged in this worthy and perpetual linking of their names. Many friends will rejoice to take a hand in making this proposition a beautiful reality. Every reader is asked to think, speak and act in the interest of this consummation.

President McKinley's Psalter and Hymnal.

The Metropolitan Methodist Episcopal Church of Washington has presented to the American University the Book of Psalms and the Hymnal which President McKinley used at that church up to the time of his death. Each book bears on a fly-leaf this inscription signed by the treasurer of the church, Mr. James M. Holmes:

"Immediately upon learning that President McKinley was worse from his wound, I went to the church and removed this book from his pew, and after his death, at a meeting of the official board, was directed to make this endorsement, and present it to the American University."

These books will bear a sacred interest through all the years, and constitute an attractive feature in our museum of Methodism.

Proposed Improvements in the District.

Three local improvements in the great northwest section of the city, helpful to our cause, are probable in the near future. One is the expansion of the National Rock Creek Park on its westerly boundary to the grounds of the Cathedral foundation, not far from our site. Another is the extension by loop or branch of one of the electric car systems to the vicinity of the University. The last, but by no means the least, is the early resumption of the work on the opening of Massachusetts avenue, between Wisconsin and Nebraska avenues, beginning at the University site and working eastward.

The University Courier.

DEVOTED TO THE INTERESTS OF

The American University and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price, 25 cents per year.

Address all communications to the Editor, Rev. W. L. Davidson, D.D.,
University Secretary, 1419 F Street N. W.,
Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Editorial Notes.

— MAY 16th will be a red-letter day for the University. Thousands will be on the ground to greet President Roosevelt and enjoy the uplift of the occasion. Make your plans to be present.

— MRS. MATHIAS SAXMAN, of Latrobe, Pennsylvania (formerly Mrs. Robert Wilson of this city), has recently donated to the American University photographs of a ladder of flowers and some of the other decorations used in Metropolitan Church at the reception tendered to Bishop Newman on his election to the Episcopacy, together with a few interesting pictures of prominent preachers.

— THE assets of the American University as just computed show a sum total of \$2,651,695.80. If we now could add to our endowment a sufficient amount to assure us against debt in current expenses the day of academical work would not be far distant. Let every friend rally to our help for a speedy *endowment*.

— A NEW pamphlet entitled "The American University and the National Capital" has just been issued. It contains statements of approval from presidents, senators, bishops, educators, lawyers, historians and other eminent persons. It is printed in colors and makes an attractive appearance.

Those interested can secure a copy by writing Rev. Albert Osborn, 1419 F St. N.W., Washington, D. C.

— SELDOM has the University Senate of the Methodist Episcopal Church offered a wiser suggestion than the following:

"Is it not time, and is it not imperative, that we shall have in the Methodist Episcopal Church a board so constructed and intended as to be the almoner, not only of students for the university in petty loans—a most benign purpose and to be forever perpetuated and honored—but the almoner also of the colleges themselves? A distributor not only of petty loans, but a distributor also of large sums in endowments, buildings, etc., etc., to the entire educational system of the Church?"

If we are to believe Mr. Owen Wister, Europe still outstrips America in the realm of higher education. Mr. Wister tells us that of the greatest living scholars only three are Americans. He adds, "No American university possesses one single teacher of undisputed preeminence." Whether or no this be true, have we not here only another argument in behalf of establishing the American University at the one strategic point in all this western world where American scholars can enjoy better opportunities for research than are possessed by any scholar in Europe?

A Roosevelt Rumor.

From a remark of Mr. Carnegie on the subject of a third term that "The President has other plans," the public press recently gave currency to the rumor that Mr. Carnegie is planning some new and large educational scheme in which Mr. Roosevelt is to take an active and prominent part. Whatever foundation of fact there may or may not be for this report, it is morally certain that all connected with it recognize that the proper location for such an institute would be in Washington. The two new bills introduced into Congress at this session for a National University, though differing from each other considerably in important particulars, and neither being likely to pass both Houses, agree in naming Washington as the fitting place. These currents of opinion and of public interest in education put new emphasis on the wisdom of locating the American University at this growing center of the national life.

REV. FRED M. STONE.

Our Endowment Secretary.

The American University has secured the services of Rev. Fred M. Stone as Endowment Secretary. His duty, in connection with publicly and privately bringing the purpose and interests of the University before the people, will be to raise a large permanent endowment fund. For a number of years he was a well known and popular minister in the North Indiana Conference. As Endowment Secretary of the Woman's College, Baltimore, for the past three years, he made a very favorable impression and became an important factor in the \$500,000 debt raising campaign conducted by that splendid institution. In public speech he is fortunate in possessing a pleasing platform personality, and commands attention from start to finish. In the active pastorate he has been very successful as an organizer and financier; his ministry has always been marked by extensive revivals and he is regarded as one of the best preachers in his Conference. He comes to the University in the prime of life to give the best that is in him to this monumental work of raising a great endowment fund.

The President's Reception of the General Conference.

Unusual interest attends the announcement through Bishop Cranston that President Roosevelt, in naming the day when he will receive the delegates to the approaching General Conference, readily accepts the joint suggestion of the Baltimore Committee and the Executive Committee of the Trustees of the American University that the reception take place at the site of the University. The afternoon of Saturday, May 16, is the time selected. The Marine Band will furnish music suited to the significance and character of the occasion. Transportation will be arranged for by steam and electric cars, and by a shuttle service of carryalls. The delegates number about 800. Brief addresses will be made by the President, Senator Dolliver, and Bishop Cranston. A buffet luncheon will be served to the delegates in the College of History. This midway outing will put expectation on tiptoe. Fair skies and balmy air are hoped for. Should other weather conditions prevail, everybody should bear in mind that President Roosevelt's out-of-doors programs do not fail of execution.

To the delegates free tickets will be issued.

Visitors to the General Conference and members of the families of the delegates will be furnished with tickets for this excursion at actual cost.

What Our Workers Are Doing.

A large part of the work of the officers of the University at this season of the year has been the visitation of the spring Conferences, where there is opportunity, by public address and private interviews, to represent the cause to thousands of our preachers and leading laymen. Chancellor Hamilton's itinerary carries him to Philadelphia, New England Southern, Wyoming, New England, New Hampshire, Vermont, Northern New York, East Maine, Troy and Maine. Dr. Davidson has visited the Wilmington, Central Pennsylvania, Washington, Baltimore, New York and New York East. Dr. Gutteridge's list is the Delaware, New Jersey, East German, Newark and East Swedish. Mr. Osborn has been engaged in furnishing matter for the church papers in the Publicity Campaign, in correspondence and in literary and clerical work at the office.

Charles Henry Fowler.

Great in intellect, great in affection, great in will, was Bishop Charles Henry Fowler. His decease makes a great vacancy. Broad in outlook, devoted to the highest welfare of the church, the country and the race, and strong in administration, his life has counted largely on two generations, and will long continue its fruitful energy. Bishop Fowler combined in himself native ruggedness of character with high culture. He was a mighty preacher and an eloquent lecturer. He was a tender and true friend.

In the higher education he was deeply interested from his young manhood to his last breath. He served as president of the Northwestern University for four years, took special and prominent part in the formation of the Peking and Nanking Universities in China, and the Maclay School of Theology in California, and in the merging of three Methodist colleges in Nebraska into the Nebraska Wesleyan University at Lincoln. He was a trustee of Syracuse University and of Drew Theological Seminary, and an active manager of the Board of Education. He has served as a trustee of the American University for sixteen years. He was particularly interested in the new charter of 1893, and brought his wide experience into use in the transfer of the University from the earlier corporation under the District charter to the present basis of the charter from the National Congress.

At the mass meeting in Exposition Hall in Omaha, at the General Conference of 1892, in the interest of the American University, he spoke on "The University the Defender of the Faith." This characteristically able and eloquent address abounds in strong passages and climaxes of power. Again, at the laying of the corner-stone of the College of History in 1896 he spoke with remarkable vigor of thought and beauty of language on the University as the developer of spiritual forces. He knew Bishop Hurst well and intimately, and greatly admired and loved him. They understood each other as by intuition. It is difficult to think of him as resting in any other way than in the unceasing output of his titanic strength for good ends. Thus we conceive of him in the new-found home on high.

Newly Awakened Interest Manifested.

Nearly all the spring Conferences have passed ringing resolutions in approval of the American University. Wise men realize it would be an everlasting disgrace to the church to lose its present leadership in this movement. Let the General Conference now heartily approve and besides provide some practical method of assistance.

Strong Words from Well Known Men.

Chancellor James R. Day, Syracuse University: "I would not have started the American University under the conditions at that time in our college work. But I would not give it up now that it has been started. That would be a misfortune that would reflect upon all of our colleges.

My thought is that such buildings as are necessary to the most important departments should be secured and that the endowment ought to be pushed vigorously without limit, and the full and complete policy of the University should wait for the light of developments.

I have the largest confidence in your success."

Hon. William H. Taft, Secretary of War:

"I have your letter of February 6th. I sincerely hope that the American University will have a long life, and that the beautiful buildings and site assigned to it may be properly availed of to make it useful to the country at large as it ought to be. The beauty of the surroundings is great and the architecture and solidity of the buildings are such as to indicate that it is being built for a long life of usefulness."

Endorsement by Philadelphia Conference.

A good example has been set other Conferences in the action of the Philadelphia Conference at its recent session in passing the following resolutions:

Whereas, in collegiate and higher education a growing interest is possessing our people, and a new era is at hand; and

Whereas, we are pleased to note that the American University of Washington, D. C., is growing in favor and that its prospects are brightening; and

Whereas, all of our existing educational institutions will be benefited by the speedy opening of this institution:

Be it resolved, That we have heard with pleasure Dr. Franklin Hamilton, the Chancellor, who concretes in himself the cultural and educational ideas of New England with the warmth and brotherliness of the sunny south land; that we congratulate the church at large upon the approaching realization of the vision of Bishops Hurst and McCabe. We extend to him the heartiest welcome to our pulpits, and commend him and his great cause to the benevolence of our people.

That we commend this enterprise to the loyalty and sympathy of our people everywhere, praying for the speedy realization of the noble efforts which it proposes in behalf of Protestantism, Americanism and the interests of the Kingdom.

REV. DAVID B. JOHNSON.

Our New Field Secretary.

The Reverend David B. Johnson, a member of the Central Illinois Conference, has just taken the field in the interest of the American University. He is a brother of the Rev. Dr. A. A. Johnson, of Denver, and of the Rev. J. A. Johnson, of Los Angeles. His lineage has given him a blending of the English-German and Scotch-Irish elements of our American composite, and through his veins runs the blood of Robert Bruce. The militant spirit of patriotism is traceable through his ancestry, among whom are found soldiers of the Revolutionary, the Mexican and the Civil wars. He is a graduate of De Pauw University. He has had wide experience in the pastoral field in Texas, in Michigan and in Illinois. He organized the Illinois branch of the Christian Temperance Alliance, the forerunner of the present vigorous and effective Anti-Saloon League, which he has successfully served as field secretary. He is also the Superintendent of the American Christian Federation and Civic Union—now in process of formation—an organization closely

allied in its spirit and purpose with the American University as the exponent of a united Protestantism in the field of the higher education. We bespeak a fair hearing for Mr. Johnson. He is an earnest and intelligent advocate of the high and noble causes of Christian union and Christian culture.

Battle-ships versus Christian Education.

Every month this people is paying \$8,000,000 and more for the possession and use of some twenty floating fortresses. Before any more of these leviathans are built let everybody learn what such luxuries cost.

The price of one battle-ship could plant a Tuskegee Institute in every southern State. It could put up two hundred fine new buildings on as many college campuses. With two battle-ships we could more than double the endowments of the fifty-three chief colleges of the Methodist Episcopal Church. One battle-ship costs "more than the most generously endowed hospitals and laboratories for the study of disease and the relief of suffering; it takes more money than a hundred public libraries;" into the making of one such death-dealing machine goes "all the wealth produced by the skill and labor on 500,000 acres of fertile land."

But now listen! To our astonishment note this! Pile together all the land, buildings, equipment and furnishings, the accumulated plants of the seven oldest and most historic colleges and universities in New England, exclusive of their endowments. Pile together the accumulated plants of Harvard University, Yale University, Williams College, Brown University, Amherst College, Bowdoin College, Dartmouth College—and they, all together, would cost less by two million dollars than the price of one battle-ship.

The estimated life of a battle-ship is ten years. Every ten years one of these monsters of destruction is obliterated. That is as if every ten years there were an earthquake or cataclysm swallowing up the land and buildings of the seven oldest and most historic universities and colleges of New England, and two million dollars more!

Give us here in Washington the price of one battle-ship and we will build the American University and set in operation forces for enlightenment and righteousness which only the ages can measure.

Form of Will for The American University, Washington, D. C.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names, their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

ANNUITY PLAN OF THE AMERICAN UNIVERSITY.

We offer a plain business proposition which provides for a life support for self, wife, children or dependents giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, may do so, and receive in return an annuity bond legally executed and yielding a life long income at fair per cent., payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Officers of the American University.

Chancellor - - - - FRANKLIN HAMILTON.

Vice-Chancellor, BISHOP A. W. WILSON, D. D., LL. D.

Secretary, REV. WILBUR L. DAVIDSON, D. D.

Financial Sec'y, REV. J. A. GUTTERIDGE, D. D.

GENERAL CONFERENCE EXCURSION TO THE AMERICAN UNIVERSITY, ADDRESSED BY PRESIDENT ROOSEVELT.

General Conference Excursion to the American University.

The day was Saturday, May 16th. Leaden skies and a chill in the air made the day all the more enjoyable for such an outing. Nine hundred and three free tickets were given to delegates, bishops, the press, missionaries and fraternal delegates. Six hundred and eight tickets were sold to visitors at actual cost. Splendidly equipped special trains on both the Baltimore and Ohio and Pennsylvania Railroads brought the excursionists to Washington. Contrary to arrangements, both trains reached the city at exactly the same moment. It had been planned to have them arrive ten minutes apart. This made a little unlooked for congestion.

Fifteen mammoth open street cars, specially chartered, were in waiting to carry excursionists to Loughborough road. From this point a carry-all

shuttle service of twenty wagons was in commission during the entire afternoon, carrying free the excursionists to and from the grounds. As the day was pleasant many preferred to walk the short half mile—which will be provided with electric service the moment the University is open for students.

In the short space of one hour and a half fifteen hundred and seventeen persons partook of the elegant buffet luncheon served in the main hall of the College of History by one of Washington's most famous caterers. All speak of it in highest praise. To serve so many in so short a time was little less than a miracle. The crowd was larger than was anticipated, as there was no such shrinkage as was expected in the free tickets given to the delegates. The desire to be on hand when the President arrived made the last half hour of the luncheon a little uncomfortable.

A speakers' stand, handsomely decorated, had been erected. Around it in a semi-circle thirteen hundred chairs had been placed for the delegates. Through the kindness of the Navy Department the full United States Marine Band played as they only can play, during the entire afternoon. Fully four thousand people surrounded the stand when promptly at 3 p. m. the President and Mrs. Roosevelt arrived. The Marine Band, standing, played the Presidential salute and the great audience broke into wildest cheering. The scene will never be forgotten by those who were present. It was the proudest day Methodism ever saw in Washington, and the most memorable day in the history of the American University. World-wide Methodism looked upon the noble site and the advancing buildings of the University, and if in the days to come they shall show enlarged interest in the work the generosity of the noble friends who made this excursion possible will be justified. We are glad to present to our readers in this memorial issue a full account of the services of the day, which now follows:

Chancellor Hamilton's Introductory Remarks.

In behalf of the Trustees of the American University, I welcome you to this place—a place consecrated by tender and holy memories, for during our civil war the first fortification built in defence of the national capital was erected upon the very spot where to-day you are gathered. Yonder you can mark the grassy ramparts' slippery swell, and the rifle-pits, where beside their campfires lay upon their arms the Pennsylvania Reserves. Shall we not, therefore, thank Almighty God that, as a symbol of the widening empire of the Prince of Peace, it now is in the hearts of God's people that upon this self-same sacred height shall rise a mighty fortress of national defence, an impregnable entrenchment of righteousness?

But it is not my privilege to-day to address you. I merely may introduce to you him who is to serve as the chairman of this occasion. And yet I know that you will bear with me if, out of a full heart, I venture to say a word concerning him. Let it be said, therefore, that he is worthy of the men who have gone before—John P. Newman, whose classic mind took fire at the thought of this enterprise; John Fletcher Hurst, who set his unconquerable will to its accomplishment; Charles Caldwell McCabe, that Adonais of immortal song, whose blithe spirit set all our souls to singing. Yes, he is worthy of them all. His vast business experience, his sagacity, his passion for accomplishment, his vision, his hope, his consecration, are and have been a bulwark of inestimable value to this cause.

Your Excellency, President Roosevelt (applause), for whom my own personal welcome must thrill a

little more warmly because of our common annamater, dear fathers and brethren, sisters, friends, I have the high privilege of introducing to you, as the chairman of this occasion, our resident Bishop at Washington, Bishop Earl Cranston.

Bishop Warren's Prayer.

God of our fathers, maker of heaven and earth, thou hast made us for thyself. All our springs are in thee; and we never reach to the height of grandeur in our lives until we are lost in God. We thank thee that thou hast given us a marvellous school-house—every piece of earth ready to burst into flower, every scraggy tree ready to bear fruit, all the heavens above us ready to bloom and sing with stars. God in heaven, we thank thee for the place of our dwelling. And we thank thee that we were made in thine image, and dowered with thy power that we might have dominion over the works of thy hands. And thou hast never put thy hand upon aught, or spoken to anything, without leaving in it more of wisdom and power than our minds can dream of. So we ask that thou wilt lighten the eyes of our understanding. Do thou intensify and enlarge our faculties, that we may know the hope of our calling and what is the exceeding greatness of the glory of God's inheritance in his saints. May we bring glory to God. We ask that this institution, planted in prayer, matured in faith, may speedily realize the object of its founders. We ask, O God, that we may be able here to read the secret things of God, written in the earth, written in the hearts of men, written in the skies. Enlarge our thoughts, increase our faculties to know God by the works of his hands. We ask thy blessing, O God, upon this nation, blessed of heaven more than any other in all history. Raise it up, not to be a mere city set on a hill, but a nation on ranges of rocky mountains on all sides of the continent, that it may lighten the world, and show the glory of liberty, of independence, of free thought, of glorious manhood. May all that toil share richly in the proceeds thereof. All whose hands are hard, may their hearts be tender and open toward God. Bless, we beseech thee, the President of the United States. May he be really God's vicegerent, ruling in his name and according to his ideas—righteousness exalted and established here and in the ends of the earth. The Lord lead us all into the greatness of his glory so that we may live worthy of God, and finally may we be taken up into the heavenly, sit down at the throne of the universe with Christ Jesus our Lord, and be at home—not ashamed, but fitted for the place by the infinite help of this earth, God's footstool, and of God's spirit in our hearts. We ask it in the name of him who loved us enough to die for us—Christ our Lord. Amen.

The vast audience joined in singing "Faith of Our Fathers," led in the singing by Mr. Percy S. Foster.

Bishop Cranston: That is our hymn. The next will be the President's hymn, sung by a number of our German preachers, not professional singers, who carry still the heart of the fatherland—Martin Luther's hymn by the German members of the General Conference.

Bishop Cranston's Address, and his introduction of President Roosevelt.

Ladies and Gentlemen:

For years the American University had no other grant of being than the purpose and plan of its founder, Bishop John F. Hurst. Time will allow but the briefest summary of its history to date.

This site was purchased in 1890. Congress granted the charter in 1893. The College of History building was completed at a cost of \$176,000 in 1898, and the corner-stone of the College of Government laid by President Roosevelt in 1902. That building now stands before us, its noble proportions appealing for the funds needed for its completion. Ill health compelled the resignation, in 1902, of Bishop Hurst as Chancellor; and when Bishop McCabe, his successor, was removed by death, the Rev. Franklin Hamilton, D. D., was chosen to that responsible office. He is in fact the first Chancellor to devote all his time and energies to this great work, and he has entered upon his duties with all the zeal and courage characteristic of the distinguished family to which he belongs. Under his leadership new hopes have already been inspired for the early opening of class work.

The bold plans of Bishop Hurst were a daring challenge to the benevolence and enterprise of a great Church which was already engaged in building and endowing numerous schools of high grade. Many leaders were as doubtful as he was confident of the expediency of the movement. But before us is the proof that he did not believe and plan in vain. Two millions of dollars are no mean sum for a beginning.

To-day, for the first time, the Church looks upon what has been accomplished. This great gathering of representative men and women must be impressed by what they see, and will tell even to our remotest bounds beyond the oceans that the American University is already more than the dream of a devout scholar. Local ambitions have sometimes led the Church into educational ventures that time has proved to have been premature and disastrous, but it is simply inconceivable that this great enterprise at the Capital of the nation, commanded into being by both need and opportunity, with many millions' worth of equipment at hand, and indorsed by successive General Conferences, shall fail of ultimate triumph.

Every consideration that should appeal to a

wealthy and progressive body of Protestant Christians demands the earliest possible opening of these marble buildings for the highest learning under the sadest auspices. Scholars the world must have. Let Christ be Headmaster over the schools in which they are trained. It is the confident hope of the Trustees that what you see here to-day will reinforce your interest in this, our most conspicuous and comprehensive undertaking. Ours, yet not ours. The very name American forbids the word sectarian. Broad as the universe must be the plan of a modern university; free as the essential spirit of Protestantism and no less reverent, its search for truth.

Delegates, friends and Christian educators, we covet your closer affiliation with us in the inspiring purpose to create here an institution that shall keep every avenue of the most advanced learning open all the way and all the time to God and his Christ.

And now a happy privilege is mine. I am honored by the Trustees of the American University with the duty of presenting to you the President of the United States—a ruler for whom you are taught to pray and do pray with fervent spirit; the ruler who represents the sovereignty of the American people, but whose hand I have seen heartily offered to an American workman; a ruler who is in cordial sympathy with the missionary movements of all the churches; a ruler who has lifted politics to the plane of statesmanship and forced diplomacy into the open; a ruler who takes the people into his confidence because he has nothing to conceal; a ruler who is none the less a man because a ruler, and who as a man, in the intensity of his convictions and feelings, in his zeal for righteousness, social, commercial, political, ethical; in his fearless rebuking of iniquity and his belief in a judgment day for evildoers, as well as in his readiness to bear witness to the faith that is in him—is a born Methodist, but ecclesiastically misplaced in early life. He is not now out of place, but at home with the family here to-day.

Methodists of all the Americas and Mexico; Methodists of Germany, Norway, Sweden, Denmark and Italy; Methodists of Japan, Korea, China, India, Malaysia and Africa; Methodists of all the world—your salutations to Theodore Roosevelt, President of the United States of America, friend of higher learning and of every good cause.

President Roosevelt's Address.

Bishop Cranston, I want to thank you personally for that introduction. I value it more than I can express. I do. I feel akin to you. I would be glad to address you at any time, in any place. But I am doubly glad to address you here; and I most earnestly wish you well in your purpose to plant here a great American University—a university that shall fulfill the dream of the greatest and first American President, George Washington.

And let me say a special word of thanks to those brethren who sang that hymn that I happen to be fondest of. I sing very badly, but I joined with you in all three verses—

“Ein feste burg ist unser Gott.”

And now, friends, it is indeed a pleasure to be with you to-day and to bid you welcome on behalf of the nation, here in the Capital of the nation. I am glad to meet here good Methodists from so many lands. The Methodist Church plays a great part in many lands; and yet I think I can say that in none other has it played so great and peculiar a part as here in the United States. Its history is indissolubly interwoven with the history of our country for the six score years since the constitutional convention made us really a nation. Methodism in America entered on its period of rapid growth just about the time of Washington's first presidency. Its essential democracy, its fiery and restless energy of spirit, and the wide play that it gave to individual initiative, all tended to make it peculiarly congenial to a hardy and virile folk, democratic to the core, prizing individual independence above all earthly possessions, and engaged in the rough and stern work of conquering a continent. Methodism spread even among the old communities and the long-settled districts of the Atlantic tide water; but its phenomenal growth was from these regions westward. The whole country is under a debt of gratitude to the Methodist circuit riders, the Methodist pioneer preachers, whose movement westward kept pace with the movement of the frontier, who shared all the hardships in the life of the frontiersman, while at the same time ministering to that frontiersman's spiritual needs, and seeing that his pressing material cares and the hard and grinding poverty of his life did not wholly extinguish the divine fire within his soul. Such was your work in the past; and your work in the present is as great, and even greater; for the need and opportunity for service widen as the field of national interest widens. It is not true in this country that the poor have grown poorer. It is not true. (Cries, “No! No!”) And the judgment that we speak of will come on those who tell too much untruth. Sometimes I feel a little like a Methodist lay preacher myself. But it is true that in many sections, and particularly in our large cities, the rich have grown so very much richer as to widen the gulf between the man of very large means and the man who makes each day's livelihood by that day's work; and those who with sincerity, and efficiency, and deep conviction, band together for mutual help, as you are banded—not only for one to reach down and help another, but for each to extend his hand in help to, and to take the hand extended to him in help by

his brother. Those of you who do that are those who can keep the gulf from becoming too wide. Join with a man in doing something of common interest to both of you, and you find there's not going to be, even, any very great gulf between him and you. Is not that common sense? Exactly! Exactly!

True religion, through church organizations, through philanthropic organizations, in all the field of kindred endeavor, can manifest itself as effectively in the crowded and complex life of to-day as ever it did in the pioneer yesterdays; and the souls of men need the light now, and strive blindly toward it, as they needed it and strove toward it in the vanished past. Glory in the past! But treat it as an incentive to do well in the present. Do not confine yourselves to being so proud of it that you forget to do similar work to-day. It is your task to do the work of the Lord on the farm and in the mine, in the counting-room and the factory, in the carshops and beside the blasting furnaces, just as it was the task of your spiritual forebears to wrestle for the souls of the men and women who dwelt on the stump-dotted clearings in the wilderness.

No nation in the world has more right than ours to look with proud confidence toward the future. Nowhere else has the experiment of democratic government, of government by the people and for the people, of government based on the principle of treating each man on his innate worth as a man, been tried on so vast a scale as with us; and on the whole the experiment has been more successful than anywhere else. Moreover, on the whole (when I say this I think you will acquit me of having made any attempt to minimize the evils of the present day. But, on the whole) I think it can be said we have grown better and not worse; for if there is much evil, good also greatly abounds, and if wrong grows, so in even greater measure grows the stern sense of right before which wrong must eventually yield. It would be both unmanly and unwarranted to become faint-hearted or despairing about the nation's future. And the Methodist Church would not be the Methodist Church if it either were unmanly or grew faint-hearted! Clear-eyed and far-sighted men who are both brave of heart and cool of head, while not for a moment refusing to see and acknowledge the many evils around us, must yet also feel a confident assurance that in the struggle we shall win and not lose, that the century that has just opened will see great triumph for our people.

But the surest way to achieve this triumph is, while never losing hope and belief in our progress, yet at the same time to refuse to blind ourselves to what is evil in the complex play of the many forces, working through, and with, and against one another, in the upbuilding of our social structure. There is more of good than evil, but there is plenty of evil,

and it behooves us to war against it. There is much that tends toward evil as well as much that tends toward good; and the true patriot is that man who, without losing faith in the good, does his best to combat the evil, to stamp it out where that is possible, and if that is not possible at least to minimize the harm it does. Prosperity such as ours, necessary though it be as the material basis of national greatness, inevitably tends to undue exaltation of the merely material side of the national character; and we must largely rely on the efforts of such men and women as those I am addressing to build up the spiritual life without which the material life amounts in the end to nothing.

I do not want to be misunderstood. I do not want to seem to be guilty of cant. The material success is a good thing. Don't ever let me be misunderstood as saying to a man or the nation to disregard material success. You want your son to be able to pull his own weight—not to have to be helped by somebody else to keep himself and his wife and his children, and I hope he will have plenty of them. (Laughter and applause.)

You want him to be able to care for himself and for those close to him and dependent upon him. But you do not want him to be content with only taking care of his body. Let him take care of his body; but remember that it amounts to nothing if he does not take care of his soul. And as it is with the man, so it is with the nation.

As generation succeeds generation the problems change in their external shape; old needs vanish, and new needs arise; but it remains as true as ever that in the last analysis national greatness, national happiness, national success, depend upon the character of the individual man and individual woman. Nothing can supply the place of that individual character. We need good laws; we need to have these laws honestly and fearlessly administered; we need wealth; we need science and art and all the kindred activities that spring from the clever brain and the deft hand. But most of all we need the essential qualities that in their sum make up the good man and the good woman; most of all we need that fine and healthy family life the lack of which makes any seeming material prosperity but a glittering sham.

If the average man is brave and hard-working and clean-living—he has got to be that; he has got to be brave; the timid good man is not worth much. He has got to have common sense. He has got to be willing to work hard, and to be clean of life and thought. If he is that type of man; if the average woman has the qualities which make a good wife and good mother, if each of them alike has self-respect, and if each realizes that the greatest thing in life is the chance to do service; if that

is true of the average man and woman, we need not bother about the future of the nation. It is secure. But, men and women, we can not stand up for what is good in manhood and womanhood without condemning what is evil.

We do not want to be too hard upon the sinner. But we do not want to spare the sin; and sometimes, as an incident to that, you must condemn the one guilty of the sin. We must condemn the man who is either brutal and vicious or weak and cowardly; the man who fails to do his duty by the public, who is a bad neighbor, an idler—let not the idler lay the onction to his soul that he has not harmed anybody. If he does not benefit anybody he cumberes the ground. We must condemn the man who fails to do his duty by the public, who is a bad neighbor, an idler, an inconsiderate and selfish husband, a neglectful father.

Just one word to the man whose goodness is confined to affairs outside his own house. Let him remember that by being selfish, inconsiderate, exacting in his own home, he may be able to inflict considerably more misery than he can ever offset outside. So much for the man. I am better fitted to preach to him than to the woman. But the woman likewise is to be condemned who, whether from cowardice or coldness, from selfish love of ease or from lack of all true womanly quality, refuses to do aright her great and all-essential duties of wifehood and motherhood. We admire a good man, but we admire a good woman still more.

I believe in the future of this nation, because I think the average man is a pretty good fellow. But I think his wife is a still better fellow. But in the case of war she is not; I am not going to say that she is. All honor to the man who does his full duty in peace; and honor evermore to the man who does his full duty in war—as the Methodists did in the civil war. (Applause.) But there is one person whom I put above the soldier and that is the mother who has done her full duty. For every man worthy the name must recognize that the birth pangs make all men the debtors of all women. No human being has quite the title to respect that the mother has who does her full duty. It is owing to her that the nation can go on—that it grows and not decays; so that in quality and in quantity the citizenship of the nation shall increase and not decrease. The measure of our belief in and respect for the good man and the good woman must be the measure of our condemnation of the man and the woman—of either man or woman—who, whether from viciousness or selfishness or from vapid folly, fails to do each his or her duty in his or her special sphere. Courage, unselfishness, common sense, devotion to high ideals, a proper care for the things of the spirit—which does not in the least mean that there shall not also be a proper care for

the things of the body—these are what we most need to see in our people.

It is not genius, brilliancy, keenness of intellect, that we most need in our people. We most need the common, everyday, humdrum qualities which make up the ordinary good man and good woman. These are the qualities that make up the right type of family life; and these are the qualities that by precept and by example you here—you Methodist men and women whom I am addressing—are bound to do all in your power to make the typical qualities of American citizenship. (Great applause.)

The President: I just wish I could stay longer with you, but I have another engagement—I have been leading a quite busy life recently—and I am a little late for it now. It has been a very real pleasure to meet you here to-day. I am not at all sure that I have helped you, but you have helped me. (Great applause.)

In response to the expressed desire of the gathering, Mrs. Roosevelt came forward and graciously acknowledged the greetings of the assembly.

Bishop Cranston: The service that the President has rendered us to-day is of exceptional character. The President regrets almost as much as we do that his time does not admit of a reception to the delegates in person. And yet I would like to know how many of you would care to stand and shake hands with all this company?

The Temple Quartette sang, much to the pleasure of the audience.

Bishop Cranston: I was just trying to find out on what day it was that the voice of a man child was heard in a parsonage somewhere in the West, in West Virginia; a voice that has never since been stilled. Whatever it may have learned in childhood else, it learned in due time the language of Zion; and wherever this voice is heard there is no uncertain note as to the significance of life, as to the grandeur of destiny. And I shall have now the pleasure of introducing to you this child of a Methodist parsonage, this boy of a Methodist preacher's home, one more to give the lie to the charge that Methodist preachers' boys are invariably unworthy, a man whose eloquence has charmed even the saints in Boston; and, let me say it further, whose life in Washington city is the same in quality and vitality as his life in the great Methodist State of Iowa—Senator Jonathan P. Dolliver.

Address of Senator Dolliver.

Mr. Chairman, Ladies and Gentlemen: It is a very great pleasure to participate with you in the exercises of this hour. On behalf of the Trustees of the University I desire to express their grateful ap-

preciation that the General Conference has thought it fitting, in the midst of its deliberations, to visit this spot and see the foundations of the institution which the Church is laying here.

The Board of Trustees desires, also, to thank the President and Mrs. Roosevelt that, notwithstanding the unnumbered cares and responsibilities which press upon them, they have found the time to meet with us, and by their presence to make this occasion one of far-reaching national interest and historic importance. The inspiring words which the President has spoken here will be treasured for a long time by those who have had the fortune to hear them, and in other generations will become a part of the traditions which surround this institution. The President's words come to us not only with the weight which belongs to the greatest office of the people but also with the influence which arises from the best type of popular leadership any generation of Americans has ever known—a leadership which has had a care not for the material development of the nation alone, but for the higher life of the community, without which the triumphs of industry and commerce are all alike in vain. We are glad to think that the courtesy which he has extended to us by his presence here contains within it not only an evidence of his good will towards the church of which you are representatives, but also a recognition of the work which you are doing in the world, and especially of the vast project which lies in outline and in promise yet unfulfilled on these broad acres, which are to be the home of the American University.

A week ago to-morrow I was wandering in one of the beautiful cemeteries near the Soldiers' Home, under the guidance of an artist, who desired to show me one of the famous works of Saint Gaudens, hidden away there among the trees. In a quiet spot near at hand I found, by accident, the simple monument which marks the grave of John Fletcher Hurst, the founder of the American University; and as I looked upon the base inscription of his name upon it I forgot all about the beauty and mystery of our greatest sculptor's masterpiece, and found myself thinking of that quiet, unostentatious, American scholar, in whose mind and heart this institution took form before ever yet one stone was laid upon another even in the buildings which he lived to see complete. What, after all, is the genius of the artist who paints a great picture, or the sculptor, who embodies in bronze or marble a great thought, compared to that which holds in its grasp the outlines of a great enterprise, to be filled in by the living zeal of generations yet unborn? I have heard Bishop Hurst described as a dreamer. So he was. In these days of practical affairs such a description of a man sometimes carries with it the suggestion

of a sneer. It all depends upon what you mean by the epithet. If a man, like the fascinating youth of Dothan, is all the time dreaming about himself, or what is going to happen to him, or what offices he is to hold, and how sheaves and stars are to wait upon him like servants, it requires at least an admixture of grace, to avoid joining in the railing salutation of his brethren: "Behold, this dreamer cometh!" Or, if a man spends his time looking forward to the day when incredible fictions shall be invited to take the place of the realities of human life, he must not complain if men dismiss his calculations with scant respect. Bishop Hurst was not such as these. He never took thought for himself; he never left the earth upon which we all must walk. If he had a communion with the skies it was not for the purpose of locating a comfortable residence for himself or anybody else. He belonged utterly to the world and to the age. In what respect, then, did he differ from us of little faith? In this respect, at least; he had, in an extraordinary measure, that loftiest faculty of the human mind, the constructive imagination operating in the realms of high spiritual ideals. He was perhaps the most profound scholar our world-wide Methodism has produced. He had lived the life of the great universities of Germany and England. He had followed these ancient centers of culture back to their sources, from the pious zeal which laid their foundations down to our own times. He belonged to a church which began in the oldest university in England. He comprehended the importance of preserving the blessings of learning and at the same time keeping alive the spiritual life of man. He saw the danger which has overtaken the older nations through the sacrifice of civilization to mere progress, even the progress of knowledge. He forecast, with true prophetic insight, the influence upon society, and especially upon popular systems of government, of the modern revivals of ancient paganism, which give man free access to all the treasures of learning only to dismiss him without God and without hope in the world.

And so the vision slowly took shape that united Methodism should begin the building at the Capital of the nation of a university to which the youth of America might repair to complete their education and qualify themselves for leadership in the national life. He chose this spot, not only on account of its natural beauty, but because it lies near the center of our greatest affairs. He was wise enough to know that within a few years a million people will live here, and other millions make pilgrimages hither, and that not many generations will pass away before this Capital will become not only the seat of the greatest government of the world, but a factor of undisputed preeminence in the whole life of the republic. Here are to grow

the richest libraries in the world—not one, but many. Here are to be in constant use the most efficient laboratories for the study of all the problems of natural science. Here is the clearing house of the opinions of men of learning from all sections of the country. Here are the monuments of our national history, and about the capital have already the legends of patriotism and liberty. This city is a university in itself, and every resident who has the preparation and the time may pursue post-graduate studies as long as he lives.

Some of us have been discouraged on account of the slow movement of this educational project. I am no longer one of these. In the first place we are not building to meet a sudden emergency, and in the next place we can easily afford to leave to other generations a part in the completion of so vast a scheme. It is not possible to build a university in a hurry. All institutions among men are a growth, not a creation. If you had all the money in the world, and nothing else, you could not build a university with it. For that reason I have been anxious to see this institution founded upon the common interest of millions of people rather than upon the beneficence and generosity of a few men. I like the spirit of American philanthropy, especially in its dealings with our colleges, because instead of doing things for people it aims to help people to do things for themselves. Such institutions, to be valuable, must be founded upon the sacrifices and sympathetic interest of the whole community. That has always been the history of our great philanthropies, including those world-wide efforts to lift up the barbarians of the earth; but I do not doubt that the American University, as soon as men begin to see the strategic importance of the work it is to do, will attract the attention of men everywhere who understand the meaning of that high and inexorable law of human life, which ordains as a part of the structure and framework of society that where much is given much also shall be required.

There are some who think that an institution such as this will be hampered and limited in its usefulness by the fact that it comes into existence under the auspices of a particular church. I do not share that view, nor is it verified by the experience of our institutions of learning in America. The bitterness of sectarian strife in the United States is passed. The fraternity of religious faiths among the people is one of the finest evidences of the progress of our democracy. Even the fury of controversies which in other ages sundered the Church into contending factions and colored the political as well as the religious life of great nations, has passed away, and so far as American Methodism is concerned it takes the hand of every creed which preserves the fundamental truth of the gospel with a sincerity which has forgotten the little things about which men de-

bate in the presence of the larger things in which they are as one.

There is not a denominational college in America which asks a student what church he belongs to, and seeks to take away from him the faith which he inherited from his father and his mother; so that this institution loses nothing by the fact that a religious denomination with a membership of millions of people has put its resources to its support, but its enthusiasm and its devotion and sympathy for its guidance and development.

I have been proud of the honor of being numbered among the members of its Board of Trustees. It was a luxury which I shall never forget to sit down in the meetings presided over by that stalwart old soldier, whose heart was so big that there was room in it for all the struggling undertakings of his church and of his country, Chancellor McCabe, so lately admitted to his exceeding great reward; and I cannot conclude without congratulating the friends of the University upon the election as his successor of Dr. Hamilton, a courageous leader in everything which concerns the welfare of the Church or State. He has a great burden of responsibility, and I would encourage his heart to-day by saying that he has a great constituency—great in resources, greater still in the solemn conviction of its duty—and with that behind him he must succeed.

The Bishops' Estimate of Our Future.

In their last quadrennial address the Bishops of the Methodist Episcopal Church say:

"As successive General Conferences have approved the plan of this institution, reported upon its progress and commended it to the liberality of the Church, we are glad to report that the last quadrennium has furthered its advance toward the point where endowment will permit its being opened to students. Its site of ninety-three acres is now worth \$800,000. It has two buildings, costing \$332,219, and a library and apparatus worth \$21,600. These assets, with other property, bonds, mortgages and subscriptions for endowment make a total of \$2,051,695, as the value of the University to date. It is thus placed, before it is opened, in the first class as to property of our institutions. We see no reason to change our estimate of the future of this University. Though sadly bereaved by the deaths of Bishops Hurst and McCabe, its new Chancellor, the Rev. Franklin Hamilton, D. D., is taking up his work with vigor and success."

Commendation by the General Conference, 1908.

The General Conference of the Methodist Episcopal Church, at its recent session in Baltimore, adopted the following resolutions, presented by the Rev. Dr. William D. Parr, on Tuesday, May 26th:

Whereas, with great care and no little expense, the authorities of the American University conducted a unique and successful excursion to their grounds, May 16, 1908; and

Whereas, the authorities of the University gave thereby to the delegates of this General Conference and their friends not only pleasure and recreation but valuable information concerning this great educational movement, at the Nation's Capital;

Resolved, 1. We appreciate the presence of his Excellency, Theodore Roosevelt, President of the United States, on that occasion—his spiritual and patriotic address, so lofty and inspiring, making the hour ever memorable in the history of the institution and the Church.

Resolved, 2. We congratulate the Chancellor, the Rev. Franklin Hamilton, Doctor of Philosophy, his associates, the Board of Trustees, and the Church on the possession of a campus so large and of such natural beauty. We congratulate them also on the work so well done, and commend this enterprise to people everywhere, who believe that patriotism and sound learning are the safe guaranties of the republic.

Work has already commenced on Massachusetts avenue between Wisconsin avenue and the grounds of the American University. The appropriation made by Congress is being expended, and culverts are being built preparatory to the grading of this finest avenue in Washington, which will bring the University into easy and direct touch with the heart of the city.

James Oliver Wilson.

It becomes our sad duty to record the death of the Rev. James Oliver Wilson, D. D., a member of our Board of Trustees, which occurred suddenly on Saturday, June 13, 1908. Dr. Wilson was serving a very useful pastorate in the Nostrand Avenue Methodist Episcopal Church, in Brooklyn, N. Y. In the same capacity he had given many successful years to leading churches in Philadelphia and New York, achieving a most remarkable deliverance from the bondage of debt at Saint Andrews in the last-named city. He was deeply interested in the American University and was a Trustee for the last ten years. He was a man of broad culture, deep faith and spiritual fervor. His touch was upon thousands for their good.

The Opening of Massachusetts Avenue.

"The dirt is flying" on Massachusetts Avenue. The cut above is from a photograph taken October 15, and shows in part what is now being done. The view is from a point on the north edge of the avenue, looking northwest. The trend of the avenue is shown by the opening in the woodland to the right where the greatest altitude, about four hundred feet above tide water, will be reached. The residence and tower, near the center, are "Westover," the villa of Mr. Charles C. Glover, president of the

Riggs National Bank and treasurer of the American University. Between these two and against the sky-line appear the dome and roof of one wing of the McKinley Memorial College of Government. A little to the right of this structure stands the College of History hidden by the thick foliage. The giant steam shovel and construction trains are a part of the equipment of the McDermott Company, contractors, of Philadelphia, who are doing the work.

The second picture (on page 3) looks to the southeast from a point in near proximity to the University site and central in the line and at the grade of the avenue, on the northwest side of the Foundry branch where the present fill is being made. The depth of the fill here is forty two feet. The great sewer of Arizona Avenue is seen in the white line at the bottom of the ravine crossing Massachusetts Avenue and providing for both the future surface and service drainage of all this region. The cut to the northwest of the ravine will be, at its greatest depth, about thirty five feet. From the crest of the hill where the avenue enters and crosses the site of the University, the twin domes of the National Capitol and the Library of Congress and the upper portion of the Washington Monument are in plain view.

The significance of this new approach to the American University cannot be put into words. It means not merely the saving of the roundabout travel on Loughboro Road and Nebraska Avenue. It amounts to a breaking out of seclusion into publicity. Massachusetts Avenue is the great residential thoroughfare of Washington and one of the most imposing boulevards in the world. The growth of the city, for the past thirty years has been almost wholly in the northwest section until the geographical center of the city has shifted from the White House to a point north of Dupont Circle, the intersection of Massachusetts and Connecticut Avenues. The site of the University is destined to be in the heart of the most beautiful portion of the Capital of the American nation.

Gifts.

Seventy thousand dollars for the University has been secured in wills which recently have been made by two consecrated, far-seeing members of the Methodist Episcopal Church. This enterprise is winning its way. In the present crisis in education it is being recognized that at our national capital there are unique opportunities for an enlightened Protestantism and a distinctively Christian educational training.

Recent contributions in cash have been as follows :

GENERAL FUND.

John Fritz, \$200; Mrs. Wm. McEckron, \$150; D. H. Carroll, \$125; Miss Simpson and Mrs. Buoy (jointly), John Gribbel, W. M. Crane, James W. Jackson, Harry A. Houseman, T. D. Collins, C. E. Welch, F. W. Tunnell, W. S. Pilling, Wm. Gisriel, J. E. Fricke, Frank A. Freeman, Mrs. Rosa A. Harvey, each \$100; C. H. Harding, \$50; Isaac S. Smyth, Jr., Calvin M. Smyth, George J. LaBar, J. W. Bowman, A. B. Browne, T. H. Anderson, G. W. F. Swartzell, Summerfield Baldwin, each \$25; H. S. Dulaney, \$10; J. E. Ingram, \$10; A friend, \$5.

Current Notes on Education.

Harvard has recognized that the office of the university includes more and more the training of business men, and has started a post-graduate School of Business on line parallel to its professional schools. It will have a two years' course and be open only to those who have attained the B. A. degree. The dean of the school is to be Professor William E. Gay.

An interesting discovery is the fact that the attendance of American students at European universities is rapidly falling off. At the same time it is interesting to note that in the post-graduate departments of our universities students from all civilized countries in the world are being enrolled, which we cannot but believe means that the real universities of this country can take rank in equipment and scholarship with the best and oldest in the world.—*Nashville Christian Advocate*.

The Methodist colleges that have endeavored to be less denominational in order to be listed as one of the beneficiaries of the Carnegie pension fund are now paying the price of their course at the conferences of the Methodist Episcopal Church. The elders want to know how a college can be non-sectarian and still be Methodist, and some of the old-fashioned ones are able to give the college presidents a bad half hour.—*Springfield Republican*.

The Opening of Massachusetts Avenue—The Fill at Foundry Branch, Looking Southeast.

The *Christian Herald*, in its issue of June 3d, has a generous and appreciative article describing the American University and speaking encouragingly of the enterprise. It says, "A newer and deeper interest in the American University at Washington has been recently awakened, and is manifest especially in the great cities of the East." The article is illustrated.

Efforts are being made to establish a new University at Buffalo, N. Y., and a College at Scranton, Penn. Concerning the latter enterprise a Scranton daily journal comments as follows:

"It is impossible to measure the benefits to a city of an institution which year after year devotes itself to the manufacture of character, of personality, of manhood, just as a factory is devoted to producing goods. A college turns the creative energy of a city to new and higher forms of achieve-

ment, and in turn the result is writ large all over the business and the society and the industry of that city." But what if that city be the national capital of the foremost country in the world?

Chancellor MacCracken declares that his university (New York) is suffering from the fact that its older and richer neighbors in the university business have adopted and promulgated "the monopolistic heresy that no room exists in the metropolis for a second university. They have been so enveloped by business corporations that they have unwittingly classified themselves with owners of railways or of producers of steel and iron, sugar and lead, oil and tobacco, instead of classifying themselves with charitable and religious bodies where they really belong. The result is the existence in this region of America of a virtual university trust."

Fret not thyself, brave Chancellor. 'Tis a heresy gray and far-wandered. As Ibsen puts it, "The old do ever fear the young."

Resignation of Dr. Davidson.

At the meeting of the Executive Committee of the Trustees, held on October 16th, the resignation of the Rev. Wilbur L. Davidson, D. D., Secretary of the University, was presented by the chairman, Dr. D. H. Carroll, and accepted "with deep regret and high appreciation of his long and valuable services." Dr. Davidson served as Field Secretary of the University for Ohio for a year, and was then, in 1899, elected Secretary of the University. His period of office has covered ten years. The sickness and death of Bishop Hurst and the death of Bishop McCabe, the first two Chancellors, rendered his duties at those times peculiarly heavy. He was especially useful in the initiatory canvass for the Ohio College of Government, and has been an able public representative of the institution in many places. Dr. Davidson will devote his attention to the development and extension of the Chautauqua work, with which he has been so long and so successfully identified, and in which he is the acknowledged leader in America. At the same meeting the Executive Committee voted that the Rev. Albert Osborn, Assistant Secretary of the University, should perform the duties of the Secretary *ad interim*, among which is the editorship of the UNIVERSITY COURIER. Dr. Davidson bears with him the good will and love of all connected with the institution.

A Sacred Spot.

The soil of Virginia is enriched with the blood and sacred with the dust of many of the good and great of earth. A spot peculiarly dear to Methodists is the grave of William Watters, the first native American preacher. From the hallowed ground where he sleeps his last sleep, near El Nido, the country home of Mr. Isaac R. Hitt, Jr., of this city, the buildings of the American University are plainly visible.

Echoes of two Great Speeches.

The two illustrious addresses at the late General Conference were, first, that of Dr. Lewis, the fraternal delegate from the Methodist Protestant church, and second, that of Bishop Cranston when he introduced President Roosevelt to the General Conference audience on the grounds of the American University at Washington. Ah! that was a masterpiece of eloquence and power and must be ranked as one of the notable addresses that shall find a place in the history of that General Conference.—*Northwestern Christian Advocate*.

It is stated that:

"The address delivered by President Roosevelt to the delegates of the General Conference of our Church, delivered at the American University, has attracted more attention in Great Britain than it did in this country. Nearly every leading paper devoted considerable attention to it. The *Spectator*, after declaring that the address is specially important as exhibiting one of the strongest characteristics alike of the President and his countrymen—optimism—comments upon these words as follows: 'Many as are the speeches from the President which his fellowcountrymen have warmly applauded, we believe that none will bring him closer to their hearts than the one from which we have just quoted, for it is a short and strong embodiment of their innermost feeling.'"

"Sectarian Colleges" and Dr. Henry S. Pritchett.

Dr. Pritchett objects to Sectarian Colleges. He wants the colleges "de-sected." Non-sectarian education, he thinks, would prevent the use of the schools to propagate denominational tenets. But Dr. Pritchett forgets that non-sectarian education is a figment. In a recent issue of the *Belfast Witness*, Rev. W. T. Latimer pointedly queries, "What do you mean by non-sectarian education? It is secular education? 'Certainly not,' would probably be the reply. If not, then what is it? To this question I have failed to get an answer."

But let the emphasis fall where it belongs. Why divorce the school and the church? Education never can be complete without Christianity as the religion of humanity. Why? Because not a scientist, not a philosopher, but Jesus of Nazareth redeemed humanity from bondage to the Dark.

Standing Against the Drifts.

In education today there are two drifts. The first is toward mere practical training, disparaging the study of theoretical science. The second is a growing tendency toward secularism in education itself.

From its inception the American University has been planned to stand as a rock against both these drifts; against the first, because, in the words of James Bryce, the British Ambassador, a university exists for the sake of training men to observe and to reason, and therefore it must provide training for them in all branches of thought.

The American University is to stand against the drift toward secularism in education, for the reason that, to borrow the phrase of an eminent divine, secularism in education, "in reality, is only another clever ruse to substitute a pagan philosophy for Christianity."

Our Roman Catholic Neighbors.

The interest and activity of our Roman Catholic friends in educational and other forms of propaganda are manifest in the dispatches noted below:

Rome, July 30—The Pope yesterday received in private audience Very Rev. Charles P. Grannan, of Washington, D. C., with whom he conversed on the subject of the Catholic University in that city, and the Biblical Commission, of which Dr. Grannan is consultant. Later the pope received Very Rev. A. P. Doyle, rector of the Apostolic Mission House, Washington.

Rome, July 31—The Rev. A. P. Doyle, rector of the Apostolic Mission House at Washington, D. C., has informed the Vatican of the progress made by the mission in America. The object of the mission is to convert Americans to the Catholic faith, and Fr. Doyle says it will not take long to realize this object; indeed, the hope is entertained that the entire English-speaking people will be converted to Catholicism.

Rome, Aug. 15—Cardinal Gibbons had his final farewell audience with the Pope. The Cardinal thanked the Pontiff for having granted him all that he had asked for, both from the Propaganda and the Vatican, and the Pope replied that where the interest of the Church in America was concerned, nothing ever would be denied.

The Pope again expressed his satisfaction with the progress of the Catholic church in America. He praised the way in which the gospel is preached there, and said he was preparing a strong letter recommending the Apostolic Mission House in Washington, which he would send to the Cardinal later.

New York, April 29—Many distinguished persons attended the children's day observance of the centenary of the Catholic Church this morning at St. Patrick's Cathedral. There

were 6,000 boys and girls gathered at the Cathedral for the services. Cardinal Logue, following the services at St. Patrick's Cathedral, was entertained at dinner at the cathedral college. Cardinal Logue in his address said:

"I express it mildly when I say that I am astonished and pleased to see with my own eyes the progress Catholicity has made here, both in America and in the city of New York. I had, of course, heard of it in a sort of theoretical fashion before. Now I know of it as an eye witness knows. Now, seriously, I think the future of the Church of Christ is in America. Rome will be the center, there the holy father will have his seat, but the energy, the strength, the moving life, will be here in America. The Church owes and will owe a great deal to this free country of America. I cannot but admire the progress the Church is making here. All this has been accomplished without the Church relinquishing one jot or tittle in that which she holds dear, and to which she clings. She has shown herself capable of a wonderful adjustment to the conditions of life in America."

In closing, his Grace (Archbishop O'Connell, at Boston, August 9) spoke with special earnestness regarding education. He told how the poorest Catholics have attested their fidelity to their church by erecting, at the cost of millions and millions of dollars, schools and institutions wherein their children may be taught that there is a God to whom all men must be responsible, that the moral law emanating from that God binds them during all their lives.

The Thomas Coke College of Missions.

One of the earliest announced purposes of the American University was the establishment of a College of Christian Missions. Toward the fulfillment of this purpose a Christian woman of Pennsylvania has given real estate, worth at present about one hundred thousand dollars and steadily increasing in value. The language used in conveying this gift is: "To found a College of Missions to be named and known as the Thomas Coke College of Missions, to be devoted to the training of students in the languages, customs, laws and religious faiths of the people of foreign countries, for the purpose of most effective usefulness in the spread * * * of the Christian religion."

Thomas Coke by his studious interest in foreign peoples, by his early and ardent advocacy of foreign missions, and by his liberal contributions of money, his personal example in labors for their planting and his death while on his way to India, deserves this perpetual remembrance. If John Wesley justly earned the title of the Father of Methodism and exercised the patriarchal right of government until he was styled the Methodist King, to Thomas

Coke might rightfully be given the name of Methodism's Spiritual Premier.

Coke's personal co-operation with Asbury in the first attempt at education under Methodist auspices in America is signalized in the name of that first but fated institution at Abingdon, Maryland, Cokesbury College. One of the foundation stones of old Cokesbury, weighing about three-hundred pounds, is now in the Museum of Methodism, in the College of History of the American University, awaiting the time when it can be placed in the building which is to house the Thomas Coke College of Missions. This will probably be Asbury Memorial Hall, which might, by virtue of this historical linking of associations in educational lines, well be called the New Cokesbury. In this structure the College of Comparative Religion also will doubtless find its proper home.

The vital relation of successful missions to the higher education has become one of the most patent facts in the great modern expansion of the Christian Church. Next, in importance and value for permanent fruits, to the spirit of consecration in the individual planter and organizer of mission work, is the intelligent training of the missionary leaders. Through the study of missions and their far-reaching results, their reflex influence upon the great body of the church goes to establish this same important relation. That is a beautiful reciprocity by which the sympathy and gifts of the home churches to the foreign work are exchanged for an increased intelligence and a higher and more distinctively altruistic type of civilization. Thus the people of distant continents and islands of the sea act and interact upon one another for good, as the tides of the great seas meet and blend in the tides of the greater ocean.

The University Senate of the Methodist Episcopal Church, at its last meeting held at Evanston, was earnestly requested by the noble women of our Woman's Foreign Missionary Society to require the introduction of courses in the study of missions into the curricula of the colleges and universities of the church. To this appeal the Senate's reply was: "While we feel that many of our colleges would be embarrassed by a definite requirement at this time that such courses should be given, we still recognize the relation of missions to history and sociology, as well as to the religious life, and we recommend that,

wherever our institutions are able to do so, they offer well-ordered and well-taught courses in missions, so thoroughly organized as to have an educational value on a par with that of other parts of the curriculum."

The embarrassment of the ordinary college and university in attempting to introduce such courses into their already overcrowded curricula amounts practically to an impossible task. Every consideration of efficiency and economy, both of labor and money, points to the wisdom of concentration in missionary training and equipment.

The gift announced above of one hundred thousand dollars, soon to become productive, is a most encouraging beginning. To this foundation we ask and confidently believe that thousands will add their gifts until there shall be in Washington the the best equipped College of Missions in the world, to do for our workers in foreign fields a service for missionaries of both sexes, similar in character to that which is already being done for the women in the home-field by the Lucy Webb Hayes Bible and Training School. Washington is cosmopolitan in its life. It lies in the pathway of all the nations. Here are resident representatives from every civilized country. Hither come in endless procession visitors from every shore. Here should and may be planted the strongest and most effective College of Missions on the planet, a memorial to Thomas Coke, a pioneer leader in the modern evangelization of the world.

Enriching Our Library.

Seventeen thousand bound volumes, about the same number of pamphlets, and a goodly collection of manuscripts, have already been given to the American University. Chief among the givers have been Mrs. Henry M. Harman, of Baltimore, who gave the valuable linguistic collection of the late Professor Harman; Professor Alfred Higbie, of the University of the Pacific, who donated about 450 volumes largely of Oriental literature, with many on mathematics, surveying, astronomy and mineralogy; the Rev. Dr. Lewis R. Dunn, who presented about 1,000 well-selected volumes; Mrs. John A. Logan, who has given the magnificent collection of legal and military material left by her husband, General John A. Logan, more than 3,000 volumes; Mrs. Wm. M. Springer, and Chaplain R. W. Springer, who united

in the gift of about 3,000 volumes in the library of the Hon. Wm. M. Springer, of Illinois, a rich mass of books on finance, tariff, banking, to which topics he devoted his special attention; Miss Mary H. Wright, of Philadelphia, a part of the fine library left by her father, Colonel John A. Wright; Rev. William Fotsch, who presented some valuable specimens of early printing, among them a few veritable incunabula; the estate of Mr. Stephen L. Parrish, of Washington; and many others.

The original letter of George Washington to Governor Brooke, of Virginia, on the subject of a National University, an interesting letter of Thomas Jefferson, a letter of John Wesley, and many other manuscript writings of distinguished men are already garnered in the library. All persons owning pamphlets, books, manuscripts, or other valuable historical materials, are earnestly invited to contribute such to the American University. Washington leads the whole country in the number of its books accessible to private citizens and students, and these immense public libraries growing rapidly every year are among the great working assets of the American University. But the University should have also housed under its own roof and constantly available for use a very large general library, besides its special departmental collections. Will our friends bear us in mind and send us more treasures for permanent usefulness?

Books Received.

We thankfully acknowledge the following donations to our growing library since our last issue:

Proceedings of the National Arbitration and Peace Congress, New York, April 14th to 17th, 1907. Edited by the Secretary (Robert Erskine Ely). New York, 1907. (Through kindness of Mr. Henry Clay Weeks, of New York.)

Individual Training in Our Colleges. By Clarence F. Birdseye. New York, Macmillan, 1907.

The Raid on Prosperity. By James Roscoe Day, Chancellor of Syracuse University. New York, Appleton, 1908.

John Paul Jones. Commemoration at Annapolis, April 24, 1906. Compiled under the direction of the Joint Committee on Printing by Charles W. Stewart, Superintendent Library and Navy War Records, Washington, 1907. (Through kindness of Senator J. P. Dolliver.)

Rochambeau. A Commemoration of the Congress of the United States of America of the Services of the French Auxiliary Forces in the War of Independence. Prepared by De B. Randolph Keim, Washington, 1907. (Through courtesy of Senator J. P. Dolliver.)

Memorial of the Celebration of the Carnegie Institute at Pittsburg, Pa., April 11, 12, 13, 1907. Comprising a complete description of the exercises connected with the eleventh celebration of Founder's Day of the Carnegie Institute and opening of the enlarged Carnegie Library Building, containing the library, museum, music hall, and art galleries, founded by Andrew Carnegie. (New York) 1907. De Vinne Press. Large octavo, pages xii, 465, with illustrations. From the Carnegie Institute at Pittsburg.

Strong Words from Well Known Men.

President Edmund J. James, LL.D., University of Illinois:

"I have been greatly interested in the development of the American University in the city of Washington, D. C., ever since I talked over in detail some twenty-five years ago with Bishop Hurst, the subject of a national university in the Federal Capital.

It was always a matter of great regret to me that the Bishop did not see his way clear to devote his entire time and strength during the latter years of his life to this great enterprise. I believe it would have been launched long ago if he had done so. Indeed I think he would have seen great progress made in the actual work of instruction before he passed away. The Bishop knew that I had always believed in the establishment of a Federal university in the capital of the country under the control of and at the expense of the Federal Government, but he also knew that I fully sympathized with his endeavor to develop this great institution which he had in mind along the liberal lines which he laid down. It is my opinion that the city of Washington is destined to contain the greatest group of institutions of higher learning which was ever gathered in any one spot since the history of the world began. In this group, doing a specific and special work of high quality, and unique in character, I expect to see the American University taking a prominent part, with banners full high advanced. It will do a work, in my opinion, which no other institution will or can do in this great group, and in my opinion it ought to have the warm support of friends of education everywhere. This country is so great, its future is so full of infinite possibilities, that in my opinion no single institution, whether founded on the basis of governmental grants or of private beneficence, can do this needed work. I have never doubted myself, for a single moment, since the project was first outlined to me by Bishop Hurst, that here was an undertaking which in the long run would be successful, and which in combination with the other educa-

tional forces about Washington would be an indispensable element in helping the people of this country to accomplish in the educational and scientific field achievements fully parallel to their marvelous work in developing agriculture, industry, and commerce. In the latter lines the leadership of the world is plainly assured to us. It will be a shame to us and our posterity if we do not assure for ourselves quite as distinctly the leadership of the world in the former."

Bishop John W. Hamilton:

"Washington, henceforth will be the most important city of the world. The English Language and the Christian Church, both by their influence, will have their capitals there. The city, by Federal endowments, already dominates original research, and will therefore be the nation's educational center. The Methodists by their evident destiny could build the American University nowhere else.

It will be the pleasure, as it is the duty of every Wesleyan the country over, to put a little something into this great school. I gave the first gift and expect to add to it every year while I live."

Senator Elmer J. Burkett, of Nebraska:

"It was a magnificent idea to build a great central university at the National Capital. It means much to Methodism and to the country and to the young people that shall be able to avail themselves of the opportunities which it presents. Here is the seat of Government where are located the departments, the libraries and the collections of art and industry as nowhere else. It competes with none, but supplements all. It has my sincere wishes for success."

Bishop Daniel A. Goodsell:

"I commend the American University to the liberality of all who wish to see a great Protestant University at the Nation's Capital. So much has been done that neither the Church nor the general public can afford failure. Noble grounds and some equally noble buildings are already secure. The plan of the Institution is wise, and its curriculum adapted to modern conditions. Delayed by the untimely deaths of Bishop Hurst, its founder, and Bishop McCabe, its second Chancellor, the burden of leadership has fallen upon the Rev. Franklin Hamilton, D. D., whom I commend to all he may approach as in every way qualified for the position he holds. I trust his ability, his courage and his devotion may be rewarded by easy access to those he wishes to see and by great success in raising the sum necessary to secure the opening of the Institution."

Words from Public Prints.

The following items culled from the public press show how the cause of education at our National Capital is followed with keenest interest by our most alert journals:

"Dr. Franklin Hamilton, Chancellor of the American University at Washington, spoke yesterday morning at Trinity Church on 'The Imperialism of Christian Education.' Dr. Hamilton is President of the University which, although

its doors have not yet been opened, has several fine buildings which will be occupied when the provisions under which it is founded are met. The University will be for postgraduate work only. * * * Dr. Hamilton is speaking in different places, keeping the University before the people."—*Springfield Republican, Springfield, Mass.*

"With such a favorable site, at the Capital of earth's greatest nation, backed by a Methodism, both north and south, which is destined to be united into the mightiest of all Protestant bodies, with a rapidly increasing demand for trained scholars in every field of research, with a growing army of graduates, who will want postgraduate courses, there ought to be no misgivings as to the ultimate triumph of this magnificent move in the right direction."—*Dr. Matthias Kaufman, Zion's Herald, Boston, Mass.*

"On a Monday morning, some few weeks ago, in our Preachers' Meeting, the Rev. George C. Wilding, pastor of Market St. Church, Paterson, N. J., read a paper on 'A United Methodism, North and South.' The speaker dwelt upon the great loss of power and influence consequent upon the separate existence of the two great wings of American Methodism. He emphasized the points of similarity which still exist between these two churches, after a separate history of more than sixty years; then he touched briefly the items of difference which have grown up in these years. Then he noted the favorable signs which make for a possible union in some day not a great way off. The great American University at Washington was specially mentioned as a possible and reasonable meeting-point. A discussion followed which was quite animated and interesting."—*The Christian Advocate, New York.*

"The only thing that the proposed Pan-American University lacks is the requisite tin."—*Boston Herald, Boston, Mass.*

The Jewish University of America.

Dr. Cyrus Adler, in an address not long ago in New York, advocated the establishment of an American University to include the leading Hebrew institutions of learning now existing. He said "We would call this the Jewish University of America. In the method of instruction, I would like to see the German University plan adopted. The good such an institution would do for a large number of Jews would be great. But the good it would do for the scholar and the investigator would be infinitely greater. * * * We have been amateurs and dilettantes long enough. It is time for us to be professional. The Jewish people, through their literature, have contributed more to modern civilization than any other single force. The Jewish people should promote this knowledge * * * It is time to make this boastful western world understand that the Orient, not the Occident, is synonymous with learning."

Could there be any stronger argument found for the upbuilding at our National Capital of such an institution as is proposed in the American University? All hearts from all quarters thus are acknowledging this need of fostering the national spirit in matters of learning.

MRS. J. FRANK ROBINSON

MR. J. FRANK ROBINSON

Five Hundred Thousand Dollars To Open The American University.

CHANCELLOR FRANKLIN HAMILTON.

Five hundred thousand dollars to open the American University! I have been thinking that of late. Somehow it has been running through my heart. As I have been thinking, I have been doing a little sum in arithmetic. Five hundred thousand dollars for the American University—what would that mean?

Well, first of all, it would mean that every dollar of indebtedness on the university property would be paid off. Not a penny would remain. Then we would finish the McKinley College of Government. In pure, white marble, that monument would stand complete, telling the deathless story of one who did nothing base, one of whom all was well and fair.

Then we would furnish the McKinley College of Government and the College of History for immediate use. We would connect the buildings with the water, gas, electric light and sewer systems of Washington. We would macadamize all the roads around the buildings and we would make the roads twenty feet wide. Then, following the plan of that genius of landscape architecture, Frederick Law Olmsted, we would mold over and level another road, a beautiful, winding, old country pike, down into a natural hollow beyond the marble buildings. There, five hundred and fifty feet away, we would erect a modern heating plant. It would be equipped with the latest scientific appliances.

having a stack a hundred feet high. For the moment, utilizing only one-half of this building, we would install three one-hundred horse-power boilers. By means of pipes and conduits, we would connect these boilers with every one of the eighty-odd rooms, lecture halls and auditoriums of the university.

Then we would grade and beautify the grounds, conserving the trees, shrubbery and grassy slopes. Little else would be required for that sweet and simple hillside. All its own is that vast, majestic outlook which led Mr. Olmsted to pronounce the spot one of the noblest university sites in the world.

By the time all this is completed, the United States Government will have brought up to our doors that Appian Way of the capital, Massachusetts Avenue. The electric cars will have followed.

But now let us examine our resources. All this will have cost \$307,104. Let us find what we have left. We still have left \$628,830—as the beginning of an endowment for actual academic work. And much of this resource immediately would be productive. Beyond this there is secured to us several hundred thousand dollars in wills which already have been probated.

"Impossible," you say. "All this is some Baron Munchausen dream." Nothing of the kind. The estimates of experts covering all these things of which we have been speaking lie before me as I write. The figures are conservative. They cannot be challenged. The truth is, that while men have been sleeping, God has been doing a little sum in arithmetic. And His figuring always is more wonderful than ours. He simply is waiting here again to prove that if His children only will put down for Him a few ciphers, He will help. He will do the multiplying and carry to the higher column.

Friend, patriot, lover of learning or of humanity, follower of the Lord Christ, are you willing, just a little, to help in this new arithmetic? Will you strike hands to help raise this money which, for the American University, shall claim the promise of the Open Door? Do you wish to know how this can be done? If you do, then send your name and address to me at 1410 F Street, N. W., Washington, D. C., and the story shall be continued. You shall help to throw open broad gates through which, like serried armies, shall march shining captains of human hope, of enlightenment and redemption.

Eleven Thousand Dollars from "A Friend."

Another notable gift has been made to the American University. Eleven thousand dollars has been devoted to the use of the University through the generous gift of a noble "Friend" from Ohio. This friend already has turned over to the University trustees this amount in securities and cash. This gift is to serve as the means of creating a fund which steadily will increase. For \$10,000 of the principal is to be swelled by the accrued interest on a part of the investment now made. The fund will bear the name of the benefactor. Through modesty, the name for the present is withheld.

We take this occasion, however, to thank most gratefully this far-sighted and benevolent giver. This is an example worthy of all gratitude and praise. This touches the center of being for the University. For this is just the one thing needful. It is endowment. The supreme need is permanent endowment. Whatever is devoted to this purpose of endowment will be safe-guarded sacredly. It will be cared for and invested by men who are among the foremost in the national capital for probity, experience and conservative business sagacity. Who will follow the lead thus so worthily set?

Mr. and Mrs. J. Frank Robinson.

We propose to publish at intervals the photographs of benefactors of the American University. These men and women of God who have consecrated their means to the service of Christian education deserve fitting recognition while their presence is with us. They shall not have wrought in silence or in darkness so far as we may record our appreciation and gratitude.

How better can we inaugurate this series of the Christian altruists, whose services should be writ down in the Book of Golden Deeds, than by presenting to our readers the portraits of the one noble woman who serves as a trustee of the American University, Mrs. J. Frank Robinson of Rock Island, Illinois, and of her sainted husband, Mr. J. Frank Robinson? Mr. Robinson made a princely bequest to the American University. Mrs. Robinson, his devoted wife, counts it her holy privilege to make his wish her desire and, living, to carry on the work of her dear one departed in the Lord.

Gifts of Money.

Our record of recent gifts of money includes the following:

SPECIAL FUND

\$11,000 (name withheld.)

GENERAL FUND.

\$2,000, T. D. Collins; \$500 (each), W. H. Sweet, R. B. Ward; \$100 (each), David H. Carroll, John H. Dearnley, Mrs. Anna W. S. Keator, John Kenworthy, Miss Ida Simpson, John A. Wallace, J. Atwood White; \$50 (each), Wm. C. Arrison, J. W. Bowman, Alcaeus Hooper, George J. LaBar, Wm. B. Matthews, W. J. Montgomery, Alexander Simpson; \$25 (each), Walter F. Ballinger, George I. Bodine, Mrs. Amanda L. Coulston, E. Eichelberger, J. W. Ellenberger, Mrs. Hannah Fox, J. McGregor Gibb, Jefferson Justice, John Walton; \$20, Cornelius Bodine; \$10 (each), S. L. Bowser, Stanley S. Cline, Lidie J. Davis, Vivian F. Gable, Mrs. James Hooper, Charles O. Kruger, John W. McPherson, Thomas A. Redding, E. G. Taulane, Henry M. Wilson; \$5 (each), Joseph H. Piester, Henry Shirk.

ASBURY MEMORIAL FUND.

\$16, G. G. Vallentyne; \$10, Frank G. Mitchell.

MCKINLEY MEMORIAL FUND.

\$10, W. H. H. Smith; \$5, N. K. Hubbard.

MCCABE ENDOWMENT FUND.

\$100, W. J. Armstrong; \$5, Richard Newbold; \$1, Mrs. S. Nilson.

ENDOWMENT (GENERAL)

\$250, John T. Bryant.

Gifts to our Library.

Among some valuable gifts to our library of late are the following:

The Cary Family in England, and The Cary Family in America. By Henry Grosvenor Cary. Published by Rev. Seth Cooley Cary, Dorchester Center, Boston, 1906 and 1907. Two beautiful illustrated volumes of valuable genealogies. Quarto, pp. 105, 106. Cloth. Presented by Rev. Seth C. Cary.

The Later Cary Poems. By Rev. Otis Cary, D.D., Kyoto, Japan. Third edition. Published by Rev. Seth C. Cary, Boston, 1908. Pamphlet, 8vo. Presented by Seth C. Cary.

Annual Report of the United States Life-Saving Service. Washington, 1908. 8vo, pp. 505.

Twenty-fourth Annual Report of the United States Civil Service Commission. Washington, 1908. 8vo, pp. 287.

Year Book of the Young Men's Christian Associations of North America, 1907-1908. New York, 1908. 8vo, pp. 319.

What is Man? or Creationism vs. Evolutionism. By Judson D. Burns, M.D. New York, 1908. From the publishers, Cochrane Publishing Co. 12mo, pp. 334.

From the Rev. Job A. Price, of this city, we have received the valued gift of eleven volumes of the Daily Christian Advocate, extending from 1868 to 1908, inclusive. The series covers 288 numbers of the General Conference daily and lacks of completeness only two numbers—No. 6, of 1868, and No. 1, of 1888. Duplicate copies of seven numbers, 7-13, accompany volume of 1892.

The University of the White Deer Grotto and the University of the White Marble Halls.

In China, in the Valley of the Poyang Lake, says Bishop J. W. Bashford, in an interesting and informing travel letter published in the "Epworth Herald," there is an ancient school called "The University of the White Deer Grotto." This university was founded by a celebrated sage, Choo He, in about the year 1200 A. D. During seven centuries there have gone forth from the walls of this place of traditional learning men who have helped to mold the life of the great Chinese Empire.

But the halls of this University of the White Deer Grotto today are deserted. Its student cells are vacant. In some of the buildings the furniture still is in the rooms, the curtains are hanging in front of the images, but everywhere silence! Not a teacher, not a student!

An explanation of the absence of students from this famous university and of the closing of many another school of the ancient learning is found, says the Bishop, in the thousands of students in Japan, the United States, and Europe, in the modern schools springing up in various parts of the Chinese Empire, and in the new government rule that future candidates for government positions must be versed in modern as well as in classical learning. The University of the White Deer Grotto is a silent monument of a dying philosophy.

On the University heights of Washington, at the noblest site of our National Capital, there is another university empty. Two of the most commanding educational buildings in the land, standing in close proximity to the national observatory, within easy reach of the noblest library and governmental collections and bureaus in the world, overlooking the spot, where shall rise the National Cathedral of America, there is this university, but its halls are silent! Not a teacher, not a student!

But between these two, the oriental place of traditional wisdom and the Occidental University—what a difference! The Chinese school is forsaken because humanity has outgrown it. The world has swept by and forgotten it. Its books are closed because its work is done.

The very contrary is true of the school on the heights at Washington. Over fifteen hundred students have knocked for entrance at the door of this university of the White Marble Halls. Over fifteen hundred, and every day others are asking "Why do you not open your doors?" And some of those who have knocked and called to enter, have come from the very land where the light of the Grotto school flickered and went out.

"Why do you not open?" Yes, why do we not open? Harken, you who read. Has it entered into your heart to conceive what it means to have over fifteen hundred brave, open-eyed souls coming from all over the world, seek entrance to a place of light and be denied admission?

With the very buildings not yet completed, and over fifteen hundred men and women, future seers and prophets and captains of the spirit already seeking to find in those halls their girding for life—has that to you no significance of vaster future meaning?

Yes, why do we not open? Ask that, you who could help us and will not. Ask that, you who call yourself a steward of your Lord, or even a lover of your brethren and a patriotic citizen. Ask that, let it burn into your heart.

Another Legacy for the American University.

Through Mr. Peter H. Pleune, of Grand Rapids, Michigan, the executor of the estate of the late Rev. Samuel B. Smith, of the Cincinnati Conference, the University has just received a legacy of five hundred dollars. Mr. Smith retired from the active ministry several years ago and spent the last years of a useful and honored life in Grand Rapids.

Professor Borden Parker Bowne, of Boston University:

No other city in America can offer so many advantages for a great university as Washington; and nowhere else would a great university be so effective.

Mr. Charles C. Glover, President of the Riggs National Bank:

Here in the Capital City where our laws are made and where the national character is molded, all the forces of Protestantism ought to combine to build, in the American University, an impregnable stronghold of liberty and disinterested patriotism, of enlightenment and the open Bible.

Bishop William F. Anderson, of Chattanooga:

The need of Methodism and of the country for such an institution as is proposed by the American University must be apparent to every man who is aware of the educational situation. The strategic point for its location is in the Nation's Capital. The splendid foundation already secured and in process of development leaves no further question as to the duty of the denomination and all true patriots toward this great enterprise.

Annual Meeting of the Trustees.

At the annual meeting of the Board of Trustees of the American University held on December 9, 1908, there were present: Vice-President Charles W. Fairbanks, Senator Charles Dick, Chancellor Franklin Hamilton, Dr. David H. Carroll, Dr. Charles W. Baldwin, Mr. Charles C. Glover, Mrs. J. Frank Robinson, Dr. Thomas N. Boyle, Dr. J. G. Bickerton, Dr. W. L. Davidson, Mr. B. F. Leighton, Mr. R. B. Ward, Mr. Thomas W. Smith and Mr. John E. Herrell.

The officers of the board and the standing committees were elected as follows: President, David H. Carroll; Vice-President, Aldis B. Browne; Secretary, Charles W. Baldwin; Treasurer, Charles C. Glover; Executive Committee: Franklin Hamilton, T. H. Anderson, B. F. Leighton, A. B. Browne, J. E. Herrell, T. W. Smith, Earl Cranston, D. H. Carroll, B. H.

Warner, C. W. Baldwin, G. W. F. Swartzell; Finance Committee: A. B. Browne, C. C. Glover, J. E. Herrell; Auditing Committee: B. F. Leighton, T. W. Smith, G. W. F. Swartzell.

The general sentiment of the meeting was reflected in the statement by several of the older members of the board that the university enterprise was never before on so solid and hopeful a business basis as at present. Tributes to the memory of Bishop Charles H. Fowler and Rev. Dr. J. O. Wilson were adopted and spread upon the journal.

\$35,000 More for Massachusetts Avenue.

The present District of Columbia Bill, which we have every reason to believe, finally will pass Congress, provides an added appropriation of \$35,000 for the continuance of the work on Massachusetts avenue between Wisconsin avenue and Nebraska avenue.

Laudable progress already has been made in bringing up Massachusetts avenue toward Nebraska avenue. Like a vista in the gardens of Versailles appears the noble stretch of outlined road. The new appropriation ought to complete the grading to our doors.

What does this signify? Take notice! Historic already is the spot beside old Fort Gaines, where the great boulevard, traversing the metropolis from the Potomac past the Capitol and the Union Station and through the most exclusive residential quarters of Washington, comes at last to the roof of the District. A far vision is not needed to behold in this spot where the Appian Way of the capital reaches the lookout toward the blue Virginian Mountains and the sunset, the glory spot of Washington.

Above the Capitol dome and the slender, silvery shaft of Washington's Monument, above the Naval Observatory and the proposed romantic new park, above Cathedral Heights and the rising University Heights—above them all towers this one supreme place of honor in the national city, and on it stands the American University, *with the way open to her doors!*

Extension of Rock Creek Park.

The proposed extension of Rock Creek Park by the purchase of about 4,000 feet frontage on Massachusetts avenue, for which the bill before Congress appropriates \$420,000, is a measure which has the sanction of the friends of future Washington. Before division into building lots and the erection of residences shall have removed the possibility of its acquisition for public use, this choice piece of woodland should be secured as the natural beauty spot and breathing place for the millions of population who will visit and enjoy its charms. Once in the possession of the Capital, what a perfect home it would be for the National Gallery of Art, which must ere long be built to give proper setting and shelter to the famous Freer Collection and to other similar treasures of painting and sculpture! Our Solons at the Capitol will show farsighted wisdom by putting into actual effect this splendid suggestion

which has the endorsement of Commissioner Macfarland and many other of our first citizens. The proposed extension is in the vicinity of the American University. It is needless to say that such a park, with the possibility that later it may be the site of the great National Art Gallery, would be an added asset of almost incalculable value to our enterprise.

Strong Words from Well Known Men.

Ex-Governor S. R. Van Sant, of Minnesota:

The American University is advantageously located. What better place than our National Capital city for a great institution of learning? It will not only give its students a most excellent opportunity for study and research, but the young men educated in Washington would have an opportunity to familiarize themselves with public questions and the science of government, and at the same time better prepare themselves to battle for the perpetuity of the Republic. The need of the hour is not only for educated men, but educated patriots.

Ex-Governor John L. Bates, of Massachusetts:

The American University deserves the encouragement of all interested in the cause of education or in the cause of the nation. The breadth of its conception may cause the less forceful to hesitate but stimulates the admiration and spirit of men of action who can see both clearly and far and recognize that the plan is not more broadly conceived that the outlook warrants or than its future relation to the country justifies.

There is not only room, there is positive need for such an institution at the Nation's Capital, and I tender you and your co-workers my heartiest best wishes that the men of faith and of means may co-operate with you to the complete realization of this great undertaking.

Justice William R. Day, of the United States Supreme Court:

It affords me pleasure to express my appreciation of the importance and value of establishing the American University at Washington. At the Capital of the Nation the students will not only learn from books and instructors, but will find available the finest and most complete library in the country, as well as museums of art and science and other facilities not elsewhere obtainable.

As a primary object of education to promote good citizenship, the knowledge which the student may acquire in Washington of the practical working of government and administration of the law will be of the greatest advantage.

I well recall the deep interest which President McKinley took in the welfare of the University and his confident belief in its usefulness as a great central institution of learning.

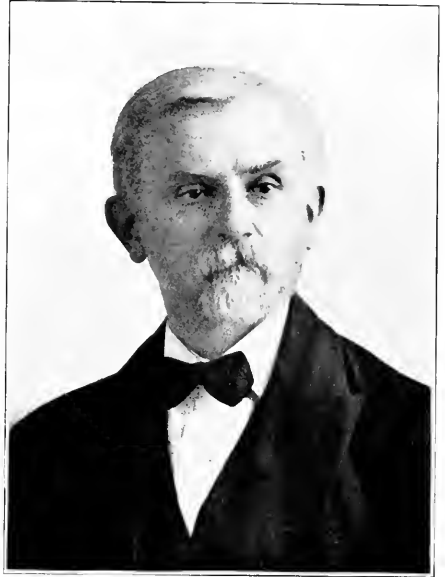

A Caution: To Whom It May Concern.

It has been brought to the attention of the trustees of the American University that two other enterprises at present are using this same name. The representatives of said university consider it their duty to advise the public of this fact. "The American University Popular Course of Home Reading," having offices in New York City and various other places, and "The American University," claiming a headquarters in Boston, are not connected in any way with the American University at Washington, District of Columbia.

This public announcement is due to the University, as well as to the community at large.

FRANKLIN HAMILTON, Chancellor.

Washington, D. C., February 8, 1909.

Albert Osborn, Editor.

"Ye Editor," in fact and in type, made his initial bow in the last number of the COURIER. In the present issue, through the pleasantly compelling suggestion of the Chancellor, he makes the same pictorially—a sort of pre-face. In lieu of the actual and voluntary bending of the neck, impossible through a halftone, he begs his readers to accept any involuntary nods of which the signs may at any time appear. He will welcome suggestions from friends and especially from the members of the editorial fraternity.

Influence of the Catholic University on the National Capital.

The extraordinary activity and success attending the work of the Roman Catholic Church in our national Capital may be imagined from the three following reports which are taken simply as samples of the record for one Sunday. All three meetings were held on one Sunday, that of December 13, 1908.

The influence which the Catholic University of America is exercising upon Washington will be appreciated when it is understood that both the "Apostolic Mission House" and "Trinity College, Brookland," here referred to, are affiliated institutions of the Catholic University. Thus may be seen into what varied fields of effort the members of this University are carrying their enthusiastic labors.

A Collection for the Catholic University of America.

In St. Patrick's Church yesterday morning, the Sodality of the Blessed Virgin Mary of that parish and the St. Vincent de Paul Societies of the District attended the early mass and received Holy communion in a body.

The sermon at the solemn high mass by Rev. Father James A. Smyth, was of the "Peace of Christ."

Rev. Dr. Russell read the announcements and took that occasion to thank the congregation for its liberal response last Sunday to the collection for the Catholic University of America, which realized a total commensurate with the amount furnished heretofore for this purpose.

In this annual collection, St. Patrick's congregation has for five or more years furnished a larger sum than has been collected from any other church in the United States.

A League of Men under Jesuit Leadership.

At St. Aloysius' Church it was announced yesterday that the 7 o'clock mass in the upper church next Sunday and the service at 7.30 o'clock that evening will be exclusively for men. The Third Sunday League, composed of 1,508 men, will gather at the mass to receive holy communion in a body, offering their communion for the intentions of the Pope.

Immediately after the mass a flashlight picture will be taken of the whole congregation of men, copies of which will be sent to Pope Pius X, and to Very Rev. Father Francis Xavier Wernz, S. J., father-general of the Jesuit order at Rome.

In exhorting each member of the league to be present the director, Rev. Father Eugene DeL. McDonnell, S. J., said that he "wished the sovereign pontiff and Father Wernz to see what sort of men we have in Washington. Let every man of the league be in the picture; let us prove what Catholic men of America can do and are doing. The sight of the 1,500 men assembled at mass to receive holy communion for the Pope will bring joy to the 'Prisoner of the Vatican.'"

The magnificent memorial, signed by 1,508 members of the Third Sunday League, in attestation of their love and devotion to the holy father, will be unveiled next Sunday evening.

This memorial is the work of Sister Florence Louise, of Trinity College, Brookland.

Winning Non-Catholics to the Roman Church.

A congregation of men that overtaxed the capacity of the church gathered last evening in St. Martin's, North Capitol and T streets, for the closing service of the mission for men and the opening of the mission discourses for non-Catholics.

Sermons every evening this week at 7.30 o'clock by missionary preachers associated with the Apostolic Mission House will be given for the purpose of explaining to non-Catholics the doctrines and practices of the Catholic Church.

Non-Catholics are cordially asked to attend, and Catholics will only be welcome when accompanied by non-Catholic friends.

Very Rev. Alexander P. Doyle, C. S. P., rector of the Apostolic Mission House, inaugurated the course last evening with a sermon on "The Christian Man."

Rev. Alvah Doran, of Philadelphia, a convert to the Catholic faith and former minister of the Episcopal Church, will preach this evening on "The needs of a creed." Father Doran is at present pursuing a course of missionary study at the Apostolic Mission House, Brookland.

But It Will Remain.

One of the public prints in commenting on the various national Capitals of the world, says:

St. Petersburg, Berlin to some extent, Ottawa and Washington are national capitals that have been made to order, as it were. In their earlier stages, at least, these latter derived their importance from the fact that governmental power centered there. In theory a national capital should be centrally located geographically, and thus equally accessible to residents of all sections of the country. But how seldom is this the case, either in national or state capital sites! A national capital, viewed from one standpoint, should be where

the best intellectual and moral life of the country centres, where legislators and administrators are subjected to the environment that both stimulates thought and action and informs and refines the mind. Viewed from another standpoint, a national capital may well be placed somewhat apart from those enervating, demoralizing, cynic-producing aspects of life which come to be so prominent in ancient and vast centers of population like London and Paris. Nor is it well for public officials to be too near the great centers of commerce and industry, lest they take on the 'commercial' point of view.

The choice of sites for national capitals, theory and doctrine seldom control. Washington on the Potomac is not the ideal site for the American capital, whether viewed from the standpoint of geography or climate. But it will remain the national capital as surely as London will the British.

Yes, it will remain. And just because Washington for centuries to come will be the dominant, vitalizing center of our American civilization, ought we not to equip this center with that which will fit it for its high destiny?

A great Christian University, reaching out into every corner of the land for resources of brains and men and money, sending back through every channel of life, back into the uttermost corners of our national realm and of the world, the sweetening, idealizing, strengthening, ennobling influences that make for well-being and righteousness. That is our dream! And slowly, but surely, that dream is coming to reality in the foundation of The American University.

The American University—A Sky Line View.

As a companion picture to the two which appeared in the COURIER of October, 1908, we now present another sky line view of the first two buildings of the American University. This impressive view is reproduced from a photograph taken December 12, 1908, from the open field lying in the angle formed by Massachusetts avenue, now being extended, and Jewett (formerly Joliet) street. The line of vision is to the northwest, up the beautiful slopes of "Westover," the villa of Mr. Charles C. Glover, our University Treasurer, and parallel to Massachusetts avenue, which is to strike the University site just beyond the notch in the woodland at the extreme right. The McKinley Memorial College of Government at the left shows its northern wing with its marble front to the east and its copper dome crowning its pillared entrance. Its western wing of equal dimensions is not here visible. The strong, chaste structure at the right is the College of History, a rear view, the proper architectural front being on the opposite or western side, facing the campus.

A glance at this picture suffices to reveal a part of the natural beauty of landscape that surrounds the University. It also shows the attractive environments of the main approach from the heart of the city by Massachusetts avenue. The completion of this popular thoroughfare and most striking residential boulevard of Washington to the grounds of the University is a question only of a short time. The next appropriation

THE AMERICAN UNIVERSITY—A SKY LINE VIEW

from Congress for this great improvement doubtless will open the avenue for public use, as a driveway straight to our grounds. This will obviate the tedious route of Nebraska or New Mexico avenue (formerly Tunlaw Road). The opening of this highway of the National Capital will put a totally new aspect on the fitness of the site of the American University as the permanent habitat of an institution of higher learning.

The White "City set upon a hill cannot be hid." Already it shines the argent crown of a metropolis turning to silvery marble. Washington has been growing whiter for twenty years. Within this period many of the principal buildings of the capital have been constructed of marble, or blanchèd granite, or other material of the lighter shade. Among these buildings may be named the Library of Congress, the Naval Observatory, the Corcoran Art Gallery, the Post Office, the Public (Carnegie) Library, the Riggs National Bank, the American Security and Trust Company,

the Union Trust Company, the Hibbs Building, the Evening Star, the New Willard and the Raleigh Hotels, Stoneleigh Court, the Cairo, New Foundry Church, Memorial Hall of the Daughters of the American Revolution, Union Station, the Municipal Building, the Senate Office Building, the Representatives' Office Building, Masonic Temple, the Carnegie Institution, the National Museum, and the Agricultural Building. Other edifices of similar beauty are soon to follow—the Bureau of Engraving and Printing and the new home for the Department of State, of Justice and of Commerce and Labor. The White House, the Capitol, the Treasury and the Monument have been the inspiring examples in this glorious train of architectural lustre.

Shall this outward whitening, a spreading splendor in our Capital City, prove to be, in the years to follow, only the material sign of moral leprosy, or, shall it become the effective symbol of a growing purity in

private life and in public affairs? With the Christian people of America lies the answer to these questions. The increasing strength of the civic conscience has received great impetus from the personal worth and virile characters of the men who in the White House have lived the white life. Hayes, Garfield, Cleveland, Harrison, McKinley and Roosevelt have become talismanic watchwords in the exalting of this nation through righteousness.

A timely reinforcement to this uplift of national honesty and honor will come with the opening of the departments of history and government in the American University. The selection, for academic work in the institution, of Christian men who know how the summits of human achievement have been reached and who to the problems of the present age are able to apply the lessons of the past, and to teach the fundamentals of human government, now awaits simply the needed endowment. We have faith that men and women glad to consecrate their money to such an end soon will be found.

Is it too high a vision to dream of this University on its hill as now soon to be "A city that is compact together; whether the tribes go up, even the tribes of the Lord." "Who shall ascend unto the hill of the Lord, or who shall stand in His holy place? He that hath clean hands and a pure heart, who hath not lifted up his soul unto vanity, nor sworn deceitfully. He shall receive the blessing from the Lord, and righteousness from the God of his salvation. Lord, who shall abide in Thy tabernacle? Who shall dwell in Thy holy hill? He that walketh uprightly and worketh righteousness and speaketh the truth in his heart."

The Pope and His University Workers.

His Holiness, Pope Pius X, is following with keenest interest every phase of religious and educational life in America. At the recent epoch-making Chicago Council held for the purpose of furthering the missionary movement in the Catholic Church in America there was exhibited a letter from the Pope to Cardinal Gibbons. This letter had been brought from Rome by Rev. Father A. P. Doyle, Rector of the Apostolic Mission House, Washington, D. C. (This Mission House is connected with the Catholic University at Washington.)

The first portion of this letter from His Holiness reads as follows:

"Pope Pius X.

"To our beloved son, James Cardinal Gibbons, cardinal priest of the title of 'Sancta Maria trans Tiberim,' Archbishop of Baltimore.

"Beloved son—health and apostolic benediction.

"Truly solicitous as we are concerning all measures which may contribute to the progress of the church among the nations, we have received with joy the information that in the United States of America there are many who are every day more powerfully drawn to the study of the doctrines of the Catholic Church by the labors of zealous missionaries, especially of those who have been trained at the apostolic mission house at the University in Washington.

"In the fruitful work of these missionaries, two things are particularly approved by us. First, that apostolate bands of these missionaries, established in the different dioceses, are subject immediately to their own bishops, and by their direction and under their auspices the missionaries teach the doctrines of the faith not only to Catholics but to non-Catholics.

"Accordingly, let these devoted missionaries know that their work and method correspond entirely to the desire and the hope of the apostolic see, and strengthened by the testimony of our approbation let them continue their labors, always remembering that their zeal is approved by us and by the church, to the end that the work of the missionary bands may be extended to each and every diocese and be multiplied therein."

Who Will Stop Our Taxes?

"DEAR SIR:—I write to ask whether you are contemplating offering instruction in the American University next year. I did not know but you might be about ready to begin in a modest way, as I understand that the amount saved in taxes would be nearly sufficient to provide the salary of a subordinate officer, if not quite sufficient for this purpose * * * *"

All of which is a text. The above quotation from a letter which has just come to the office is a sample of many such inquiries. From every quarter they come. We select this particular communication for the reason that it specifically raises the question of a fixed charge against the present resources of the University enterprise which we cannot escape. Until actual academic instruction is in progress we must pay each year a large sum as taxes on the property which we are holding in trust for the future. We hesitate to state how many thousands of dollars this has aggregated.

If we only could put in operation one department, or if we only could feel able to put into permanent being one professional chair of research from which as a nucleus other work speedily would grow, the burden of taxation would roll from us like the burden of Christian at the Cross.

Bishop Hamilton, one of our trustees, urges the immediate foundation of at least one permanent professorship or lectureship on Christian Evidences. With his characteristic vision and courage he already is busied with bringing this about.

Is it any wonder that, as we view the constant outgo for taxes of money that ought to be used for purposes of instruction, we are tempted more than once to exclaim, "How long?"

Is there no one who will take to heart this opportunity? Is there not some one who will endow a memorial professorship bearing the name of the giver, and thus set in operation forces that only the ages shall measure?

Hon. George B. Cortelyou, Secretary of Treasury:

I am glad of this opportunity to express my hearty commendation of the project to establish at the seat of government such an institution as the American University. The substantial progress already made gives every assurance of ultimate success. Naturally, I am especially pleased with the plan to erect as one of the colleges a national memorial to the late President McKinley. Such a memorial will be a fitting tribute to the great President whose interest in the new University was well known.

The American University Courier

Entered as second-class matter February 27, 1909, at the post-office at Washington, D. C., under the Act of July 16, 1894

Volume XVI

Washington, D. C., June, 1909

No. 1

MADAME MOUNTFORD.

Important Announcement.

It has been deemed wise to raise the amount asked for as an Opening Fund for the American University from \$500,000 to \$1,500,000. All subscription envelopes, cards, circulars, etc., used for the fund will bear this changed amount. Of this larger sum \$500,000 will be used to open the doors of the University to students the present year.

The September issue of the UNIVERSITY COURIER will contain an important and interesting communication in this connection to which all are referred for full information. In the meantime we call upon our friends everywhere to assist us in raising the Opening Fund. We are calling for subscriptions divided into annual payments running from two to five years. Will you not make such a subscription to this fund now?

\$60,000 for the American University Opening Fund.

Sixty thousand dollars has been subscribed toward the opening fund of the American University by two friends of the institution. A gentleman in one of the

PETER VON FINKELSTEIN MAMREOV.

middle states, a life long and devoted member of the Methodist Episcopal Church, has pledged \$40,000 to endow a lectureship which is to bear the name of the donor. \$20,000 has been subscribed by a resident of the city of Washington. This ready and heartening response to the appeal for a sum of money which shall justify the trustees in opening the University to students is a source of real encouragement. Let every friend of this enterprise now rally to our help. Let each do what each is able to do. The time has come to make the supreme effort to open the University. Every subscription now makes that event more assured.

Madame Mountford's (Lydia Mamreoff Von Finkelstein) \$50,000 Oriental Collection for the American University.

Another benefactor to the American University has been found. This benefactor is a lady. She has our gratitude and sincere appreciation. On the front page of this issue of the COURIER we present the portrait of Lydia Mamreoff Von Finkelstein Mountford. This

elect woman is known in three continents as a singularly gifted and inspiring lecturer on Bible traditions and symbolism. She is just completing a series of fifty lectures to crowded audiences in the city of Washington.

Madame Mountford long has been interested in the American University. Her study of the strategic situation at Washington has crystallized her interest into action. She very kindly has consented to deposit in the University her rich and extensive museum of objects gathered in Palestine to illustrate her teachings on the Bible during the past twenty-five years.

This museum comprehends also the collection of Madame Mountford's brother, the late Peter Von Finkelstein Mamreov. Experts have pronounced this doubly variegated assemblage of Oriental objects unique. There is none other like it in the world. It represents the loving industry and intelligent gathering of two lives. It is valued at fully \$50,000.

The intention of Madame Mountford is to place the objects in the University as a loan collection during her lifetime. Upon her death Madame Mountford intends the museum to become the property of the American University as a memorial of herself and her brother Peter. The title of the museum will be "The Lydia M. Von Finkelstein Mountford and Peter Von Finkelstein Mamreov Museum Illustrating Bible Life and Customs."

This generous benefactor of our enterprise already has begun to install her treasures in the College of History building. The collection will be increased with time. It will form a new attraction to our national capital and will draw many visitors to the University. Madame Mountford personally will give all care to the proper arranging, labeling and explanation of the various curios, utensils, garments and emblems. Visitors to Washington hereafter in their itineraries will need to include this matchless Palestinian folk museum on the grounds of the American University.

Peter Von Finkelstein Mamreov.

The second picture on the first page of the COURIER is that of the late Peter Von Finkelstein Mamreov, a brother of Madame Mountford, who assisted her in a joint lecture tour through the United States and England. He died in January, 1902. He was a well-known lecturer at the various Chautauquas and contributed many articles on Oriental subjects to various religious magazines. In the picture he appears in the costume of a gentleman of Bethlehem, such as Boaz, of old, wore.

Bishop Hamilton Endowing a Professorship.

We previously announced the intention of Bishop Hamilton to endow in the American University a professorship on Christian evidences. We take great pleasure now in stating that the bishop is actively engaged in this effort. Some money already has been raised, and wherever the subject is broached it meets with instant favor.

About \$60,000 ought to endow such a chair as is contemplated. Certainly it is fitting that one of the first chairs of teaching put in operation in this University should be one devoted to the subject of the evidences of the Christian faith.

The bishop has had printed a large number of envelopes, explaining his plan and suggesting the way in which those who are interested can help him. The effort is ingenious and cannot fail of success. Send to Bishop Hamilton for an envelope. There is to be no limitation, large or small, applied to the help for which he is asking. Even those of slender means can help a little. Send for an envelope. The bishop's address is 30 Bromfield street, Boston, Massachusetts.

Gifts of Money.

Receipts of money for the University since our last published statement include the following:

\$1,000, Mrs. Helen Hendrix; \$500, Samuel B. Smith estate; \$250 (each), T. C. Hunter, John Fritz; \$100 (each), S. W. Bowne, M. G. Norton, F. W. Tunnell, Mrs. J. L. Norton, C. H. Smith, Miss O. N. Chamberlain, A. A. Chapin, John T. Stone, Mrs. A. W. S. Keator, J. W. Jackson, Zenas Crane, James A. Gary; 50 (each), L. E. Breuninger, I. O. Ball, John Grubbel; \$30, Charles A. Woodworth; \$26, collection, Hutchinson, Kansas; \$25 (each), B. F. De Klyn, A. H. Bailey, S. H. Walker, J. C. Yost, W. A. Rankin, I. H. Good, Ward Platt; \$18, collection, Sedalia, Missouri; \$15, T. H. Hagerty; \$10 (each), D. H. Carroll, T. C. Smith, A. W. Chapin, H. N. Taplin, Miss E. F. Pierce, Wm. Cunningham, W. S. Wood; \$9, collection, Kingman, Kansas; \$5 (each), T. W. Gallaher, Summerfield Baldwin, J. S. Rawlings, J. B. Landis, collection, Tarkio, Missouri; \$1 (each) J. Howard Sutton, W. A. Gault, A. G. Miller, J. J. Ware, A. S. Taylor, Mrs. Mary P. G. Jackson; 50 cents, Daniel Bailey.

Portrait of Bishop McCabe.

Some time ago announcement was made of an oil painting from life of Bishop McCabe by Mr. Templeman, a Philadelphia artist. The intention of the plan concerning the purchase of this portrait has been that the painting is to be given to the American University.

We invite all to come and see the portrait as soon as it shall be hung. Mrs. McCabe and friends of the bishop pronounce the picture an excellent likeness.

Later.—The picture has been received and for a time will be at the University office, 1419 F street northwest.

How to Build a National University.

Many opinions for years have been expressed as to the best method of building a National University at the Federal capital. The most feasible plan, perhaps, after all, may be found to be that suggested by the Washington correspondent of the New York "Christian Advocate." He says:

Methodism will do its part in making this idea possible, if it will munificently endow the American University. Congress has frequently refused to do this as a national affair, and the only way at present worthy of consideration is for our great Church, in conjunction with all evangelical churches, to build up and complete the work so auspiciously begun by Bishop Hurst.

President Taft and the American University.

I sincerely hope that the American University will have a long life, and that the beautiful buildings and site assigned to it may be properly availed of to make it useful to the country at large as it ought to be. The beauty of the surroundings is great, and the architecture and solidity of the buildings are such as to indicate that it is being built for a long life of usefulness.

The next issue of the AMERICAN UNIVERSITY COURIER will contain an announcement in this connection that will interest every one. Look for that issue and see what it says: In the meantime will not you lend a hand to help realize what is contained in President Taft's first sentence above? We are in the midst of a great battle for this enterprise and the President realizes this and is giving us his sympathy and deepest interest. Long live President Taft!

Cordial Greetings in the West.

FRED M. STONE, ENDOWMENT SECRETARY.

The American University is winning its way in the West. The writer's last trip has brought increasing evidence of this fact.

The spring annual conferences of Missouri and Kansas were assigned to the writer for visitation. The key to the region is that coming metropolis of the south-west, Kansas City, Mo. Here the people gather from all parts of the Union to go into the regions west, south and south-west. One hardly realizes the large number and energetic character of the throngs of settlers going out into the vast empire of opportunities lying out beyond. A reliable informant assured me over one million two hundred thousand homeseekers passed through this gateway last year. The great West! The writer traveled hundreds of miles but barely touched its eastern edge.

Clay Center, Kansas, was the first destination. The Kansas Conference was in session, with Bishop Quayle, alert, genial, sympathetic and humorous, in the chair. Our University was given the entire evening hour on the educational anniversary program. The cause was received with a cordial spirit and the speaker accorded an attentive audience. From this conference the writer turned back to Sedalia, Mo., the seat of the St. Louis Conference. Bishop Anderson was in the chair and presided with dignity and dispatch. He gave the American University representative an excellent opportunity to speak to the conference. Rev. Dr. Thomas Nicholson, Corresponding Secretary of the Board of Education, and the writer divided the time of the educational anniversary hour and each was given an excellent hearing. A night trip from Sedalia to Coffeyville, Kansas, a day representation at the Southwest Kansas Conference, and a night ride back to Sedalia, Mo., give a glimpse of the way the various secretaries toil and travel. After the adjournment of the St. Louis Conference Bishop Anderson, Dr. Ezra S. Tipple, the writer, Rev. Dr. J. G. Vaughan, Rev. Dr. J. W. Van Cleve, and Rev. Dr. W. D. Agnew, President of Missouri Wesleyan College, by invitation, attended a ban-

quet at Kansas City given by the Methodist Laymen's Union and spoke in the order named. My next visit was to the Southwest Kansas Conference in session at Kingman, Bishop Nuelsen presiding. The Bishop was the personification of graciousness and brotherliness. This truly great conference gave our cause a royal welcome. Again Dr. Nicholson courteously divided the time with the writer and we were given an attentive hearing.

Kansas Methodism is a vigorous vine. All the conferences are doing grandly for God. What a company of Methodists! 350,000 strong! And just getting well under way. It was a delight, indeed, to find so many old friends and to make so many new ones for the University. District superintendents, pastors and members pledged their support to the work. The last Sunday in Kansas was spent in Hutchinson and again the American University was received with a cordial greeting that was encouraging indeed, thanks to the pastor, Rev. H. E. Wolfe. Turning eastward the writer journeyed to Greenfield, Indiana, where his own conference, the North Indiana, convened. There the story of interested and cordial greetings was repeated. Much praise is due the pastor, Rev. W. W. Martin, for the courteous attention given our cause. The writer returned to the seat of our University grateful and encouraged by the multiplied evidence of interest and goodwill.

Roman Catholics to Raise \$500,000 for the Catholic University at Washington.

Formal approval of the plan suggested by the special committee of the Knights of Columbus to raise \$500,000 for an endowment fund for the Catholic University of America, at Washington, has been given by Cardinal Gibbons in a letter to that body.

In his letter the Cardinal says that the plan also has the sanction of Pope Pius X.

The Knights of Columbus undertook the task of raising the \$500,000 endowment fund at the annual meeting at Jamestown, Va., in 1907, and at the convention at St. Louis last year. The plan adopted is to assess each member of the organization the annual amount of \$1.

As the total membership is approximately 225,000 it is expected that the complete amount will be raised within two years.

Cardinal Gibbons in his letter of approval says:

Your order has already manifested your friendship for the university in an unmistakable way, and the accomplishment on your part of this magnificent endowment will forever redound to the glory of your organization, and in the name of the church (which will be benefited so much by it) and with the sanction and approval of His Holiness Pope Pius X, who has taken the university under his special patronage, I exhort all good and faithful Knights of Columbus to contribute cheerfully the small amount required for the purpose of raising this fund, and extend to all the Knights the benediction of the church for this good work to be done by them.

Faithfully yours in Christ,

J. CARD. GIBBONS.

Who Will Give or Help to Give \$10,000?

We desire to put the College of History building into condition for immediate use. To cover all expenses involved we ought to have ten thousand dollars. We cannot do what is needed with less. We can not wait long for this. Our plans call for it now. We must have it now. Are you willing to help by a contribution? To lend a hand now will multiply the effectiveness of all future giving.

Some one, perhaps, is willing to assume the cost of a particular part of the work required. That would be indeed a gracious act. The tax bill on the University site, amounting to \$2,037, is due. It ought to be paid. That, therefore, we include in our estimates.

Think on these things. Remember how we have struggled for years. Now is the hour for every friend to rally to our assistance. Now is the moment when a

little money wisely utilized can be made to accomplish vast results. Who will write down his or her name as first in the list of those who opened the American University?

Semi-Annual Meeting of the Trustees.

The trustees of the American University met in semi-annual session on Wednesday, May 5, at the University office. There were present Bishop W. F. Mallalien and Bishop J. W. Hamilton of Boston; Chancellor Franklin Hamilton; Dr. D. H. Carroll, president; Dr. C. W. Baldwin, secretary; Dr. T. N. Boyle, Dr. J. G. Bickerton, Dr. W. R. Wedderspoon, Dr. W. L. Davidson, Mr. R. B. Ward, Mr. A. B. Browne, Mr. B. H. Warner, Justice T. H. Anderson, Mr. T. W. Smith, and Mr. G. W. F. Swartzell. Reports were received from Chancellor Hamilton, Assistant Secretary Albert Osborn, Financial Secretary John A. Gutteridge, Treasurer Charles C. Glover, and Endowment Secretary Fred M. Stone. Bishop Hamilton stated that he was at work to raise money for a lectureship and expected to secure from \$50,000 to \$60,000 for the purpose. The Chancellor reported the prospective early payment of the bequest of \$50,000 from the estate of Mr. Hart A. Massey as soon as the details for the use of the money could be arranged. Important measures bearing on the policy of the University and especially on the opening of the University to students were discussed and good progress was made toward that result. Luncheon was served during the hour between the forenoon and afternoon sessions.

William Connell.

The death of William Connell, of Scranton, Pennsylvania, on March 21, removed a venerable figure from public life and a member from the Board of Trustees of the American University. His term of service extended from 1895 to the time of his decease. He presided, in the absence of the chairman, at the December meeting of 1898. He contributed to the funds of the University \$5,000 for the College of History and \$5,000 toward the grading of the site. He was a large giver to the Elm Park Methodist Episcopal Church of Scranton, and a liberal supporter of many benevolent causes through his life. He served in the House of Representatives for his district for eight years, with efficiency and credit to himself and his constituency. In early life he battled successfully against great difficulties of environment. He wore his trophies with lowliness of mind and rejoiced to be a helper in the spread of Christianity throughout the world. His years were more than fourscore and the friends who mourn his departure are legion.

John E. Herrell.

The Board of Trustees of the American University has lost another of its members in the death of Mr. John E. Herrell, which occurred after several weeks of illness on March 29, 1909. He was in his sixty-

ninth year. He had been president of the National Capital Bank for many years and a director of the American Security and Trust Company and other leading financial corporations of Washington. He became a trustee of the American University in May, 1895, and was appointed a member of the Building Committee in June the same year. He rendered active and efficient service in the general work of the Board and was particularly helpful on the Building Committee. One of his special services was a trip of several days to Rutland, Vermont, and a personal inspection of the quarries there as to the quality of the marble which was used in the College of History. From these quarries later came also the marble for the McKinley Memorial College of Government. His manner of life was one of simple frugality. To the end he practised the lessons of his early discipline. He surrendered his active labors only as compelled by physical decay. All friends of the University must be grateful for the profound interest and helpful attitude which he took toward the enterprise from its inception.

Dr. Claudius Spencer's Noble Words on the American University.

The American University is in our hands. There is a moral debt due those who have put multiplied thousands of dollars into it, to use these benefactions in something more than annuities, office rent, and salaries. Moreover, the life blood of at least two bishops calls for action. And action is the word. It is high time to put some steam on the wheels as well as on the whistle—or hank the fires.

The story of this Catholic educational enterprise (at Washington) should rise as a spectre to trouble the conscience of the Methodist Episcopal Church, if we do intend to do anything in Washington, because that university immediately began to teach; it began to put its steam on the wheels, and to-day, twenty years later, it has a family of colleges in law, philosophy, science, languages, sacred science, all going, a faculty of eminent professors, 55,305 volumes in the library, \$627,627 in productive funds, and a total income last year from endowment, tuition, and incidental fees of \$188,069. Moreover in Washington is also the Roman Catholic Georgetown University having 149 instructors, 855 students and a library of a hundred thousand volumes. There are also no less than six minor theological colleges in Washington affiliated with the Catholic University of America. And we? What have we?

The American University was chartered. It was not to be sectarian nor narrow. It was to be simply Christian, with Methodists at the helm.

The American University is building not for a generation, but for the lifetime of the Nation: it is building for five hundred, for a thousand years. Oxford has already seen more than a thousand years.

The American University had to build well. No one can possibly criticize that. Nor can anyone criticize the policy of erecting the noble buildings now on the great campus. They fit their ideal. They are as creditable as they are substantial.

It has all the room it needs to begin business. And now Congress has ordered Massachusetts avenue, a veritable boulevard, opened out to the campus, the University is certain to be immediately the objective of countless automobiles, carriages and sight-seers: it brings Methodism into the very eye of the capital—and of the world. There is no site anywhere better. It is near Mount St. Albans, the little knoll where the Episcopalians are to develop their great cathedral system; it commands a historic and inspiring prospect; it has every potency of situation and destiny to make it the flower, the dome, of the Methodist system of education in all the world.

All that John Fletcher Hurst saw is there. A hundred, a thousand years hence it may be to American Methodism what Washington will be to the American Republic, and to world-wide Methodism what Washington is to the civilization of the world.

The American University will go. The American University will go.

The above stirring words are from an editorial by Dr. Spencer in the "Central Christian Advocate" of March 31, 1909.

All who are interested in Christian education are urged to send for a copy of that number of the "Advocate" and to read the thrilling utterance from beginning to end.

Personal.

Senator Dolliver's recent speeches on tariff revision are another vindication of his powerful leadership and courageous statesmanship. His thorough grasp of the subject and of the bearings of the proposed legislation upon the interests of the common people was keenly felt and freely recognized by those who take a different position. The wisdom as well as the justice of the measure he advocates will, we believe, be amply vindicated in the sequel of the action of the Senate. The senator is one of our most earnest and active trustees.

The illness of Bishop Alphaeus W. Wilson, of Baltimore, for several weeks past has kept him from his official and public duties and prevented his attendance at the May meeting of our trustees. More recent reports give assurances of improving conditions of health. Bishop Wilson is our vice-chancellor. He is one of the strongest minds and most powerful preachers of the Methodist Episcopal Church, South. We hope and pray for his thorough restoration to his wonted activity.

Mr. Brainard H. Warner, a member of our Board of Trustees, has recently added to his distinction as a citizen of Washington by being designated to present to the city and the nation the striking statue of Alexander R. Shepherd, once Governor of the District of Columbia, and also that heroic figure of Henry W. Longfellow. Mr. Warner is equally at home in functions relating either to civic or literary life.

Our financial secretary, Rev. Dr. John A. Gutteridge, with Mrs. Gutteridge, left New York on May 8 for a few weeks' vacation in England among the scenes and associations of his early life. While renewing the vivid memories of boyhood and young manhood, Dr. Gutteridge will keep his eyes open to the future and to any opportunity to further the interests of the University.

President Taft on the City of Washington.

The coming grandeur of the city of which the American University already is a part inspired President Taft to a great utterance at the banquet of the business men of Washington on Saturday evening, May 8th. We quote a few paragraphs. They picture better than anything we yet have seen the strategic location and the even more beautiful environment of the American University.

I take the utmost personal pride in the city of Washington. It thrills my heart every day to look out of the back windows of the White House—for the short time I have been there—and whenever I get the opportunity to see this beautiful city in which we are permitted to live—these avenues and streets constructed on a magnificent plan, looking forward for centuries; these trees planted with great foresight to make every part of Washington a park; these vistas into which always creeps unbidden that beautiful shaft that marks the memory of the founder of this city.

Washington intended this to be a Federal city, and it is a Federal city, and it tangles down to the feet of every man, whether he comes from Washington city or Los Angeles, or Texas, when he comes and walks these city streets and starts to feel that this is "my city; I own a part of this Capital, and I envy for the time being those who are able to spend their time here."

Now I want to talk about the future. And the future of Washington! What an enormous development is before us! Why, I am not an imaginative man, but I would like to come back here a hundred years hence and see the beauties of which this city is capable. Right here, under our noses for a time, under our very eyes, are those beautiful Potomac flats that are going to make as fine parks and parkways as there are in the world. Those parks ought to be connected with the Rock Creek Park by means of the mouth of Rock Creek, or otherwise; and then through them all there ought to be carried a park clear around, including the Soldiers' Home, and completing the circuit with Rock Creek at the other end.

And to think—to think that we had a genius a hundred years ago, almost, in his way, as matchless as Washington, to make the plan for a great Capital, like the Frenchman whose remains were buried here the other day and whose plans were hardly changed in the new plan made by Burnham and his associates.

We ought to thank God that we have got a plan like that to build to, so that when we go on with the improvement every dollar that we put in goes to make Washington beautiful a hundred years hence.

The Baltimore Conference and the American University.

At its recent session in Broadway Church, Baltimore, the Baltimore Conference gave special and cordial attention to the claims of the American University on the sympathy and co-operation of the people. In his report District Superintendent Sumwalt said:

The American University has had a good year. The stimulus of the visit of the General Conference and addresses of President Roosevelt and other speakers on that memorable occasion has been felt throughout the church, and the year's work has greatly cheered and encouraged those who bear the heaviest part of the burden.

He also introduced the following resolution which was adopted:

Resolved, That the educational apportionment shall be increased from ten cents per member to fifteen cents per member, and that the additional sum thus raised be paid to the American University: *Provided*, That an amount equal to the largest sum raised and paid over, namely, \$1,600, be paid each year to the Woman's College before any amount shall be set aside for the American University, and the said University shall not receive its full one-third of the said educational collection until \$2,400, or a larger sum, shall be raised.

In its comprehensive report the Committee on Education was pleased to say:

The American University continues to make progress in securing money for the completion of its buildings and adding to the endowment. Chancellor Franklin Hamilton has

proven to be the right man for this difficult work. He is not only a well trained scholar, but a successful administrator whose plans have put new life into this great educational institution. Special efforts are now being made to raise \$500,000 as an endowment fund. When this is accomplished the doors will be open and teaching will begin. It is a matter of congratulation that this Conference passed a resolution raising the educational assessment five cents per member, which assessment is to be applied to the American University. This decision will mean much for the success of such a movement, because the impetus given by the Baltimore Conference will not allow this enterprise to fail. The General Conference has endorsed this institution and multitudes of people are praying for its success.

Washington Already the Rome of the Western World.

In the olden days newly appointed bishops of the Roman Church went to Rome to make their profession of faith. Now, if they are Americans, they go to Washington. The action concerning the new auxiliary Bishop of Boston illustrates this interesting and suggestive custom.

Washington, April 20.—The Rev. J. G. Anderson this morning at the papal legation made the profession of faith, as required by the new regulations, as auxiliary bishop of Boston. The papal delegate, Mgr. Falconio, administered the oath in presence of the legation staff. The bull from Rome will be sent to him later.

Washington, May 19.—Should the efforts of prominent Catholic laymen prove successful, the Order of the Sacred Heart will shortly establish a convent and school in this city. According to information obtained by the *Post*, it is expected that the order will have established itself in the national capital before fall.

Cardinal Gibbons was visited, it is said, by a leading layman here in the interest of the new order and granted permission for the latter to locate in Washington or the District of Columbia.

The Order of the Sacred Heart was founded in France in 1800. Its first house was shortly afterward opened at Paris, and for more than a century its members have taught the children of Europe's crowned heads and of the nobility.

Mark the wisdom of making Washington the center of Roman influence for America. Only those upon the spot can realize how certainly this is being done.

Then make the national capital the burning hearth of American Protestantism and of modern enlightenment. Build the American University!

Progress on Massachusetts Avenue Extension.

The extension of Massachusetts avenue between Wisconsin and Nebraska avenues moves steadily on. As we go to press the trestle work across the Foundry Branch ravine stands complete. The contract for the cut and fill and grading has been let. We are assured that before snow flies the driveway will be ready for use to the site of the University.

Later.—The tracks are laid and the work of grading has begun at Nebraska avenue. Few people of Washington realize the vast changes this extension will bring to the entire region about the University. Our friends are urged to visit the spot and see with their own eyes.

SECRETARY STANTON'S WAR DESK.

Secretary Stanton's War Desk.

By FRANKLIN HAMILTON.

The editor of the "Central Christian Advocate" recently published a stirring and noble editorial on the American University. I desire to thank him. That was a shot heard around the world. From every quarter commendations upon those words have been arriving at the University office. The priest of the tripod where ascends the sacred influence of the Central Christian Advocate is not only helpful but also far-visionsed.

It will interest the readers of that editorial to learn an added fact of historical interest concerning the American University

First let me say that since the call for \$500,000 for the University went out there has been a meeting of the University trustees. After consideration we deem it wise to increase the amount asked for from \$500,000 to \$1,500,000. If we Americans can consider spending \$10,000,000 in flashing a message to Mars, and actually

in a single year can expend \$42,000,000 for importing diamonds, we doubtless ought not to quail at our adding a single million to our first estimation of what is needed to open a university at our national capital.

Now, as to the campaign itself in raising this money. That raises the question of the War Desk of Secretary Stanton.

That sounds like a queer collocation of ideas, but it is not. For, listen to my tale.

Unless someone else will volunteer for the task, the raising of the Opening Fund of the American University will have to be directed by the Chancellor of the institution. All the plans of battle, all the racking experiences of temporary defeats in widely scattered fields of effort, all the hopes and fears of the war for the American University which now must be pushed to the end will centre around the desk of the Chancellor.

But that desk is the War Desk of Secretary Edwin M. Stanton. It is the very same old-fashioned piece of department office furniture at which sat the doughty

and sometimes testy War Secretary of Abraham Lincoln.

As is the custom often at the close of one administration, when at the termination of Mr. Stanton's labors the furniture of the War Department at Washington was changed to make ready for the new Secretary of War the desk of Secretary Stanton was sold to a resident of Washington. This gentleman, realizing the interest attaching to the desk from which had been directed the struggle to put down the Southern Confederacy, carefully preserved the relic. With his accustomed zest for such souvenirs of history, Bishop Hurst learned of the existence of this desk. In the latter part of 1897 the Bishop bought the historic piece of furniture for the American University. The desk now is installed in the Chancellor's room in the Washington office. Again it has become the storm centre of a war for redemption.

It well may be believed that he who now sits at the old war desk dreams dreams and sees visions. The desk never has been repaired. It is just as Secretary Stanton left it. There, on the left side, is the bell push button, now a little rusted. The green baize covering the writing board is splashed with faded ink. Yonder are the same pigeon holes where rested officers' commissions and orders for executions and resignations of defeated generals. Above is the broad shelf upon which stood the reports and files telling of dreadful battles. Oh! the desk is full of memories. It seems ghost-haunted.

Secretary Stanton must have smoked a great deal. For on both sides of the writing board are deep holes worn by a penknife used in cutting off the ends of cigars. Underneath the writing board was found a hidden compartment with some old papers in it. There, too, was a place evidently set apart for maps—fitting abode of secret drawings and sketches of future campaigns.

As a young soldier of the North, my father-in-law, the late Hon. Edward Lillie Pierce, of Milton, Massachusetts, came to this same desk bearing a card of introduction from Abraham Lincoln. On this card was written, in the writing immortal: "I shall be pleased if the Secretary of War, in his discretion, will give to Mr. Pierce such directions as he may deem wise concerning the freedmen of South Carolina."—A. LINCOLN. And that card led to the appointment of Mr. Pierce as the first Superintendent of Freedmen's Aid Work in our country.

To this desk also came the great liberator himself. There in a chair at his side he sat listening, with what eagerness, as his secretary read aloud the reports from the battlefields. And as, leaning eagerly over the desk, covered with maps and papers, the gaunt, haggard captain followed the changing story of his people in its Gethsemane, how often he must have found the dark events outrun his fears, how often he must have felt need of some arm stronger than mortal flesh to uphold that dying nation.

Yes, disaster, despair, tears, this old desk has known

in full measure. But it also has known victory. The whisper of her wings it never can forget. And victory shall come again, sweet daughter of the sky. As the Greeks dreamed, victory shall come again to visit what once she made her own. "The American University will go!" Help us to make it go.

Widening Influence of the Catholic University at Washington.

The increasing influence of the Catholic University at the national capital is seen in the steady widening of its labors. This is illustrated by the recent lectures of one of the University professors explaining to non-Catholics in Boston the primacy of the Pope and by the Missionary Convention held at the University in Washington on June 9 and 10 of this summer.

Boston, March 30, 1909.—The Rev. E. G. Fitzgerald, professor at the Catholic University, Washington, before a large congregation in the Cathedral last night, gave the second sermon in the week's mission for non-Catholics. His subject was "The Primacy of the Pope."

In his address Sunday night Dr. Fitzgerald dealt with the establishment by God of one true church. His sermon last evening was a series of arguments from nature and from the Scriptures to prove that to one member of that church, the Pope, has been committed a jurisdiction over the whole body.

Washington, May 17, 1909.—The congress of missionaries, to be held at the Apostolic Mission House June 9 and 10, will be attended by diocesan missionaries and numerous representatives of religious orders from every section of the United States.

The Rev. Dr. A. P. Doyle (of the Catholic University) has been advised that there will be present at Brookland (Catholic University) missionaries representing the following bodies: the Apostolate of Cleveland, the Josephites, missionaries from Florida, the Norbertines, the Vincentian Fathers, the Sulpitians, the Benedictines and the Jesuits.

Gathering Money to Open the University.

To those who have subscribed to any of the various funds of the University and whose subscriptions are either in whole or in part unpaid we are sending a reminder as follows:

DEAR FRIEND: To open the American University every effort is now being made. Your subscription has been a great encouragement. With other help now at hand your money can make possible a speedy opening. But we can do nothing unless your subscription is paid. \$..... is due on your promise toward the fund. Gladden every heart by paying now. Write your name down as first in the list of those who open the American University.

FRANKLIN HAMILTON, Chancellor.

ALDIS B. BROWNE, Chairman Financial Committee.

ALBERT OSBORN, Assistant Secretary.

In asking for money and new subscriptions from our friends we are using an envelope which bears the following pledge:

In consideration that the American University, Washington, D. C., is to raise \$1,500,000, whereof \$500,000 shall be used to open the doors of the University to students the present year, I promise to pay annually to the trustees of the University, or order, for two, three, four, or five years, the sum of dollars, the first payment due and payable on or before 1st, 19.....

The American University Courier

Entered as second-class matter February 27, 1909, at the post-office at Washington, D. C., under the Act of July 16, 1894

Volume XVI

Washington, D. C., September, 1909

No. 2

MRS. JANE A. GIBSON.

MRS. REBECCA GRAZIER.

Opening the American University.

CHANCELLOR FRANKLIN HAMILTON.

Every effort is being made for a speedy opening of the American University. Our workers are in the field busily engaged in seeking the funds now needed for preparing and supporting the plant while in operation. The trustees at their last meeting voted to be bound no longer in their actions by a policy calling for a vast endowment before utilizing the university plant for actual scholastic ends. They directed the officers of the institution to begin academic work at the earliest possible moment. It was hoped even that some preliminary endeavor might be inaugurated this autumn. The President of the United States and other eminent men have consented to officiate in the formal opening of the enterprise.

We cannot state at this moment the exact date upon which we shall begin work. It is enough to say, for the moment, that a new policy has begun and that this policy

carries with it the proposed actual use for educational work of the plant as we now have it. This policy also includes open and frank information to all concerning our plans. We feel it our duty to give to all interested perfectly clear data concerning the facts as they exist.

It is self evident that we must have a certain amount of ready money with which to fit up the College of History building for use by students. It is equally clear that we must have a certain amount of money either in hand or safely guaranteed for insuring the continuance of the work when once begun. This is the immediate work which now is engaging our every effort. When the money is in hand or provided for there need be no fear but that work will be begun. There is too much involved to cause any doubt on that point. If our friends only will come to our aid and help us push through our present endeavor it will be but a question of a brief period when the American University will be numbered in the ranks of working educational institutions.

Of the larger sum which we had planned to raise for endowment we had set aside in mind as an actual working basis \$500,000. Of that amount we now have in sight about \$100,000. Bishop Hamilton is hard at work raising the amount needed to endow his Professorship of Christian Evidences. Coincident with this is the energetic effort to gather in hand at least \$10,000 in cash for installing furnaces, sanitary appliances, furniture, electric fixtures, etc. We have been disappointed a little in securing certain gifts which we had hoped to have in hand at this moment. This is what is causing our delay. Some of our noblest and most self-sacrificing friends have been unable, on account of the monetary market and their own business conditions to turn over to the University money which they fully are determined to devote to this end. To give some idea of the difficulties at this point under which we labor we need only say that we have due us now on old back subscriptions, to say nothing of the new subscriptions, over \$140,000. We feel that until a good part at least of these old subscriptions are paid blame for delay must not be put upon us alone.

As to the question whether we can man our school when once we have opened it, the friends need have no fear. In our office files we have applications from over 1,500 young men and women asking for the privilege of admission to our institution. This certainly is a clear and convincing demonstration that the institution will command a clientele when once it is put into operation. The fact is that our national capital is coming to be appreciated more and more as an imperial place for research and study. The years only will add to this as an asset peculiar to Washington. Are we to allow this matchless storehouse of material for human knowledge and intellectual achievement to go on increasing in richness every year and yet make no effort to appropriate such resources for useful ends? Think of what our national capital is to be only a hundred years from now. The educational institution that bravely and boldly casts in its lot with that growing fortune need have no fear as to the outcome. What, in any event, is a generation or two in the life of a university?

Others see the opportunity and fear not. With two great Roman Catholic universities, in addition to numerous similarly manned Roman schools and colleges already reaping the benefits and prestige of Washington, are we to hesitate or falter? Where others prosper shall we hesitate even to attempt? Our history forbids! Never! The die is cast. With the first money in hand for the work we will adventure our fate. We will nail to the mast our holy flag, and this Old Ironsides of the future, this precious barque freighted with the hopes and prayers of millions, we confidently will commit to the God of storms, the lightning and the gale.

Mrs. Rebecca Grazier.

On the first page of the COURIER appears the face of Mrs. Rebecca Grazier, of Pennsylvania,

one of the active benefactors of the American University. She has already given to the institution in fee simple real estate whose value at present is one hundred thousand dollars, and steadily increasing. The terms of the gift state the purpose for which the money shall be used, namely: "To found a College of Missions to be named and known as the Thomas Coke College of Missions, to be devoted to the training of students in the languages, customs, laws and religious faiths of the people of foreign countries for the purpose of most effective usefulness in the spread * * * of the Christian religion." With this magnificent foundation as a nucleus the Coke College of Missions well may be expected to become, through the co-operation and gifts of other wide-visited friends of humanity, a mighty agency of the Christian Church in its world-wide work of light, peace and goodwill. Mrs. Grazier long has been a vigorous worker in the church and a liberal giver to all its charities. She has special interest in Christian missions. By this noble benefaction she will project her lifelong work into the coming centuries.

Mrs. Jane A. Gibson.

We are glad to give our readers the opportunity of seeing a representation of the face of Mrs. Jane A. Gibson, of Indiana, one of the numerous benefactors of the American University. Several years ago she devoted by direct gift in fee simple a well equipped farm of nearly seven hundred acres to the University. This benefaction has been, and continues to be, one of the most useful and acceptable, inasmuch as it permits the use of its product for the most pressing needs of the institution. The wisdom and helpfulness of such unconditional donations are commended to others who contemplate aiding any benevolent enterprise. The farm is under cultivation and valued at twenty-five thousand dollars, and is located on the north bank of the Ohio river.

A Noble Bequest from Miss Mary J. Robbins.

Our treasurer has just received, through Mr. J. M. Scott, of Cumberland, Ohio, executor of the will of Miss Mary J. Robbins, his check for \$1,256.37, the distributive share of the American University. Miss Robbins left also a bequest to the Missionary Society, to the Woman's Home Missionary Society, and to Mount Union College. Miss Robbins has long been interested in education and was in deep sympathy with the enterprise at Washington. A lifelong member of the Methodist Episcopal Church herself, she came of well-known and honored Methodist ancestry. Her girlhood home was long the meeting place of Methodist itinerants. Her sister, Mrs. J. M. Scott, and Mr. Scott, the executor, are among the strong and leading members of the Church in Cumberland. Truly this is an instance where one rests from her labors, but her works do follow her. How wise and fruitful thus to put one's life into the lives of a multitude for their good and the world's benefit.

Gifts of Money.

\$1,250.37, estate of Mary J. Robbins, Cumberland, O., per J. M. Scott, executor. \$500, T. C. Hunter. \$250, David H. Carroll. \$200 (each), Mrs. J. Frank Robinson, S. K. Felton. \$100 (each), Thomas W. Smith, Mary K. Calder, Francis Magee, W. A. Rankin, Bishop W. F. Mallalieu, W. M. Crane, Rev. George H. Dart, John Thwaites (for Rev. E. G. Lewis), Rev. J. H. Macomber. \$50 (each), W. H. Heisler, W. J. Montgomery. \$35, Frank A. Freeman. \$25 (each), W. C. Arrison, C. H. Harding. \$15 (each), A. L. Wiley, Rev. S. H. C. Smith. \$10 (each), Calvin M. Smyth, Rev. Frank Leever, Rev. T. H. Sheckler, W. T. Cheney. \$5 (each), Rev. J. F. H. Harrison, Sara E. Doebler, Miss C. E. Jackson (for Rev. L. L. Stewart), Rev. S. A. Morse. \$4, Rev. G. W. Mann. \$1 (each), Rev. A. F. Poore, Abbie Mills.

Detroit Conference Aids in Endowing Bishop Hamilton's Professorship.

At the session of the Detroit Conference which has just closed Chancellor Hamilton presented the cause of the University and urged the Conference to assist in making possible the opening of the institution. Bishop Hamilton followed this address with a strong and stirring appeal to the Conference to do something definite at once. He stated that a friend had promised him that there should be given dollar for dollar for all money that could be raised at the Conference. The great audience present caught the inspiration of such practical interest in the enterprise. Envelopes were distributed and everybody lent a hand to assist the Bishop in raising the endowment for his proposed Professorship of Christian Evidences. At the first counting of the envelopes and pledges it was seen that a goodly sum had been raised. But that was only the beginning. The Bishop was assured by kind friends that the matter should be carried into the city and that the gifts should be increased by contributions from generous-hearted laymen. The fact that every dollar given meant another dollar for the University from Bishop Hamilton's munificent friend gave a thrill of interest and enthusiasm to the movement which augurs well for the American University. God bless the noble Detroit Conference.

Bishop McCabe's Portrait.

The oil painting of Bishop McCabe, by Templeman, of Philadelphia, from sittings during his lifetime, is now the property of the American University. Several friends of the Bishop and of the University united in its purchase and have presented it, with Mrs. McCabe's full consent, to the institution so much in his thought and affection during the last years of his life. The portrait is a three-quarters figure, life size, and presents a striking likeness to the living man. Some of the softer and lifelike effects which show in the painting are lost in the photographic reproduction and in the cut herewith published. Yet his strong character and true nobility of soul find a partial expression in this, the third reflection of his open countenance. A fitting place for this portrait in the

BISHOP CHARLES C. MCCABE.

halls of the American University would be the department dedicated to the study and development of that great cause which claimed the energies of "Chaplain" McCabe for many years—Christian Missions and Civilization. Partial provision for such a department is already made in the Coke College of Missions. Some one should complete it by endowing a McCabe professorship for the same object.

North Ohio Conference Endorses the American University.

At the recent session of the North Ohio Conference the Conference unanimously passed the following resolution:

We desire to express our joy in having the opportunity to greet and hear Dr. Franklin Hamilton, Chancellor of the American University. We recognize in the Chancellor's personality and very able message the elements which must count much for the highest ideals in behalf of the sanest and broadest culture the Church can offer our ambitious youth. We felicitate the regents of the University upon the splendid work accomplished and upon the optimistic outlook for the future, and we pledge this great enterprise our enthusiastic co-operation.

Form of Will for the American University, Washington, D. C.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names their place of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have herewith subscribed our names as witnesses."

Annuity Plan of the American University.

We offer a plain business proposition which provides for a life support for self, wife, children or dependents, giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, may do so, and receive in return an annuity bond legally executed and yielding a lifelong income at fair per cent., payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Another Echo from That Day.

President Roosevelt is of the Methodist spirit if not of the Methodist name. Upon the occasion of the visit of the General Conference to the seat of the American University, Washington city, through the invitation of Chancellor Hamilton and his Board of Trustees, the President was the guest of honor. While Bishop Cranston was making the introductory address, the President found himself in complete sympathy with the enthusiasm of the hour. He remarked to Chancellor Hamilton frequently: "By Jove, this is fine! Say, I like this immensely! Isn't it great? This is the best time I've had for a long time!" The bishop gave out a choice bit of humor when he said, "The President was born a Methodist, but unfortunately was ecclesiastically misplaced early in life." This observation brought forth great applause from the sixteen

It is our conviction that the extraordinary courtesy extended by Chancellor Hamilton and the Board of Trustees of the American University to the General Conference and press representatives made for this splendid institution a host of enthusiastic friends.—*Western Christian Advocate.*

From the New York "Christian Advocate" Concerning Our Campaign.

Chancellor Hamilton and his coadjutors are making strenuous efforts to raise an adequate endowment fund. They are working for a definite amount, namely, a half million dollars. If this is secured within the next few months the doors of the University will be opened for students. Shall Methodism, rich and generous, aid in this appeal, or allow it to be defeated? Congress has done its part by appropriating enough money to complete Massachusetts avenue, thereby making the University easily accessible from the city. Many would-be helpers are saying: "We will give you financial help when the American University begins actual work." This is a good motive, but not good enough. The initial step in a great enterprise is often the most important. When once started this great educational enterprise will gather a momentum that cannot fail in achievement. President Harper said he could do more with a million dollars in Washington, D. C., in the equipment of a university than with ten millions elsewhere. This was no impulsive utterance, but one which can be easily sustained by facts. The govern-

ment places at the disposal of the students, especially those in post-graduate work, facilities that no private university could possibly possess. With the completion of the McKinley building, there would be two magnificent halls of learning capable of accommodating thousands of students. The person who can and will give liberally now starts a multiplication table which will eventually greatly increase his contribution. The seed will become a harvest, and such an intellectual gathering as will place Methodism in the front ranks of education at the nation's capital. Chancellor Hamilton's address is 1419 F Street N. W., Washington, D. C.

A Spicy Note from Harper's Weekly.

"Five hundred delegates are expected to attend the Congress of Catholic Missionaries, to meet in Washington in June. It is the purpose of the Congress, according to some Catholic leaders, to discover the best means of making America dominantly Catholic."—*Daily Paper*.

"Don't make it so, gentlemen. It would not be good for your Church, which has done best when it was not dominant. The best possible thing for the Roman Catholic Church anywhere is a strong (but not bitter) Protestant opposition." That sharpens zeal and restrains despotism on both sides.

An Example for the Friends of the American University.

It is proposed to convert the famous institution at Serampore, known as Carey's College, into a Christian university for India. Such a transformation would fulfill one of Carey's highest ambitions, for it is well known that he always intended that the establishment which he originated should ultimately appeal to the whole of India and be something much more than a Baptist training college. All the best friends of India must wish success to the scheme. Its magnitude is proved by the cost which would be incurred, which would amount to fully a quarter of a million pounds.

If friends of Christian enlightenment feel moved to such efforts in behalf of Christian education in a pagan land, is not our duty clear in a nation which already is the vanguard of Christian civilization? One of the greatest opportunities for elevating the life of this land is now opened through the proposal to build a Christian University at the capital of the American nation. Endow the American University.

Catholic University to Have Fifty New Scholarships.

It was announced not long ago that the Catholic Order of the Knights of Columbus has undertaken to provide for the Catholic University at Washington a fund of half a million dollars. The income of this fund is to care for fifty scholarships. Word now comes that this undertaking is progressing. The following statement is made concerning the fund:

The Knights of Columbus, in their scheme to raise half a million for the endowment fund of the Catholic University at Washington, have arranged with the trustees of the University for the proper protection and investment of the funds. The committee has made an agreement with the trustees to allow a perpetual scholarship for each \$10,000 of the fund subscribed, thus insuring, by the raising of the endowment fund, fifty perpetual scholarships. Archbishop Glennon, of St. Louis, and Walter George Smith, of Philadelphia, have been appointed a special committee of the trustees to consider the proposals made by the Ancient Order of Hibernians to endow a number of scholarships.

More Diamonds, Less Benevolence.

In a leading British journal, a writer, commenting upon a notable speech made by Lord Rosebery on a certain public occasion, said that he wished that the nobleman had inculcated better the lesson of a noble liberality. "There are," he said, "many very wealthy men who appear to give away almost nothing. In 1896 America imported seven millions' worth of diamonds and ten years after forty-two millions' worth. In these years the charities and benevolences of the American people shrank from 103 millions to 83 millions."

If this is true, and we have no reason to question the authority of the eminent writer, the fact certainly presents a most interesting problem. However great are our benefactions, they are not keeping pace with our ability. And possibly still for the great work of sweet charity we must look, as of old, to that spirit of which the immortal epitaph is: "Out of my poverty have I done this."

The American University and Our English Friends.

JOHN A. GUTTERIDGE, FINANCIAL SECRETARY.

The visit of myself and wife to England this summer was primarily on private business connected with family affairs. Nevertheless, I availed myself of favorable opportunities to call attention to the American University. I was pleased to discover that many of the leaders in Church and State were quite well informed concerning the plan and scope of this important educational interest. They freely expressed their confidence in the enterprise and are looking forward with supreme interest to its opening and the relation it will sustain to the other educational institutions of Europe and America.

It would be quite easy to fill every column of the present issue of the COURIER with complimentary remarks concerning the University, its founder, its chancellor and its trustees, with whom a surprising number of the leaders of British Methodism have sustained the most cordial relations. Truly, the American University has many staunch friends on the other side of the ocean. They will have more opportunity of proving their friendship when the University is ready to receive students and to take its place among the great educational institutions of the world.

I am not so sure that we can expect much financial aid toward the erection of our buildings, for they have just now many costly enterprises of their own on hand. They have, somehow, come to believe, and, perhaps, with good reason, that we have more rich men in the Methodist Church and more wealth at our command than they have. But to have their hearty goodwill is worth much; without it little can be expected of them; with it much can be hoped for.

It was usually in some social gathering or public assembly that I got the opportunity of meeting our friends and hearing what they had to say. These gatherings were of frequent occurrence and often far-reaching in their influence.

A rare opportunity to call attention to our interests

was afforded me through an invitation to meet with over 400 representative citizens of the United States, then in London, at a banquet given in the Hotel Cecil under the auspices of the United States Embassy Association. There were many assembled who knew Bishop Hurst very well, and who spoke affectionately of him and the University he has founded in Washington.

Through the courtesy of Dr. William Perkins, the president of the British Wesleyan Conference, whom I met in London, I was invited to be present at his installation. A seat on the platform throughout my stay at the conference gave me opportunities to meet their representative men and hear them express their kind feelings in regard to our Methodist interests in general and the American University in particular. I refer now to such well-known leaders as J. Scott Lidgett, last year's president of the conference; Dr. W. L. Watkinson, Dr. Thomas Allen, both ex-presidents, who have represented British Methodism as fraternal delegates to our General Conference.

The British Conference was held this year in the city of Lincoln, where I was born, and in the very church I attended when I was a boy. This added much to my interest. The Hon. W. S. White, mayor of the city of Lincoln, a staunch Methodist, who knew my father, was there to address the conference and to extend to the members an invitation to a collation and reception in the Arboretum Gardens. He also invited 500 of the citizens of Lincoln to meet the members of the conference. Here again I met and heard Dr. Watkinson and Dr. Allen. Both talked with me about their American experiences and their interest in our University, and Dr. Watkinson grew so enthusiastic over America as to say, "I love America dearly, and if I was only twenty years younger I would return and end my days there."

At his London residence, in Kensington Palace Gardens, I had the honor of an interview with Sir Robert Perks, M. P., the acknowledged leading layman in British Methodism. In an interesting conversation with him about the educational and ecclesiastical affairs of the two countries, Sir Robert said "he kept himself fully informed about the American University, knew many of the gentlemen interested in it, and read all that was published about it in the 'Christian Advocate' and other papers." He wished us well in every way.

An Educational Editorial With a Timely Warning.

In the "Boston Herald" not long ago began a ringing editorial with the following comment:

The privately endowed and supported American University is facing competition from the State University which bids fair to become serious, unless those who believe in the non-State type arouse themselves and meet the competition where it is keenest, namely, in income.

The writer then went on to cite a gleaming illustration of what one State is doing toward the systematic endowment of its State university. This enrichment by a particular State of a State university ought not

to dull our hearts toward the higher duty which is incumbent on those who have distinctively Christian ideals of education. For, side by side with this enrichment of our great seats of learning there has existed a condition causing no little alarm. The "British Weekly" has called this tendency "the materialization of the American University." The writer quotes various authorities who deplore the sordid note in American universities. He declares that the very fatness of our civilization is dwarfing the intellectual side of our present day life and of our universities. He calls for a return to the simplicity of earlier days when distinction was earned by the conquests of the mind. "We could," he says, "were this the place, print a list of the very men who at certain great universities run big elective courses crowded with loafers from the 'Gold Coast'—courses that are a disgrace to any institution that professes to stand for the higher learning."

The writer in the "British Weekly" goes on to quote a leading university paper as making this confession:

"Probably only a handful of the undergraduates of any one class could name their chief scholarship or prize-winner, or half the philosophical oration men." What is still more serious is the alleged fact that many of the professors encourage this contempt for learning. Wealthy men send their sons to college. Their interests are chiefly centered on the social and athletic victories of the lads. "Indeed, it is almost inconceivable that a man or woman in the so-called 'smart set' of New York should even comprehend the ambition of a son who, by some accident, might wish to gain intellectual distinction at college."

There is danger in the secularizing of education, even when that process is accompanied by a Midas-touch able to evoke limitless stores of gold.

The Scattering That Enricheth.

We are asking friends who are endowed with this world's goods to devote some of their money to the building of the American University. We look to the rich for help because we do not believe that wealth inevitably hardens the heart of man. During the past dozen years a billion dollars has been given for charitable and philanthropic purposes. In a recent issue of "Leslie's Weekly" appeared a most sensible article commenting upon what great good rich men's money has done for the development of education. We commend the reading of the entire article. One paragraph presents food for much thought:

We believe in encouraging the growing conviction on the part of the most of our best citizens that these gifts were not bestowed to soothe troubled consciences or in any Robin Hood sort of fashion, because of the way the money was made, but purely from a desire wisely to administer wealth possessed by them as stewards. We call them not rich malefactors, but rich benefactors, and commend their wisdom in fostering education as the safest and best means for solving the problems, social and economic, of our age. The "spirit of the times" ought at least to give them a "square deal," in view of what they are doing for the youth of to-day, and through them for the citizenship of to-morrow.

MASSACHUSETTS AVENUE EXTENSION—THE FILL AT NEBRASKA AVENUE.

Massachusetts Avenue Extension.

We present in the accompanying picture a view of the fill or embankment on Massachusetts avenue at its meeting with Nebraska avenue at the eastern boundary of the site of the American University. The photograph from which this cut was made was taken August 26, at a point about one hundred yards north of Massachusetts avenue and somewhat lower than the level of the fill. The central point of the picture, looking southwest, gives us a fine view of the north end and of the rear of the College of History from the water table to the roof, and also the upper part of the massive corner of the McKinley Memorial College of Government. The telegraph lines shown are on Nebraska avenue. At the left may be seen the gable peak and ridge of the frame building known as the superintendent's office. The fill at the point where a gentleman is standing on the track near the platform car is about twenty feet high. About twenty rods to the east (left) the cut through the west bluff of the Foundry Branch is nearly forty feet deep, and the fill a little farther east (shown in the COURIER of October, 1908) is about forty-five feet deep. Most picturesque is the approach of this majestic thoroughfare toward our magnificent site. Its present rate of progress warrants the expectation that it may become available for driving by December of this year. The opening of this latest stretch of the Capital's most noted avenue brings the American University directly into the eye of the public and prefigures the opening of the doors of the University for genuine progressive work by faculty and students. The opening of a few loyal

hearts, liberal purses and helping hands will bring this joyful result.

The American University is on Massachusetts Avenue.

The immense significance that attaches to the fact that the American University is located on Massachusetts avenue may be gathered from an article published not long ago in the Boston "Transcript," entitled "Massachusetts Avenue's Fame." Note the following excerpt from the article:

Other States have long been envious of the prominence on the map of the National Capital accorded to Pennsylvania. The avenue named in its honor, 180 feet wide, links the White House and the Capitol, making it supposedly the great thoroughfare of the nation for all the triumphal parades of future centuries. Other States have there been granted far less distinction. Until comparatively recent years Massachusetts avenue, for example, was an out-in-the-country thoroughfare. But time brings its changes. Pennsylvania avenue now maintains its place against the northward migration of business only by the government's exercise of sovereignty expressed in the erection of a series of public buildings on what would otherwise have been that thoroughfare's deserted side; it would there fall into about the relative position that Hanover street occupies in this city but for Uncle Sam's benevolent oversight. Meanwhile Massachusetts avenue has come squarely to the front.

Of the thirteen senators who, in the latest Washington residence directory, have homes in any of the many avenues of that city, ten give Massachusetts avenue as their address. One senator lives in Oregon avenue, another in Maryland avenue, and a third in Wyoming avenue. But the one named in honor of Massachusetts thus has the appearance of a senatorial colony with the ten senators, and the Vice-President besides, living not only in it, but with slight exceptions in that part of it between Thomas circle on Fourteenth street and

Dupont circle, on Eighteenth street. The Massachusetts avenue senators are Aldrich, Burrows, Crane, Cullom, Cummings, Dooliver, du Pont, Flint, Lodge, and Oliver. The only "poor man" in the list is Cummings, of Iowa, and he lives in that part of the avenue which lies against the meridian of Georgetown.

In the early days of the republic the ownership of a private house in Washington was most unusual for a senator or representative, probably because the city was so undesirable that they all tried to get out of it as soon as possible. But as it gradually grew to be an attractive place of residence for a more generous share of the year the practice of acquiring homes there gained headway. This tendency has been somewhat checked of late years by the increasing cost of keeping up private establishments. No one can tell what will be the next turn of the tide, but of one thing all may be sure—Massachusetts avenue is having its day in court!

The Growth of Roman Catholicism in America.

ROME, June 13.—The Pope gave an audience in the Consistorial Hall at noon to-day to the bishops, alumni and students of the American College. His holiness, accompanied by Bishop Kennedy, rector of the college, and followed by the other bishops, went round the hall and gave his hand to be kissed by everybody. Then, when he was enthroned, Bishop Kennedy presented Fr. Wall, president of the association of the alumni, who read an address of homage, devotion and gratitude to the Pope for his interest in the welfare of the college.

The Pope replied that the presence of so many members of the American episcopate and clergy afforded him great consolation. He praised the live faith of American Catholics. They had, he said, shown piety, attachment and generosity to the Holy See, which on the occasion of the recent earthquake had enabled him to aid their suffering brethren. He added that he rejoiced at the great development of Catholicism in America. He said he prayed always for America and the Americans.

More than once on official occasions has the Pope declared that not a little of the present prosperity of his church in America is due to the energetic and far-seeing labors of the men and women connected with the Roman Catholic University at Washington. His holiness seldom loses an opportunity to commend this institution for its vital assistance in aiding the propaganda of his church.

Let the friends of a true spiritual America strike hands to build and endow the American University.

Are Not We Wise?

A well known journalist, commenting upon the present trend of education, reverts for his unqualified commendation to the very plan and principle of the American University. He says:

Many of the larger universities have minorities, if not majorities, favorable to establishing the strictly universal type of institution, and then relegating the work now done in them to an institution, affiliated or unaffiliated, of the collegiate type, wherein work now done in the freshmen and sophomore classes can be carried on, the university only admitting the man who has accomplished work which would now admit him to the junior class. Wisconsin University, for instance, would be tempted to do this were the small colleges of the State equal to the task.

President Jordan, of Stanford University, California, sets May, 1914, as a date at which that University possibly may make such a change, providing agencies then exist in the State for carrying on the requisite collegiate work. This action of the richest and largest university on the Pacific coast should prove a great stimulus to the growth and equipment of the

colleges like Pomona and Whitman. It also has its larger interest to educators everywhere who are alive to the significance of the step proposed.

Each year only gives increasing evidence of the wisdom of the founders of the American University and of the far-reaching influence of the plans of the institution. For to these plans, as the above article indicates, are tending some of the wisest educators in the land.

The Rich and the Poor Labor Together.

Two announcements by two widely known men have been made almost at the same time. One is the declaration of Mr. John D. Rockefeller that he is increasing his donations to the General Education Board at New York by a gift of ten million dollars. He also releases the Board from the obligation to hold in perpetuity the funds contributed by him. The members of the Education Board, in accepting this gift, commend Mr. Rockefeller for his generosity and for his "zeal for an educated citizenship in this democracy." They will endeavor, they declare, to use the gift with large-mindedness and good sense, to the end that the interests of society in the republic may be increasingly benefited by this great foundation.

The other announcement is made on behalf of General William Booth, of the Salvation Army. Commander Evangeline Booth declares that, in honor of the eightieth birthday of the general, it is planned to raise five million dollars for the founding of a World University of Humanity. The aim of the university is to train workers for the army's social operations.

These two purposes, coming from such divergent sources, the one aiming at an educated citizenship and the other at an enlargement of social redemption, are both in a measure repetitions of what is involved in the proposed organization of the American University. Through the "McKinley College of Government" we aim at founding a school for the upbuilding of American citizenship in its highest sense. Through the Thomas Coke College of Missions we strive after the same ideal of the world's redemption that now fills the mind of General Booth. You who read, will you not help us? When influences as wide as the world contribute to illustrate the sanity and practical character of our plan, can you not lend a hand to put that plan into operation? Build and endow the American University!

A Boston Architect on Washington City.

"There is no doubt that Washington has more beautiful statues, in proportion to its size, than any other city in the world, not excepting Berlin, a city of statues," said John T. Henderson, an architect, of Boston.

"This is as it should be. The Capital should be beautified in every possible way, and there is nothing which will conduce to that end more than monuments. The parks here, too, are beautiful. I never saw a more attractive place, with its wild and rugged beauty, than Rock Creek Park.

"Yes, I am charmed with this city, and am going to come here to live when I retire. It is a surprise to me that more persons of independent means, who have no special ties in any of the big commercial cities or smaller places, do not settle here. Washington is certainly the Hub of the United States."

The American University Courier

Entered as second-class matter February 27, 1909, at the post-office at Washington, D. C., under the Act of July 16, 1894

Volume XVI

Washington, D. C., December, 1909

No. 3

BISHOP JOHN W. HAMILTON.

MADAME MOUNTFORD IN THE MUSEUM.

A Munificent Gift from a Noble Benefactor.

A new gift of \$5,000 in cash to the American University which has just been made is full of interest. For the present the benefactor desires his name not be made public. The money is the first payment toward an endowment for teaching, which is to bear the names of the donor and his wife, serving as a joint memorial of both. The giver and his noble wife are well-known doers of good deeds in one of the Middle States. Having the means and the will to do largely for the enterprise at Washington, this man of action and vision is determined by his giving to stir up others toward a speedy opening of the American University.

This munificence by this generous leader will bring encouragement to every friend of our undertaking as well as to every true lover of an enlightened America. In a recent conversation the giver expressed his firm determination to impress his action upon the hearts of others who have means. He believes that if others can be led to see what is involved for our whole land in the undertaking at Washington they will forget the limitations of their own local environments and think and act as true Americans and lovers of our whole country.

The heart of this man is very tender as he thinks of the great leaders of other days who were his personal friends

and who wrought their highest endeavors into making America what she is. In some subsequent COURIER of the near future we hope to publish the portraits of this benefactor and his wife and tell the story of their lives. Many will be interested to know who they are.

Bishop John W. Hamilton's Lectureship on Christian Evidences.

Bishop Hamilton has begun his campaign to endow the lectureship on Christian Evidences with which the American University may begin its scholastic work. The Bishop everywhere has received encouragement and met with practical response. Many who have made modest subscriptions or have given small sums, as initial assistance, have promised larger help as soon as they have been relieved from previous obligations. Not a few who as yet have been able to do nothing, have assured the Bishop that they are heartily in sympathy with him and will give assistance in the noble and interesting labor to which he now has pledged strength, mind and heart.

Bishop Hamilton never yet has failed to raise money in a large way for Christ and the Church. This "most conspicuous and comprehensive undertaking" now is to profit from his magic and restless leadership.

In a separate column of the Courier, under its own caption, from time to time, will appear the current accounting of the Lectureship Fund. In this issue, for the first recapitulation, appear the figures to date. All persons contributing to this Fund one dollar or upwards will receive the Courier free, the length of time of such receipt depending upon the amount of the gift and the exigencies of the office. In the Lectureship column will be found formal acknowledgement of each specific gift. All cash is deposited in the American Security and Trust Co. of Washington, D. C., to the credit of the Bishop Hamilton Lectureship Fund and is subject only to the check of Charles C. Glover, President of the Riggs National Bank and treasurer of the American University. There at 2 per cent. accumulating to \$7,000, the money, through the Riggs bank, will be invested more permanently by the Finance Committee of the University, of which committee the Chairman is Hon. Aldis B. Browne, of Washington, D. C. The address of Bishop Hamilton is 30 Bromfield street, Boston, Mass.

Rally to the help of this new leader in the cause of the American University, Christian Education, and patriotic Protestantism. Hold up his rod of victory. According to your ability, we beseech you, give, and give, knowing that your beneficence will set in motion larger influences for good that never will die. Those who join this Diamond Circle shall win the aureole which History paints around the heads of humanity's helpers—*fortunati, illuminati, beati!*

The Mountford-Mamreov Museum.

In the COURIER for June, 1909, announcement was made of the loan collection made to the American University by Madame Lydia M. von Finkelstein Mountford. A part of the collection was installed in the College of History during the past summer and early fall as Madame Mountford found time in the intervals of her frequent and popular lecture tours. The spacious show cases in the museum room have been filled with the various costumes illustrating the leading forms of apparel in Palestine.

We present on the first and seventh pages of this issue of the COURIER two views of the northeast angle of the museum, taken from photographs by the National Press Association. The smaller picture on the first page shows us Madame Mountford dressed in her messenger garb of white and equipped with the shepherd's outfit of staff and crook, rod, short sword, scrip and sling, with a lamb folded in her left arm.

The larger picture on page seven gives us a more extended view of the same corner. The seven compartments are occupied with the costumes of men. Beginning at the left, the first is a robe such as Jethro, priest of Midian, Moses' father-in-law, would have worn; the second the dress of such a chieftain as Abraham; the third is the seamless robe woven throughout with hem, such as Jesus wore; the fourth is the garb of a gentleman of Bethlehem, such as Boaz would have used; the fifth is a ploughman's dress; the sixth the covering of a hireling; and the seventh the dress of a shepherd and of a shepherd boy. The richness of color produced by the brilliant Oriental dyes and the fineness of the needle work on these garments can be appreciated only through actual sight of these wonderful fabrics and designs in the clear light of a bright day.

Only about one-fifth of the present installment of the museum is seen in this picture. Three adjoining rooms have been reserved for the remainder of the collection which, when fully placed, will give a total of four rooms. The entire assemblage will challenge the world for its equal in rarity and completeness. Its chief function is well described in its full name and title, now mounted on a handsome sign over the central doors in gilt letters on a blue background, "The Lydia M. von Finkelstein Mountford and Peter von Finkelstein Mamreov Museum, Illustrating Bible Life and Customs."

The left hand of Madame Mountford is everywhere in evidence in the artistic taste with which the costumes and accompanying ornaments and utensils have been arranged and displayed. Exclamations of wonder and delight come from all who visit this unique collection.

\$50,000 More for The American University.

Fifty thousand dollars additional for the funds of the American University is the latest good news. Still rising is the tide of giving to this enterprise. Another philanthropist from the central section of the Union has recorded his faith in the undertaking which, at the national capital, is to be the bulwark of Protestantism and Christian Americanism. With keenest interest for years this friend has watched the progress and development of this institution. Now is announced this happy outcome of his sympathy, and \$50,000 more can be set down in the assets of the American University. As time goes on there is a steady revealing of unflinching believers in this cause. A further announcement will be made concerning this munificent benefaction and the purpose of the giver.

Asbury Fund Being Carefully Safeguarded.

\$1,000 for the American University at Washington, D. C., was the result of the recent appeal to the subscribers to the Asbury Memorial Fund for another payment on outstanding subscriptions. Through the Riggs National Bank this money has been invested in a safe five per cent. security, to the credit of the Francis Asbury Memorial Fund. Some members of the Annual Conferences paid their share of this money under circumstances and at personal sacrifices that excite profound appreciation and gratitude. To such loyalty and devotion the Asbury College of Religion yet shall stand as a fitting monument in the eyes of the whole nation.

Gifts of Money.

Since our last issue we gratefully acknowledge the following cash gifts:

Asbury Fund.

\$100, William Burt. \$66.66, P. S. Merrill. \$50, E. M. Kelley. \$5, G. O. Moore.

Memorial Fund.

\$5,000 for a man and his wife—names for the present withheld.

General Fund.

\$1,000, Mrs. G. F. Swift. \$500, R. B. Ward. \$200 (each), Summerfield Baldwin, James Gains, T. C. Hunter. \$100 (each), M. B. Ayars, Margaret A. Mann, John Watts, J. W. Jackson, Mrs. S. E. McEchorn, Samuel Musser, J. B. Wamsley, John S. Huyler. \$51.75, H. C. McWhorter. \$50 (each), A. C. Folsom, Wm. Pilling, D. H. Carroll, A. L. Maris. \$25 (each), J. A. Rankin, W. A. Payton, B. F. DeKlyn, Mrs. Jas. Hooper. \$24.75, A. L. Wiley. \$20 (each), Epworth League, Maryville, Mo., Joseph Jackson. \$18, Collection at Centralia, Ill. \$15, Mrs. C. Jensen. \$12.50, S. H. Kemp. \$10 (each), C. E. Legg, W. G. Cathcart, Mrs. Mattie Fiske, Mrs. S. R. Caraway, G. A. Laur, John Mitchell, James Meeks, G. L. England. \$7.00, G. B. Baker. \$6.45, Collection, Rossville, Ill. \$5.00 (each), D. S. Hanson, O. F. Hypes, J. S. Murphy, Etta Faugnar, C. R. Tombaugh, Wm. Cunningham, M. G. Coleman, W. W. Reeves. \$3.62, Collection, Pontiac, Ill. \$3.00, James Harris. \$2.46, Collection, Muncie, Indiana. \$2.35, Collection, Maryville, Mo. \$2.00 (each), W. C. Adams, H. A. Walker, N. R. Carter, W. C. Graves, Mrs. C. E. Legg, A. M. Legg, M. K. Cummins, J. C. Curfman, D. R. Ebersole, Miss Ruth Martin, Miss Elizabeth Wilkinson. \$1.00 (each), E. M. Anthony, Mrs. F. J. Saleno, Miss Myrta Fairchild, Marion Gallup, Kenneth Murphy, H. S. Allen, Jessi Green, Charles McNeel, Miss Mary Q. Evans, W. M. Oakson, G. Heck, J. A. Wray, Lester Bennett, J. A. Alderman, Mrs. W. J. Carter, A. D. Dutton, G. W. H. Kemper, J. A. Monroe, W. T. Janwy, Florence Smith, Flora McDowell, Mrs. S. Nilson, Miss May Bowers, G. P. Green.

Bishop Hamilton Lectureship Fund.

\$100 (each), F. D. Leete, J. L. Hindson. \$34.12, Collections at Detroit, Central New York and Genesee Conferences. \$5.00

(each), Miss Jennie C. Decker, Mrs. Joseph H. Pierce, S. G. Grove, Mrs. Anna N. Gibson, George Ellkott, S. F. Sanford, B. J. Tracy, Ward Mosher, Maria F. Rathburn, J. G. Hann, Mrs. L. Jennie Laycock. \$2.84, Miscellaneous at Plymouth, Mass. \$2.00, E. A. Healy and wife, W. W. Washburn, George Fosbinder, D. B. Shantz. \$1.90, Miscellaneous at Ithaca, New York. \$1.75, Miscellaneous at Detroit, Mich. \$1.40, Miscellaneous at Kingston, Pa. \$1.00 (each), Francis E. Bacon, John Hinchcliffe, Percy W. Carr, Richard Schlack, Mrs. Richard Schlack, G. E. Benson, E. Sedweek, L. F. Rayfield, E. D. Dimond, E. A. Cross, B. Scott, C. R. Kidd, Charles Simpson, A. T. Camburn, G. E. Tripp, B. A. Cramton, J. L. Nickerson, W. H. Rule, E. W. Ryan, Mrs. Abbie F. Taber, S. M. Gilchriese, J. M. Gordon, F. N. Miner, Mrs. E. Bigelow, Mrs. E. L. Lockwood, A. R. Johns, M. C. Piper, J. E. McDowell, O. C. Miller, W. T. Curtis, E. W. Williams, S. W. Eaton, L. S. Boyd, B. E. Pierce, M. J. Owen, W. C. B. Turner, E. A. Peck, O. J. Purington, C. D. Smith, C. M. Eddy, Horatio Yates, J. N. Sackett, T. I. B. Walker, C. E. Ferguson, Frank Hamilton, J. J. Peritz, J. Mullett, Arthur Copeland, J. L. Transue, G. A. Stott, W. T. Fitzgerald, H. F. Hill, Mrs. S. A. Morse, Mrs. Lucy Burley, Mrs. Harriet Hurley, Mrs. Helen Tennant, T. F. Parker, C. E. Lane, Philip Haendiges, H. H. Downey, G. S. Eldridge, Walter Hawthorne, Loren Stiles, S. L. Littlefield, C. M. Hall, Miscellaneous at Buffalo, N. Y., P. R. Giltott, Anna C. Cleg, Mother Stafford. Total to date, \$374.01.

Central New York Conference Enthusiastically Pledges Help.

At the recent session of the Central New York Conference the cause of the American University received heartiest endorsement. After Chancellor Hamilton had addressed the Conference setting forth the purposes of the new campaign for opening the University, Dr. William V. Kelley, editor of the Methodist Review, who happened to be present, asked for the privilege of speaking. Dr. Kelley already had addressed the Conference in the interests of the Review. Not a little interest, therefore, was excited by his request. Having gained the attention of the Conference, Dr. Kelley in a noble and most eloquent speech, which received the enthusiastic applause of the Conference, delivered a statesman's plea for the American University at Washington. He told of a conversation with Prof. George P. Fisher, of Yale University, in which the Professor urged upon Dr. Kelley and his church just such activity as now is being shown at Washington. Dr. Kelley endorsed the work now being done and solemnly warned the church of the growing need of greater efforts. He called upon all true American patriots to know the hour of their visitation and to lend a hand in this enterprise at our national capital. It was a most moving and far-visited address and the Conference responded unanimously to every sentiment expressed.

When Bishop Hamilton followed up this address by a direct appeal to the Conference to help him in founding his University Lectureship on Christian Evidences, everything was swept away in a whole-hearted, generous response to the request. The Conference made a large subscription and offering to the cause and individual preachers and laymen came forward with promises of yet more substantial help in the future. Friends of the University are under deepest obligation to Dr. William V. Kelley and to the noble and self-sacrificing Conference. Their action was big with history and eternal influence.

What They Did at the Genesee Conference.

Genesee Conference has large resources of courtesy and Christian charity. Few Conferences could have stood the strain under which this body was laboring and yet have been willing to give much heed to philanthropic or educational causes knocking at the door. The Genesee Conference did this; to this Conference, therefore, be the greater honor.

Chancellor Hamilton, who presented the cause of the University, did not feel like trespassing upon the patience or endurance of the ministers before him. He made, therefore, only the briefest, bare statement of the case. He hesitated even to ask for help. But the men who listened surprised him by their attention. When Bishop Hamilton stated his purpose of founding a lectureship with which to open the University for academic work, the response was swift and cordial. A goodly sum was pledged and given and the leaders of the Conference all expressed a profound faith in the enterprise and promised assistance in days to come.

On Sunday in the Delaware Avenue Church to a great congregation, Chancellor Hamilton preached and presented the cause of the University. Here again although two other collections already had been taken that morning the response was ready and generous. Dr. Hurlburt, the pastor of the church, contributed greatly to this happy outcome by his brotherly and splendidly commendatory words. Highest success to Dr. Hurlburt wherever he may be. He is a brother and a prince in Israel. And our deepest gratitude to Delaware Avenue Church and to the noble Genesee Conference.

A Word from the Middle West.

FRED M. STONE, ENDOWMENT SECRETARY.

"We are glad to assist the University in its development." This is the encouraging note in the Middle West. Ministers and laymen are becoming deeply interested in our cause. My chief duty lately has been to inform the people in regard to this institution and its needs. To this end I am toiling and in city and rural sections cordial sympathy and financial support are being given. It is a pleasure to report that a loyal company of givers, increasing in numbers each month, is rallying to our standard. The ministers are opening their pulpits in a truly fraternal way and the laymen are beginning to discuss this great educational project with a zest that warms the secretary's heart. As I move about among the people a satisfying sense of security for our nation grows within me. Intelligence, patriotism, Christian character and a spirit of liberality in giving are increasing in this part of the Union. I find the best literature in the homes of the people in city and country alike. The reading matter is bearing fruit. My work is becoming more satisfactory because of it. More than \$90,000 has been added to the assets of the University from this region in the last year. Educational interests have a large place in the sympathies of the people of this section and our University will receive its share as the information concerning it is more widely diffused.

I want to thank in an especial manner the ministers and generous friends who have contributed toward the development and support of this important enterprise.

Rapid Transit to Our Site.

The near approach of the day when Massachusetts Avenue can be used for public travel to the site of the American University arouses peculiar interest in the question, "What about rapid transit to the whole region lying west of Wisconsin Avenue to the District line?" The direction of the city's growth and the building of trolley lines and branches usually have a mutual relation of cause and effect. The time is now here when the two great railway corporations are studying the situation. It does not yet appear which one of the two systems will extend an arm or a loop from its present operating lines, and give service of the kind needed by people living in Wesley Heights, along Nebraska Avenue, and in and about the American University Park nearer the Maryland line. May it not be that the solution of the question will be not only the building of such a line as is demanded, but also a step toward the unifying of the railroad systems of the District in one operative whole? So mote it be!

Annual Meeting of the Trustees.

The annual meeting of the Trustees of the American University was held at the office of the University on December 15, 1909. The president, Dr. David H. Carroll, was in the chair. Others in attendance were Senator J. P. Dolliver, Chancellor Franklin Hamilton, Dr. Charles W. Baldwin, Dr. W. R. Wedderspoon, Dr. W. L. Davidson, Dr. J. G. Bickerton, Justice Thomas H. Anderson, Mr. Robert B. Ward, Mr. Charles C. Glover, Mr. Aldis B. Browne, Mr. Benjamin F. Leighton, Mr. Thomas W. Smith, and Mr. George W. F. Swartzell.

The officers of the Board and standing committees for the ensuing year are: President, David H. Carroll; Vice-President, Aldis B. Browne; Secretary, Charles W. Baldwin; Treasurer, Charles C. Glover; Executive Committee: Franklin Hamilton, T. H. Anderson, B. F. Leighton, A. B. Browne, T. W. Smith, Earl Cranston, D. H. Carroll, B. H. Warner, C. W. Baldwin, G. W. F. Swartzell; Finance Committee: A. B. Browne, C. C. Glover; Auditing Committee: B. F. Leighton, T. W. Smith, G. W. F. Swartzell.

The reports of the Chancellor and other officers showed a good increase in the amount of invested funds and a decrease in the stated expenses. Several new promises of generous gifts in the near future were reported. Concerning the election of new members of the Board action was taken of which announcement will be made later.

Rev. D. B. Johnson No Longer Our Representative.

The relation of Rev. D. B. Johnson of the Central Illinois Conference, as representative of the American University, terminated Dec. 27, 1909. For some time ill health has prevented the presentation of the comprehensive plans of this enthusiastic Superintendent of Federated Alliances. May restored strength and vigor soon permit the full fruition of earnest hopes for his larger activity. Brother Johnson has our good will and regard. May he be prospered in his unselfish ambition for service to Christ and men.

The American University and the Great Northwest.

During the past summer Chancellor Hamilton made a tour through the great Northwest and along the Pacific coast from Seattle to Southern California. He preached and lectured as he went. Everywhere he found a deep-seated faith in the American University and a growing eagerness for its speedy opening.

In Montana it was touching to see how men and women who were pioneers in the dauntless struggle of building the Kingdom had always a friendly thought and a helping hand in the common cause back in the old national capital. Among so many there must be no distinction of kindly remembrance. But the pen itself would refuse to write on unless there flowed from it the names and joyous memories of District Superintendent and Editor Mills, of Helena, "Brother Van of Montana," District Superintendent Charles D. Crouch, and President C. W. Tenney, of brave Montana Wesleyan. Who could fail to chronicle that famous picnic in the unfinished chapel hurd by the classic shades of Two Dot, Round Up, and Dad's Home? Never was there such flow of eloquence on such thin lemonade. The American University, cheese sandwiches, Montana Wesleyan University, suspicious loving references to friendly young couples and long bearded embalmers jokes, all were intermingled inextricably that day. Cowboy experiences on the neighboring plains lent added need for the cause of higher education.

The beautiful thing about it all was that there never were gathered together any brighter young folk than the fine sympathetic and cultured company of young men and maidens who made up the Montana State Convention of Epworth Leagues at Lewistown. While loyal all to their own University, they believed, one and all, in the American University. Dear friends, this heart softens at the remembrance of those halcyon days. I was a stranger and ye took me in; I was homesick and lo! ye taught me to love your Montana homes and mountain heights. Thankfulness and gratitude are in my heart. To you all, glad hail! Only, when we meet again, may the lemonade be not quite so reminiscent of your overflowing crystal fountains, your bounteous cascades and tumbling cataracts, your royal rivers hurrying on with eager face set toward the sea!

The Pacific Coast Interested in the American University.

In continuation of his visit to the Northwest, Chancellor Hamilton made a pilgrimage along the Pacific coast. Here, too, whenever opportunity was afforded, the cause of the University was brought to the attention and hearts of all. Here, also, as in the Northwest, there was found an abiding faith in the need for the American University and a willingness to help. Calls for money are naturally provocative of a poignant realization of home conditions. But better days are close at hand for California.

Like Junipero Serra of old Mission fame, this visitor to California was a wanderer, and as he went was filled with admiring wonder. He, too, saw the big trees, "the large vines of grapes and the roses that were like the roses of Castile." As he made his pilgrimage, this latter day Franciscan tried to win friends for the great undertaking and to plant the thought and the hope of it at least as a foundation for a greater mission in days to come.

Among the many friends unforgetting memory will record the kind and helpful offices of Dr. Freeman D. Bovard, of San Francisco; Dr. Charles Edward Locke, of Los Angeles; Dr. Dille, of the California Conference; Dr. Peck, of Southern California Conference; Dr. Charles Coke Woods, President of the Yosemite Chautauqua, and Hon. A. M. Drew, of Everywhere.

The Yosemite Chautauqua, where Chancellor Hamilton preached and lectured, is an undertaking of abounding promise and usefulness. If possible to do so, the visitor from the East is determined to accept the kind invitation to take part in that same picturesque Chautauqua next year. If he does, the story of the American University told in that hallowed and historic place will find a widening hearing like the notes of that fabled horn on Fontarabian echoes borne. That energetic statesman, Hon. A. M. Drew, who has made this Chautauqua possible, is opening a gate through which there shall come much to California. Let us hope that among the many causes, plans and enterprises, propagandas and appeals that come begging a hearing and an interest, the American University may be held in remembrance. Let it be for the cause itself, and, shall we say it, let it be also a little for the sake of one who learned to love the people dwelling in that land whose roses are like the roses of Castile.

Our Cause at the New York Preachers' Meeting.

At the invitation of the Executive Committee, on Nov. 22, the New York Preachers' Meeting was addressed by Chancellor Hamilton. There was present a large attendance of the ministers, with many visitors from a distance. For an hour Dr. Hamilton spoke on the work of the American University at Washington, D. C. The most cordial and earnest hearing was given his message. That his hearers were in sympathy with the cause was attested by their frequent manifestations of approval. The simple story of what is being done and what is planned seemed to bring home to all the vast significance of this undertaking at the national capital.

The remarks of the Chancellor evoked discussion. Among others who spoke were Rev. J. Lewis Hartsock, Bishop Neely, and an ex-President of Canadian Methodism, all of whom urged an instant and hearty response to the needs of the enterprise.

At the close of the meeting many assured Dr. Hamilton of their earnest faith in the work and their determination to help push it to triumph. Who says that the American University is not winning its way in the citadels of power and influence in this land? Let other preachers' meetings extend like invitations to hear this story of a surely coming triumph for Protestantism and Americanism, and Chancellor Hamilton will be glad to respond with an address telling of the present outlook and promise.

The American University and the Southland.

The recent decision to make the city of Washington the headquarters of the Southern Commercial Congress and to erect there a building to cost \$1,850,000 is a very wise move on the part of the South and goes to show how the commercial mind is running in regard to the advantages that section of the country is to derive by so associating its interests with the heart of the nation.

This movement brings the South into close touch

REV. JOHN A. GUTTERIDGE, D. D., FINANCIAL SECRETARY.

with all the great centers of trade and commerce. Where is there a city of any pretension that does not have its representative in Washington? And this applies not only to the United States but to every circle of the globe where our commerce is extending in ever widening proportions.

In the selection of Washington as the site for The American University the founders displayed their wisdom. This will be more and more apparent as time goes on. The faculties and students of The American University will be ever grateful to their benefactors for the immense advantages they derive from their close alliance with the world's diplomats, with the statesmen of our own land, and with the delegates to the commercial congresses from all the countries of the world who will from time to time wend their way to Washington.

From the beginning The American University has sustained the most cordial relations with all parts of the world, and with no section of the United States has it shown more friendly relations than with the Southland. Well does the writer remember the pleasure our late Chancellor, Bishop Charles C. McCabe, had in nominating Bishop Alpheus W. Wilson, of the Southern Methodist Episcopal Church, to fill the office of Vice-Chancellor of The American University, and the delight he manifested, as indeed, did all the trustees who were present, when Bishop Wilson accepted the honor and the responsibility. More than once it has been said to the writer by men of distinction in church

and state that "The American University is going to do more to unite the two Methodisms, North and South, than any other one thing that has happened since the separation." Be that as it may, it will not be for any lack of interest in that direction on the part of the officers and trustees of the University. Let any one study the names of these, past and present, for evidence of that—such names as John F. Hurst, William McKinley, Theodore Roosevelt, Charles C. McCabe, David H. Carroll, John W. Hamilton, Jonathan P. Dolliver, Alpheus W. Wilson, Julian S. Carr, John S. Huyler, F. D. Collins, Mr. and Mrs. J. Frank Robinson, and many others I might mention among our resident Washington trustees, who, by their words, works, and benefactions have shown themselves to be among the staunchest friends the South has ever had.

It is the purpose of Chancellor Hamilton and his coadjutors to continue these cordial relations, and as an earnest of their intentions they have commissioned one of their representatives, the Rev. Dr. John A. Gutteridge, to make an extended trip through the South, visiting the states of Virginia, North and South Carolina, Tennessee, Georgia and Florida. He will leave in January in time to address the Florida Conferences and to be at other conventions and preach in some of the leading city churches in the various Southern states. He will also look in upon some of the Southern schools. The purpose of this visit is that the people of the South may be the better informed concerning the plan and scope of The American University and the privileges that are to be offered to the young people of our land in the way of high grade scholarships in addition to the many other advantages such as the city of Washington alone can give.

We insert a portrait of Dr. Gutteridge, who may not be as well known in some parts of the South as he is in the North. We bespeak for him a cordial welcome and a patient hearing as well for the University he represents as for those who may be privileged to hear him and to meet him.

\$10,000 More to Grade Massachusetts Avenue.

The present appropriation bill before Congress carries \$10,000 more to continue work on Massachusetts avenue. During the past summer and fall the great steam shovel, with two construction trains, has been almost constantly at work cutting through the bluffs west of Foundry Branch and filling the ravine of that stream to a depth of nearly 50 feet. The majestic proportions of this great thoroughfare never appeared in a more impressive form than is now presented to the eye of the beholder standing either near Woodley Inn, near Wisconsin avenue, and looking westward toward the American University, or standing at the intersection of Massachusetts and Nebraska avenue and looking eastward toward the National Cathedral schools. The new appropriation is considered sufficient to macadamize the new portion to the site of the American University. The grades secured over this picturesque

region will be found to be comparatively easy for travel either by horse or motor power. By a little anticipation one may readily imagine the broad stretches of this unrivaled highway traversed by a multitude of vehicles of every description filled with people bent on business and pleasure.

Among the thousands who in days to come will move to and fro along its roomy slopes we fancy that we see hundreds of students on their daily journey to the American University and to the treasures of the nation stored in its scores of libraries and museums.

The Catholic University of America Takes Its Collection.

Bishop McFaul, of the Catholic diocese of New Jersey, on October 5 sent out an episcopal letter which began:

In announcing the annual collection for the benefit of the Catholic University of America, let me draw the attention of the clergy and laity to the danger of patronizing non-Catholic institutions of learning. Every one knows that it has been repeatedly stated on the best authority that certain professors in our great secular universities deliver lectures calculated to subvert Christian faith and Christian morality. They assert that there is no God, at least as men heretofore conceived of Him; no divinely given ten commandments; no church; and as for the Bible, one must be freed from all slavery to the sacred myths which it contains.

The letter concludes with the words,

There has been founded at Washington a splendid Catholic University. Even at its inception it has proved itself an honor to America. Be convinced that a large, powerful, energetic, and progressive Catholic University is an absolute necessity for the welfare of American Catholics.

We have been informed that this University collection when taken in Chicago realized from that city alone \$93,000.

The Papal Propaganda from Washington.

Facing nearly 200 Catholic missionaries in the great hall of the Catholic University of America, President Taft delivered a speech last night in which he decried "invidious distinctions in elections on account of religion," and declared that if his visit to the Pope at Rome had occurred forty or fifty years before "it would have sunk any administration responsible for it."

The address was made to the Congress of Missionaries to Non-Catholics, which has been in session under the auspices of the Apostolic Mission House. Frequent applause interrupted the words of the Chief Executive.

The occasion was also unusually apropos for the reason that the priests represented a progressive movement of conversion by the Catholic Church which has extended the length and breadth of the land, and has become of national significance as one of the distinctive religious movements of the day. It has the highest ap-

NORTHEAST SECTION OF THE MOUNTFORD-MAMREOW MUSEUM.

proval and liveliest interest of the Pope at Rome, who has kept in constant touch with its progress through the papal delegate and through Father Doyle, rector of the Apostolic Mission House. For these reasons every man in the room leaned forward in his seat eager to catch every word and every inflection of the President of the country directly affected by the movement. —*Washington Herald, June 11, 1909.*

Our only comment on the above is *Build and Endow the American University.*

One of Bishop Goodsell's Golden Words.

Our dear departed leader, Bishop Daniel Ayres Goodsell, in his own person and work, strongly and beautifully united evangelical fire and cultural finish. His article in the *Methodist Review* for January, 1893, entitled "Whither? A Study of Tendency," contains this pointed passage on the Church he loved and served:

She has never had to learn to give room in God's kingdom, nor sulkily to yield place to others as if unwarranted intruders. She has always had her hand

of welcome out to all who love Christ. Her whole governmental fabric, though of the ancient church in terms and authority, rests upon Christian expediency, and could be dropped at the Master's bidding if his day could be hastened thereby. Always below her ideals in practice and in learning, she has held the banner of holiness high because the Lord commanded, and beginning her work in a university has passed her people, converted at her altars, on to her schools, her colleges and universities, and dares to plan to-day at the capital of the nation the most modern and the greatest of American schools of learning.

Around the Circle of the Spring Conferences.

The Spring Conferences, so far as possible, will be visited in the interest of the American University. For the first time, in behalf of our cause, the Southland will be cultivated systematically. Dr. J. A. Gutteridge is planning a most interesting itinerary along the Atlantic coast and through the Southern States. As the official representative of the American University he will visit the following Conferences: St. John's River, Southern Florida Mission, and the Florida Conference, all in

Florida. He also will appear for us before the Philadelphia, Delaware, and Wyoming Conferences.

Dr. J. B. Polsgrove will have charge of our presentation of plans and progress before the Central Pennsylvania Conference, which this year convenes in York, Pa. We bespeak for Dr. Polsgrove a cordial reception and hearing. Recently he has been bringing things to pass in Pennsylvania.

Rev. Fred M. Stone will tell the story and picture the outlook of our work to conferences in the Middle West. He will visit the conferences in Kansas, the St. Louis Conference, the North Indiana Conference, and possibly the Central Missouri Conference.

Chancellor Hamilton plans to visit the Conferences in the East as follows: New Jersey, Wilmington, New York, Baltimore, New York East, New England Southern, Newark, New Hampshire, New England, Troy, Northern New York, Vermont, Maine, East Maine.

Form of Will for the American University, Washington, D. C.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names their place of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereto subscribed our names as witnesses."

President Roosevelt Commends the American University as Fulfilling Dream of Washington.

At the historic meeting on the grounds of the American University, May 16, 1908, President Theodore Roosevelt made a memorable address. That speech never will be forgotten. The President said:

I feel akin to you. I would be glad to address you at any time, in any place. But I am doubly glad to address you here; and I most earnestly wish you well in your purpose to plant here a great American University—a University that shall fulfill the dream of the greatest and first American President, George Washington.

In these words President Roosevelt was referring to the well-known desire of President Washington that there should be at the National Capital a great and true school of learning "adequate to our necessity."

To a select committee, January 10, 1803, Congress referred an outline of the National University thus earnestly desired by Washington. The proposition was "for a free college, adopting and combining therewith the interests of the existing seminaries throughout the Union." * * * "The memorial was accompanied by

a plan of the Equestrian Statue of Washington, surrounded by halls and colleges regularly arranged, the whole to be styled the Monument to Washington." This plan was destroyed when the city of Washington was captured and the Capitol burned by the British in 1814.

Tradition says that the house in which Washington lodged while laying out the plans for the future city of Washington is the old farmhouse still standing on the grounds of the American University.

Gifts to Our Library.

Among other substantial donations to our growing library we note the following recent gifts:

El Rodeo of the University of Southern California, Volume IV. Published for the Junior Class. Los Angeles, California, 1909. Cloth, red and gold, pp. 400.

Official Record of the Union and Confederate Navies in the War of the Rebellion. Series I, volume 22, West Gulf Blockading Squadron, January 1, 1865-January 31, 1866. Naval Forces on Western Waters, May 8, 1861-April 11, 1862. Washington, 1908. pp. xviii, 965.

Official Journal of the West Virginia Conference, Methodist Episcopal Church, 1900-1903. Morocco, gilt. From Rev. R. B. Ward.

The Japanese School Incident at San Francisco from the Point of View of International and Constitutional Law. By Theodore P. Ion. Pamphlet, pp. 18. Reprint from Michigan Law Review.

Roman Law and Mohammedan Jurisprudence. By Theodore P. Ion. Pamphlet, pp. 53. Reprint from Michigan Law Review.

Reports of the President's Homes Commission: (1) Committee on Building of Model Houses, by General George M. Sternberg; (2) Industrial and Personal Hygiene, by George M. Kober; (3) Committee on Social Betterment, by George M. Kober; (4) Committee on Improvement of Existing Houses and Elimination of Insanitary and Alley Houses, by William H. Baldwin. Pamphlets, pp. 111, 175, 281, 23.

United States of America versus Standard Oil Company (New Jersey) et al. Six volumes. Vols. I, II, III, Briefs for Defendants on the Facts; Vol. IV, Defendants' Brief on the Facts; Vol. V, Defendants' Brief on the Law; Vol. VI, Brief of the Law on Behalf of Defendants. Pamphlets.

Contributions from the Jefferson Physical Laboratory of Harvard University for the year 1908. Vol. VI. Cambridge. Twelve valuable documents by John Trowbridge, Theodore Lyman, B. O. Pierce, P. W. Bridgman, G. W. Pierce, H. W. Morse, C. L. B. Shuddmagen, and H. N. Davis.

Genealogy of Dr. Francis Joseph Pfeiffer, of Philadelphia, Pennsylvania, and his Descendants, 1734-1809. By Edwin Jaquett Sellers. Philadelphia, 1899, pp. 67. From the Author.

Washington, D. C., March, 1910

No. 4

MR. WILLARD IVES.

MRS. LUCINA M. IVES.

\$30,000 More.

Thirty thousand dollars more has been given to the American University. This is the second payment of the great-hearted friends who, a short time ago, gave \$5,000 toward a fund to be established as their joint memorial at the National Capital. This now makes \$35,000. Let the splendid gift be heralded—\$35,000! Modesty almost unexampled is being shown by this noble Christian man and woman. They give as a prince and princess might give. But to all requests that we may be permitted to announce their names and reproduce their portraits in order that the world may learn to know and honor such conscientious and consecrated Christian philanthropists, the reply is "Not yet, but before long."

There is, therefore, but one thing that we can say. And that is this: The good fairy prince and princess of the American University have been found. Soon every one will know who they are and will be able to look upon their faces. Patriotic interest will be quickened by their giving.

Already we have the material for the story. And

what a story it will be! What a noble history of a poor boy's struggle in the poor boy's country! What a vision of the Lord and of His call! Two hearts have been flooded with sympathy, love, generosity, and determination to help Christ's kingdom come on this earth. In the next issue of the Courier we hope to be able to publish all the facts and to show the pictures of these two far-visioned and other-loving benefactors.

The Opening Fund Still Grows.

Five thousand dollars in cash toward the opening fund of the American University has recently been given by Mrs. Sarah M. Billings, of Wellsboro, Pa. Having a heart of love for all wise Christian beneficence, this elect lady is interested profoundly in the educational enterprise at the National Capital. In making this gift Mrs. Billings urges the speedy completion of the work needed for opening the institution. Increasing numbers of friends now are expressing this same desire and prayer. This new gift, so generously and disinterestedly made, will inspire many, we feel sure, to crystallize their wishes into offerings.

Recent Gifts of Money.

MEMORIAL FUND NAMES WITHFIELD.

\$30,000.

GENERAL FUND.

\$5,000, Mrs. Sarah M. Billings; \$500, Miss Orra N. Chamberlain; \$100 (each), Thomas Bennett, John Moore; \$50 (each), Mrs. Carlisa F. Rowan, C. L. English, John E. Pricke; \$25 (each), J. F. Prather, H. M. Johnson, A. H. Bailey; \$10, A. E. Wiley; \$10 (each), George C. Coon, John M. Glasco, W. E. Eppert, C. E. Adamson; \$5 (each), Mrs. N. De Lani, E. C. Curfman; \$2 (each), S. M. Simpson, Mrs. K. R. and Miss Ethel Embree; \$1.75, Mrs. Lydia Harris; \$1 (each), T. L. Graves, Mrs. George Null.

\$8.62, miscellaneous at Wilmington Conference: \$5 (each), E. M. Cullinan, Mrs. M. C. Dean, Howard Davis, Samuel T. Smith, L. W. Layfield, John M. Kelso, W. R. Neshitt, S. M. Morgan; \$2, Miss Hattie L. Walters; \$1 (each), George Brüten, W. P. Taylor, E. H. Collins, James H. Gardner, George W. Stallings, Leonard White, H. D. Stewart, R. H. Adams, C. A. Hill, D. H. Willis, Thomas E. Terry, O. T. Baynard, J. W. Hardisty, L. I. McDougle. Total, \$65.62. Previously reported, \$374.01. Total to date, \$439.63.

A Rare Acquisition for Our Library.

Rev. E. L. Hoffecker, of Dover, Del., where he has done noble work in saving Wesley Church to Methodism, has presented to the American University three valuable volumes of great historic interest. One is the private Greek Testament of Samuel Taylor Coleridge, annotated in the poet's own handwriting. The book, worn and thumbed from constant use, shows that the Gospel of John was Coleridge's favorite Scripture. This explains the numerous quotations from St. John in the *Biographia Literaria*. Among the notations is one on Matthew 27, 16, concerning the release of Barabbas: "In remembrance of their delivery from Egyptian bondage." Another is on Luke 6, 1, "The first Sabbath after the second day of unleavened bread." As introductory to the Epistle to the Romans he notes "St. Paul writes more particularly for the dialectic understanding, and proves those doctrines which were capable of such proof by common logic." On the first page of the letter to the Hebrews he says: "I do not believe St. Paul to be the author of the Epistle to the Hebrews. It was probably written by Apollon, an Alexandrian Jew, and clearly during the yet existing glories of the temple. For 300 years the church did not prefix St. Paul's name to it." The second book is a copy of the Koran, in what is probably the earliest edition printed in English. The third volume is a treatise on the "Whole Duty of Man," and a manual of

private devotions of the type in use in the American Colonies in the Revolutionary period.

Mr. Willard Ives and Mrs. Lucina M. Ives.

We present on the first page of this number of the Courier, which, at least for a time, may be regarded as the portrait gallery of our benefactors, the faces of the late Mr. and Mrs. Willard Ives. The lives of this noble pair are treasured in the memories of thousands who remember with gratitude to God the associations which clustered about their strong and beautiful personalities. Deeply and actively interested in all forms of philanthropy, they both gave special attention and sympathy to the cause of Christian education. Large benefactions dropped from their hands into the treasuries of the institutions located near their home in the Empire State. Among the latest gifts of their helpful spirits were those to the American University, whose aims and plans strongly appealed to their high ideals of culture and character for the multitudes of American youth. The sum total of their donations to this institution was not less than \$36,000. The fragrance of their united lives and good deeds will ever mingle with the atmosphere of the churches and schools which profited by their love. The influence of their acts will be an ever moving force in the growth of this university, set for the promotion of truth and righteousness at the National Capital.

Bishop Cranston on the Fairbanks-Pope Incident at Rome.

Bishop Cranston is a statesman. His recent utterance upon the Fairbanks incident at Rome deserves the earnest study of every American. At the request of many an address made by Bishop Cranston in Washington at the time of the incident has been published in a brochure entitled "The Papacy Still Anti-American." We gladly would print the entire pamphlet had we space. We feel constrained to lay before our readers the following paragraphs which we quote from the pamphlet. In doing so we have only to add that again Bishop Cranston has justified his reputation as one of the foremost Americans in sagacity, wisdom, and true catholicity of Christian spirit.

1. The American form of government was from the outset a protest against the assumed divine right of Kings or Emperors to rule their fellow men. In that sense it is as against the ancient order a Protesting or Protestant form of government.
2. The Protestant Church stands for the same essential spirit in its protest against the assumed divine right of the Popes of Rome to rule over and direct the spiritual affairs of the world.
3. Papacy is religious monarchy claiming universal dominion and the power to dispose of the souls and bodies of men by its own standards. Protestantism is spiritual democracy declaring the right of every man to choose his own beliefs and such church order as suits him best.
4. The issue thus joined is not sectarian, unless the principles of civil and religious liberty embodied in our American Constitution are sectarian. We believe that the rights of the people are God-given, and that all subversive claims are

to be classed as sectarian and heretical because they are in violation of divine order.

Upon these propositions our discussion proceeds.

This is an ominous day for prohibitive tariffs and oppressive trusts, both in church and state. The greatest evangelist of his century, Dwight L. Moody, was not even ordained. The most successful preacher of England in his century, Charles Spurgeon, never felt the touch of a bishop's hand on his head. The most helpful religious book ever written, the Bible alone excepted, was by another Baptist, John Bunyan. Indeed, it would seem that the divine head of the church had never endorsed this trust in holy orders. Since the Declaration of Independence was made good by George Washington and his ragged army, the ecclesiastical trust of the ages yielding stubbornly to the spirit of the young republic has been giving way to the unsurpassed but ever aggressive "irregular," who is made a messenger of grace by his call and consecration, a minister of Christ by his certified character and attainments, and credentialed to Christendom by the signs and wonders of apostolic success in winning souls, not to a system of doctrine or polity primarily, but to Jesus, the Christ. At first this apostle of the Pauline succession, who waited not for Peter's touch, was scorned even in England and America; then, being found useful as a pioneer he was endured; later, it being discovered that he was the indispensable leader in every moral reform and grave spiritual crisis, he was contemned. At last, by dint of practical mental equipment, the poise of his moral character, the spiritual note in his testimony, his direct touch with God, and his pre-eminence in real service to the nation in times of peril, he is recognized as a something—minus holy orders. Out upon assumption so bigoted! He is the apostle of the new dispensation. He who has created republics and redeemed kingdoms, whose zeal and heroism have quenched martyr fires, arrested the inquisition, saved civilization through the open Bible given to the ends of the earth, who in our own land has incidentally protected and fed thousands of pulpit weaklings who would have starved on their liturgies—yes, this New Testament apostle of spiritual regeneration whose professional has led him not to the shrines of dead saints, but to the humble homes of the hungry-hearted poor, he is in the highest and holiest of orders. But he must not invade the parish of the Pope, and the Pope claims the world scorning even the "orders" of John Wesley and Phillips Brooks! Would that all Episcopalians cared as little for his scorn as do the followers of Wesley. But come, my Protestant brothers, fall in line. The Pontiff of Rome, if he be the Vicar of Christ, has the same scriptural right to order us out of America that he has to keep us out of Rome. That is the claim which is being endorsed now by every American prelate who has written in apology for the Vatican. Say farewell to your parishioners, turn over your church properties to the Cardinal and let us be going. That is the logic of it.

The King received him (Mr. Fairbanks) on Saturday without suspecting himself of extraordinary condescension. Possibly he told his distinguished caller of having decorated the American Methodist Bishop Bart in recognition of his services to Italy. But he all this as it may, certain it seems to be that before the fateful Sunday hour when Mr. Fairbanks was to appear among his own co-religionists he was plainly warned, with much waste of polite phrase, of course, that he must cancel his promise to speak to his Methodist brethren of his own country, or the Pope must cancel his engagement with Mr. Fairbanks. Being his own master, as every true American is, Mr. Fairbanks promptly chose to suffer affliction with his own people rather than to enjoy the countenance of the Vatican for a little season. Thus he won glory for his countrymen and escaped infamy for himself. So much for the admitted facts. Now for the issue presented.

It is greater than Mr. Fairbanks, larger than the Methodist Church. The Methodist Church can thrive on this kind of treatment, and Mr. Fairbanks has the open or secret admiration of his countrymen in larger measure today than ever before.

BISHOP EARL CRANSTON.

In the persons of Mr. Fairbanks and the Pope of Rome true and false Catholicity are face to face. The issue is between Americanism and Romanism—religious liberty and ecclesiastical absolutism.

Do Protestants in Italy owe their religious liberty to the Pope or to the success of the revolt against Papal authority? Has the Vatican ever anywhere abandoned its claim to control the thinking and reading and worship of the people? Can the Pontiff of Rome, who believes himself the vice-gerent of God and who dares not condemn his predecessors in this assumption without discrediting himself, who must therefore believe as they believed that the Papal power is divinely ordained to crown and dethrone kings, to set up and overturn governments, to write and rewrite history, can this man, or they who support him in this awful assumption, ever consistently concede or honestly support the principles upon which this Republic rests?

A Subscription Grows into a Noble Bequest.

Breathing such deep interest and noble loyalty to "this, our most conspicuous and comprehensive undertaking," the following letter from a widely known, revered and beloved minister of the Methodist Episcopal Church, speaks for itself:

I am sorry my subscription to the University has not been paid as I expected when I made the pledge. For years I have been out of the active work and have had a struggle to get along. A sick wife and other misfortunes have overtaken me. I have some property, but cannot dispose of it while living. I propose to will \$500 to the University, and have intended writing you for the incorporate name for some time. Please send it to me, for I want this matter settled.

Annuity Plan of the American University.

We offer a plain business proposition which provides for a life support for self, wife, children or dependents, giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, if you so, and receive in return an annuity bond legally executed and yielding a lifelong income at fair per cent. payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Bishop Hamilton Lectureship Fund.

Bishop Hamilton is engaged energetically in swelling the amount of money now on deposit to the credit of his Lectureship Fund. Notwithstanding the crushing burden which he himself assumed personally in behalf of the California churches, and which he still is struggling to discharge, he now has taken up this new load. Surely his friends will not fail him in their promises of help already made. In view of the peculiar needs, Bishop Hamilton has authorized sending to each subscriber to his Lectureship Fund, a letter, a copy of which we publish here. If any subscriber sees this before he receives the letter itself, may we not ask the kindness of a response? This will save the sending of the letter.

MY DEAR FRIEND: You were kind enough, in answer to my announcement at the session of the Conference, to make a subscription towards a lectureship in the American University at Washington, based on a proposition that if I raised \$1,000, \$1,000 more would be given. Mrs. Swift, of Chicago, has paid over the \$1,000 and I now feel under obligation to make good my promise to her to get an equal amount. The money goes on interest as soon as received until the whole sum is completed.

Will you please forward the amount of your subscription at your early convenience to the office of the American University, 1419 F St. N. W., Washington, District of Columbia, and greatly oblige,

Your brother,

JOHN W. HAMILTON.

Wilmington Conference Deeply Interested in the American University.

The Wilmington Conference, at its recent session at Salisbury, Md., exhibited the most earnest interest in the American University. The proximity of the territory of the Conference to the National Capital undoubtedly had something to do with this. The presence and presidency of Bishop Hamilton also were strong contributing influences. But seldom has any annual Conference shown such a keen, personal sympathy with the welfare of the enterprise at Washington as was shown by the Conference at Salisbury.

The visitation to the Conference in the interest of the university was made by Chancellor Hamilton. He was overwhelmed by kindnesses. He preached to the Conference, and made the educational address. His presentation of the university cause to the Conference in its business session was received with a sympathy and desire for helpfulness that argued a profound belief in the enterprise. Recent public events in connection with the Fairbanks-Pope episode at Rome had quickened the feeling concerning this work at Washington. Chancellor Hamilton, therefore, found a ready response to his story as he told it. The Conference, indeed, acted nobly when Bishop Hamilton followed with a statement of his plan for a lectureship with which to open the university. A most generous offering was made toward the fund for this lectureship. Several of the members of the Conference offered to open their churches to the Chancellor for a discussion of the university and its plans. Several laymen promised to help the enterprise more largely in the future.

THE LIBRARY OF CONGRESS—WEST AND SOUTH FRONTS.

The Bishop Hamilton Lectureship idea is proving contagious. Wherever the plan is broached it meets with instant approval. Wilmington Conference, true to her noble history, has wheeled into line for this new effort to advance the Kingdom. The Conference has our deepest gratitude.

America's Palace of Letters.

TO THE LIBRARY OF CONGRESS.

Palatial shrine of granite, steel and gold,
 For human letters, learning, art, the home,
 In quiet grandeur looks thy fretted dome
 On thousands seeking truth both new and old.
 Thy veined marbles brought from lands remote
 Shed mellow lustre on the nation's head.
 In bronze thy worthies, who the race have led,
 Still speak the deeds they wrought and words they wrote.
 With doors wide flung, kindly inviting all,
 Foursquare thy walls in strength and beauty stand,
 Ornate with varying types of human kind.
 Thy myriad chiseled forms the soul enthral,—
 Thy thousand faces limned by artist hand—
 Chaste symbol of Columbia's open mind.

—A. O.

On pages five and seven we are able to present, through the courtesy of the Western Christian Advocate, two pictures of the Library of Congress, a structure which vies with the Capitol itself in popular attractiveness. The first picture gives the west, or architectural front, with the main entrance, and the second an interior view, being a portion of the upper corridor of the grand vestibule, which bursts in splendor on the eye of the visitor after he has passed within the door.

The black and white of our press work give but faintly the impressive effect of the colors and carvings of this wonderful piece of architecture.

This library is the national home for the deposits of musical compositions, pictorial art, and general literature for a century to come. Here the facilities for study and research are of the best, combining rich and varied material with a corps of trained specialists and sympathetic assistants who count it their duty and pleasure to aid students in their work by suggestion and guidance to the sources. Both professors and students of the American University will find this unrivaled collection of inestimable value in their literary, artistic, scientific, and historical courses of investigation.

The New Jersey Conference and the American University.

The New Jersey Conference has set an example which in time will be followed by other conferences, we believe, all over the land. Chancellor Hamilton had been invited to give the educational anniversary address at the conference. In connection with his visit for this purpose, he attended a meeting of the Educational Committee of the Conference. That committee, after incorporating into their report a most kind and helpful reference to the enterprise at Washington, voted to recommend to the Conference that hereafter the Conference shall appoint annual visitors to the American University. Through these the Conference will keep in constant touch with the progress and plans of the undertaking at the National Capital.

This is only another of the multiplying evidences of a deepening and widening interest in the American University. We welcome the closest examination of all our work. We are honored by such spirit of sympathy and cooperation. Our grateful thanks to the New Jersey Conference.

From Snow Drifts to Orange Groves.

BY JOHN A. GUTTERIDGE.

From winter's cold to summer's heat is but a day's journey. Leaving New York on January 11th we had snow to Richmond. Through Virginia, the Carolinas and Georgia the weather was pleasant. We entered Florida and waving palms where the bluebirds, the thrushes and the mocking birds made the air vibrant with their songs.

We had journeyed South to represent The American University at the several conferences. Our good friend Bishop Berry was the presiding officer at all three of the Florida conferences, which met respectively in the beautiful cities of Eustis, Orlando and Ocala. The three weeks we spent together in these places were very enjoyable, as the bishop and myself each had our wives with us to help to make it so. In the brief intervals between the conferences we were the recipients of many courtesies on land and water. The steam launch of Mr. and Mrs. George Scott, of Brooklyn, was at our disposal for fishing parties and the fruitful orange grove of Mr. Amos Wakelin, of Philadelphia, gave us delightful shelter beneath its many and varied fruit trees while we ate our luncheon.

The St. John's River Conference met at Eustis. This is the only white conference our church has in Florida. It embraces all the territory from above Jacksonville to Key West, a distance of nearly 400 miles. The preachers impressed me as being fully abreast of the times and quite as able as a like number of the members in most of our Northern conferences.

From Eustis we went to Orlando, the seat of the South Florida Mission Conference. Here I addressed the conference on the first day. On Sunday morning we had a remarkable love-feast, which helped to inspire Bishop Berry to preach one of his masterly sermons. At the request of the conference the writer preached on Sunday evening, while the bishop accepted an invitation to preach in the Methodist Church South.

We next went to Daytona, one of the beauty spots of Florida. Here we left our wives and went to Ocala, the seat of the Florida Conference. Having discharged our mission there and the business of the conference being ended, we returned to Daytona. Our wives and other friends had planned several things for us. A trip up the Tomoko River, which proved very delightful, then a carriage ride to Ormond and Daytona Beach, then a dinner party at the home of Dr. Porter, the District Superintendent, and lastly a preaching service for me at the Methodist Church at Daytona, to which church the Rev. H. H. Mallinson has been recently transferred from the Pittsburg Conference.

From Daytona we took a three days' river trip to Palm Beach. The first day was along the Halifax River to Rock Ledge. Here we sorrowfully parted with Bishop and Mrs. Berry, this being the extent of their trip before returning North. In the early morning we saw them on the river bank waving to us their adieux. We continued our journey down the Indian River to Fort Pierce, Jupiter and Palm Beach. Space forbids my giving a description of the delightful feature of this charming river—myriads of wild ducks, geese, pelicans, and other birds innumerable. Great fish also abound! At Palm Beach we reached the climax of interests. All the glories of the tropics are there. I was privileged by appointment to spend a half hour with Mr. H. M. Flagler in his palatial home. From Palm Beach we started for Miami, but on arriving at Fort Lauderdale received invitation to go by steam launch up the New River some thirty miles, and from there into the Everglades. I gladly availed myself of that favor and was intensely interested to see the work that is being carried on by the government in the way of cutting canals and thereby draining thousands of acres of these everglades which are already being cultivated for fruit and vegetable farms.

From Fort Lauderdale we came northward to Tampa. They expect a great boom here when the Panama Canal is opened.

Next we went to St. Petersburg, and on the whole liked it here as well as any place we visited. Continuing northward we enjoyed a day or two with Dr. W. L. Davidson at his Chatauque Assembly at Gainesville and, besides assisting on the opening night of the assembly, preached on Sunday morning in the Methodist Church South. A day was spent at Clark University and another day in making calls in Atlanta. Then brief business stops at Charlotte and at Durham and a fast run home over the Southern Railway brought our journey to an end.

We greatly regret to state that since writing the above article Dr. Gutteridge, our Financial Secretary, was taken suddenly ill at his home in Ocean Grove, N. J., and is still unable to resume his important work. His legion of friends will join us in the hope that he will be restored soon and completely to his former health and vigorous manner of life.

More Millions for Washington the Beautiful.

Commenting on the money disbursements by the Congress now in session, one of the public prints says:

Appropriations aggregating a total that would fairly stun L'Enfant and make Alexander Shepherd gasp are embraced in the recommendations attached to the report of the District Commissioners to Congress. They were crowded out of the estimates by the law limiting the amount the Commissioners may ask Congress for, but will be advocated in a measure at a later day, together with a plan for raising the \$17,500,000 required to carry out the projects in the near future.

The larger amounts involved are for betterments designed for the beautification of Washington, and they have received the indorsement of trade bodies and citizens' associations, and are favored by all who take a deep interest in what makes for municipal growth and progress.

"Make your plans," says Senator Heyburn, a member of the Senate Committee on public buildings and grounds, "and we will see that you get the money to carry them out. It is our desire to see Washington become the most beautiful city in the world, and this can be accomplished in no better way than by the erection of great and beautiful buildings which will stand forever as a monument to the genius of the architects of the United States."

A New Reason for Locating the American University at Washington.

In speaking of the city of Washington as a great natural headquarters for the Nation, an influential daily journal says:

The selection of Washington as the commercial headquarters of the South has been ratified and supplemented by the action of the Southern Commercial Congress, in session here this week. Definite action was taken as to the erection of an adequate headquarters building, and the handsome sum of \$1,850,000 was fixed upon as the cost.

By having its headquarters in Washington, the gateway to the North, the Congress will be in easy reach of the territory embraced in the plan of exploitation.

Washington's superior advantage as a headquarters city has long been recognized, and has been availed of by so many different organizations and institutions that in this respect it is far in the lead of American cities. Some of the bodies thus established here and occupying buildings of their own are the Catholics, the Methodists, the Baptists, the Adventists, the Daughters of the American Revolution, the Bureau of American Republics, the National Colonization Society the Scottish Rite Masons, the Knights of Pythias, and others.

LIBRARY OF CONGRESS—PORTION OF GRAND VESTIBULE.

Our Place for Study by Act of Congress, March 3, 1901.

Accessions of almost priceless value form a part of the 167,677 volumes which were added during the year to the Library of Congress, making the total number 1,702,685, according to the report of the librarian of Congress, recently made public.

The valuable additions include a set of the great Chinese Encyclopedia given by the Chinese Government. Valuable manuscripts transferred to the Library from various departments of the government include all the "applications for office" during Washington's administration, the original vouchers and accounts of Washington's expenses during the revolution, and historical documents regarding revolutionary pension claims. Other valuable manuscripts acquired include originals of speeches by Luther Martin and James McHenry to the Maryland Legislature relating to proceedings in the Constitutional Convention of 1787. The McHenry document has special significance from the fact that it was hitherto unknown to historians.

Welcome to the World's Sunday School Convention.

To the delegates and visitors to the World's Sunday School Convention for 1910, the Courier gives salutation, and joins in the universal welcome extended by the Christian people of Washington. By reason of

your personal and united zeal for the spread of scriptural knowledge through the earth, we greet you warmly. By reason of the great and growing host of workers and students—a veritable army on the march for the occupation of the earth for the Christ—whom you represent, we greet you enthusiastically. The enthronement of Jesus Christ in the educational world as the Teacher of teachers, the preeminence of the Bible in the world of books, as the embodiment of divine truth, expressed in human speech, and the recognition of education as an integral part of the religious life constitute a common basis and a triple bond of union between the American University and the noble cause you represent.

We invite you, during your stay in Washington, to visit our site and our College of History, and particularly to inspect, with as much care as your limited time may permit, the Mountford-Mamreov Museum, illustrating life in Palestine. The first installments of this remarkable collection, consisting of costumes, pictures, utensils, weapons, and other curios, are varied and rich, and shed a realizing light on the dress and customs of Bible lands. Mme. Mountford has given personal attention to the artistic placing and grouping under glass of each article in this unique assemblage of oriental treasures. Decades of travel, large moneys, and painstaking selection have gone into the make-up of this Museum.

"Pushing the American University."

Under the above heading there appeared in a recent issue of *The Christian Herald*, an illustrated and appreciative article on "The American University." This article was a spontaneous effort upon the part of the management of the *Herald* to lay before their readers things big with present day interest; things of national import that cast their shadows before. For this article on the American University was published face to face with the full page illustrated discussion entitled "Mr. Fairbanks and the Pope." The writer of the article in question understood thoroughly that our name is significant. We are *American*. We quote from the writing but cannot publish the pictures.

There is a strong likelihood that the present year will witness the formal opening of the American University at Washington, D. C. This great seat of learning has been in the making for some years past. It now possesses two imposing marble buildings that are to serve as the nucleus of the splendid group of structures that will one day crown the heights overlooking the capital. The prime movers in the enterprise are impressed with the conviction that there should also be an inauguration of practical instruction—even though it be on a restricted scale.

Of the total endowment asked \$500,000, or one-third, is desired as an actual working basis, to enable the university to open its doors. Donations to this portion of the fund have been coming in at a gratifying rate, and at this writing total upward of \$250,000, or one-half the needed amount. There are already on file more than 1,500 applications for admission as students from young men and women.

The two buildings now in evidence at the ninety-three-acre site of the university (purchased at a cost of \$100,000) give a hint of the magnificence of the institution when all the projected buildings shall have been provided. One building—the College of History—has been completed at a cost of \$180,000. The second structure, the College of Government—a memorial to the late President McKinley—is now finished in so far as the exterior is concerned, about \$150,000 having been expended upon it, and nearly as much more will be needed to finish the interior. When the fund permits, teaching and lecturing will begin in the completed building. A Hall of Administration, to cost half a million, will perhaps be the next building to receive attention.

When the American University project had its inception the site chosen, though an admirable and commanding one, had the disadvantage of being in a somewhat inaccessible portion of the suburbs. Few tourists and sightseers who have visited Washington during the past ten years have had pointed out to them this enduring monument. Latterly, however, Congress has made liberal appropriations for the extension of Massachusetts Avenue, which will create a wide thoroughfare to the very gates of the university and will afford a direct and unbroken artery of communication between the new university and the United States Capitol. This, likewise, will become a reality during the present year.

WALDON FAWCETT.

Progress on Massachusetts Avenue Extension.

This magnificent approach to the Northwest Heights, the most sightly region of the District of Columbia, steadily moves on toward completion. The great fill over Foundry Branch, and the two great cuts on its eastern and western sides, were substantially accomplished last year. The settling of the fill is now sufficiently advanced for the surfacing processes of guttering and macadamizing. The unexpended por-

tion of the last appropriation is about \$10,000, which will go far towards putting the avenue in shape for public use. Much more than this will be needed to bring it to a condition comparable to that already accomplished on the part between Rock Creek and Wisconsin avenue. This doubtless will be forthcoming, we hope, during the present session of Congress. A bill is now before the Senate, already passed by the House, providing for the extension of the avenue to the District line, and for the acquisition of the land necessary by the usual condemnatory procedure.

This bill, which has the approval of our District Commissioners, commends itself to all public spirited citizens and will doubtless receive the attention and prompt action of the Senate. It vitally concerns the development of the most picturesque and commanding region of the District.

Thus is foretold the complete realization, at no distant day, of the plans for the most popular and most beautiful thoroughfare in the Capital city, which is now open to the site of the American University, and before long will pass through the northern part of its grounds.

Archbishop Quigley Pictures Catholics Controlling the Country's Life.

A vision of the United States controlled by the Catholic Church was given by Archbishop James E. Quigley yesterday afternoon at the dedication of Loyola Academy, the first completed building of the Jesuit University that is to be erected at Devon and Evanston avenues.

Archbishop Quigley declared that all modern universities outside the Catholic Church were teaching pagan principles that would destroy civilization unless checked. Then he pictured the Catholic Church triumphing over outside universities by the enlarging of the parochial school system and ultimately controlling the country in social, business, and political circles.—*Chicago Record-Herald*, November 15, 1909.

A Dash of Pepper.

The papers say the Methodists at Rome are trying to engage Colonel Roosevelt to lecture in their church, and that, if he does, the Pope will not receive him.

We bet they won't get him. Mr. Fairbanks seems to have stumbled without premeditation into an engagement that was incompatible with his seeing the Pope. Mr. Roosevelt, being forewarned, will probably do in Rome as the Romans do.

All the same, Italy needs more Methodists, and whether the Colonel preaches or not, his visit is not likely to discourage those that are there.—*Harper's Weekly*.

The sequel of Colonel Roosevelt's arrival in Rome proves the above prophecy to have been true—that he would "probably do in Rome as the Romans do;" that is, as some Romans do—those who prefer liberty of conscience, speech, and conduct to dictation from one claiming jurisdiction over these sacred rights of free men.

SOUTH FRONT—NEW NATIONAL MUSEUM—EAST END.

Action of the Board of Bishops of the Methodist Episcopal Church.

Chancellor Hamilton was called from Washington to Chicago, at the request of the Board of Bishops, who were in session there, to make a full statement of the affairs of the American University. After a careful and lengthy presentation of the financial conditions of the institution, and satisfactory replies to all the questions which were asked, a committee consisting of Bishops Cranston, Neely and Quayle presented the following resolutions which were unanimously adopted and officially signed.

Resolved, that we have been cheered by the report of Chancellor Hamilton showing an improved outlook for the affairs of the American University at Washington, District of Columbia.

Resolved, that we were never so clear in our conviction of the dignity and necessity of the American University as now.

Resolved, that we profoundly appreciate the importance of this great enterprise and the necessity of completing and putting into action the American University.

Resolved, that in the present hopeful outlook, we earnestly commend the cause of the American University

to the attention and support of the entire Methodist Episcopal Church, and to the Christian people generally throughout the United States of America.

Resolved, that the needed financial support should be given immediately to this Christian university at the capital of the country.

Resolved, that it is our judgment that the work of the American University should be started at an early date.

HENRY W. WARREN, Pres't.
L. B. WILSON, Secretary.

Chicago, Ill., May 10th, 1910.

\$12,000 From the Kent Annuity.

On May 17, 1910, at New York, Miss Isabella E. Westlake died, following an operation. On the succeeding Sunday, May 22, her uncle, Thomas Kent, passed away in Chicago. Mrs. Kent, the bereaved aunt and widow, has our deepest sympathy and condolence. For years this noble family has followed the American University with profound interest and earnest prayers

for success. By the death of Miss Westlake our American University annuity of twelve thousand dollars, which the uncle, Thomas Kent, had created for the benefit of his niece, lapses. The good that men do is not interred with their bodies. It lives after them more often.

\$6,000 For Scholarships in The American University.

Six thousand dollars for two scholarships in The American University have been provided for as memorial endowments. One fund of five thousand dollars is to be known as the Ross Earl Maris scholarship. It is the offering, in memory of their deceased son, by A. L. Maris and Mary C. Maris, of Tuscola, Ill. A fund of one thousand dollars, the gift of Mary F. Dever, of Lacon, Ill., is to provide for the Nancy Barnes Dever scholarship.

Gifts of Money.

ROSS EARL MARIS SCHOLARSHIP FUND.

\$5,000, A. L. Maris and Mary C. Maris.

NANCY BARNES DEVER SCHOLARSHIP FUND.

\$1,000, Mary Dever.

GENERAL FUND.

\$12,000, Thomas Kent, annuity lapsed; \$250, T. C. Hunter; \$100 (each), S. K. Felton, Mrs. Anna W. S. Keator, Zenas Crane; \$75, W. S. Pilling; \$50 (each), R. S. Todd, John Gribbel, Mrs. Rebecca Grazier; \$20.75, A. L. Wiley; \$25 (each), J. L. Spaulding, Jr., G. E. Tarbox, Wm. S. Jones, W. H. Gilbert; \$20, Wm. C. Arrison; \$10 (each), Albert Cline, John Oenslager, Jr., Joseph Coombe, E. M. Enslinger, Frank Schoble; \$5 (each), Bostwick Hawley, Cornelius Bodine, Jacob Hilgenberg; \$4, Nathaniel Moore; \$2.50, Clark Crawford; \$1 (each), J. A. Neill, John L. Hurst.

BISHOP HAMILTON LECTURESHIP FUND.

\$7.60, J. B. White; \$5 (each), G. A. Bond, J. C. B. Moyer; \$1 (each), Mrs. A. H. Benzec, D. J. Ebert.

ASBURY FUND.

\$5, Daniel Haskell.

M'KINLEY MEMORIAL COLLEGE OF GOVERNMENT.

\$75, Estate of B. D. Kauffman.

M'CABE MEMORIAL FUND.

\$50, Mrs. Matilda Van Rensselaer Yard.

Abraham Lincoln's Sofa.

Mr. John La Monte Hurst, of Denver, the eldest son of Bishop Hurst, has just presented to The American University a sofa once used by Abraham Lincoln in the White House. It has still the original green leather cover and makes a fine addition to our rich collection of historic pieces, which already include the table and chairs of Charles Sumner, the war desk of Edwin M. Stanton, the wardrobe and map case of George Bancroft, the standing work desk of John McClintock, later owned and used by John Fletcher Hurst, and the writing desk of Charles Cardwell McCabe, used during his marvelous campaign for missions. It can be seen in the College of History in the northeast room of the first floor. Mr. Hurst's kind thought and generous interest are deeply appreciated by the officers and trustees of the University, and should stimulate others to similar contributions.

Rare Books For Our Library.

Mr. Alexander H. Ege, of Mechanicsburg, Pa., has given to the library of The American University thirty-nine valuable volumes. Those of special interest are two copies of the Discipline of the Methodist Church, one for 1789 (printed by William Ross, New York), and the other for 1792 (printed by Parry Hall, Philadelphia). An old edition of the sermons of Robert South is doubly valuable by containing the autograph of Harry Dorsey Gough, of Perry Hall, in two of the volumes. A copy of Brookes' Universal Gazetteer, revised by John Marshall, Philadelphia, 1839, contains on title page the autograph of Ira Day, with whom John Fletcher Hurst boarded in Mechanicsburg when he first began preaching "under the elder" on the old Carlisle circuit. Martin Luther's German Bible, printed at Somersset in 1813 by Frederick Goeb, is another treasure in the original binding of wood and leather. A fine specimen from the press of the Orphan House at Halle, 1732, is John Porsts' Divine Guide for the Soul. This gift of Mr. Ege is in memory of his father, the Rev. Oliver Ege, of the Baltimore Conference. Several copies of a pamphlet containing a reprint of important portions of the two Disciplines accompany the collection.

We are also indebted to some unknown friend for the gift of a copy of a Mathew Carey Bible, Philadelphia, 1808; a Brown's Bible, Bungay, 1814, and Richard Baxter's "A Christian Directory: or, A Forum of Practical Theologie, and Cases of Conscience," London, 1673.

Other books recently received are as follows:

Justice to the Jew. By Madison C. Peters. New York, 1910.

Contributions from the Jefferson Physical Laboratory of Harvard University for 1909. Vol. VII. Cambridge, Mass.

Babylonian Expedition of the University of Pennsylvania Series D. Researches and Treatises. Edited by H. V. Hilprecht. Vol. V. Fasciculus I. The Earliest Version of the Babylonian Deluge Story and the Temple Library of Nipur. Philadelphia, 1810.

The Tanioid Cestodes of North American Birds. By Brayton Howard Ransom. Washington, 1909.

Annual Report of the United States Life-Saving Service for 1909. Washington, 1910.

\$60,000 More to Complete Massachusetts Avenue to Our Doors and Beyond.

Two weeks before adjournment Congress passed the bill entitled "An Act authorizing the extension of Massachusetts Avenue Northwest from Wisconsin Avenue to the District line," which had been pending for a long time. This legislation will remove the last obstacle to the continuous stretch of this great thoroughfare from the Eastern Branch to the District line—the said barrier having been the houses and land lying immediately west of Wisconsin Avenue. The cost of the new extension is estimated to be about \$60,000, which is to be assessed as benefits upon the properties which shall be adjudged to be thus benefited. The development of buildings and building sites along the avenue west of Rock Creek is one among the most important real estate movements now in progress in this city.

The Bishops on the Fairbanks-Roosevelt-Vatican Incidents.

The Bishops of the Methodist Episcopal Church have given out the following noble manifesto in defense of the mission at Rome:

Deploring and at all times seeking to avoid, interdenominational controversy, we are, nevertheless, compelled to recognize occasions when personal preference must yield to a higher sense of official duty. We cannot allow to pass unnoticed the recent unprovoked and unwarranted attempt to discredit one of our most useful missions by widely published accusations, which, if based upon truth, would bring dishonor upon the Church which supports that mission. We regret that, after repeated challenges for details of the specific acts supposed to justify these charges, they still remain in such general terms that their validity cannot be tested before the judgment of the world. We can only observe:

facts that support this inference are known to all who have followed the course of recent events in the city of Rome. Had there been any other way to avoid certain issues of etiquette and precedence created by coincident circumstances of a public nature, the Methodist Mission might have escaped calumny, and thus lost the valuable recognition of its success. Under such circumstances, we enter upon no defense of our work in Italy and make no plea for abatement in the judgment of the world. We decline at the present time to enter upon any counter attack upon the Roman Catholic Church. We ask only that all fair men interested in the situation, study for themselves its methods of propagandism and the traditional attitude of that Church toward other Christian faiths.

We believe there are standards of equity and moral rectitude by which, in the estimate of all progressive peoples, all religions and all methods must be rated by what they contribute to intelligence and moral character.

We now content ourselves with affirming our entire confidence in the moral integrity of our missionaries and methods

GROUP OF ZUNI INDIANS, IN NEW NATIONAL MUSEUM.

1. That ordinarily the use of opprobrious adjectives is suggestive of anger rather than of reason.

2. That the methods of our Mission in Italy, now for the first time thus publicly condemned, are the same that have been pursued from the beginning, almost forty years ago.

3. That the same methods, namely, preaching the Gospel in its simplicity and conducting schools where they are needed, schools which recognize the plain teachings of the New Testament as a supreme authority in religion and ethics, have long been followed by our missions in South America and Mexico, as well as in Rome, and no such indictment has been brought against those missions even to this day so far as we are informed.

From these facts the inference seems to be irresistible that other conditions than the methods of our Mission in Rome must have been the real cause of this sudden outcry. Possibly some exigency of diplomacy, local in its origin, but far reaching in its portent, required this attack, with all its hazard, as a diversion from the real issue involved. The

in Italy; and against the denunciations of their accusers we place the wide-open record of the Methodist Episcopal Church, both as to teaching and method in America and throughout the world.

Proposed New National Cathedral Near The American University.

The announcement that, by the will of the late John A. Kasson, of Washington, there has been left to the Protestant Cathedral enterprise in Washington a fund which, it is believed, will amount to about \$1,000,000, is of special interest to our work. The spacious and noble Cathedral site is near that of the American University. Needless to say, we hail with delight every step in the progress of The National Cathedral and University—what better or happier association?

Dr. John A. Gutteridge.

We rejoice to be able to announce that Rev. John A. Gutteridge, D. D., the Financial Secretary of The American University, who for some time has been ill, is being restored to health. His recovery to his accustomed strength and activity now is assured. It is hoped that he may be able to attend the Fall Conferences and aid in advancing the University's interests.

We are thankful to the Heavenly Father for our brother's preservation and pray for him long years of usefulness and successful labor in the cause so close to his heart.

Rev. Fred M. Stone, D. D.

Word has just been sent us that Hedding College at its last commencement, on June 15, conferred upon Rev. Fred M. Stone, Endowment Secretary of The American University, the degree of Doctor of Divinity. Dr. Stone richly deserves this recognition of his long and self-sacrificing labors in behalf of Christian education. His interest in all phases of Christian training, his own deep personal consecration to the educational cause, and his attainments in intelligent knowledge of theology all warrant this distinction. We thank the faculty of Hedding College for their kindly interest.

In West Virginia and Pennsylvania.

In company with Dr. Polsgrove, Chancellor Hamilton has just completed a tour in West Virginia and Pennsylvania in the interest of The American University. Wherever the two went they found much interest in the new activity in the University enterprise. Some subscriptions toward the opening fund were made by leading laymen, and co-operation was aroused in new quarters. One man, who is among the foremost citizens of Pennsylvania, both in wealth and social standing, after an afternoon's conversation concerning the project, promised soon to give substantial help to the cause. He said that such a work must be established at the Capital. Conditions there increasingly demand it.

There was not a town visited where the cause of the University was not thoroughly understood. There was not a man approached who was not well aware of the purpose and thought of the enterprise. Many confessed that they have been following with profound sympathy the work as it has progressed and have hoped for a speedy opening of academic instruction.

But many calls are pressing now on all who have a conscience about Christian giving and this, of course, must be realized in our estimates of present money returns from our efforts.

What The American University is Seeking.

Those who save their money lose it; it perishes with them. Their mansions become office buildings or Keeley cures, and their profligate sons waste their substance and their names die out, and their wealth is scattered to the four winds.

But those who build and endow colleges live age after age, down the centuries, doing good. The University of Copenhagen has an endowment 600 years old. Oxford, Leyden, Paris, Prague, have foundations due to the gifts of individuals who died hundreds of years ago. Such men still live on, still from their dust bless humanity, still make music in that choir invisible "whose music is the gladness of the world."—*Central Christian Advocate*.

Semi-Annual Meeting of the Trustees.

The regular semi-annual meeting of the Board of Trustees of The American University was held at the University office on Thursday, May 19, 1910. The following were present: Bishop Earl Cranston, Chancellor Franklin Hamilton, Dr. Thomas N. Boyle, Dr. David H. Carroll, Dr. Charles W. Baldwin, Justice Thomas H. Anderson, Mrs. John F. Keator, Mr. Benjamin F. Leighton, Mr. Thomas W. Smith, Mr. Charles C. Glover, Mr. George W. F. Swartzell, Hon. William L. Woodcock, Mrs. Earl Cranston, Dr. J. B. Polsgrove, Dr. Fred M. Stone, and Rev. Albert Osborn.

The reports of the Chancellor and other officers were of a most encouraging character. The additions to the permanent assets and funds of the University during the preceding five months were larger than for several years for the same period. The recent favorable action of the Bishops of the Methodist Episcopal Church on The American University was officially reported and a hearty response thereto was made. The meeting was one of perfect harmony and great interest.

The New National Museum.

The recent opening of the New National Museum building in Washington recalls the Act of Congress by which this museum, together with other educational resources of the National Government, are open for purposes of research to properly accredited students. Thus a new asset of the American University may be said to have sprung into being. And what an asset it is!

A description of the new building with the plans for the enlarged museum has been published. This description is so interesting and inclusive that we quote from it as giving at first hand information which will be of widespread interest.

The new museum, which has been completed at a cost of \$3,500,000, is the most remarkable structure of its kind in the world. It covers more ground than any other building in Washington, except the Capitol, having an area of 400,000 square feet on its four floors—or approximately 10 acres.

Of white granite, and so substantial that it might well be expected to last for all time to come, it is almost literally walled with glass, so that every one of the rooms and exhibition halls is flooded with light.

The National Museum possesses exceptional interest for the American people at large, because it is the most attractive of all the "sights" inspected by visitors who come to Washington from all over the country.

The new building will be kept open at night, affording to the working people of all classes in Washington an opportunity not hitherto enjoyed of viewing the collections.

The massive white granite structure stands directly in front of the Smithsonian Institution, which it faces. Four stories in height, it has a frontage of 561 feet, and a depth of 305 feet.

As yet the collections are only partly installed. It is planned to separate them into two great divisions—one to comprise all kinds of natural objects and the other to embrace exhibits relating to the arts and industries. The latter are to be housed in the old museum building, and will include, among other things, ceramics, metal work, jewelry work, glass work, firearms, laces and other textiles, and a collection of objects illustrating the development of transportation by land and water. Also this division will embrace the government's collection of patent models, which for many years, housed elsewhere, has been a great attraction to people visiting Washington.

The new building will be devoted to natural history, in the broadest sense of the term, including zoology, geology, botany, ethnology, and archaeology. All the stuffed animals and birds will be there; likewise the groups illustrating the manners and customs of primitive peoples, and the marvelous assemblage of giant reptiles which lived in this country before the Rocky Mountains existed—when, in fact, that mighty backbone of the continent was represented only by scattered islands uplifted out of the sea.

For the sake of architectural effect, the new building has been provided with a dome, of no great height, which covers

a rotunda 84 feet in diameter. This enormous circular hall, rising through the middle of the structure, is surrounded by three galleries, each representing a story. Every imaginable improvement in construction for exhibition purposes has been introduced. The interior walls are white, so that the illumination, thanks to the huge windows on all sides, is most brilliant. On this account mainly the national collection of paintings is to be placed, at least temporarily, in the new building, which will also contain the great historical collection, including relics of George Washington, Abraham Lincoln and other men who have contributed importantly to the development and progress of the United States.

For the people at large, the educational usefulness of the establishment is enormous. It stands today as one of the greatest monuments to American history and achievement. New objects and specimens flow into it from all parts of the world at the rate of something like 250,000 per annum, and thus the collections are steadily and rapidly increasing in interest and value. If in the past the museum has been instructive and a source of entertainment to the public, it will be vastly more so from this time on, now that it is provided with proper quarters for the expansion and exercise of its activities.

NEW NATIONAL MUSEUM—INTERIOR VIEW.

Is it True?

There is an interesting rumor to the effect that when Mr. Roosevelt returns to America it will be to found a great seat of learning or university at Washington, with almost unlimited capital. It is even said that this matter was planned and partly arranged before he left this country on his great hunting trip. It is said that Andrew Carnegie will head the subscribers to this institution of learning with a gift amounting to several millions and that other multimillionaires will put their names to the paper with donations involving seven figures. The ex-President has lived at Washington off and

on probably longer than in any other part of the country, and it is here that his influence would be greatest and most widely pervasive, for nowhere else in this part of the world would he come so closely in contact with public men, and nowhere else would his world-wide popularity be so effectively felt.—*Correspondent in St. Louis Christian Advocate.*

Whether or not the above report be true, the rumor itself is a straw showing a current. It is only another evidence that more and more is it felt that our capital city, Washington, is the natural location for a seat of learning which cherishes a world vision.

A Motto For Friends of The American University.

Pro Deo et Patria—"For God and Country"—is the official motto of The American University. As an added heraldic device on the shields of our helpers we are enblazoning as we go this word:

Things Move Along so Rapidly Now-a-days that People Who Say it Can't be Done! are Interrupted by Somebody DOING it.

Action of Board of Bishops—Christian Education.

We view with great interest the educational situation at the present time. The history of education in America will show that the church of Christ in its various branches has been easily the leading influence in the founding and maintaining of higher institutions of learning. It is our conviction that colleges and universities under the control of the state will do better work if stimulated by the high example and proper competition of our church schools. No greater disaster could happen to the educational system of the nation than the destruction of those colleges which, while avoiding sectarian narrowness and granting full religious freedom to their students, still maintain Christian ideals, and furnish an atmosphere wherein the spirit of real religion may flourish.

It is our opinion that our schools have now no more imperative and important duty than the generous care of our Christian colleges, in the giving of funds for current expenses and for permanent endowments. We can not possibly hope to raise up an adequate force of lay and ministerial leaders for our work unless these colleges are supported with enthusiasm and liberality. Within the next decade our people should pour millions of dollars into the treasuries of our higher institutions of learning. These institutions should remain absolutely loyal to the church which has given them founding and maintenance, while the church on its part should recognize the increasing obligations to support them, so that they may do honest work educationally, and may maintain the broadest and deepest spiritual life. We call upon our District superintendents, our pastors and members everywhere to take an eager part in every campaign to aid our splendid colleges in the sure conviction that without these training-places our church and the kingdom of God would suffer irreparable loss.

A Letter to Laymen.

To about a thousand laymen and friends of the American University has been sent the following letter:

DEAR FRIEND: We are making every effort to open The American University. We are attempting to secure \$1,500,000, of which \$500,000, when raised, will be used for the immediate opening of the University. Toward this goal we have made good headway, but we need help. Will you not read carefully the enclosed subscription envelope and subscribe some amount toward our work?

Recent events have demonstrated anew the vital need to America and to Protestantism for a Protestant university at the National Capital. We must make this institution the arsenal of defense against aggressions that threaten our civil and religious liberties. We are at a place in the development of this enterprise where one good determined effort by our friends from all over the land will bring victory. Strike hands now with us and be one of those who shall open the door of The American University.

To this appeal we pray that a ready and generous response may be made. All who have received this letter, and all who now read are urged to make a generous and early proffer of help. We shall be very glad to communicate with any one who especially is interested or to send literature to any one so desiring.

Sewer Connection For the Grounds of The American University.

Bids have been asked for by the District of Columbia authorities to complete the last section joining our grounds with the great metropolitan sewer system of Washington. Another step of progress thus is recorded in the ever-growing completion of our plant.

The late John E. Herrell, one of the leading bankers of Washington and one of the oldest trustees of The American University, shortly before his death made a proposition to contribute at least one hundred thousand dollars, and, if need be, more to insure the opening of the University. Had Mr. Herrell lived, such was his spirit of determination coupled with his financial ability, that undoubtedly The American Uni-

versity even now would be in process of opening for academic work. Chancellor Hamilton was directed to investigate as to the expense of completing everything needful for the immediate utilization of the University plant. Among other things he consulted the District authorities as to sewer connection for the grounds. He was informed that the cost would be four thousand dollars. Of this the District would pay one-half if the University would pay the other half. When Mr. Herrell unexpectedly died the plan for the movement lapsed.

Now comes the happy announcement that the District authorities, heeding the great need in the case, have undertaken themselves to run a sewer line out to Nebraska Avenue and the University grounds. Thus the University is saved two thousand dollars while a section of Washington is better served in sanitary facilities. While men sleep The American University progresses, for now we shall have installed at our grounds water, light, and sewers. We only wait for the electric car connection which will come soon.

The American University an Exponent of the American Passion For Culture.

A recent luminous paper by the Rev. R. J. Chrystie, Th. D., contains the following paragraph, which we commend to the earnest reading of all:

When a comparatively new state like California appropriates \$200,000 a year to the support of its university, and an old state like Massachusetts maintains ten normal schools at a cost of \$250,000 a year, it shows that intellectual culture has become an American passion.

In these movements the church stands at the front, and the clergy are the divinely and humanly-appointed leaders of the church. As such they have been uniformly men of culture, and have led in the great moral movements of the age; and no great movement in the church has ever been inaugurated by other than men of culture. In our own Methodism, from the days when Cokesbury College was founded, and Asbury studied Greek on horseback, to the days when the honored name "Wesleyan" is proudly borne by fourteen institutions of learning, and the buildings of the American University begin to rise in sight of the United States Capitol, the Methodist Episcopal Church and her ministers have always represented the ripest scholarship.

Dr. Spencer's Incisive Pen Helps The American University.

Think of the resources of that city (Washington), of what would be available in books, libraries, men, to be had for one street car fare, and without a copper of expense to the university. The Catholics have gone in there, and have two universities. They had come through a huge malappropriation of funds by the treasurer of one university. We passed through the principal university some months ago to make note of exactly what the institution and equipment are. They are doing business. They have gone to work. We started out to put up a veritable World's Fair series of small structures before we should pause to consider so superficial a matter as professors and curriculum.

We have one great marble palace of education already and another partly complete. But the bell in steeple striketh not. * * *

When are we going to open The American University? We want nothing, nothing whatever, now, but teachers, students, text books, dormitories, endowment.

The above graphic utterance is from an editorial in the *Central Christian Advocate* of June 15, 1910. Again Dr. Spencer has proved himself a helper to our cause. He attains to our Thirty Mighty Gibborim. With his help, yet greater things shall appear. May his tribe increase!

Wanted--One Thousand Pastors!

The range of the modern pastor's functions is very wide and diversified. Among them all is one delicate in its nature and far-reaching in its results. It is the duty of giving wise and discriminating counsel to those of his people who, knowing that in the near or more remote future they must leave their earthly riches, desire to know how they may project and direct the power of usefulness lodged in these possessions after their own hands have ceased to administer to others. A few words discreetly spoken, a thoughtful suggestion given in full view of the possibilities for largest and most enduring good, will bring genuine satisfaction to such minds and to the American University the pleasure and privilege of furnishing the channels for the distribution of such fructifying influences to the end of time. We need one thousand such pastors. Brother pastor, will you be one?

of its committee on the graduate college. To Princeton, but especially to the development of its graduate college, he gave much thought and care and interest. He was a firm believer in Princeton, and was convinced that her influence for good in the future lay not only in the undergraduate department, but especially in the opportunities given for graduate study and research. He once said to a Princeton graduate with whom he was talking, "You, who are a college man, cannot appreciate as much as I do, who am not, the benefits of a college education. I believe that post-graduate work is even, if possible, of greater importance. I pray that I may live to see our graduate college established on a firm foundation." That his hopes were almost realized is largely due to his painstaking care and hard work.

Mr. John D. Rockefeller and Higher Education.

In "The World's Work," Mr. John D. Rockefeller, in his last chapter of reminiscences, says that his interest in the University of Chicago has been due largely to the fact that in that university so much attention is given to research. That Mr. Rockefeller appreciates the call for that at which the American University aims is evidenced in the following paragraph:

Form of Will for the American University, Washington.

If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise and bequeath all the residue and remainder of my estate, real

and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names their place of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereto subscribed our names as witnesses."

President Grover Cleveland and Post Graduate Study.

After President Cleveland had left the White House and had made his home in Princeton, New Jersey, he became deeply interested in Princeton University. In discussing this period in Mr. Cleveland's life, "The Outlook" says:

Soon afterwards he (Mr. Cleveland) was elected a life trustee of the University, and, in the course of time, chairman

So many people see the pressing needs of everyday life that possibly they fail to realize those which are, if less obvious, of an even larger significance -- for instance, the great claims of higher education. Ignorance is the source of a large part of the poverty and a vast amount of the crime in the world -- hence the need of education. If we assist the highest forms of education -- in whatever field -- we secure the influence in enlarging the boundaries of human knowledge; for all the new facts discovered or set in motion become the universal heritage. I think we cannot overestimate the importance of this matter. The mere fact that most of the great achievements in science, medicine, art and literature are the flower of the higher education is sufficient. Some great writer will some day show how these things have ministered to the wants of all the people, educated and uneducated, high and low, rich and poor, and made life more what we all wish it to be.

The best philanthropy is constantly in search of the finalities -- a search for cause, an attempt to cure evils at their source.

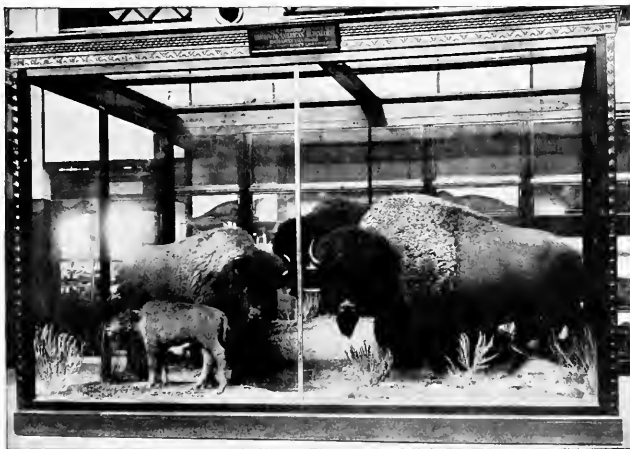

Wise Words From A Helper.

Why not take a special collection for the university in all the able churches of the connection and give us little fry a chance?

If the pastors of the churches would make a painstaking effort, we might give you a substantial surprise. Every Methodist ought to consider it a privileged duty and an honor to contribute at least one dollar toward your great and worthy enterprise.

Don't let all the honors of rearing and endowing this great Christian educational institution go to a few moneyed men, and two or three percent of the more humble laity.

Permit us all to give you a hand.

GROUP OF AMERICAN BISON. IN NEW NATIONAL MUSEUM.

Accompanied by a check for ten dollars, the above letter came to the office in answer to our published appeal for money. The writer, a loyal and well-known Christian business man, speaks wisdom worthy of wide circulation.

Halley's Comet and Our Site.

The recent visit of this celestial wanderer to our morning and evening skies was the occasion of many "comet parties." One series of these assemblages which celebrated the post-sunset glories of our western heavens was of the automobile variety. Night after night groups of star-loving people sought the higher parts in the District of Columbia for an unobstructed view. The favorite place of a large number was on Nebraska Avenue, along the front of the site of The American University. Here scores of amateur astronomers gazed at the stranger until his retreat from our neighborhood took him out of sight. This spontaneous confirmation of the wisdom shown in the location of the University is significant in its astronomical bearings. To the south of the esplanade, on the site itself, is a knoll of symmetrical proportions which has been designated as the natural home for an observatory.

The American University Shares in the Superb Progress Along Massachusetts Avenue.

Epoch-making improvements have been in progress in the northwest section of the District of Columbia during most of the later years in which the capital has been experiencing its greatest ratio of growth, and certainly none of them has been of greater importance than the opening of Massachusetts avenue extended, which is now in progress, between Wisconsin and Nebraska avenues. In a sense this work is only a portion of a still greater project, which has as its ultimate goal the extension of a magnificent boulevard, which will intersect all of the avenues, streets, and roads which penetrate to the boundary of the District.

The new portion of Massachusetts avenue which is now in progress of construction begins just west of the junction of Wisconsin avenue and Jewett street, near Tenleytown, and extends to the northwest as far as the Nebraska avenue frontage of The American University grounds. Its length approximates three-quarters of a mile, and although the work of opening has been in progress only a few weeks, the contractors will have the hills cut down and the valleys filled and the whole thoroughfare completed with its top-dressing of limestone before the frosts of winter.

The largest single dedication of property for Massachusetts avenue was made by Charles C. Glover, who gave the right of way not only through his own beautiful estate, but through several blocks of property which he had been holding for varying periods of years, and Mr. Glover, as a member of the board of trustees of the Cathedral Foundation, and of The American University, was practically wholly responsible for the dedication of the rights of way for the avenue through both of these large properties.

In the opening and development of Massachusetts avenue, however, a still greater plan of municipal improvement is projected. It is intended by Mr. Glover and others behind the movement to make this thoroughfare the greatest of its kind in any capital in the world. No efforts will be spared to place the property abutting upon the avenue in the hands of wealthy men who will build mansions upon it and surround each home with its private park. The tendency already is in this direction, because Massachusetts avenue is lined with beautiful homes, and as the semi-urban stretches of the thoroughfare are reached it is hoped the same types of buildings will be constructed.—*Washington Evening Star*.

Great Gifts to the Catholic University at Washington.

More than a half million dollars in bequests have been made to the Catholic University of America, at Brookland, in the last six months.

The Catholic University in recent years has been supported mainly by small contributions from the various Catholic

organizations of the United States, but in the past year or so it has been the recipient of numerous bequests. The Knights of Columbus of America are now at work collecting a \$500,000 fund.

This money will place the university in a superior position in the educational world. From time to time new buildings have been added.

The largest bequest received this year was that by Mathew Core, of Philadelphia, who died in December last, leaving a fortune estimated between \$500,000 and \$600,000. After certain bequests are turned over to relatives, the residue, amounting to at least \$200,000, will go to the university. The bequest of Mrs. Emily Lisby, of Baltimore, amounts to \$100,000. Two weeks ago \$100,000 was given to the university by a well-known Catholic of Greater New York, his only provision being that his name be withheld.

Cardinal Gibbons has issued a further appeal for funds to enlarge certain departments of the University, and this sum will be collected as usual in all the churches of the United States on a selected date.

The Joy of Giving.

Dr. D. K. Pearsons, the Hinsdale philanthropist, whose benefactions to struggling American colleges has made his name known throughout the country, has announced his intention of making a new series of gifts to education. In making known his purpose he expresses views on giving which deserve profound consideration. We quote his words:

The joy of giving! There is no joy in the world like it. I am now nearly 60 years of age, and I can tell you out of the wealth of experience that those years have given me that there is no earthly pleasure like that which comes from giving to others and seeing your gifts make them happy.

I ought to know what I am talking about, because I have been doing nothing else but give during the last twenty-one years. In all that time I have had no other business. I haven't stopped in my favorite diversion even to swap jack-knives. When you consider that during the thirty years that had preceded that I had worked like a slave at the task of accumulating my fortune you can imagine what a hold the joys of philanthropy have obtained on me.

Let other rich men go in for automobiles and steam yachts. I'll stick to my favorite fun. I intend to stick to it as long as the money lasts, and when I die I don't expect to have a single penny left. I don't intend to die for ten years yet, however. The joys of watching my money do good make life to me well worth living.

A good many have wondered why it was that I have always insisted that my gifts to colleges should remain as an endowment. Well, the chief reason is that I want to see my money continuing to do good. That foundation will last until the end of time. It will always be a fine thing for the school. But at the same time it affords me the pleasure of watching my money work long after the gift has been made.

I can see that school grow and become prosperous, and I enjoy the happiness of knowing that it is my money that is helping to bring all that prosperity about. And there is more to it even than that. As I sit here today I know that after I am gone my gifts will still be at work bringing happiness to and brightening the lives of thousands who will live after me. Perhaps there is something selfish in this. Perhaps—I don't pose as a saint—but it seems to me it's not a very discreditable kind of selfishness.

The Pope and His Franciscans at Washington.

ROME, Oct. 4, 1909.—This being the seventh centennial of the foundation of the Franciscan Order, the Pope addressed an apostolic letter to the Franciscans throughout the world. He recapitulated the great merits of the order, of which he was proud to be a member, and concluded by establishing new rules, especially with reference to privileges and indulgences.

At Brookland, in the city of Washington, in connection with the Catholic University, is the great Franciscan Monastery planned for five hundred monks. This Monastery has been made the headquarters for the propaganda of the Franciscan order in three continents.

No. 2

HON. JOHN L. DONOVAN

MRS. ANNA H. B. DONOVAN

Hon. and Mrs. John L. Donovan of Watseka, Illinois, Have Given \$40,000 to the American University.

We publish the pictures and give all the privilege of knowing the two noble-hearted benefactors who recently gave the University \$40,000. These friends first gave \$5,000; then they added \$30,000. Now they have just given \$5,000 more. This makes a total to date of \$40,000. But they intend to continue their benefactions. Their purpose is to endow at the National Capital a fitting foundation for the teaching and dissemination of Protestantism, and no wiser plan could have been evolved or desired. For events each day only make more clear the providential opportunity for such work.

Hon. John Lyle Donovan has become a benefactor of his time with vision and far-reaching motive in his plans. His benefactions are the result of long meditation and experience through a life of extraordinary vigilance and activity. He was born in Mason County, Kentucky, August 27, 1824. He

comes of that same American environment and that noble, sturdy stock which gave us Henry Clay, Andrew Johnson and Abraham Lincoln. Like most of the boys of his neighborhood and time, John Donovan knew hard work, penury and restricted opportunity. But in his veins was the blood of a conqueror. Nothing could keep him down. He set his eyes and his heart toward the goal and he never wavered or faltered. With his own hands he made the first pair of shoes which he ever wore. But those same tireless capable hands were to establish banks and great mercantile enterprises. They were to found villages and build railroads. They were to clasp in deathless friendship the hands of great men like Gen. John Logan and Senator Palmer. They were to build a church, and through its dedicated chime of bells to ring out the story immortal. Oh, the hands of the patient, indomitable little boy must have been watched by other eyes as they wrought the first humble, lowly tasks in the beginning.

The life scenes shift to Illinois. In various coun-

ties the same hard struggle went on until finally a home was made in Iroquois County. We see the young man a mail carrier, a merchant, a farmer, county treasurer, a cattle trader, and finally a banker. Everything that the tireless toiler touched prospered. The people who knew him had faith in him. He was elected a supervisor of Belmont township. He served as trustee on important bodies and corporations. He became the owner of a railroad in Tennessee, and then became a great factor in the betterment of a large section of the State. When the Chicago and Eastern Illinois Railroad was seeking to run its lines down the eastern line of the State of Illinois to whom should the directors more naturally turn than to this strong man of Iroquois County? This section of Illinois, which has profited so wonderfully through the use of this iron highway, never will know how much of the success of the enterprise is due to the contagious energy and forceful generalship of John L. Donovan. It is not extravagant to say that that railroad is one of his monuments.

But what man has rounded out his life in all fullness until he has joined his energy to the sweetness and purity awaiting him in the one God-given woman? Rare and memorable, indeed, for John Donovan was that day when, in Bunkum, Iroquois County, his was the felicity of becoming the husband of Anna H. Bradford, of New York.

Anna Bradford is a descendant of Governor Bradford, of the old Plymouth colony. She was the daughter of David and Nancy Bradford, and made her early home in her native State. She was educated at Millville Academy, Millville, N. Y. She early became a member of the Presbyterian Church, and always has taken a deep personal interest in religious and charitable enterprises.

To know Mrs. Donovan is to realize instantly that she is by nature and gifts the divinely intended companion of her husband. The gentle sweetness of her character and the refinement of manner that betrays the long line of eminent ancestors behind her is set like music to the rugged, masterful force of her husband. John Donovan never will know how much he owes to that devout souled, sincere and beautiful spirit who all these years has walked faithfully by his side.

In the later years these two began to feel that the wealth which their labor has brought ought to be a consecrated abundance. Although both all through life had been counted as identified with every good cause which their Christian faith supported, they began to search out unusual expressions to their Heavenly Father for His goodness and bounty to them. Mrs. Donovan encouraged her husband in the largest plans. Finally they determined to build a new church for the Methodists of Watseka. Mr. Donovan was a loyal Methodist, and he determined that the local church of his faith should be worthy of his pride. The result was one of the finest stone churches in the State of Illinois. Mr. Donovan has said often that what he is he owes to his mother. That godly

mother must have rejoiced when her son, in happiest comradeship with his beloved pastor, Rev. Joe Bell, worked out and finally saw dedicated the noble structure which for generations will tell the story of his generous devotion. But while Watseka honors John Donovan let the town also remember and write down in gold that name, Joe Bell. This pastor friend of Mr. and Mrs. Donovan threw himself into the enterprise, and with them made the plan possible.

Then came the gift by Mr. and Mrs. Donovan of a chime of bells to complete the church. To-day the chime rings out the tunes to a rejoicing town. And the bells forget not "The Old Kentucky Home," of which the man sitting on his porch in these days of honor and achievement often dreams as he sees rise before him out of the vanished days a little boy just beginning the long upward, toilsome way.

The gift of Mr. and Mrs. Donovan to the American University is the natural expression of their Christian loyalty and generous desire to make their lives count in the largest way. John Donovan, long an experienced man of affairs, believes that the hope of this land of freedom and light lies in the strength and activity of Protestantism. It seems almost of divine ordering that at the some moment that the Pope has sent out an encyclical harking back to conditions which called into existence the Know Nothing party, this strong man, whose youth shared in that earlier religious upheaval, feels moved of God to found at the National Capital of his country a power for Protestantism and liberty which, in the providence of heaven, never shall die.

We can only register our thanks and believe that it is of God. The years shall tell the tale of increase in this man's efficiency. He has not only built a synagogue unto his faith, but he also has linked his life with that Power for Righteousness which moves the sun and the other stars. Generations shall rise up to bless John Lyle Donovan and his wife, Anna Bradford.

\$10,000 More from Mrs. Jane A. Gibson.

The death of Mrs. Jane A. Gibson, of Aurora, Ind., has removed one of the strong friends of the American University. From the beginning Mrs. Gibson watched with faith and solicitude the various steps in the progress of the enterprise. From time to time she testified her interest in all that was being done.

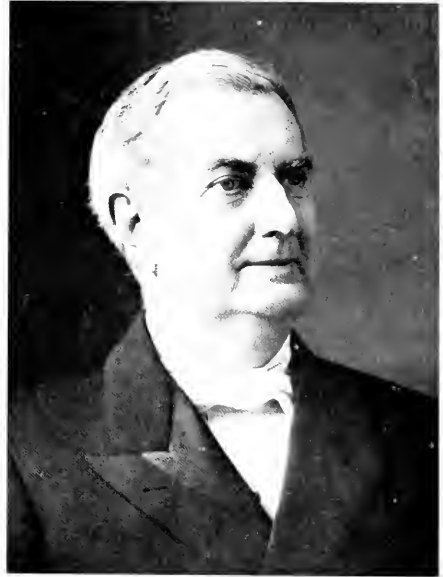

She desired that part, at least, of her means should be dedicated to the cause. She gave, therefore, to the University a farm of 676 acres as a gift outright. Subsequent to this gift came the announcement that Mrs. Gibson had remembered the University in her will.

After a long illness Mrs. Gibson passed away, and now from her executors comes the information that in her will there is a bequest of \$10,000.

The farm which Mrs. Gibson earlier had given to the University has an estimated value of \$35,000. It

MRS. JANE A. GIBSON

MR. THOMAS KENT

is in charge of a competent farmer, who is making every effort to improve the land and enlarge the products. We believe that the farm steadily is increasing in value, and that ere long it will be found to have advanced very materially in what could be secured for it in the event of a sale.

With this new gift of \$10,000, the total amount of Mrs. Gibson's beneficence to the University amounts to at least \$45,000. Later it may be found to amount to more. For this noble and generous assistance we only can register our gratitude. By such gifts the American University slowly but surely is being lifted into security and efficiency. A few more such gifts will put us where something actually can be done to justify the faith of our friends and the gifts of our benefactors.

In the meantime let there be written down in immortal memory and gratitude the name of Mrs. Jane A. Gibson, of Aurora, Ind.

Gifts of Money.

JOHN LYLE DONOVAN AND ANNA HUBBARD BRADFORD
DONOVAN MEMORIAL FUND.

\$5,000, John L. Donovan and Anna H. B. Donovan.

GENERAL FUND.

\$100 (each), R. B. Ward, W. M. Crane, Miss Orra N. Chamberlain, Thomas Bennett; \$50 (each), T. B. Moreland,

Henry J. Maris, J. E. Heavner, W. R. McKeen, Edmond L. Brown; \$26.50, A. L. Wiley; \$25 (each), W. J. Montgomery, Mrs. Cora Clark, W. H. Webster; \$12, collection, Niles, O.; \$10 (each), Lee F. Smith, F. H. Duckwitz, Mrs. Mary M. Sanders, G. T. Rearick, J. G. Williams, C. E. Legg; \$5 (each), F. S. U'ery, C. F. Myers.

BISHOP M'CABE ENDOWMENT.

\$25, George A. Slife.

ASBURY MEMORIAL.

\$100, Estate J. Albert Hyden; \$15, C. T. House; \$10 (each), L. P. Smith, H. D. Mitchell; \$5 (each), T. W. Boothe, Mrs. Annie E. Boothe; \$4 (each), J. T. Owings, Joseph Wheeler.

BISHOP HAMILTON LECTURESHIP FUND.

\$25 (each), Mrs. Alice H. Proctor, George O. Robinson; \$20, E. L. Hoffecker; \$10 (each), I. E. Springer, D. D. Campbell; \$5 (each), Miss Rebecca Watt, Mrs. A. M. Bliss, Miss May C. Bliss, W. H. Rider, H. F. Trigg, G. W. Townsend, E. L. Waldorf, Mrs. Mary J. Jones, E. J. Yerdon, Mrs. Joseph Cronan, J. W. Briggs, Charles E. Hamilton, W. O. Hurst, K. F. Richardson; \$2 (each), H. C. Woods, Z. H. Webster, S. P. Beardslee, M. V. Calkins, H. J. Johnson, F. Mittlefehldt, E. C. Toy, S. A. Brown, J. W. Campbell, Milton McCann; \$1.25, G. H. Smith; \$1 (each), H. J. Chattin, McKendree Shaw, G. E. Hutchings, J. R. Beadle, John S. Miller, H. R. Williamson, J. L. Sparklin, F. J. Cochran, W. R. Flint, Walter Firth, Mrs. Henry Babel, W. C. Francis, H. A. Reed, F. E. Edwards, M. L. Hallock, D. H. Kyes, G. C. Williams, G. A. Fee, W. H. Manning, A. B. Taylor, R. E. Brettie, W. G. Boyd, F. M. Thurston, P. J. Williams, W. H. Collycott, F. J. Grant, Mrs. L. E. Davis; 50 cents, R. E. Winn.

The Late Thomas Kent.

Our readers will be glad to see the reproduction of a photograph of the late Thomas Kent, of Chicago, which appears in this issue of the COURIER. The qualities of his heart and character show in his face. His strong and generous interest in every good cause was well known during his useful and honored life. His gifts to the American University ran up into the thousands of dollars. His death, and that of a loved niece, Miss Westlake, occurred within a few days of each other. Mrs. Kent survives, and keenly feels the loneliness resulting from this double loss, but rejoices in the heritage of the good names left by each of her departed.

Welcome to Dr. Wedderspoon.

The COURIER joins heartily in the general welcome to Dr. William R. Wedderspoon, who has just finished a successful pastorate at Emory Methodist Episcopal Church, of Pittsburg, and now enters upon that of Foundry Church, of Washington. Dr. Wedderspoon is a working member of the Board of Trustees of the American University. His presence and work in the city will be a benediction to thousands.

John S. Huyler.

After a life of eminent success in business and equally eminent usefulness as a citizen, John S. Huyler, of New York, has entered into rest. A promoter of evangelism, he, himself, in his later years, was a glad and winsome messenger of the good tidings of God's love to his fellow men. His long connection with the Board of Trustees of the American University has been marked by oft repeated and generous gifts. His departure will be felt as a great loss in wide circles of men who have enjoyed his fellowship, his philanthropy and his Christian warmth of heart.

A Bequest by Mrs. Sophia O. Loomis.

The American University has recently received the deeds to two unimproved lots in the suburbs of the District of Columbia through the Rev. Benjamin B. Loomis, a member of Troy Conference, now of Carlisle, Pa., acting as executor of the estate of his deceased wife, Mrs. Sophia O. Loomis, who left these properties to the University by her will. Both Mr. and Mrs. Loomis have been warm friends of the institution since its inception.

The Wisconsin Conference Enthusiastic in Interest.

Never has Chancellor Hamilton received a more gratifying and brotherly reception than was accorded him at the Wisconsin Conference. The way was opened by Bishop Berry in his characteristic thoughtfulness of the interests of others. He gave up his address to the entering class in order that the cause of the University might be brought to the brethren. The Conference entered heartily into the presentation of the cause. It was good to be there. Everybody seemed to feel that this enterprise now represents interests which are vital to all Christian educators and all Protestants.

Dr. Plantz, who is making such a remarkable record in his great presidency of Lawrence University, extended his courteous and brotherly expressions of interest to Chancellor Hamilton afterward. And many of the members of the Conference assured the Chancellor of their intention to aid the work in every way. Dr. Hamilton was invited to address the Laymen's Conference in the interests of the University, and did so, being received with marked cordiality.

As if there was to be no end to the hospitality of spirit of this cosmopolitan conference, Dr. Hamilton had been engaged to make the educational anniversary address and also to give the Conference lecture.

Great audiences were present at both of these meetings. And again came eager inquiries as to the work at Washington and expressions of ardent interest and prayers for success.

Surely the whole country is awaking to the need for the American University. As Conference after Conference, without a single dissenting voice, swings into line and records its approval with fervor—the workers are lifted up strangely. They are tempted to say, "If these be for us, who can be against us."

The Des Moines Conference Makes a Contribution to Our Cause.

The Des Moines Conference always has taken a deep interest in the American University. At its last session in September Chancellor Hamilton represented the interests of the enterprise, and was greeted with the utmost cordiality. After addressing the Conference, Chancellor Hamilton referred to the active co-operation which Bishop Hamilton was showing in the work. Bishop Hamilton thereupon made a statement of his plan to endow a lectureship by means of which the University should be opened. He mentioned the fact that Aberdeen University for four years had been carried on by just such lectures. He stated that many friends were assisting him in raising money for this lectureship and that he would be glad of any help that might be given. The Conference took up a collection, and many subscriptions were made, netting a very generous contribution in the name of the Des Moines Conference. This great Conference has had a name for generous support to all good causes. Again, the name has been made good. Here, and now, we express our deepest gratitude to this noble band of self-sacrificing workers. We do not wonder that all causes are prospering under their hands.

The Iowa Conference Endorses the American University.

The Iowa Conference, in its session but recently closed, gave a ringing endorsement to the work of the American University. A most generous assignment of time for the presentation of the cause had been given to Chancellor Hamilton. He was heard by the Conference with most evident sympathy. There was no doubt of the desire of this old historic body of Iowa Methodists that the work at Washington shall take on the largest and most aggressive form for the advancement of Christian education. Heartiest evidences of approval of the efforts now being made for the speedy opening of the University were shown.

At the close of the address President Schell, of Iowa Wesleyan University, offered a strong and ringing resolution endorsing the American University and pledging fealty to the cause. The conference

passed the resolution unanimously and with unmistakable approval of the sentiments of the mover. The great success now attending the work of President Schell at Iowa Wesleyan lent especial significance to his endorsement of the work at Washington. Our wisest educators and leaders fully understand that our work is a unit, and that all are vitally interested in the success of any one part of our co-ordinated educational system.

Upper Iowa Conference Makes a Noble Response.

The Upper Iowa Conference is a strong Conference. It has great responsibilities to face. Within the bounds of this Conference are four schools of the Methodist Church—Cornell College, Upper Iowa University, Epworth Seminary and a German college. Naturally the heart of the Conference turns to these children of its own household.

And yet the people of Iowa never have been merely local in their interests. They always have been loyal to the larger causes which have knocked at their door. An illustration of this was seen in the manner in which at Charles City they received Chancellor Hamilton and the presentation of the needs of the American University. The Conference had passed a regulation that no collection should be taken for any of the benevolent causes.

In the midst of a strenuous and absorbing session of the highest import to the Conference the work was intermitted long enough to hear the statement concerning the educational enterprise at Washington. Profound interest was manifest. Seemingly the Conference caught a new vision of responsibility in this work. After Bishop Hamilton had stated his plans for helping the University by beginning a lecture course, the Conference decided to lend a hand in the affair. By a vote of the Conference an exception was made in behalf of the Lectureship Fund, and a collection was ordered to be taken. A goodly offering was made.

Chancellor Hamilton had been invited to deliver the Conference Educational Anniversary address. Representatives from all four educational institutions of the Conference were present at the meeting. President Harlan, of Cornell College, presided. President Cooper, of Upper Iowa University, offered prayer. The church was crowded to the doors. The character of the meeting was such that all felt the unity of our connectinal work, and that all Christian schools of the land now must stand shoulder to shoulder to fulfill the task which is common to all.

It was an occasion of deepest interest. At the close of the meeting many expressed their high hopes for the American University, and expressed gladness that the leaders of Christian education in Iowa are so sympathetically harmonious, not only in their own local endeavor but also in the wider work of the country as a whole. Our heartfelt thanks to Upper Iowa Conference.

High Water Mark at the Northern Minnesota Conference.

No conference yet visited in recent years in the interests of the American University has manifested such enthusiasm for the cause as has been shown by the Northern Minnesota Conference. Recent events, perhaps, had turned the attention of the members of the Conference to the providential role which the American University now seems destined to play in the struggle to maintain our civil and religious liberties.

The Conference seemed eager to hear about the enterprise. Many members kept asking, "When are you going to tell us about the American University?" Finally, when Chancellor Hamilton was introduced to the Conference he was assigned to speak after Dr. Robt. Forbes. That meant, of course, that he found a full Conference before him. Everybody had gathered to hear the eloquent and inimitable secretary of the Board of Home Missions.

The University could not have had a better or more considerate hearing. No Conference yet visited has taken the matter so clearly to heart. Tall, sun-crowned men are those heroes of upper Minnesota. They have the vision. Great things are under their hands now, but yet greater things shall come to pass in their empire.

The dinner hour was postponed to talk the matter out. Bishop Hamilton told of his endeavor to help open the doors of the University, and instantly the Conference favored making an offering in behalf of the work. A goodly collection and subscription was made. There were present a number of reporters. They sent out to all the papers a full account of the proceedings. This was repeated through the Associated Press, and the story finally reached every corner of the land. Some of the papers followed up the first report with an additional subsequent article discussing the significance of the American University to our national interests.

Great kindness was shown to Chancellor Hamilton as a mark of courtesy to the University. He was entertained in the home of that prince of Methodist laymen, Joseph S. Ulland. He was invited to deliver the address at the anniversary of the Board of Education, and Sunday evening he preached to the Conference. A debt of deepest gratitude is due to the Northern Minnesota Conference. May it flourish and prosper in an ever wider and nobler heritage.

Joseph S. Ulland, Great-Hearted Layman.

Among the growing Christian lay leaders in the great northwest country there is none who more certainly commands the confidence and holds the hearts of all than Joseph S. Ulland, of Fergus Falls, Minn. "Joe Ulland" everybody calls him, because everybody loves him. But in reality Mr. Ulland is one of the solid and progressive builders of the great State of his home. He is the worthy son of a noble Methodist preacher. He is president of the Fergus Falls National Bank, one of the best banks in the

State. He is a pillar of the Christian Church, and is recognized everywhere as a safe and yet progressive leader. Personally he is a mighty man for righteousness. The evil forces of his city fear him. The church people count him their Achilles. Twice he has represented the Northern Minnesota Conference in the General Conference of the Methodist Church. Every indication is that again he will be called upon to serve his Conference and State in this capacity. Incidentally Joseph S. Ulland is a friend of the American University. He showed many courtesies to Chancellor Hamilton during the latter's visit to Fergus Falls. He was of great service in securing a proper hearing for the University cause. Long life and happiness to Mr. and Mrs. Ulland and all theirs!

Minnesota's Capital Lends an Ear.

The St. Paul and Minneapolis daily papers had heralded the coming to the twin cities of Chancellor Hamilton. They had done it almost as interestedly as if some political event were impending or some new sensation were about to be sprung on ears and hearts made acutely alert by recent happenings attending the coming and going of some great one.

The Northern Minnesota Conference had attracted wide attention throughout the State. Chancellor Hamilton's address there on the American University had been quoted broadcast throughout the State. Many expected that the speech at Fergus Falls would be repeated at St. Paul. But, instead, an entirely different line of presentation was followed. The newspapers courteously made the best of the loss of sensational matter, and reported in full the address to the Conference, followed by a speech by Bishop Hamilton.

The Conference showed every interest. Although it is heavily under the endowment plans for Hamline University and the various other enterprises which mark the forward movement of Minnesota Methodism, the Conference made a generous offering to the American University.

Individual members of the Conference in large numbers pledged their renewed support to the work. Several laymen expressed interest, and had there been time for a systematic canvass of the twin cities much more material help could have been secured.

Chancellor Hamilton made the educational anniversary address and also the Epworth League anniversary address to the Conference on Sunday evening. Sunday afternoon, to a large gathering of young men in the Y. M. C. A. building, he gave the address which opened the series of autumn and winter meetings for the city.

Courteous beyond words was the reception of the representative of the American University. New friends for the enterprise were found. Old ties were strengthened. Here and now we extend our deep-felt gratitude to the warm-hearted friends in the great gopher State.

Many Friends in Northwest Indiana.

The American University has many friends in the territory comprised in the Northwest Indiana Conference. This was made clear during the recent visit to that Conference by Chancellor Hamilton. It was a busy Conference, and the program was crowded. The church where the Conference was held was thronged with people. The interests involved and the topics up for discussion made it a great Conference. La Porte, Ind., was the center of interest from a wide section of the State, when Bishop Moore called the assembly to order.

The American University received a most generous hearing and attention. Chancellor Hamilton had been invited to make the Epworth League anniversary address in the absence of President Schell, who could not reach the Conference in time for this service. The following day the regular anniversary of the Board of Education was held, and Chancellor Hamilton made the address. Much emphasis in the daily press was given to both these meetings.

The address on the University given to the Conference evoked the most generous sympathy and attention. Many members of the Conference in person professed renewed allegiance to the enterprise. None was more kind than that most tactful and able District Superintendent, Dr. Paul Curnick, and the pastor of the church entertaining the Conference, Dr. Craig. Although new in the Conference, Dr. Craig already is bringing much to pass. Dr. Curnick has won highest honor in his work as District Superintendent. At the educational anniversary Mrs. Curnick sang, to the delight of all, one of her own songs, "My Mother."

In the local press the report of the address to the Conference on the American University was almost sensational, and attracted wide attention. As a result several offers of substantial help to the work were made. Certainly, the American University is winning its way to many loyal hearts.

North Dakota Conference Is With Us.

The State of North Dakota is only twenty years old, and yet already it is a mighty commonwealth. That, perhaps, may account for the happy optimism of the men of the State. The recent conference at Bismarck would seem to indicate that the future of that great State is in the toiling hands of Methodist preachers. What wonderful reports the District Superintendents made! What labors abundant marked the experiences of the ministers. And yet they forgot not the American University. The Educational Anniversary address was made by Chancellor Hamilton. Dr. Robertson presided at the meeting. All were interested in his description of our great work. He explained the unique relation of Wesley College to the North Dakota University, and then spoke most kindly concerning the enterprise at Washington. There was deep interest manifested in the address by Chancellor Hamilton, which fol-

lowed, as illustrating the common interest of all in the schools of the church.

On the next day, to a crowded conference, Chancellor Hamilton presented the cause of the American University. Many of the preachers in their own work were facing pioneer conditions, and yet such was their enthusiasm for the Washington enterprise that they gladly made a most generous offering to the Bishop Hamilton Lectureship Fund. Seldom has Bishop Hamilton received a more considerate and sympathetic hearing as he stated his plans. Many members of the Conference declared their determination during the coming year to advance the work of the American University in every way. Several of the leading citizens of the State, such as Judge Pollock, of Fargo, were present at the meeting. And they both contributed and also expressed their interest and sympathy. It was a great Conference. The visit to North Dakota will live long in happy and grateful memory.

Washington More Important Than Rome.

The Protestant Committee recently formed in Rome has decided to ask the American Protestant denominations, and the Archbishop of Canterbury, to join with the German and the Swiss congregations in the erection of a Protestant church, facing the Vatican, as a protest against the recent papal encyclical on St. Charles Borromeo, which greatly offended German Protestants.

While the plan thus proposed for Rome must commend itself to all lovers of light, let the situation at Washington challenge instant attention. The Roman Church is stronger in Washington than in Rome. It is estimated that the Roman Catholic Church now has invested in Washington and its environs over \$114,000,000. Over against this enterprise build and endow a Protestant university that shall prove a corrective source of light and learning for all America.

Two Famous Encyclicals.

Encyclical Number One.

Three years ago Pius X issued his encyclical against Modernism. As the readers of *The Outlook* will remember, it was divided into three parts: The first of these, reported to have been written by Father Billot, of the Roman College of Jesuits, describes a systematized body of belief which its author ascribes to all Modernists. The second enumerates the basic causes of Modernism, namely, curiosity, pride, and ignorance. The third part, which alone is believed to have come from the hand of the Holy Father himself, is disciplinary. It directs measures of repression, among them being the establishment of "Watch Committees," which are to be in every diocese, which are to watch for and report on every trace of Modernism, and which are to be secret tribunals. In other words, they are in practice the equivalent of the Inquisition.

With the issuance of the encyclical there fell a great silence over the Catholic world. The Church had spoken, the new studies had been condemned, the Curia (as the central Papal government at Rome is called) was employing every weapon of repression—spying, delation, the "regime of starvation"—to stamp out this "sum of all the heresies," and, so far as we in America could tell, the Modernists had seemed to conform. No bishop even can protect his subordinates from unjust or grotesque accusations, and it is oftentimes the man of pure life and lofty devotion who is made the

victim. The days when no man was safe from suspicion and denunciation in Spain or the Netherlands have returned in Italy, so far as the clergy are concerned. And it is not the will but the power which prevents the Church from turning them over to "the secular arm" to be burned at the stake, as were the heretics of three hundred years ago.—*Frank Hunter Potter.*

Encyclical Number Two.

An encyclical issued by Pope Pius X, in connection with the tercentenary of the canonization of St. Charles Borromeo, of Milan, aroused intense indignation in Germany. References in it to the Reformers and the Reformation called forth protests and agitated discussion at mass-meetings held in many German cities and largely attended. At those in Berlin thousands of persons gathered. Chancellor von Bethman Hollweg, in response to a demand for action "to meet such insults in the Evangelical Church," said: "The contents of the encyclical reflect upon German Reformers, on Reform and on the princes and peoples of the Reformed faith in a manner likely to wound deeply their religious convictions. Their political and moral sentiments are equally affronted," and he announced that the German Ambassador at Rome had been instructed to make these feelings known to the Vatican. The Roman Catholic dignitaries were themselves stirred to unwonted action by the storm of protests evoked, for the papal nuncio at Munich and the archbishops of Breslau and Cologne immediately telegraphed to Rome, expressing fears that the political consequences would be harmful to the Catholic center in the Reichstag. The effect was at once manifest, for the Pope withdrew the encyclical from publication in Germany, instructing the bishops not to make it known in their dioceses.—*The World Today.*

We print these two comments because it has been claimed without denial that, like the Jesuit University at Chicago, the Catholic University in Washington is in favor of this ban on Modernism. If it is, let none wonder that we are seeking to build and endow the American University at Washington. At the National Capital of this land of Freedom's hope let us build one lighthouse of untrammelled Truth in order that that hope may not grow dim.

Mid-Summer Attractions of Our National Capital.

By Susan Hunter Walker.

Those who do not live in Washington are apt to believe that the winter is the time to see our National Capital at its best. True, it is its busy season, when the Houses of Congress are making their country's laws, and the presence of our national legislators with their families sets the wheels of society in swift motion. But the Washington of spring, summer and fall shows us quite another side of her attractions, and it is in these seasons that she becomes the nation's city beautiful.

President Taft recently said of his place of residence: "It thrills my heart every day to look out of the windows of the White House, to see this beautiful city in which we are permitted to live—those avenues and streets constructed upon a magnificent plan, looking forward for centuries; these trees planted with great foresight to make Washington a park; these vistas into which always creeps unbidden that beautiful shaft which marks the memory of the founder of our Capital."

Washington has at least a hundred beautiful vistas, and in every one of them the climax is either the majestic obelisk reared to the name-giver of the city of his creation or the classic Capitol building.

One of the finest vistas in which the Washington Monument is the chief object is to be had from the west terrace of the Capitol, and the best time to view it is on a clear summer evening just at twilight. The great shaft rises tall and solemn, its gray, square outlines softened by the evening

haze, its shadowy height silhouetted against the rosy background of the dying day. Seen under this favoring condition one fully appreciates the fitness of this tribute to our greatest American.

Still another vista in which the Capitol plays the part of prime importance is to be seen from the spacious grounds of the National Soldiers' Home at the northeast limit of the city. Here is an expanse of five hundred acres of hill and dale "improved" by the artifice of man only to the extent of aiding nature in her luxuriant arrangement of flowers and grass, trees and shrubs, which beautifies the seven miles of driveway this breathing space affords.

In this northerly section also is Rock Creek Park, a reservation of two thousand acres of forest, field, and stream, whose great natural beauties have been guided to near perfection by the able hand and hand of the noted landscape gardener, Olmsted. This splendid recreation ground for the city's workers encloses the National Zoological Park, the finest feature of its kind in the world. Here, in as nearly their natural conditions as it was possible to surround them, are to be found hundreds of the wild creatures of the universe.

American University Grounds.

If you will fare farther in this northwesterly direction and do not mind a bit of a walk, the grounds of the new American University will be reached. My tramp was over a dusty highway and under a burning sun, but the magnificent view from this hundred-acre plateau which the Methodist Episcopal Church has chosen for its great educational institution more than repaid the slight fatigue involved.

Washington, like Rome, lies in the basin of a circle of hills, and this great establishment chose for its site the very highest of them all. The great white buildings throw their beacon lights of learning in all directions, but the most striking view they command and dominate is that over the Potomac River and for many miles beyond into Virginia.—*Epworth Herald.*

Washington an Educational Center.

President Grant said in his annual message of 1873: "I would suggest to Congress the propriety of promoting the establishment in this District of an institution of learning or university of the highest class by the donation of lands. There is no place better suited for such an institution than the National Capital. There is no other place in which every citizen is so directly interested."

George Washington, as we all know, had the same idea of the superlative fitness of the National Capital as a national educational center and made a bequest to put into concrete practical shape his thought of a national university at Washington.—*Washington Star.*

President Cyrus Northrop Pleads for Comprehensive Universities.

It thus appears that the business of establishing the small college, gradually increased in activity during the first half of the last century, culminated about the middle of the century, and has steadily decreased to the end of the century. It is not likely, in view of the tremendously increased cost of equipping and running a college, that many small colleges will be established in the near future. Men of great wealth may try to duplicate or surpass what has been done at the University of Chicago, and the various States will doubtless continue to do all they can to enable their State universities to do the best kind of work, and the good, small college will continue to thrive and to exert its healthful influence in the region which it serves. But the faith and patience and sacrifice of our fathers in the cause of Christian education will not be repeated, if the great fortunes of the very rich shall continue to be poured into the educational treasuries as they have been in recent years, or the existing institutions shall not, in their teachings, prove recreant to all that the fathers held sacred.—*The World Today.*

The American University Courier

Entered as second-class matter February 27, 1909, at the post-office at Washington, D. C., under Act of July 16, 1894

Volume XVII

Washington, D. C., December, 1910

No. 3

MR. JOHN S. HUYLER

SENATOR JONATHAN P. DOLLIVER

Payment of Mrs. Gibson's Bequest of \$10,000.

Mr. W. V. Webber, cashier, and Mr. E. H. Davis, president of the First National Bank, of Aurora, Ind., the executors of the will of the late Mrs. Jane A. Gibson, of the same place, have recently paid to our treasurer the amount of her bequest to the American University—ten thousand dollars. This payment has been made within a few months of Mrs. Gibson's death. Such promptness deserves special commendation and is greatly appreciated by the trustees and officers of the University. This noble gift is all the more helpful, because it comes untrammelled by any conditions except that it be used to carry out the purposes of the institution.

What Is On the Bronze Doors of the Capitol?

Some time ago we inaugurated a campaign for an Opening Fund for the American University. We undertook to raise a million and a half of dollars, of

which five hundred thousand dollars, when raised, should be used to open the doors of the University to students. We took the field with this as our rallying cry and purpose. From that moment to this we have intermitted no effort, we have turned aside for no instant, we have been disturbed by no criticism or coldness of reception, we have hesitated at no task, we have asked no favors. The Christian people of this land ardently desire the founding and opening for active life of the American University. Having now been brought into intimate contact with the people of this country from Aroostook County to the Golden Gate, and having taken occasion at every possible opportunity, through private conversation and through noting the temper of great and responsible assemblies under direct and indirect appeal, we now know what the people want. Like Abraham Lincoln through personal contact we have come to knowledge, sure knowledge, of what the people of this country really want. While never impatient of difference in opinion, and always welcoming intelligent criticism, as the unconscious

The American University Courier

contribution of the adversary to the tempering of the blade, we now have come to such clear assurance of the backing of the people for this enterprise that we can afford to be courteous and wise at the same time under any testing. Not only underneath us are the everlasting arms but also behind us are the everlasting people. And little does any man gauge the temper of those now in charge of the American University if he fancies that we will tarry to parley at the gate while the enemy are beating in the doors. Where has the sword of Earl Cranston ever yet failed to flash clear and bright and terrible when the need came? Look at the conditions which now are confronting us in this country. "Can we not read the signs of the times?" Go, look at the panels of the bronze doors of the Capitol and there read the answer to your question.

And does any man think that with such needs and such a call and such a beginning and such an opportunity we shall hesitate to interpret whether the country would have us as patriots lead? Any one who could have followed the receptions given to the representation of the cause of the American University at the fall conferences and through the Middle West this past autumn must have been veritably a blind man not to be able to read the heart and will of the people. Great assemblies made up of the leaders of men do not break into tumults of approval to a cause without having in their hearts deep down a reason for their faith. These men read the signs of the times. And through our history these men and their type ever have proven the wise and safe counsellors of progress. We do not wonder that John Knox prayed, "God, give me Scotland!" What that soul in agony or prayer was beseeching of God was the hearts and wills of the plain people of His Scotland. And the prayer was heard. Behold, what the peasantry of Scotland, Bonnie Scotland, my Scotland, as so many a tender heart can say, behold, what God's people of Scotland have wrought for liberty, light and righteousness.

We have been asking God for America. Years ago in the dark we took as our motto, "For God and Country." And now the dark is becoming light. Slowly but surely the country is rising to the vision. A little patience and all will be well and fair.

It is in this spirit that we are asking for an Opening Fund for the American University. Only yesterday one of the sanest and most noble-spirited laymen in the Methodist Episcopal Church heard Bishop Cranston exclaim, "Oh, if some one would only give five million dollars to the American University!" and that layman instantly answered, "I will give a thousand dollars!"

The layman's name is F. X. Kreidler, of Nebraska, Pa.

That is how it is going to be done. We are asking gifts and subscriptions to the Opening Fund on a specific basis. The form is as follows:

AMERICAN UNIVERSITY OPENING FUND

In Consideration that the American University of

Washington, D. C., is to raise \$1,500,000, whereof \$500,000 when raised shall be used for the immediate opening of the University to students, I promise to pay annually to the Trustees of said University, or order,

for years, the sum of
..... Dollars.

The first payment due and payable on or before

..... 1st, 191.....

Date.....

Name.....

Address.....

Friends, read these lines in the spirit of cooperation and helpfulness. Join the league in progress. Strike hands with us for a great advance. Help us swell this Opening Fund. Make it possible at once to open this University, which now is freighted with the hopes and faith and prayers of multitudes, who love the things to which this enterprise is committed and for which it stands.

Recent Gifts of Money.

GENERAL FUND

\$10,000, Estate of Mrs. Jane A. Gibson, per E. H. Davis and W. V. Webber, executors: \$150, T. C. Hunter; \$100 (each), Mrs. Sarah S. Levings, Wm. G. Cathcart, Mrs. Emma Sconce, Jas. W. Jackson, W. S. Pilling; \$78.07, A. L. Wiley; \$50 (each), George I. Bodine, John Gribbel; \$25 (each), U. O. Colson, John Kissack, Allen Myers, A. R. Baxter; \$12.50, S. H. Kemp; \$12, Illinois Conference, per treasurer; \$10 (each), Mrs. Sarah L. Clark, G. L. England, D. R. Ulmer, Lee Brunson; \$5 (each), George Clark, Edward Levings, W. F. Lear, H. C. Jones, John A. Lindsey, W. W. Murphey, Hiram Dulaney, C. M. Lemon; \$3, "A Friend"; \$2, J. A. Price; \$1 (each), Chas. McNeal, "Two Friends."

ASBURY FUND

\$5, Mrs. Grace M. Cahoon.

BISHOP HAMILTON LECTURESHIP FUND

\$50, Robert Watt; \$20.00, Miscellaneous; \$5 (each), Fletcher Brown, P. N. Dwell, E. K. Copper, H. G. Bibbie, W. H. York, Anna C. Eley, J. M. Johnson, J. A. Roberts, John Lowe, D. Morgan, C. A. Recent Gifts to the Library.

Bacon is Shakespeare, by Sir Edwin Durning-Lawrence, from the author, per The John McBride Co., New York; cloth.

World Corporation, by King Camp Gillette, The New England News Co., Boston; boards.

Twenty-sixth Annual Report of the U. S. Civil Service Commission, Washington; cloth.

Statistical Abstract of the United States, 1909. Prepared by the Bureau of Statistics, Washington; cloth.

How to Develop Self-Confidence in Speech and Manner, by Grenville Kleiser. Funk & Wagnalls Co., New York; cloth.

Louis Lombard—Observations d'un Musicien Américain Traduit de l'Anglais par Raoul de Lagenardiere. Paris; paper.

Fiftieth Anniversary Sermon, by Rev. Henry W. Hicks. Delivered at Calumet, Mich., Sept 10, 1908. From the author; paper.

The Fundamentals: A Testimony to the Truth, Vol. III. Testimony Publishing Co., Chicago; paper.

The Bishops and the American University.

The semi-annual meeting of the Board of Bishops of the Methodist Episcopal Church was held in Washington, D. C., in October and November. The presence in the Capital City of these distinguished men naturally was of interest to many. It always is a pleasure to see gathered into one body men whose activities and usefulness belt the globe. Great affairs of Church and State occupied the attention of the bishops and they were absorbed in multifarious cares from the moment that they entered Washington.

But we are glad to inform our friends that again these leaders took a practical share in the promotion of solving the American University problem. That their interest is only increased and that their vision of the need of the University is clearer than ever before were manifest by an act upon their part which, when it is announced later, will be a stimulus and source of inspiration to all. Wait for a further announcement in this matter. The news when it comes will be all the more helpful and profitable for suggestion to others.

Senator Jonathan P. Dolliver.

The death of Senator Jonathan Prentiss Dolliver was felt poignantly by the whole nation. It was as if some tall mountain pine had gone down and left a vacant place against the sky. Plain folk needed this man to be their protagonist. In mind, heart, and spirit he was the tribune of the people. Only the years will reveal how deep and lasting has been the national loss which has come through the death of this noble Christian statesman.

But if the nation suffered through the untimely taking off of Senator Dolliver, the deprivation which has come to the American University has been even keener. We depended upon him for counsel and guidance. He attended our trustees' meetings and shared heartily in all our burdens and cares. In public we

always could count upon his extraordinary gifts as ready at hand for our service.

Jonathan Dolliver was a son of the parsonage. From infancy he breathed in principles of loyalty to high ideals and faith in the ultimate regnancy of the kingdom. Through days of penury and strenuous endeavor these ideals and this faith never lost their allurements. Many triumphs came to the young man for he "rose by the upward gravitation of natural fitness." From human view point he was cut off while yet ascending.

Many and fitting tributes elsewhere have been paid to this eminent American. We desire here simply to express our sense of personal bereavement at the death of one who to many of us was a personal friend, and to record the profound loss which thus has come to the American University. Senator Dolliver's services to this enterprise find their most conspicuous expression, perhaps, in the address which he gave on the occasion of the official visit of President Roosevelt to the grounds of the American University in 1908. That address has entered into history where it will live. It has been quoted around the world. But the more hidden services, the alert appreciation of our needs, the ready proffer of assistance in private advice and personal conversation with eminent men, the unwavering sympathy with all our undertakings—these are not published and never can be told. But they have been builded into the very structure and fibre of our enterprise. And there the memory and encouragement of them will abide to strengthen and to sweeten for all time the life and endeavors of the American University.

John S. Huyler.

We briefly noticed in our September issue the death of John S. Huyler, of New York. In this number of THE COURIER we present his picture. His connection with the board of trustees of the American University was continuous for nearly eighteen years, and his benefactions, amounting to many thousands of dollars, came in a perennial stream. He was one of the chief givers for the College of History. Mr. Huyler has left in the social and commercial world a commanding monument to his energy, integrity, and sagacity in the large and successful business which he built up on the foundation of industry and honesty. He has left in the character and memory of thousands of his fellowmen a more precious and enduring memorial through his simple, strong and consecrated life as a Christian and as an evangelistic worker for the winning of erring men and women to the paths of righteousness and peace.

Catholic University at Washington Progressing.

WASHINGTON, November 17.—An appropriation of \$100,000 was voted today from the general funds of the Catholic University by the board of trustees for the erection of a new building which will alleviate the present crowded conditions and form a nucleus for further development of the institution. General plans for new buildings were discussed, but with the exception of authorizing expenditures for a structure to be occupied by lay students, no action was taken.

University Office Location Changed.

Attention is called to the fact that the street number of our University office is 1422 F street N. W. The Glover building in which for a number of years we have had our office, having been taken by one of the Government departments, we with others, were compelled to vacate the premises. We have moved directly across the street to the Kellogg building. Thus we are in the same neighborhood and on the same street as before, only the number is different. Kindly notice the new number—1422. Let our friends remember that we can be found directly across the street from our old location. We shall be glad at any time to greet old friends and new in our attractive and convenient office now at 1422 F street N. W., Washington, D. C.

Annual Meeting of Trustees.

The annual meeting of the trustees of the American University was held December 14, 1910, at the new office of the University, 1422 F street, N. W. The enterprise never before has been so promising. Loyalty to a wider vision of the work with a more aggressive spirit of determination stirred those present. Reports showed that the institution is being administered with utmost economy while the endowment funds steadily are increasing. The active personal leadership of Bishop Cranston in bringing the finances of the University to careful business methods at the same time that new and varied endeavors ceaselessly are put forth is being felt everywhere. The last six months have recorded a most notable advance. Hon. John L. Donovan, of Watseka, Ill., was elected a member of the board.

Members present were Bishop Earl Cranston, Dr. David H. Carroll and Dr. Charles W. Baldwin, of Baltimore; Dr. J. G. Bickerton and Mrs. J. F. Keator, of Philadelphia; Dr. T. N. Boyle, of Pittsburg; Dr. W. R. Wedderspoon, Mr. B. F. Leighton, Mr. Thomas W. Smith, Mr. Aldis B. Browne, Mr. G. W. F. Swartzell, of Washington, and Chancellor Franklin Hamilton. Officers of the board were elected; president, D. H. Carroll; vice-president, A. B. Browne; secretary, C. W. Baldwin; treasurer, C. C. Glover. The members of the executive committee are: Franklin Hamilton, T. H. Anderson, B. F. Leighton, A. B. Browne, T. W. Smith, D. W. Carroll, W. R. Wedderspoon, C. W. Baldwin, G. W. F. Swartzell, Earl Cranston, C. F. Norment. Finance committee: A. B. Browne, C. C. Glover, C. F. Norment. Auditing committee: B. F. Leighton, T. W. Smith, G. W. F. Swartzell.

A Voice From the Middle West.

Fred M. Stone, D. D., Endowment Secretary.

Increased interest and the support of the ministry and laymen is the order of the day. All are saying, "The integrity of the Church is at stake and the University must go." They are backing their statements with their dollars. I am nearing the close of my third year's connection with the University and the outlook was never more assuring than now. There have been many anxious hours and some disappointments, but it is a joy to add there is a substantial financial increase and our future is brighter than ever in the history of the institution. The work in the Middle States develops steadily. The Rubicon of our days of distress and uncertainty has been crossed. The University is more than solvent in its finances and status before the people. Money is coming in larger and larger sums.

The attitude of the conferences attended this fall was marked by a welcome hospitality. I presented the interests of the University to the Illinois Conference at the session in Jacksonville and was most cordially entertained by Dr. Harker and his delightful wife at the Woman's College. Here is a great and growing plant of educational activity and the worthy doctor and his amiable wife, with an excellent corps of instruc-

tors, are happily working out the problem of the separate education of women. Bishop Cranston was in the chair presiding over the session of the conference on my arrival, keen, analytic, kind in spirit, but firm as adamant when convinced his cause was just. He graciously stopped the conference business in the midst of important matter to allow a presentation of the cause in hand. The brethren were the personification of courtesy as attentive listeners. I remained over Sunday and greatly enjoyed the masterful sermon of the Bishop in the morning and took part in the addresses of the evening.

The following week I attended that wide-awake body of our ministers known as the Central Illinois Conference, a fine body of successful servants of God. The session was held at Pontiac. Dr. Ryan, the conference host, has the unique distinction of serving that church eleven out of fourteen consecutive years and this was his second entertainment of the annual conference during his pastorate at that place. A place was accorded on the program Tuesday evening and Wednesday morning through the kindness of Bishop Moore, who is always alive to the University's affairs, the business of the conference was stopped in the midst of the organization work to allow an opportunity to address the ministers concerning our enterprise, as it was necessary to leave on an early train for the next appointment. Bishop Moore took occasion to affirm his unwavering faith in the development of the University and its vital importance.

The next destination was Niles, Ohio, where the East Ohio Conference was in session. Bishop Berry, genial, wholesouled, and alert, gladly made way for the University cause in the morning session and at night the services were divided between the conference claimants and our cause. The growing attitude of the conference is that of happy and stable encouragement.

While traveling in this great region of industrial and agricultural activity I was struck with the many indications of substantial prosperity. It is truly a marvelous illustration of workshop conditions and a storehouse of fruit and grain. Industrial plants, well equipped farms and rapidly growing cities are constantly in evidence. The great causes of the Church are dear to those people and they are constantly supporting these with an increasing liberality.

To succeed in this project and build upon a never failing foundation I profoundly believe in three things: Faith in God, victory in prayer, active consecrated human endeavor. In life's problems "more things have been wrought by prayer than this world dreams of," and the recorded achievements of active consecrated endeavor fill the annals of sacred and profane history. Upon this basis the University will go forward in its building and enlargement.

The Historic Wesley Chair.

Our readers will be glad to see the pictorial representation of the massive chair now in the College of History made from the timbers of City Road Chapel twenty years ago and given to the American Univer-

THE HISTORIC WESLEY CHAIR

sity. The combination of artistic skill with historic material renders this piece of furniture unique in interest. Its chief points of attraction are the carved medallion of John Wesley, the British lions and the American eagle, the coats of arms of Great Britain and of Lincoln College, Oxford, and the lines of Charles Wesley:

Unite the pair so long disjoined,
Learning and vital piety

The inscription plate reads:

Presented by William Newburn, of Wykeham Park, Banbury, on behalf of the Methodists of Great Britain to the Methodists of America, to be used as a chair of the Second Ecumenical Conference, Washington, October, 1891, and afterwards as the President's Chair of the American University. The chair is made of old oak taken from Wesley Chapel, City Road, London.

Designed and executed by Robert Garnett & Sons, Warrington. T. B. Stephenson, President of the Wesleyan Methodist Conference, 1891.

THE CHRISTMAS CUP OF PEACE

Dedicated to the Professorship of Peace proposed for the American University by Bishop Willard F. Mallalien.

Mingle afresh the Christmas cup of peace.
 Enlarge the skyline of thy faith anew.
 Rear watch towers high for wider Pisgah view.
 Reach forth to coming joy, the old release.
 Yet not entirely let past music cease;
 Contrive to take from memory's heartening cue
 Hope's brightening path to Heaven's unfading blue.
 Relive the angels' song and still increase
 In work of thinking brain and loving heart.
 Seek fields fresh furrowed by the share of pain
 To scatter there the grains of Christly gold.
 Mix every hour with love the major part,
 And sympathy's sweet chord the minor strain.
 So shall the Shepherd Good the world enfold.

—Albert Osborn

A Peace Professorship Proposed by Bishop Mallalien.

Bishop Mallalien has long been interested in the promotion of international peace. He now proposes a Peace Professorship for the American University. At the self-same moment Mr. Carnegie sets aside over eleven million dollars as a foundation for bringing about world peace. The first meeting of this foundation was held in Washington. The hearts of all peoples are centered on this dream of a world peace. Well they may be. Mark these indictments of the folly and the crime of war from one of our keenest editors:

Each year we pay \$8,000,000 and more for the possession and use of some twenty battleships. The price of one battleship would double all the benevolent gifts of the Methodist Episcopal Church for the next three years. With two battleships we could more than double the endowments of the fifty-three chief colleges of the same church. One battleship costs more than would provide twenty parks in the crowded areas of our great cities. The wealth produced in one year by the skill and labor on 500,000 acres of fertile land goes into the making of one of these fighting machines.

Dr. John A. Gutteridge Steadily Improving in Health.

We rejoice to be able to announce to the legion of Dr. Gutteridge's friends that he slowly but surely is regaining his health and strength. By the nature of the case his complete recovery will require time. But it will be only the more permanent for that lengthened process of healing. The naturally buoyant and optimistic temperament of our friend has not been disturbed. He is just as smiling and radiant with sincere human interest and friendliness as before.

This will assist greatly in the ultimate recovery to normal health.

Dr. Gutteridge has numberless friends throughout the land. They continually are inquiring with genuine concern as to the condition of him with whom they have spent so many happy hours. Like the genuine, trustful, hopeful heart that he is, John Gutteridge sends his well-wishers greeting. Ere they know it their friend will be at their doors and hearts again with his persuasive smile and that story that never grows old—The American University.

Mr. John F. Keator.

The many friends of Mrs. John F. Keator, of Philadelphia, Pa., have been pained to learn of the grief that has come to her through the death of her husband. Mrs. Keator's loss is peculiarly poignant, because of the unusually close association which she had not only with her husband's more personal tastes and interests but also with all that larger sweep of activities and benevolent causes to which he had given so much thought and time. There are some losses for which earth holds no reparation. Such has come to Mrs. Keator in the death of her husband.

Her many friends are not forgetful of her in her sorrow and bereavement. Her associates on the board of trustees of the American University, least of all, are unmindful of what such a loss means to her.

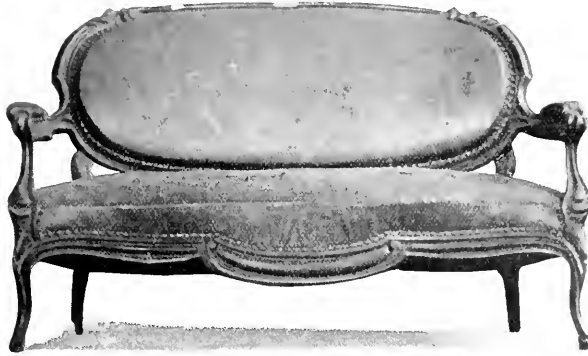

We assure her of our profound sympathy and pray that the Heavenly Father may assuage her grief, and we express our confidence that under God's blessing in the years to come she will find it her joy to take up and carry on the manifold noble interests to which her husband gave so much of his strength and life.

Madam Mountford III.

We regret to have to inform the many friends of Madam Mountford of her serious illness. In Cincinnati, Ohio, after a laborious season of lectures and public addresses Madam Mountford this past autumn was compelled to undergo a serious surgical operation. While her life was spared by the operation her mental condition was disturbed by the great strain and suffering. Madam Mountford now is being cared for in a sanitarium in Cincinnati. Her condition is serious but we hope and pray that she yet may be spared and restored to health and strength. It does not seem as if the work of this strong and vigorous personality which excited the admiration of all who knew her can be done. Let Madam Mountford's many friends have her in mind tenderly and prayerfully during these dark and heavy hours of weakness and suffering.

Sewer Connection Made to Our Grounds.

The District of Columbia authorities have completed the sewer line to the grounds of the American University. The line runs up New Mexico avenue to its junction with Nebraska avenue and there has been pushed across Nebraska avenue to our property.

ABRAHAM LINCOLN'S SOFA

There now only is needed to connect our buildings with the sewer thus built.

Some time ago when we were investigating the items of expense involved in the utilization of our plant we found that it would cost \$4,000 to carry out the sewer to our property line. The District authorities were willing to order the construction if we would pay one-half of the expense, to wit, \$2,000. But after consideration the Commissioners ordered the construction without waiting for our cooperation. Thus we have been saved an expense of \$2,000, and there now wait for us at our door water, light, and sewers. Every month now seems to register some new forward step for our University enterprise.

Three Roman Voices Which American Protestants Should Heed.

Two cardinals, one from Italy and one from Ireland, and an American Roman Catholic priest, recently have spoken words of moment concerning Protestantism. Cardinal Vannutelli while in New York said:

Naturally, I was especially concerned with the progress of the Catholic Church in the United States. The evidences I have seen of the marvelous growth of the church in this country have impressed me most profoundly. Here, unhampered by hostile legislation and free to work out her mission, the church, an infant in years, shows all the vitality and strength of a giant.

Cardinal Logue, primate of Ireland, says:

Catholicism will be the salvation of America, because its cardinal principles are more vitally Christian than those of other religions. I believe the time will come when America will be classed as a Catholic nation. Everywhere I see evidences of the tremendous growth in membership and influence of the church. It is only a narrow-minded person who can look on this growth as a menace.

Rev. Paul Francis, a recent Roman convert from the Episcopal Church, in a sermon in Boston declared:

It is evident that old-fashioned Protestantism is falling to pieces, but out of its decaying systems there is emerging, thank God, an extraordinary Catholic reaction.

The full, rich, glorious Christ of a Catholic Christianity has been dragged from his throne by the advance thinkers and reduced to beggary.

A pale, bloodless, emaciated, Syrian ghost, he still dimly haunts the corridors of this twentieth century Protestantism, from which the doom of his final exclusion has already been spoken.

We do not quote these words in any spirit of controversy or irritation, but simply as students of the times, seeking to build an institution pledged to the highest development of Protestant thought and the best progress of American life, we call attention to these utterances. Where could be found more luminous or stirring arguments for building and endowing the American University at the National Capital?

Abraham Lincoln's Sofa.

Among the treasures now housed in the College of History peculiarly valuable is the sofa once used by Abraham Lincoln in the White House. A cut of this souvenir of the great emancipator accompanies these lines. The sofa was owned for several years by Bishop Hurst. From his estate it became the property of his son, John La Monte Hurst, of Denver, who has presented it to the American University. Its antique and well built frame is still covered with the original green leather. For the photograph from which the picture is made we are indebted to the courtesy of the Rev. George V. Morris, of Lexington, Ky.

"Let the Flag Float Over the University," Says Rev. J. F. Allen.

Rev. James F. Allen, of Winthrop, Mass., is a man of vision. In his vision he sees on the grounds of the American University a tall flag mast rising above the buildings and at the mast head flung out to the breeze the ensign of the United States of America. The vision is worthy of the man and of the institution. The

motto of the American University is *Pro Deo et Patria*—For God and Country. Over all the possessions of an institution with such a motto there ought to float the flag of our country.

Mr. Allen's thought is that the Epworth Leagues of New England could be induced to undertake as their share in this national university enterprise the raising of the money needed to erect on the University grounds such a flag pole and to fly from the staff a flag of appropriate size and quality.

We do not need to wait for this until actual work is being done in the buildings. What we already have belongs to God and country. The ground and buildings already formally have been dedicated to God, now let us raise over them the flag. All who see will rejoice and the flag will honor us.

We are taking steps to learn what will be the exact expense for such a plan. In the next issue of THE COURIER we will give the estimate with dimensions of staff and flag. In the meantime let any one who is interested in the plan communicate with Rev. James F. Allen, Winthrop, Mass., who is the father of the idea.

Honor with your assistance the Christian patriot who would see put in her rightful place, high against the sky above the American University the old ensign from which "not a stripe has been erased, not a single star obscured."

A Voice From Across the Border.

Chancellor Hamilton, of the American University, Washington, D. C., was called to Chicago by the bishops to make a full statement of the affairs of that institution. The information he furnished upon the financial conditions, the opportunity and needs of his university, elicited their high endorsement, which is in every way a notable and challenging deliverance. This institution needs money to complete the buildings and "put in action" the school. In a large measure of political, ecclesiastical, Christian and educational need, the capital of this country must have at once a strong, large and influential Protestant university. The Protestant people of America must be alert to discern this necessity and to provide abundantly and quickly for it through a great school like the American University has planned.—*The Christian Guardian*.

Ten Miles Beyond the Grounds of the American University.

Washington should have a city college and it should be located on the banks of the Potomac, near Great Falls, where power could be procured for lighting and heating the large buildings required. So declared Allan Davis, principal of the Business High School, at a meeting of the Columbia Heights Citizens' Association last evening. The association met in the Post Office Hall on Park road northwest, near Fourteenth street, and the meeting was largely attended.

The address of Principal Davis was attentively listened to. When Mr. Davis mentioned the fact that in his belief Washington should have a city college he stated that in all probability some people would believe the suggestion to be somewhat advanced, but he declared that the educational advantages of the city could hardly be better served than in the building of such an institution.

In discussing the location, he declared that the best site in the section seems to be near Great Falls, where by bridling the Potomac the great water power now going to waste could be made to heat and light the buildings necessary. There

would be space, he said, for aquatic sports as well as a splendid athletic field.—*Washington Star, November 2.*

This proposition to found a Washington City College is of double interest to us. It not only is an added evidence of the educational needs of Washington, but it also has a direct bearing upon the American University. The proposed site for the new college is at least ten miles beyond the location of the American University grounds. Let those who have fancied that we were located too far from the center of the city take notice. The ideal location for a college now, it is said, is ten miles beyond us.

The American University on Trial.

The American University is on trial—of this there can be no doubt. If, however, the University is to prove a vital and uplifting influence in our national life, with our population growing more and more heterogeneous, a mere transplanting, in many sections, of foreign soil and foreign prejudices, it must begin its task in earnest "for life and letters," for genuineness in scholarship and character. It must prove, before too late, the American dynamo to control and vitalize the American nation and lead it to higher issues. Let the true expansion of our Republic be not in foreign conquests but in conquest of ourselves. The American has to be regained for America and American ideals. The University must resolutely prepare for the work. Too much time has already been lost.—Abram S. Isaacs in *The Forum*.

Whatever university may have been in the mind of the writer of the above paragraph, his words ring singularly pertinent in their application to our situation. We thank him for the sentiment, and for its concise and yet comprehensive statement. If time has been lost, let us now redeem the time. Let us build and endow the American University which shall meet the high requirements of the writer whom we quote above.

What Rich Men's Money Has Done for the Development of Education.

What has made possible the tremendous strides of our higher institutions in recent years? Johns Hopkins, founded as late as 1876 by the munificence of one man, was the first university in this country that really deserved the name. Twenty-five years ago it was thought necessary to go abroad to finish one's education. In theological circles there is still some movement toward Germany. But it is true today, as it never was in the past, that one does not have to cross the Atlantic for a university training. The vast sums given to our schools by private individuals have made this possible. European institutions that reckon their age by centuries have been made to rub their eyes in the face of the results achieved by the University of Chicago, for example, in a brief quarter of a century, and this also through the generosity of one man. Let the students who everywhere enjoy advantages like these give credit where it is due. The genius of a Harper, backed by the gifts of a Rockefeller, made the University of Chicago to develop as under a magician's wand. In Mr. Rockefeller's endowment of the General Educational Board we have one of the wisest and most far-reaching methods ever conceived of aiding deserving schools. Nor must we forget the history of Leland Stanford, Jr., University, Mr. Archbold's helpfulness to Syracuse, Dr. Pearsons' almost countless benefactions to smaller colleges throughout the West and South, the indirect influence of Mr. Carnegie's pension fund, Mrs. Russell Sage and a host of other contributors, large and small.—*Wealth and Education*.

PRESIDENT ROOSEVELT SINGING LUTHER'S HYMN

PRESIDENT ROOSEVELT AND BISHOP CRANSTON

President Roosevelt and Bishop Cranston

The two pictures which appear on our front page are of more than usual interest. Many of our readers will desire to preserve them as souvenirs of an interesting day and experience. The pictures are faithful reproductions of two kodak snapshots made on the grounds of the American University by Rev. John T. Brabner Smith of Sauk Center, Minnesota. This well-known member of the Northern Minnesota Conference is a brilliant journalist whose graceful pen is pressed into service by many of the leading newspapers and journals. While representing the press on the occasion of the memorable visit of the General Conference of Baltimore to the grounds of the American University, Mr. Smith secured an exceptionally favorable location for his work. From this point of vantage he was enabled to capture two truly remarkable pictures. One negative shows President Roosevelt being escorted to the speakers' stand by Bishop Cranston. The second film is a picturesque one indeed. It shows

the President singing Luther's hymn in company with the German Methodists.

Those who were present will recall the abounding, almost boyish enthusiasm with which President Roosevelt greeted the proposition of the German visitors to sing for him in the German tongue this his favorite hymn. They also will recall the contagious fervor with which the President finally leaped to his feet and with full voice joined heartily in the singing. This is the moment that the photograph records.

Copies of these pictures have been sent to Col. Roosevelt and to Bishop Cranston. These gentlemen undoubtedly join with us in grateful thanks to Rev. J. T. Brabner Smith for his thoughtful kindness.

\$10,000 Cash Gift

Ten thousand dollars in cash has just been paid over to the trustees of the University by one of the trustees. For obvious reasons the name of this trust-

tee, temporarily, is withheld. We must state, however, as a mark of our gratitude and sincere appreciation of this gift, that the giver is one who in the past has been a munificent helper to the enterprise. No one has stood by the University more sturdily or is recording more determinedly his intention that the work shall be pushed to a glorious culmination. Knowing as he does that resources already in hand assure the ultimate success of the undertaking, this resourceful and strong man, whose whole life has been a radiant path of conquest over difficulties, is set upon a quick coming of the Kingdom in the work at Washington. He wishes and prays for others to join him in giving in self-sacrifice that the American University may be enabled to undertake its appointed task. With such leadership success is inevitable. With such vision of responsibility the institution cannot fail to measure up to its largest opportunities. With such never failing readiness to provide the actual money by which vision may be worked out into actuality, let every friend of the American University rejoice, for here is example of Christian stewardship that shall not fail of divine commendation or of earthly increase.

Such American patriotism is larger even than the thought of America. It takes hold on the future. It has the stars in its ken. This is a Christian land. It is a Protestant people who have fought out their liberties and will let no man take their crown. By just such gifts as this—mark how beside the Potomac, rising above the National Capitol, a new, potent, noble Christian School of learning is coming to flower.

The American University Reaches \$500,000 Endowment

New assets of \$10,000 have just been added to the resources of the American University. One of these assets is a cash gift of \$10,000 from one of the trustees. This gift, which is for endowment, lifts the total endowment of the University, both productive and non-productive, to the encouraging figure of \$500,492, of which the productive portion is \$227,267, and the non-productive \$273,225. This is in addition to the University plant and all other resources. Special interest, moreover, attaches to this assistance at this time, since the givers of this last help are perfecting plans for yet larger giving. When announced, these plans will encourage and inspire all who are zealous for the opening of the American University.

Dr. Pearsons to Give All on His Next Birthday

Determined to die with the least possible amount of funds on hand, Dr. K. Pearsons, of Chicago, who is more than ninety years old and afflicted with rheumatism, has planned to sell his home and enter a sanatorium to spend the rest of his days. He has given \$6,000,000 to twenty-nine small colleges.

On his next birthday, Dr. Pearsons plans to make his last bequests to his colleges, which will be the last of his fortune. He will then rest content in the sanatorium waiting for the end.

"A man is his own best executor," said Dr. Pearsons this evening, "and I intend to be mine. I will sell my home and use the money to pay my debts."

Dr. Pearsons always speaks of his conditional pledges as his "debts."

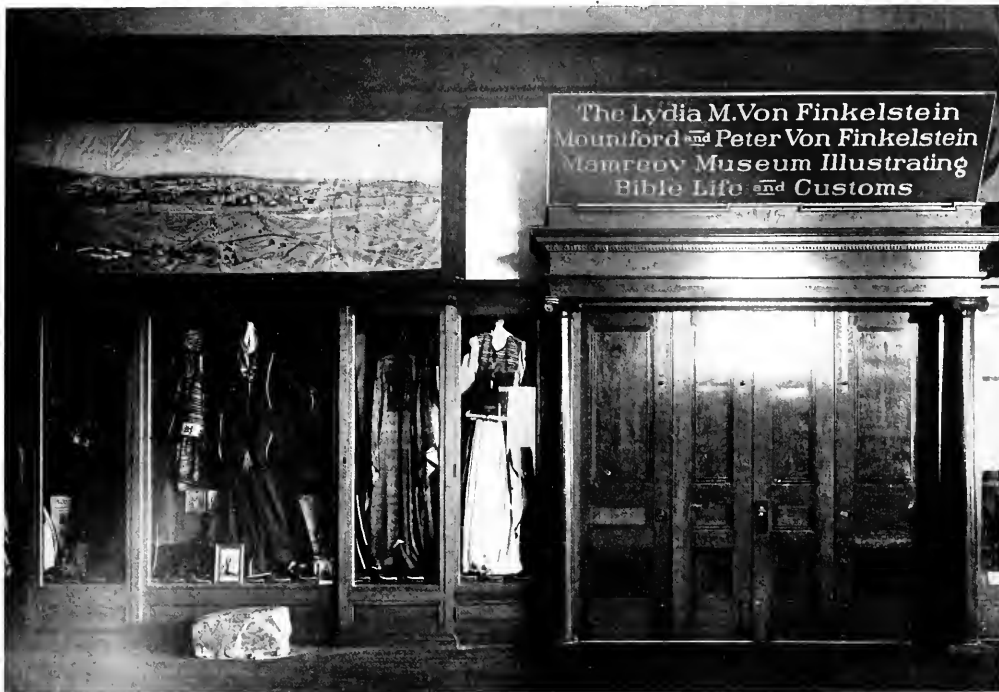

"I will make no more presents until my next birthday," he said. "Then I will dispose of everything."

All is in readiness at the Pearsons home for a new tenant. Thomas, the Pearsons' butler and general factotum, has been packing things for several weeks.

"As soon as the house is sold I shall go to the sanatorium," said he, "and prepare for the final distribution. For twenty-four years I have lived in the old mansion here. Twenty-one of the years I have been giving. I have given something like \$6,000,000 to twenty-nine colleges and institutions in twenty-four States. My debts, yes, that is what I call them. You see, I have promised Berea College \$100,000 if \$400,000 additional is raised.

"That is one debt I must meet. Then there are other conditional debts that I must meet. You know, I investigate every college or institution I aid, and as I am getting pretty well along in years I think I would rather get rid of everything right away.

"When my house is sold and the debts met I shall have been my own executor and shall have closed the estate entirely. There will be no disputes after I am gone. That is what I want to be sure of."

We have here a life suggestion and example that cannot fail to strike the imagination and the heart. What a picture! Here is one man at least who has caught the vision that with its glory filled the souls of the fishermen of Galilee. The Gospel idea of poverty is not a renouncement but a taking possession. Set free from material preoccupation the life has room for the vision eternal.

Madame Mountford and Her Palestinian Museum

In the last number of the *COURIER* was reported the illness of Madame Lydia M. von Finkelstein Mountford. Her many friends will rejoice with us to learn that she has so far recovered her health that she has been lecturing again to crowded houses on her very interesting and popular themes, vividly illustrating the ancient forms and customs of the Hebrews. Of late she has been in the South, going as far as Florida, where people thronged to listen to her descriptions of Oriental life and her interpretation of the Bible.

She has found time in her busy life and wide travels to put into book form much of the substance of her lectures. It is entitled, "Jesus Christ in His Homeland." This volume of 138 pages will be a valued

souvenir to thousands who have heard her speak and will serve to remind them of her piquant and picturesque discourses, so enlivening and instructive as expositions of the Scriptures. We hope it will have the wide circulation which it merits.

We present on the third and seventh pages of this issue two pictures showing certain cases and articles in the Mountford-Mamreov Museum, located in the College of History. The one on the third page is a section in the northwest corner devoted to the rich and variegated apparel of representative women of Bible times and lands, such as Sarah and Ruth. It also shows at the top a birds-eye view of the city of Jerusalem from Mount Olivet, and at the bottom is seen the historic block of Maryland granite taken from the foundation walls of Cokesbury College at Abingdon, Md., which some day is expected to rest in the walls of one of the buildings of the American University. The other, on page seven, shows the rich and costly seamless garment, such as Jesus wore during His public ministry. Its figures in gold thread are symbolic of great truths, while the hem, woven in as an integral part of the robe, is indicative of the fact that the wearer was a healer. Visitors to the museum are enthusiastic in their outspoken admiration of its richness and beauty.

Rev. J. F. St. Clair, D. D., Takes the Field for the American University

Rev. J. F. St. Clair, D. D., is one of the most successful workers in financing the kingdom which the Methodist Church possesses. We halt the press of the COURIER long enough to announce that Dr. St. Clair has joined the staff of the American University and is perfecting plans for an aggressive campaign in our behalf. The next COURIER will contain a full statement of this most interesting news with information concerning Dr. St. Clair and his past achievements and victories. All friends of the cause will rejoice at this reinforcement.

Form of Will for the American University, Washington, D. C. If a Legacy or Bequest—

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land—

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate—

I give, devise, and bequeath all the residue and remainder of my estate, real and personal, including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect, to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names their place of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have herewith subscribed our names as witnesses."

Annuity Plan of the American University

We offer a plain business proposition which provides for a life support for self, wife, children or dependents, giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, may do so, and receive in return an annuity bond legally executed and yielding a lifelong income at fair per cent, payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Two New Helpers for Our Work

It is with great pleasure that we announce two new helpers who will assist us in the field. One is a highly esteemed member of the Wisconsin Conference who has been long interested in higher education, Rev. Joseph Luccock, a brother of Rev. Dr. Naphtali Luccock. The other is a young layman, Mr. John Holland, son of Hon. Joseph Holland, so long and honorably identified with the highest and best interests of the State of Delaware. Mr. John Holland has removed his home to Sacramento, California. There he has an important position of trust which will give him wide influence and acquaintance.

Both of these friends of our cause believe profoundly in the high destiny of the American University. They both are men of persuasive personality and convincing powers upon the platform. They will be heard gladly, wherever they present our cause, and for them to be heard will create an ever widening circle of friends for our undertaking.

They will accept invitations to make addresses in the interest of the American University, and we earnestly bespeak for them the most cordial cooperation in any thing that they may undertake to bring the interests and work of the American University to the attention and hearts of all patriots and lovers of Christian education.

Dr. David H. Ela's Library to be Given to the American University

The daughters of Dr. David H. Ela have decided to donate to the American University the library of their father. Dr. Ela was one of the leaders of the New England Conference. He had held foremost appointments, was a trustee of many societies and institutions, was a presiding elder, and had served as the superintendent of the Boston City Missionary Society. The Methodist Hymnal now contains his hymn on the Transfiguration, "The Chosen Three, on Mountain Height."

It is fitting that the books of such a workman should become the pabulum for other workmen like himself after he is gone.

We thank the Misses Ela for this generous and gracious gift. We assure them that the gift is appreciated and that the books of their father shall be cared for and protected and soon, let us hope, put to good and helpful use.

Rev. J. F. Allen's Flag-staff and Flag for the University

Since our last issue we have investigated the cost of securing for the American University such a flag-pole and national ensign as is suggested by Rev. James F. Allen, of Winthrop, Mass. The superintendent of our grounds and buildings, Mr. J. B. Hammond, has made a careful investigation of the matter. He has secured estimates for such a flag-pole and flag as would be in keeping with the buildings and grounds, and the same herewith are appended. We trust sincerely that this spontaneous and patriotic interest in such an appropriate undertaking as Mr. Allen has suggested may come speedily to fruition. His idea is that the Epworth Leagues of New England shall join in making this contribution to the cause. He gladly will hear from any Epworth League Chapter or any leaguer who will lend a hand in the enterprise.

The cost of the flag-pole, eighty feet high, with cross-trees at the middle, with gold ball at the top, with halvards, painted with three coats and set in cement, will be \$250. The size of the flag, suited to that height, will be 12 x 25 feet and the cost of the flag \$27. The total expense will be \$277.

\$9,400 More for Massachusetts Avenue

Among the appropriations for the District of Columbia made by the Sixty-first Congress was an item of \$9,400 for Massachusetts avenue extended. This money provides for the grading and macadamizing of that short portion of the avenue lying immediately

west of Wisconsin avenue, for the acquisition of which condemnatory proceedings were necessary. This legal procedure is now in an advanced stage, and the new appropriation, now available, will complete the direct approach from the heart of the city along this magnificent thoroughfare to the site of the American University. The detour previously made by way of Wisconsin avenue, Woodley road and Idaho avenue is thus eliminated and the time consumed in a trip to the University correspondingly shortened.

Bishop Hamilton Lectureship

The Bishop Hamilton lectureship idea is taking fire. From all over the country come assurances of help. Laymen and preachers alike express interest. Help for this undertaking, in the shape of actual money, daily is coming into the office. As it comes in the money is deposited in the American Security and Trust Company, of Washington. When the amount thus deposited reaches a sum of \$1,000 the money is withdrawn from the bank and invested in a permanent 5 per cent security.

We are glad to announce that Bishop Hamilton has received pledges and money and definite assurance of further help to the aggregate amount of about \$20,000. And still the fund is growing.

We hope soon to publish some of the letters received from some of these helpers. When this is done everyone will be astonished to learn who some of these givers are and to know the feelings that they express.

In the meantime all who give money toward this Bishop Hamilton Lectureship Fund will find the amount of their gift set down in the column of the fund as a receipt for the same. All who contribute \$1 and more will receive the COURIER free until further notice.

The Philadelphia Conference

The Philadelphia Conference is among the foremost of all the conferences in its interest in the American University. Chancellor Hamilton visited the conference in the interest of the University. The generous and genial host of the conference, Dr. Linn Bowman, pastor of Park Avenue Church, Philadelphia, could not have been more kind or considerate. Every comfort was provided for the entertainment of the University's representative, and the most distinguished consideration for him was shown in the adjustments of the conference program.

Saturday evening Chancellor Hamilton made an educational address setting forth the plans and purposes of the University. Sunday morning he was assigned to preach at the First Church, Germantown, where the University has many friends. Not the least among these is the pastor of the church, Rev. Charles Wesley Burns, whose pastorate in this great church is being attended with such brilliant success. In the afternoon another service had been arranged in another church. Here Chancellor Hamilton was accompa-

nied by Endowment Secretary F. M. Stone. Both spoke.

In the evening, at the conference church, to an audience which had crowded the church to the doors, Chancellor Hamilton preached to the conference. An after service was conducted by that ever faithful friend of the American University, Rev. Charles M. Boswell. In inimitable manner this master of assemblies closed a wonderful day.

On the morrow, although Chancellor Hamilton had made plans for addressing the conference further, he was called to Washington. His place was taken by Dr. Stone, who on Tuesday morning made a most effective address. The secular papers reported this address generously and widely. New evidence was afforded that the newspapers are watching the work being done in behalf of the American University. The public press is the barometer of public feeling. It seldom mistakes in its choice of matter which is reckoned upon as "interesting." The Philadelphia incident is another straw showing that the interest in the American University is widening and deepening.

We desire to record our gratitude to the press, to the conference, to our host, and to the many friends beloved but unnamed whom we salute in the city of brotherly love.

New York East Conference Lends a Sympathetic Ear

Chancellor Hamilton, here let it be told, approached the hour of his visitation to the New York East Conference with trepidation. It was his first appearance at this assembly of the Areopagites of Methodism. True, among them was a beloved brother and others who had been personal friends from childhood. Friends of the American University, moreover, always have been legion in this conference. But it is no small task for one humble mortal to be assigned to make the educational anniversary address, to give the conference lecture, and on Sunday morning to preach just across the street from the presiding bishop. When to this is added a severe cold thrown in as a royal bounty and contracted from sleeping in a draft after the above Herculean labors, one can imagine why Chancellor Hamilton felt compelled to "abide in quietness a bit" after the New York East Conference. But here and now let it be said that even conservative New York believes in the American University. Nowhere are vital facts concerning the welfare and progress of the American University received any more eagerly than in the New York East Conference. Its best men are our friends. Its prophet-souls see the light shining for us. Everywhere were heard sentiments of hope and sympathy and the prayers for abounding and increasing success to come to the American University.

The Newark Conference

The Newark Conference numbers many friends of the American University. The recent session of the

conference demonstrated the fact that even its own heavy local burden of interest in connection with Pennington Seminary does not dampen its ardor of sympathy for the work at Washington. Never during any conference visitation has Chancellor Hamilton been received more graciously than at Newark. He had been invited to make the address at the conference anniversary, for the conference claimants, a great anniversary always in the sessions of the Newark Conference. The night was most inclement, but a good congregation was present. The presiding officer of the evening was Dr. John A. Gutteridge, president of the conference society for the funds of the superannuated preachers. To the pleasure of every one Dr. Gutteridge so far had recovered his health that he seemed quite like himself as he made the opening address. It was a great satisfaction to his friends that the veteran worker in this fund still was to be counted upon in forwarding its interests.

On the morrow the conference, in a very full session, listened interestedly to the presentation of the cause of the University. At the close of the address Bishop Warren, as always, manifested again his abiding faith in the enterprise, and led the conference in song. The University lecture eagerly was received and many expressions of good will for the work were given by leading members of the body. The representative of the University work only regretted that other conference engagements prevented a longer stay with these hospitable hosts.

Connecticut, Too, Hears Something About Our Work

The New England Southern Conference, at South Manchester, Conn., was crowded. Sometimes one wonders whether there ever is a conference which is not crowded. But this conference certainly had interests that kept the visiting itinerants within their appointed spheres of usefulness. The sifting committee nobly held them to their tasks, and that right briefly. More than one epigram and apt and luminous "story" had to remain in cold storage. And why not? We all received all that we deserved, some of us more than we merited. For the representative of the American University, who, at this conference, was Chancellor Hamilton, had been assigned the address at the educational anniversary. The other speakers for the evening were Rev. Samuel Irwin, principal of East Greenwich Seminary, and his friend and collaborator, the earnest young professor of English in the seminary. Both of these speakers made brilliant and effective addresses. The address which followed was heard patiently and sympathetically. At the close of the evening many friends greeted the University's representative and made inquiries and expressed sentiments that could not fail to encourage any friend of the cause. At this conference it was a pleasure to find two trustees of the American University—Bishop Cranston, who presided, and Bishop Mallalien, who made a captivating and enthusiastic address to the conference.

THE SEAMLESS GARMENT—MOUNTFORD-MAMREOV MUSEUM

The American University

The builders of this university are plodding forward their weary, though thoroughly hopeful and expectant way. Bishop Hamilton has been harnessed into the enterprise which is prophetic of success. The bishops appointed a committee consisting of Bishops Cranston, Neely and Quayle to consider thoroughly the situation at this institution and in addition to reporting their "clear conviction of the dignity and necessity of the American University," they resolved that:

"In the present hopeful outlook we earnestly commend the cause of the American University to the attention and support of the entire Methodist Episcopal Church, and to the Christian people generally throughout the United States of America.

"The needed financial support should be given imme-

diately to this Christian University at the Capital of the country.

"It is our judgment that the work of the American University should be started at an early date."

It is a distinct reflection upon our innate power as a denomination that we should allow this flower of our educational system to come so slowly to its completion. Why is it? Have we not the capacity for producing it? The Romanists have. They have a whole family of colleges in Washington. They appreciate what it means. Their young University sustained a loss of between \$300,000 to \$400,000 from malappropriation—not to say embezzlement. But did the young institution stop? It simply tightened the cinch a little and went straight ahead. When we inspected that plant some months ago we could but reflect upon the way the leaders of that church do a thing when they start to do it; and how.

when we start to do some things we spend a whole generation simply starting, and then marking time.

In the case of the Methodist Episcopal Church, this institution which means so much to the future, which offers a dome above the pillars of all our other institutions, should have the heavy support of our rich men and the small support, aggregating large totals, of everybody marching behind our banners. It would be easy by one concerted act of benevolence to start that Methodist University at the head and heart of the Republic within one year. We do think the trustees ought to lead off, but whether they do or do not, the name and the usefulness of the Church demand action before some other body steps in, takes our place and appropriates our crown.—*Central Christian Advocate*.

Again Dr. Claudius Spencer lends his magic pen to our cause. The name of this master-editor is blessed in this office. We read every word he writes—it is worth while.

Yes, They are Outstripping Us—Let Protestants Take Note

We recently received a note of alarm from one of our readers in the East, who feared that Roman Catholics would soon capture our National Capital. She inclosed clippings from local papers to substantiate her fears, particularly with reference to the development of their great Catholic University at Washington as contrasted to our own institution. To one confining his observation to the circle of Washington there is a likelihood of just such depression of feeling, not that the Roman Catholics are so active (for such despondency would hardly savor of the spirit of Christ), but that Methodism is so backward.—*Western Christian Advocate*.

The above note is not without power to provoke thought. With the whole vast hierarchy of Roman Catholicism, not only in this country, but also in the Eternal City itself, pushing the Catholic University at Washington to success, why should not this work prosper? "According to your faith be it unto you!"

But look you, all that read, think ye that this is the end of the matter? Is not this very success of this enterprise of Rome at our National Capital so full of significance to the whole country that Protestant loyalty must be awakened to new endeavors? The hidden-deeps in the heart of this people are being stirred. And while ardent souls, zealous for the quick coming of the Kingdom, may lament the halting steps of the chosen Protagonist of Protestantism in Christian education at the Capital, none the less that Protagonist is pushing on into the arena. Her armor steadily is being welded to greater strength and brightness. Her weapons of light are being put in added numbers into the quiver. Wallet and purse are being filled. Helpers are coming in increasing confidence to her banner. Protestantism at Washington shall not be overshadowed or shouldered aside or overwhelmed. *Deus lux mea* is not for Rome alone. Another walks confident of God's help. Protestantism is not destined to fail at our National center. And the American University each day now is stronger for the task to which Protestantism calls her—*Pro Deo et Patria!*

"Blow Ye the Trumpet, Blow"

It would be a good thing if every Methodist preacher in the whole world would announce that old hymn next Sunday morning.—*Central Christian Advocate*.

Those who read this number of the COURIER may think that we have heeded the above advice in our own columns. Well, we do feel that way, for the

years of bondage in the American University are drawing to an end and there is coming the year of Jubilee. As we have been making the annual scrutiny of our resources and financial affairs we rejoice at the steady strengthening of the institution. To all our workers and friends, therefore, we recommend the *Central's* slogan, "Blow Ye the Trumpet, Blow."

This is in the Neighborhood of the American University

The largest realty deal in recent years, involving more than 212 acres of the city's most valuable unimproved real estate, and representing an expenditure of more than \$2,000,000, was closed yesterday, when the Massachusetts Avenue Heights Company formally took possession of a large tract of ground on Massachusetts avenue extended. The property practically surrounds the Naval Observatory circle. Deeds were placed on record transferring the property to the syndicate. It will be opened as a subdivision about April 1. The tract will be the largest subdivision ever placed on the Washington real estate market.

The property immediately will undergo the most extensive improvements known in the history of the city. More than \$800,000 is to be expended for this purpose. Highways are to divide the section into a subdivision that will be unequalled in location and general treatment in America.

It is the purpose of the syndicate to have erected on Massachusetts Avenue Heights, by which name the property will be designated, a little city of fashionable residences.

Immediately after the deeds of transfer were placed on record yesterday a small army of workmen was rushed to the property, and the actual work of making the necessary improvements was commenced. The men behind the project say \$800,000 easily can be expended in converting the wilderness into the "magical city" they are planning.

Roughly speaking, the property is bounded by Massachusetts avenue, Woodley lane, Cathedral and Wisconsin avenues, and Rock Creek. The entire tract embraced within these limits is in the possession of the syndicate, with the exception of the United States Naval Observatory circle.

One of the most extensive advertising campaigns ever undertaken by subdivision operators is to be started as soon as the property is formally placed on the market. It is the intention of the syndicate to interest a high class of buyers.

It is expected Massachusetts avenue will be further extended to its present western terminus to the District line within a few months.—*Washington Post*.

Getting Together

The Methodist Episcopal Church, South, has decided to put several hundred thousand dollars into a cathedral at our Nation's Capital. If there is any place where the essential unity of Methodism should be emphasized, it is at Washington. Why cannot American Methodism unitedly build such a church?—*Western Christian Advocate*.

We not only second this motion of Dr. Levi Gilbert, the brainy and big-hearted editor of the *Western*, but congratulate him on having made the wisest and most far-reaching suggestion that we have heard or read in a long time. The Methodist Episcopal Church could easily raise a million, and we could raise a half a million of dollars with which we could build a church that would be really worthy of American Methodism. That would bless our nation and world for a thousand years. An up-to-date church with the best facilities for Sunday school and lecture work with two of the ablest preachers to be found in the North and South for copastors.—*St. Louis Christian Advocate*.

Then let all Methodism, North, East, South and West, strike hands to build and endow the American University. This would be unity, indeed. This would mean something equally worthy of all concerned. But it is coming. The whole country is beginning to see that the American University offers the opportunity for a truly American Union.

REV. JOHN F. ST. CLAIR, D.D.

MRS. DELIA SPENCER ROOT.

Gift Extraordinary to the American University

Productive property inventoried at \$200,000 and which the most conservative authorities estimate as at present worth \$150,000 has been turned over to the American University. This property is of such character and the circumstances surrounding its location so clearly promise a constantly enhancing value that it is no exaggeration to hold to the gift as worth to the University its full inventoried value of \$200,000.

The name of the donor we are constrained from giving. Such modesty is as rare as it is beautiful. Not to be spoken of by men or to be heralded from the housetops, but to do good and to have the inward consciousness of it—this is the spirit in which this benefactor has made this offering. For such a gift made in such a way, there is afforded us no adequate means of expressing our appreciation and that of the multitude of our friends.

But this benefaction holds vast meaning for the American University. Never did help come more opportunely. Never was a gift more freighted with results for the future. Slowly but surely the wide vision of the years is being realized. Wisdom is being justified of her children.

In the "Fairy Queen," in the catalogue of the

virtues, the poet cites, as the supreme and culminating virtue, that of magnificence. It is the supreme virtue of life to "see large," to behold the end from the beginning and to mark the glory possible in what to others is commonplace. This gift to the American University possesses the supreme virtue of magnificence.

The giver has "seen large," has caught the vision, has marked the glory that such an offering holds in helping to fruition a God-ordained cause.

This gift lifts the assets of this Christian school of learning at the National Capital to over \$3,000,000. But it does more. As with a magician's wand, it evokes above the portal of this university the Angel of the Larger Hope. In the hands of Sandolphon, we are told, the prayers of the faithful become heavenly flowers. Here gold from a faithful giver's hand shall be transmitted into learning, culture, piety, idealism—into all that makes for the good of humanity and for the uplifting of the race to the starry platform of the Kingdom of Heaven.

Appreciatively, gratefully we announce this gift. With no extravagance we say that it is with reverence that we felicitate the giver upon having had the magnificence of spirit and of opportunity to do that which future generations will not forget, but shall write down as in virtue supreme.

\$2,000 Set Aside for the Use of the University

A noble act upon the part of one of the annuitants of the University must be recorded as worthy of praise and gratitude. This friend of our cause, the widow of a gifted and deeply beloved minister of the Methodist Episcopal Church, has been receiving an annuity on \$2,000 which her husband and she together earlier had placed in the University. Now that the husband has left her this devoted servant of the church, in further sacrifice, as a touching memorial to her companion's memory, voluntarily resigns the income from the annuity in order thereby to help strengthen the resources of the American University. Do we need to state how grateful we are for this generous act? It is so rare and delicate in its spirit of helpfulness that we only can express our gratitude for this help by setting it down here in this crude way. May the friend whose gentle heart dictated so beautiful an act of assistance live long to see the happy fruition of her desires for us.

The \$3,000,000 Mark Passed

Recent gifts to the American University have been lifting steadily the mark of our resources. We have been investigating our actual and prospective holdings. We rejoice to record that now our books show to our credit the amount as \$3,025,893.17.

If some one asks "Why, with all that money in hand, do you not open your doors and go to work?" We answer: "This is not all money. Far indeed, is it from being all productive endowment. And it is productive endowment that we *must have* before we venture safely to inaugurate academic work."

So we are pressing on in our search for money. We are seeking endowment. To this we are giving every energy and thought. But what an inspiration and help it is to know that the years of effort have not failed to bring their increase. Let every friend of Christian education rejoice at the encouraging outlook. Step by step we are hewing out a path of destiny and along that path there never is any back step.

Recent Gifts of Money-

General Endowment Fund

\$150,000, from an unnamed friend.

Asbury Fund.

\$10.00, F. G. Mitchell.

Bishop Hamilton Lectureship Fund.

\$100, Bishop A. W. Wilson; \$25.00, W. A. Leitch; \$10.00, George P. Jones; \$4.00, J. M. Gordon; \$1.00, W. A. Parkinson.

General Fund.

\$100 (each), Thomas Bennett, Zenas Crane, Hon. W. Murray Crane; \$50 (each), Mrs. J. Frank Robinson, A. R. Baxter; \$25, Mrs. John W. Henderson, Wm. C. Arrison; \$17.50, A. L. Wiley; \$10 (each), C. E. Legg, Jefferson Justice, U. O. Colson, Mrs. Sarah L. Clark; \$7.00, R. S. Asay and

wife; \$5.00 (each), Charles Reuter, E. A. Gardner, R. A. Karr; \$1.00 (each), Myrta A. Fairfield, A. H. Classen.

Bishop Hamilton Lectureship Fund Steadily Growing

It encourages us greatly to see the interest that continues to be manifested in the fund which Bishop Hamilton is raising as a part of the endowment which shall afford a working capital for the institution. His plan of taking any sum as part payment for a subscription which shall run through several years, keeps the office pleasantly busy in recording gifts and acknowledging receipts.

One thing, however, we desire to call to the attention of our friends—that is, our method of acknowledging the receipt of small sums of money as they come in. All sums under \$5 as they arrive are recorded at once on our books. The receipt for the same is made in the column set aside for this purpose in the succeeding issue of the "Courier." There every cent which has been received as a gift during the past three months is set down carefully to the credit of the giver. Any one who has sent money therefore will find the receipt for the same acknowledged in this column. The larger sums always in addition receive a special individual receipt sent through the mail.

We urge an instant and generous response to Bishop Hamilton's appeal for funds. This money is invested and sacredly safe-guarded and can be used for no purpose save that of affording by its interest a means of carrying on teaching. Where could you put money so securely to good and immortal use?

John F. St. Clair, D. D., Financial Secretary

With a large fund of experience, with a wide field of acquaintance and with a firm faith in our cause, a new helper has come to the American University. Rev. John F. St. Clair, D. D., has joined hands with us to build and endow this institution. Through several successful pastorates in Indiana Conference, including Carlisle, and New Albany, and more in the Des Moines Conference, such as Malvern, Menlo, Perry, Creston, Clarinda, Atlantic, Guthrie Center and Ames, all in Iowa, he came to see his duty in the special field of financing philanthropic enterprises. For six years, from 1900 to 1906, his labors were given with large results to the establishment of the Iowa Methodist Hospital at Des Moines. He then devoted three fruitful years to the interests of Bethany Hospital, Kansas City, Kansas. His most recent work has been for the Epworth University, at Oklahoma City. Our friends will be glad to see his face as reproduced on the first page of this number of THE COURIER. His work, as a representative of the American University, will bring into requisition his varied powers and capacities already developed in his human contacts and in his service for the Master and King. We bespeak for him the most hearty welcome and cooperation on the part of the friends of the higher Christian education.

MR. WILLIAM THOMPSON.

Mrs. Delia Spencer Root

Among the benefactors of the American University stands the name of Delia Spencer Root, widow of Francis H. Root, of Buffalo, N. Y. On the front page we present her picture as rightfully belonging in the gallery of our helpers. By the terms of her will the University in 1897 came into possession of \$23,750, after \$1,250 had been taken from her bequest as an inheritance tax. Her hand was a liberal one during her life time and her benefactions are still bearing precious fruit. She rejoiced and cooperated in the large contributions to philanthropic and educational causes made by her husband during his long and useful life. Our friends will remember her name and be glad to see this pictorial reminder of her character and beneficence.

Mr. William Thompson

On the third page of this issue our readers will find the face of Mr. William Thompson, a successful business man of this city and one of the early givers to the American University. Of his gift THE COURIER of December, 1892, made mention in the following terms:

A Pleasing Announcement

Among the events of the recent past is one of which all our friends will be glad to hear. On October 20th Mr.

William Thompson, an honored citizen of Washington, who has a suburban residence at Sligo, Montgomery County, Maryland, accompanied by his wife, made a pleasant morning call upon Bishop Hurst, and at the close put into the hand of the Bishop his check for twenty-five thousand dollars for the American University. This liberal and graceful act will make the donor one of the chief benefactors of the University, both because of the magnitude of the contribution and because of its early bestowment. Such a gift should inspire others from various sources. It will hasten the day when the institution, as yet invisible to the natural eye, shall assume form and take to itself "a local habitation" as well as "a name," on the beautiful and commanding site already secured in the northwest part of our city by the generosity of the people of Washington.

A Princely Dedication of Means

Productive property inventoried at \$200,000 and which conservative authorities estimate as at present worth \$150,000 with constantly enhancing value, has been turned over to the American University at Washington, D. C. This great gift is of special significance at this time from the fact that it is an offering made to the General Endowment Fund of the University and has no conditions attached. The name of the donor is withheld.

Several other large subscriptions recently have been made to the Opening Fund of the institution. When these shall have been paid and added to the funds already invested the secure and cumulative financial strength of the University will be such as to justify undertaking work in accordance with the plans of the founders.

This last munificent contribution with its ready income marks another notable advance for the University at Washington. By such princely dedication of means the modest giver challenges the interest and money of all friends of the cause. The challenge will be accepted. Signs multiply that this good deed is stirring up other hearts to deeds of helpfulness in behalf of the American University.

What the Press is Saying

Bishop Hamilton, one of the trustees of the American University at Washington, tells me that institution has just received \$200,000 toward a further endowment. This makes \$325,000 received during the last few months. The General Conference of the M. E. church has authorized the opening of the university when an endowment of \$5,000,000 has been secured. These last amounts increase the aggregate to between \$3,000,000 and \$4,000,000. The American University has 100 acres of land facing on Massachusetts Avenue, in the city limits. Two marble structures, the History and Administration Buildings, are already completed and a will which has just been allowed, contains a bequest of \$50,000, which is to be used for the erection of another building.—*Public Press.*

The above taken from a great daily journal indicates interest in our enterprise for which, needless to say, we are grateful. We would have no objection if other journals would copy.

The May Meeting of the Trustees

The semi-annual meeting of the Trustees of the American University was held in the office of the University, on Wednesday, May 17. The members of the Board present were: Dr. David H. Carroll, president; Dr. Charles W. Baldwin, secretary; Mr. Charles C. Glover, treasurer; Bishop Earl Cranston, Bishop Alphaeus W. Wilson, vice-chancellor; Dr. Franklin Hamilton, chancellor; Mrs. J. Frank Robinson, Mrs. John F. Keator, Dr. Thomas N. Boyle, Dr. J. G. Bickerton, Dr. W. L. Davidson, Dr. W. R. Wedderspoon, Mr. A. B. Browne and Mr. Thomas W. Smith. The reports of the chancellor, the treasurer and the endowment secretary indicated a very prosperous half year ended, with prospects of increasing growth both of sentiment and of funds. Mr. W. S. Pilling, of Philadelphia, and Dr. J. C. Nicholson, of Baltimore, were elected trustees. Upon adjournment,

a party of trustees, officers and friends, filling three automobiles, visited the University site and examined with much delight the Palestinian collection now installed in the College of History. Madame Mountford, who happened to be in the city, served as guide and cicerone for the company.

Doctor Carroll Honored

The president of our Board of Trustees, David H. Carroll, D. D., has recently been elected to the presidency of the Consolidated Duck Company, whose offices are in the Continental Trust Building in Baltimore. This is the latest in a long series of practical tributes to the business ability and moral integrity of Dr. Carroll, who has won by his energy and acumen a foremost place in the commercial and industrial life of the country. It augurs well for our national future that men of his type are not merely allied with, but are component and active factors in the educational and philanthropic movements of our day. Our congratulations are sent both to the new president and to the company.

Thomas N. Boyle

Another worker is crowned. A comrade's place in the militant ranks of truth and righteousness is vacant. Suddenly on June 14th, from his home in Crafton, Pennsylvania, Dr. Thomas N. Boyle was called to his eternal home. He was a helping hand for the unfortunate, for the toiler, and for the worker in every good cause. His mind was crystal clear and ever open to fact and truth. His heart beat true to the interest of humanity and the evangel of God. He wrought out his own sterling character in the school of early discipline and bought his wisdom with the price of experience and struggle. He gave ten years of faithful service to the American University as a member of the Board of Trustees. He gave thought and time and effort to this cause in which he believed with all his heart. In the councils of the church he will be missed, but his works will follow him. His going calls for those who survive to put into their lives more earnest endeavors to promote the end for which he gave his energy and his zeal.

Madame Mountford's New Book.

Thousands of our Washington people recall with great pleasure the lectures of Madame Mountford in the halls and churches of our city. Three of her lectures, The Nativity of Christ, The Childhood of Jesus and The Manhood and Ministry of Jesus, have been published in a neat duodecimo of 138 pages, entitled "Jesus Christ in His Homeland." A few copies of this charming volume have been left at the office of the University where they can be had by sending or bringing the dollar of purchase money. The lectures are stenographic reports and sparkle with the vitality and glow of their author.—EDITOR.

Washington an Ever Richer Center for Research

The recent gift of \$10,000,000 by Mr. Carnegie as an increase in the endowment of the Carnegie Institution at Washington is another asset in the educational resources of the Capital. This new gift, which lifts the endowment of the Carnegie Institution to a total of \$25,000,000, is added evidence of Mr. Carnegie's faith in Washington as a unique center for research work.

Mr. Carnegie's report of the work which his Institution has been doing during the past year, moreover, is a singularly strong confirmation that he chose wisely when he selected Washington as the proper place for such a foundation. The same is true concerning his latest gift in behalf of world-peace. The national city is drawing to herself such crowns of human endeavor as properly befit her imperial character.

A New View of Massachusetts Avenue.

On page seven of this number of the *Courier* will be found a cut made from a recent photograph of Massachusetts Avenue extended. Our readers are invited to compare this picture with the two published in the *Courier* of October, 1908—especially with the one on the front page of that issue which was taken from nearly the same point as the present one. This spot, where the camera stood, is on the bank just east of the cut through which Idaho Avenue runs northward to Woodley Road. The curved line of macadam in the foreground shows where the present detour from Massachusetts Avenue begins by way of Idaho Avenue, Woodley Road and Wisconsin Avenue, back to Massachusetts again. This intervening section will soon be opened and graded—the appropriation therefor already having been made. The picture presents the avenue stretching away to the northwest across the Foundry Branch fill and through the forty-foot cut just beyond to Nebraska Avenue, where it at present terminates in front of the University site. On the sky line may be seen the dome and a part of the roof of the McKinley Memorial College of Government, and on either side of it "Westover," the home and windmill tower of our Treasurer, Mr. Charles C. Glover. The College of History, which is still nearer Massachusetts Avenue, is hidden by the dense foliage.

Our Biblical Museum

By Madame Lydia Mamreoff Von F. Mountford

The Bible abounds with figures from nature and from the every-day life of the people in the Holy Land, their dress, ornaments and domestic utensils, which, when understood, furnish the key to unlock invaluable treasure. In order to understand the prophetic language of the Bible it is necessary to have an acquaintance with the Scriptures in general.

Figures were originally used, not for ornament, but to explain the sacred truths, and we need them for

the same purpose still, for we have no way of understanding what is difficult, but by the application of what is familiar.

A knowledge of the symbolical language of the Bible is of great importance in order to our understanding and profiting by what we read.

The costumes and garments were used as figures to represent truths. Our Lord in His parables took similitudes from natural things to represent spiritual things. The design of the figure used is not to inform concerning these, but some important truth.

In order that we might have some weak conception of the glory of heaven, we read of "Crowns of Glory," "Wedding Garments," Spun Gold Garments, "White Robes," and a thousand other images which serve to show us a little of the glorious substance which God has laid up for those that love and fear Him.

Into the web of the present-day Holy Land embroideries and weavings is still woven all that is fundamental in our romances, our legends, our folk lore and our religious life. Hence, the object of the Biblical Museum is to assist the Bible student to a more vivid conception of the scenes in which he loves to meditate, and to excite in his mind a more lifelike idea of realities which are apt to be unreal to him; also to bring the events of Bible history as vividly to view as if they were actually transpiring before him. Parables and passages of Scripture will have a new meaning, when the object which has been used as a figure is actually seen in the glass cases ticketed and explained in the catalogue with Scripture reference, and its history and esoteric meaning. For instance, we desire information regarding cloaks, mantles and outer garments so often mentioned in the Bible. All we have to do is to visit the Museum and examine one of the large glass cases, and here we see beautifully arranged a variety of these garments. Though we see that all the garments are similar in form, yet we find they are all different in texture and color, which distinguishes the social position of the wearer, and we then learn that outer garments were not mentioned accidentally in Scripture, but each has its symbolical meaning. We see a mantle such as Elijah cast upon Elisha which ever afterwards denoted him to be a disciple of the prophet, and then another mantle attracts our attention, and we learn that it is the mantle of the prophet showing us that Elisha now becomes a successor of the prophet as well as a disciple. I Kings 19:19; II Kings 2:8 to 15, "They said the spirit of Elijah doth rest on Elisha."

Another outer garment shows us that it has a seam running across the width having an upper and lower breadth of the cloth sewed together and we learn that the lower width is called "the skirt of the garment," I Samuel 24:4. We can understand why David cut off the "skirt of the garment" of Saul when he was asleep in the cave, and learn that such an action on the part of David meant that Saul would lose the support of the common people and they would be cut away from him as he, David, cut off the skirt of the garment. This royal garment is richly woven with gold and is gorgeous in color, yet it is not "a seamless garment," but can be divided into two sections. How-

ever, without the lower skirt of the garment, the upper portion has no dignity. This robe is used often as a covering in sleep. "Thou shalt not take the outer garment in pledge, for it is his covering by night."

We read that our Lord wore a "garment without seam" which had a "hem" or border. Such a garment without seam denotes that the wearer is a public preacher and teacher. When it has a "hem" or border it denotes that he is a physician and healer, a most holy man. For this reason we read that the woman "touched the hem of His garment" because she wanted to be healed. Such a garment is very rare, unique and expensive, hence the reason the Roman soldiers "cast lots for it." How did He come to wear such an expensive garment seeing He was supposedly poor? "The women ministered unto Him."

Today the women in Palestine weave a garment whole and without seam and present it to the holy man they are ministering unto it he combines the characteristics of preacher, teacher, physician and healer.

If these women have no independent substance of their own, they will sell or pawn their jewels and ornaments and buy fine silk thread and spun gold tissue, and weave a garment indicative of the rank, position and genealogy of the wearer and present it to the man. Each woman rich or poor takes part in the weaving thereof, whether her contribution be great or small; it is the ministry that counts.

These remarks cover only a small part of the hundreds of things to be seen, and thus better understood. We shall endeavor in future numbers to give the readers of THE COURIER an insight into this Biblical treasure house. As a museum the collection will be viewed by all sorts and conditions of people. It is well adapted to arrest the attention of both Jew and Gentile, for it transports one back to the very time of the life of the patriarchs and prophets and also to Jesus Christ. The scenes and facts of the Bible will be brought nearer to the human feelings, and certainly will awaken afresh all the admiring wonder at the mysterious messages contained in its pages.

The influence of the Museum cannot be otherwise than good, adapted as it is to invest with a most attractive charm to young and old, believer or unbeliever, the history of the life in Bible Lands, and no one who visits the Biblical Museum of the American University can go away without a more intimate knowledge of the Old and New Testament histories and without receiving lasting impressions of their reality.

The Roosevelt-Cranston Photograph Taken by Rev. Fred H. Morgan

The photograph which appeared on the front page of the "Courier" in our last issue showing ex-President Roosevelt being escorted to the speakers' stand on our grounds by Bishop Cranston, was credited to Rev. J. T. Brabner Smith of Sauk Center, Minn. This was a mistake made by us, and Mr. Smith in no way is to blame for the accident. He had warned us that there was some doubt as to the exact "makership" of some of his kodak snap-shots, and spoke of these two which he sent us as in the doubtful class. Assuming

that this was only modestly upon his part we failed to record the doubt.

Now it appears that this particular photograph was taken by Rev. Fred. H. Morgan, who was representing the *Zion's Herald* at the reception to President Roosevelt. Mr. Morgan gave the picture to Mr. Smith in return for others and thus two "brilliant journalists" instead of one appear in the history of this now famous picture.

Of one thing, however, we are assured and that is that this picture is no "copy" or "fake." With Rev. Fred. Morgan behind the kodak the thing generally comes out right, just as this explanation has concerning the question as to who was the maker of the photograph.

We thank both friends for the help that has been given us by this interesting kodak film. It allows us to call attention again to the highly interesting snap-shot; and when a President of the United States comes to open the American University for all ages we will send for Rev. Fred. H. Morgan, representing *Zion's Herald*.

Visiting the Spring Conferences

Fred M. Stone, D. D.

The round of the recent conferences assigned the writer was made with much pleasure. The ministers composing these bodies are a royal set of men. What a pleasure this is to be identified in the Kingdom of God with such noble company! At Washington, D. C., we found the historic Baltimore Conference in session. Bishop Anderson, a prince of graciousness and good will, presided and kept matters well in hand. At the Educational Anniversary the time was divided between Dr. Ezra S. Tipple, representing the Board of Education, and the writer speaking for the University.

At Wilmington, Delaware, Bishop Neely administered the affairs of the conference in his masterful way as an authority of Methodist law and parliamentary government. He promptly and graciously opened the way for the American University's cause and the brethren accorded the speaker undivided attention. This conference as a body has a keen interest in the University development. Many words of encouragement were spoken to the writer, and the laymen in their association meeting cordially gave an opportunity to lay before them some facts of much interest and value.

At the Philadelphia Conference, Chancellor Hamilton, who was to have spoken to the business session, was called away and at his request we tried to fill his place. A hard thing, this, to do, but the ministers gave sympathetic attention and increased interest followed the presentation. Bishop Smith manifested a happily cordial spirit in all his relations to the conference and spoke helpfully of our work. The University is finding many supporters among the ministers of the Philadelphia Conference.

This was the writer's first visit to the New York Conference. The sessions were held in Calvary Church—Rev. Charles L. Goodell, D. D., pastor. Bishop Smith, kind, judicial, pleasantly firm and alert, gave the conference an illustration of Episcopal presi-

MASSACHUSETTS AVENUE LOOKING NORTHWEST FROM IDAHO AVENUE.

dency highly gratifying to all concerned. He gave a splendid opportunity to present the development of the University. The writer tried hard to lay such facts before the conference relating to the progress of our work as he deemed might inform the brethren of the status and outlook of the institution. The response to his statements and appeal was gratifying and highly encouraging. The American University is steadily winning its way into the hearts of this constituency of the Church.

The next and last conference attended was the North Indiana. This is one of the few spring conferences of the middle west. While standing alone as a spring session in its geographical relation to adjoining conferences, it is one of the larger bodies in the connection—its full members and probationers numbering over 66,000; in benevolences it ranks about nineteenth in the conferences of the world. Bishop Hughes presided and was particularly courteous in opening the way to discuss the University situation. The institution has a warm place in the hearts of this group of consecrated and energetic preachers. The Committee on Education made an excellent report and highly commended the University and its workers.

It is a great satisfaction to note the growth of interest and the willingness of the ministers to cooperate in the work of promoting this important project. The Endowment Secretary returns to the

task of raising funds with an increased zeal and determination to succeed. With \$125,000 more of interest producing endowment the doors will be open for work. My reader, will you help us to do this? Lend a hand and we will soon reach the goal.

A Flag at the American University

Rev. James F. Allen

It was my privilege to be present when the General Conference of 1908 assisted in the dedicatory exercises at the American University—the educational representative of our church at the capital of our country. The only flag in sight was a very small one used as a part of the decorations. Some time later I remarked to Chancellor Hamilton that it would be an assistance in raising funds for the University if a suitable flag pole was erected on the grounds, and the flag kept flying as an inspiration and a pledge of loyalty, and suggested that it would form a helpful bond of union between the University and our young people if the Epworth Leagues of New England should present the entire flag outfit. In the current March number of the *University Courier*, the subject is alluded to, as follows:

REV. J. F. ALLEN'S FLAG-STAFF AND FLAG FOR THE UNIVERSITY

Since our last issue we have investigated the cost of securing for the American University such a flag pole and national ensign as is suggested by Rev. James F. Allen of Windthrop Mass. The superintendent of our grounds and buildings, Mr. J. B. Hammond, has made a careful investigation of the matter. He has secured estimates for such a flag pole and flag as would be in keeping with the buildings and grounds, and the same herewith are appended. We trust sincerely that this spontaneous and patriotic interest in such an appropriate

undertaking as Mr. Allen has suggested may come speedily to fruition. His idea is that the Epworth Leagues of New England shall join in making this contribution to the cause. He gladly will hear from any Epworth League Chapter or any Leaguer who will lend a hand in the enterprise.

The cost of the flag pole, eighty feet high, with cross trees at the middle, with pulley ball at the top, with halyards, painted with three coats of paint in cement, will be \$250. The size of the flag, suited to that height, will be 12x25 feet, and the cost of the flag itself. The total expense will be \$277.

As Chancellor Judson is holding me responsible for the materialization of my suggestion, and I find after consulting with some of the leaders in our Epworth Leagues an enthusiastic endorsement of the idea, and a desire to provide the funds at once, I shall be pleased to receive, receipt for, and publish in *Zion's Herald*, lists of contributions from individuals and Epworth Leagues for this purpose. It may not be unfitting that the Epworth League of Winthrop, Mass., makes the first contribution, having given \$10 15 *Jefferson St., Winthrop, Mass.—Zion's Herald.*

This beautiful and generous exhibition of Christian patriotism and loyalty upon the part of Rev. James F. Allen is characteristic of the man. It is just like him to feel and to take part in such causes as this for which he appeals.

Surely such interest and leadership will work an enthusiastic following. We believe that this proposition will commend itself in such measure that the money quickly will be raised. Help him. Send him money generously. Mr. Allen never yet has failed in anything which he has undertaken and he is not going to fail now.

Modern Thought and Traditional Faith

In writing upon Modern Thought and Traditional Faith, Dr. George P. Mains has given us a book worthy of wide reading. The task that he sets himself is no easy labor. He seeks to bring into intelligent harmony of reason and understanding two positions of belief that have seemed to be antagonistic. By searching at the root of things, Dr. Mains finds a broad deep basis of common agreement and sympathy. His work, therefore, is irenic. It is constructive and it is well done.

The study in origins shows a wide and thorough knowledge of the field and a sympathetic appreciation of the difficulties that have rendered an unprejudiced view of such matters so hard to attain. Whoever studies this book will be led to know that, after all is said and done, there is a common accord of belief and faith deep down, unstirred by storm or wrack, unruffled by the superficial clashing of waves that soon sweep on to be lost and forgotten on some farther shore.

The young preacher and teacher especially is urged to read and to own this book. It will serve to hold varying minds true to the fundamentals, as Norman Lead used to say. Dr. Mains is to be commended ardently for the spirit in which he writes and for the frankness and fearlessness of his purpose.

Can Not This Apply to the American University?

I am not ready to agree with President Judson that the Church or the State cannot establish, direct, and maintain a university. The universities of Germany are State institutions, and as much so as the University of Michigan or of Missouri. The university of Freiburg is as much Roman

Catholic as is Northwestern Methodist, *Lehrfreiheit* and *Lernfreiheit* (freedom of instruction and freedom of investigation) are possible in church institutions when the instructors are devout Christians, but, of course, they would be impossible where the instructors are agnostics. Lord Kelvin, the eminent English scientist, would have felt no restraint in a Christian university, but Huxley would have raised a fearful cry against the narrowness of Christianity. The freedom depends altogether on who is doing the teaching and the investigating. When the faculties of Church colleges and Church universities are made up of Christians, then there can be no trouble about *Lehrfreiheit* and *Lernfreiheit*. The trouble is with the agnostic or the heartless freeloaner, who wants license for his intellectual and educational anarchy. Freedom to think, freedom to investigate rightly, honestly, devoutly will never find any restraint in genuine Christianity. It is doubtful if the Church has ever endeavored in this country to abridge academic freedom.

The question really is not, Can the Church establish and maintain universities? but, Will the Church accept and maintain the highest ideal of a university in its course of study?

When the Church declares that it will establish and maintain a university, it means that its purpose is to maintain an institution of higher learning with the four departments of Philosophy, Law, Medicine, and Theology. Very few of the Church universities publish in their catalogues or announcements the courses of study which are strictly for university students. Real universities, Church or otherwise, should draw the line in their course of study as distinctly between what is college and what is university as between what is college and what is preparatory. They should provide libraries (general and department), laboratories, museums, and all necessary facilities for all manner of scientific, classical, archaeological, psychological, and philosophical investigations. These will require large expenditures of money. The Church must eventually decide upon what kind of investments for education it will be able to secure the largest dividends.—John M. Moore, Ph. D., in the *Christian Advocate*.

Self-Reliant Washington.

Although Washington's greatest asset consists in the fact that it is the capital of the country, yet it has ceased in recent years to be entirely dependent upon its official population or to be as strongly affected as formerly by the ebb and flow fluctuation of political life. Washington as the capital and Washington as a city of homes may now be clearly differentiated. Of course, it never could have been the city that it is if it had not been, first of all, the capital; but assuming that the seat of national government should be changed tomorrow, the abandoned city could not be deprived of attractions that would always make it an exceptional place of residence.

Washington is growing more and more beautiful as the years go by, and more and more metropolitan and self-reliant. It has long since abandoned the idea that because it enjoyed some special advantages which enabled it to lead other large cities in some respects, it could afford to be behind them in some others. It has been of late years providing for its visitors those accommodations which they find elsewhere, and without which outward attractions lose much of their charm. Thus, Washington has now its magnificent and ably managed hotels, and is expecting soon to have more of them. Rebuilding of the Arlington alone is expected to cost in the neighborhood of \$6,000,000. The city has one of the largest and finest railway stations in the world. It is going to erect in the near future some great modern business blocks. It will soon spend \$2,000,000 upon the reclamation of the Anacostia flats. Between \$6,000,000 and \$7,000,000 will be spent upon parks and boulevards in the next five years. The government itself is about to begin the erection of public buildings to cost about \$8,000,000. Altogether, something like \$20,000,000 will be expended soon in the further improvement and beautification of the city.

It is a very different Washington from what it was fifty years ago this month. What it will be fifty years hence is a matter that must be left to conjecture, but it promises to be one of the finest cities in the world.—*Christian Science Monitor*.

HART ALMERRIN MASSEY.

Hart Almerrin Massey

On the roll of those who gave early proof of their faith in the American University, the name of Hart Almerrin Massey, of Toronto, Canada, stands among the first. His broad-minded benevolence during his busy life time poured itself out on various fields of philanthropy, both within and beyond the borders of his own loved country. While crossing the Atlantic, he became interested in the enterprise through conversations with a fellow passenger, until then a stranger, John Fletcher Hurst, to whom the vision and duty of the founding of the institution had come. This interest took the form of a noble bequest of \$500,000, which is to be used for a building to embody the mutual good will of the Dominion of Canada and the United States and their unity of purpose to promote Christian education. On the first page of this number of THE COURIER our readers will find the fine face of Mr. Massey. At this time, Toronto is in the eye of the religious world by reason of the assemblage there of the Fourth Ecumenical Methodist Conference. Like their father, the children of Mr. Massey occupy a large place in the philanthropic activities of the city of Toronto, of Canadian Methodism and of world-wide charity.

DR. JOHN W. HANCHER.

Dr. John W. Hancher Becomes Identified with the American University

Dr. John W. Hancher, who for seven years was President of the Iowa Wesleyan University, has become associated with the American University. He is to devote himself more particularly to assisting Bishop Hamilton in the work of raising a specific endowment fund by means of which the University can be put into active operation.

Dr. Hancher is a man of great executive ability and is an expert in matters of university finance. When Ohio Wesleyan University was closing up its great campaign of raising \$500,000, Dr. Hancher was secured to assist in the undertaking. The success in this Forward Movement Fund for Ohio Wesleyan owed much to Dr. Hancher. The friends of the American University may congratulate themselves that this strong man, henceforth, is to be a worker for our cause.

Dr. Hancher achieved a notable success in his Presidency of Iowa Wesleyan University. Sickness alone occasioned his detachment from that institution, to the regret of all. The three years subsequent were spent in Mexico in pursuit of health and in labors connected with important financial operations.

Now in perfect health and with yet richer experience in financing great undertakings, this aggressive workman takes up the banner of the American University. Needless to say, more surely than ever, now the device upon that banner will be *Evangelior*. Heartily and with high anticipations for his ever increasing usefulness and success, we commend this wise counsellor and experienced leader to all to whom he may come in the name of the American University. In another column we print a letter from President Welch to Dr. Hancher which will interest the reader.

Dr. Hancher is a native of Ohio, in which State he taught in the public schools for several years. He received the degree of Bachelor of Science from the Dakota School of Mines in 1888; that of Master of Arts from Mount Union College in 1890; that of Master of Science from his alma mater in 1891; that of Doctor of Systematic Theology from Mount Union College in 1895, and that of Doctor of Laws from Simpson College in 1905. He served for one year as financial secretary, and for eight years as president of Black Hills College. Among his pastorates were Grand Avenue Church, Kansas City, Missouri, and First Church, Herkimer, New York. From this last named place he was called to the presidency of Iowa Wesleyan University at Mount Pleasant, Iowa. On the first page of *THE COURIER* will be found the face of Dr. Hancher.

Rock River Conference Busy But Interested

To visit the Rock River Conference is like visiting a General Conference. Never, perhaps, has the Conference been more busy than it was at this session when the preliminary work was done looking toward the great gathering at Minneapolis. Chancellor Hamilton represented the University at the Conference, and certainly he never witnessed such a crowded and hurried session. It baffles description. How any Conference, involved as this was in internal interests of the most vital importance to itself, could take time to listen to the presentation of causes, passed unheeded. But this Conference did and no conference could be asked to listen more interestedly.

The interest did not end there. After Bishop Hamilton had stated his own plans for the opening of the University the Conference at once made a generous offering to the work. After the collection, many preachers expressed a determination to present the cause of the American University to their churches. With President Harris, Chancellor Hamilton was invited also to represent before the Conference the interests of the general educational work of the church. Friends of influence in this Conference and in this section of the country are increasing. There is deepening a feeling that we all are vitally involved in what has been undertaken at Washington, and we now must see the enterprise through to highest success.

West Wisconsin Conference Lends a Helping Hand

Wisconsin has problems of her own. But these all were forgotten in the interest that was manifested in the American University. Chancellor Hamilton represented the cause and was received with utmost courtesy and sympathy. It was a joy to tell the story of the enterprise to such an intelligent body of men. It is within bounds to say that never, perhaps, has the cause had a more appreciative hearing. There was a great gathering, and seemingly not a dissenting note in the spirit of the moment. The speaker clearly had not earned the *plaudites* with which the members punctuated and closed the address. For the noble collection which the Conference made in behalf of the University showed that each in his own heart had a message which he yearned to give in behalf of the Protestantism of the land.

Bishop Hamilton stated his plans for the University and they met earnest approval. The endeavor toward a definite opening of the University heartened everyone. The laymen showed interest, for they invited the University's representative to address their association. Here again heartfelt interest was manifested and money was given.

Chancellor Hamilton had been appointed to represent the Board of Education at the regular anniversary of that society and a great and kindly audience greeted. Is there no limit to the friendly helpfulness of the Badger State? We opine—No. For which and for all kind acts of those who greeted the travel-worn wayfarer in the land of evergreens and living water, here is recorded appreciation and gratitude.

The time is therefore come, when a plan of universal education ought to be adopted in the United States.— Not only do the exigencies of public & private life demand it; but if it should ever be apprehended that prejudices would be entertained in one part of the Union against another; an efficacious remedy will be, to assemble the youth of every part under such circumstances, as will, by the freedom of intercourse & collision of sentiment, give to their minds the direction of truth, philanthropy, and mutual conciliation.—

FACSIMILE OF PART OF WASHINGTON'S LETTER TO GOVERNOR BROOKE.

The Wisconsin Conference—Believers in a National University

The Wisconsin Conference is made up of strong men. It has great interests of its own. Within its borders is Lawrence University and it feels a right sense of duty to its own. But Wisconsin men are broad-minded and they believe in a connexional church. Hence, never perhaps in his life has Chancellor Hamilton received a more brotherly or a more enthusiastic reception. Having visited this same conference only the year before he feared that his message might prove flat and unprofitable. If it was, the lenient hearers never gave evidence of it. In a most crowded and hurried session the Conference heard him, and in response to the statement of Bishop Hamilton, concerning the new plans for the University, the Conference took up an offering. The size of this offering, by its exhibition of positive sacrifice on the part of the givers, astonished the University representative and the Bishop. Surely this work in some occult and mysterious way has gripped the consciousness of the church. The church not only desires that this enterprise shall go, but it is bound that it *shall* go.

An earnest invitation was given Chancellor Hamilton

to address the Laymen's Association. Needless to say, the invitation was accepted, and a noble company of laymen and elect women held up the hands of the speaker, and then put their own hands deep down into their pockets for the American University.

An hour had been set apart for the University representative among the Conference anniversaries. Appreciating this opportunity the speaker made an address on "Consecrated Culture—A Message of Methodism."

Sunday evening a great congregation gathered to attend the joint anniversaries of the Freedmen's Aid Society and the Board of Education. Here Chancellor Hamilton represented the Board of Education. Thus on every hand hospitality, kindness, appreciation, opportunity greeted the representative of the American University. We thank all members of the Conference for this; would that we could call each by name. Our gracious hostess was a Mayflower descendant, and the Indian name of the town signified a place sweet to travelers. Certainly the memory of Antigo, Wisconsin, will not fade from one heart that there found friends, solace and encouragement.

Willard Francis Mallaliue

Another unresting workman has gone from the earthly to the heavenly kingdom. Bishop Mallaliue's round of labors included a pervasive and persuasive evangelism, a fruitful use of the pen and the press, a practical helpfulness to Christian education and institutions, and a courageous leadership in aggressive reforms. His relief from the more exacting toils of travel and supervision in his episcopal office seemed to act as a stimulus to the more energetic employment of his time and strength in the more distinctively spiritual and advisory functions of his high station. His sympathy with the suffering and oppressed linked him as a brother to a multitude, especially to our brothers in black. He served as a member of our board of trustees for thirteen years. One of the latest formed and announced purposes of his life was the establishment in the American University of a Professorship of International Peace. What more suit-

able memorial could be erected to preserve the name of this brave soldier of the cross and ardent friend of man than the Mallaliue Professorship of Universal Peace?

Dr. Hancher's First Impressions

DEAR CHANCELLOR HAMILTON:

My circuit of fall conferences included North Montana, Montana, Iowa (my own), Central Illinois, Michigan, Nebraska, Des Moines, Northwest Iowa, and Detroit. Besides these, I was permitted to look in upon the Chicago German, Upper Iowa, and East Ohio. Everywhere I was graciously received and cordially welcomed. Bishops were uniformly courteous, considerate, and obliging. Ministers were generally favorable to American University. Laymen everywhere expressed interest, appreciation, approval, and confidence.

Accustomed as I am, and long have been, to presenting the cause of education from the viewpoint of the small college, I anticipated difficulty in adapting myself to the wider range and larger view. I had believed in the American University as a possibility at its inception. I had even hailed with gladness the first announcement of its earliest dream. I had watched its progress as an enterprise through all the formulating years and had lost no opportunity to advocate or defend it. But to stand in the presence of leaders of the church, an authorized official representative and advocate of this proposed university, challenged my courage. However, I soon learned that the herald of our ambition, looking to first place among the world's institutions of universal learning at the Capital of the American Republic under the auspices of Methodism, sounds a note, attuned to responsive chords, in a multitude of Methodist hearts. Besides, not a few Protestants other than Methodists expressed keen interest and deep concern.

My many personal interviews with laymen and ministers of our own and other denominations well qualified and favorably positioned to measure the thought of the present and forecast the need of the future, left me under full persuasion that the time is ripe for laying the American University on the thought and heart of American dissenting Protestantism and particularly of our own denomination. Our educators, and especially our college executives are catching the vision of good fortune and opportunity. In their new-caught vision three things stand out prominent and promising: First, the nation's vast treasures of educational equipment at Washington City, aggregating in value more millions of money than any or all of our small colleges or, for that matter, larger ones also, have been able to accumulate, at the free service and command of the American University students. Second, the lofty significance and value to our smaller denominational institutions of the natural and easy promotion of their students from their baccalaureate rank or graduation to an institution of universal learning, of sympathetic atmosphere, of superior equipment, unparalleled environment, and first rank. Third, the exceptional opportunity of graduate pursuit amid the

leadership of soldiers, statesmen, patriots, citizens, such as naturally congregate under the genius of the world's first republic and one of the world's first powers, at our National Capital.

Thoughtful folks recognize in this undertaking no mean or easy task, but thoughtful folks such as I have interviewed in these weeks likewise recognize in this undertaking a Methodist duty which many of them think should become a Protestant privilege.

The consensus of opinion and uniformity of good will again challenge my courage and make me bold to believe that under God this great task shall become a great victory in the fullness of time.

JOHN W. HANCHER,
Counsellor.

Mt. Pleasant, Iowa,
October 6, 1911.

The American University

Christian Advocate (New York) Editorial

This institution has had a stormy youth. It was adopted by the General Conference of 1892. A magnificent estate in the District of Columbia was purchased for its site, which at that time seemed far from the center of Washington, but the distance between the central point of the estate and that of Washington has diminished and will constantly diminish in an increasing ratio. Much money has been given to it and buildings have been erected.

The prolonged sickness and the death of Bishop Hurst, who loved the institution as David loved Jonathan, was, in some respects, a detriment to the progress of the enterprise.

Since his demise various sums have been given, quite large in the aggregate, and those who have been in charge have done what they could. Dr. Franklin Hamilton, who became Chancellor in 1908, has exhibited much energy, as well as an intelligent conception of the needs of the institution and the right methods of supplying them.

The trustees have recently authorized a financial plan which comprehends the raising of a million and a half of dollars, whereof \$500,000 when raised shall be used for the immediate opening of the University to students.

Several important cash gifts and subscriptions have been made to the opening fund. Within the last few weeks property estimated as being at the present time worth \$150,000, with constantly enhancing value, has been turned over to the American University. It is not an offering for anything special, but a bestowment to the general endowment fund of the University, and has no conditions attached. The name of the giver is withheld.

Occasionally, because the institution has not been developed as rapidly as was wished, intimations have been thrown out, in some cases by interested parties, that it would be well to relinquish the enterprise and dispose of the property in some other way. This, however, would be a very difficult and even a dangerous project. Large sums given for a specific purpose cannot honestly be used for any other purpose without the consent of the donor.

We have always supposed that the Methodist Episcopal Church could—without material injury to existing educational institutions—carry the American University to a successful completion.

The objection that there are other universities in Washington is not of such weight, with reference to the location of another institution at the capital of the country, as it would be in the case of a city of the same size elsewhere.

The Roman Catholic Church has chosen Washington as the place for its chief University and that city thus becomes the headquarters of its educational propaganda in the Western world. It is renowned throughout the world for felicitous selections for churches, convents and schools.

While an organized war against that great body would simply entrench the institution, a University worthy the name, under the auspices of American Methodism, would be a demonstration of its vitality and virility.

To the end that the Church should be universally and perpetually interested in the institution, it is necessary that its finances and property should be laid before the next General Conference, and also that the opening for students should neither be precipitated nor too long postponed.

The Christian Advocate has published several editorials upon the subject and in some instances they have been the incentive of gifts. This is the only educational institution for which the General Conference specifically appeals for help.

TO SUM UP, AMERICAN METHODISM OWNS THE AMERICAN UNIVERSITY.

It should make strenuous and continuous efforts to put the institution in readiness to fulfill its mission.

Friends in Maine

Wet or dry in the State of Maine, the King's banner never touched the ground. It was during the fight over who should rule the moral outlook of the Pine Tree State that Chancellor Hamilton was afforded the privilege of visiting the battlefield which even then was focusing the attention of the nation. He went about preaching, lecturing, making addresses and representing the American University. Not a little opportunity was afforded to stir up interest in the enterprise.

If there is a man in Maine, knowing anything about the American University, who is not interested in the cause, we have yet to find him.

The State of Maine produces pine trees and men—also women. The women of this State join the men in a faith not only in Prohibition but also in Protestantism. And some of them have the vision of what is needed for Protestantism at the National Capital. Out of this vision much shall come. The visit to Maine was one of the most pleasant experiences of recent years. New friends for the work were found and a deeper interest and faith in the university undertaking were shown than ever before. This nation is a unit. Its interests are one. Maine and Washington are linked forever by golden chains of a patriotic love for God and Country.

Washington's Last Will

The last will and testament of George Washington is to be presented in a Senate document and will come from the Government press soon. Just before the last session of Congress closed, Senator Heyburn, of Idaho, discovered an authentic copy of the will in a second-hand book store in Washington. So much interested was the Idaho senator that he purchased the copy and then obtained the permission of the Senate to have the document published at Government expense. In none of the other writings of the first president of the country are his character, his firmness and his fairness better exemplified than in this same will and testament, which in the edition which is to be published by the Senate is quaintly entitled "The Last Will and Testament of George Washington, of Mount Vernon." The original will is kept at the Fairfax County Court House in Virginia, where it was originally filed by General Washington himself. The document is jealously guarded by F. D. Richardson, the clerk of the court. It is kept in a steel, fireproof safe, and when visitors come to the out-of-the-way court house the will is taken from its resting place and proudly exhibited. It has been bound in handsome leather binding and may be scanned easily by the visitors.

The will was written by General Washington himself, at Mount Vernon, July 9, 1799. It was presented for probate in the Fairfax County Court House, January 20, 1800, a little over six months after General Washington had completed writing the document. There are forty-two pages of manuscript in the will, including the actual will and notes made by General Washington for the better explanation of provisions of the will. At the bottom of each page Washington signed his name, by this means obviating the necessity of having the will witnessed. The first thought of the Father of his Country when he made his last will was that all of his debts should be paid, and after the first paragraph, in which he states his name and that he was "lately President of the United States," he says:

"All of my debts, of which there are but few, and none of any magnitude, are to be punctually and speedily paid."

Among the various items in the will there is one which provides for the establishment of a great national university at the seat of Government, the District of Columbia, and declared that he would leave the fifty shares in the Potomac River Company to aid in establishing that university. He says:

"That as it has always been a source of serious regret with me to see the youth of these United States sent to foreign countries for the purpose of education, often before their minds were formed or they had imbibed any adequate ideas of the happiness of their own, contracting too frequently, not only habits of dissipation and extravagance, but principles unfriendly to republican government and to the true and genuine liberties of mankind, which thereafter are rarely overcome.

"For these reasons it has been my ardent wish to see a plan devised on a liberal scale which would have a tendency to spread systematic ideas through all parts of this rising empire, thereby to do away local attachments and state prejudices as far as the nature of things would, or indeed, ought to admit, from our national councils.

"Looking anxiously forward to the accomplishment of so desirable an object as this (in my estimation) my mind has not been able to contemplate any plan more likely to effect the measure than the establishment of a university in a central part of the United States, to which the youth of fortune and talent from all parts thereof might be sent for the completion of their education in all the branches of polite literature, in arts and sciences—in acquiring knowledge in the principles of politics and good government—and (as a matter of infinite importance in my judgment) by associating with each other and forming friendships in juvenile years, be enabled to free themselves in a proper degree from those local prejudices and habitual jealousies which have just been mentioned and which, when carried to excess, are never failing sources of disquietude to the public mind, and pregnant of mischievous consequences to this country."

The American University is designed to carry out his wishes in regard to a great central university.

One of the priceless possessions of the American University is a manuscript letter in General Washington's own hand, in which he for the first time speaks of this favorite project. This document is a letter to Governor Brooke, of Virginia, written March 16, 1795, from Philadelphia. We present a facsimile of a portion of this immortal letter on the third page of this issue of THE COURIER.

The Central New York Conference

A year ago the Central New York Conference was visited in the interest of the American University and at that time the Conference made a very generous contribution to the University. It was a return to old friends to revisit this Conference. Many members expressed deep interest in the undertaking at Washington and offered to assist the work in every way.

The most distinguished consideration was shown Chancellor Hamilton. The Conference had made a strenuous effort to meet the requirements of the noble gift of Mr. George Maxwell of \$50,000 toward the Conference Claimants' Fund. Success had crowned their work and now they were holding a grand banquet and jubilee to celebrate the event. It was an hour of gladness. Bishop Wilson presided. Chancellor Hamilton had been invited to make the address. People were turned away from the door unable to enter the church. The Conference had occasion to celebrate and the occasion long will be remembered. Mr. Maxwell's father and mother were present with their honored son. The son's gift was to commemorate the long and consecrated labors of his parents as members of the itinerancy of that Conference. And could any gift be more fitting? It will stir up others.

The Brotherhoods of Chicago Show Interest in our Work

Coincident with Chancellor Hamilton's visit to Wisconsin and Illinois came an invitation to him to address the United Brotherhoods of the city of Chicago. The invitation fortunately could be accepted, and in the old First Church the meeting was held. The address necessarily had to do primarily with Brotherhood work. But the opportunity was there and it was utilized. Representative laymen from all the churches of the city were present, and it was indeed a splendid body of men. An occasion was afforded for personal interviews with many of the most influential laymen of the city.

Without an exception, those interviewed exhibited interest in the enterprise at Washington and expressed gratification at the growing encouragement in the work. We would have welcomed such an opportunity to tell the story of the enterprise to such strong men. But that will come later. We are grateful for the chance that was given to meet and to know these leading spirits of the Kingdom in the great metropolis of the Middle West. May the Brotherhood of Chicago flourish!

CHARLES SUMNER'S TABLE AND CHAIRS.

Charles Sumner's Table and Chairs

Among the interesting pieces of historic furniture already possessed by the American University are the table and six chairs once owned and used by the Honorable Charles Sumner, during his long senatorial career. His house still stands at the northwest corner of Vermont Avenue and H Street Northwest, now forming the annex to the Arlington Hotel. The building holds a special place in the history of the University from the fact that the chartered existence of the institution began within its walls on May 28, 1891, when its first Board of Trustees was organized. The seven pieces were secured by Bishop Hurst, and are now to be seen in the College of History. On page seven, our readers will see a reproduction of a fine photograph of these beautiful souvenirs of American history.

Conference Visitation

Fred M. Stone, Endowment Secretary

Conferences are always times of absorbing interest. Each has a distinct personality. All, however, follow the same general routine in reports and administration. The notable differences are largely in local issues and problems that vary with the section of the country, the size of the cities within the conference boundaries, and the characteristics of the majority of the people as influenced by their employments and educational ideals. Usually particular causes receive more attention than others because of the possible conditions cited above, but the Secretary never was accorded a more hearty welcome than that of this fall, in the round of conference visitation.

The Cincinnati Conference, held at Dayton, O., was

guided in its business in a wise and gracious way by Bishop David H. Moore, whose keen but kindly wit gave zest to the prompt transaction of the routine conference business. Bishop Moore kindly opened the way for the presentation of the University interests and the audience gave the speaker splendid attention and an enthusiastic hearing. The laymen extended a similar greeting and the secretary left the conference greatly encouraged "to press with vigor on" toward the goal of the opening day of the University.

Bishop Moore also presided at the Kentucky Conference. Our reception by him and the ministers was all that could be desired, and the University holds a warm place in their hearts.

The North Ohio Conference met at Mansfield, Bishop Frank M. Bristol in the chair. We entered the conference room at the devotional hour on Thursday of the session and heard the Bishop speak on "A choice of things material or things of God." It was good for the soul to be there. Alert, cordial, spiritually alive to the needs of the hour, Bishop Bristol directed the conference in a prompt and business-like manner. In the midst of pressing duties he paused, and gave the University its chance for representation. The ministers were the personification of sympathetic interest. At the evening hour a more extended opportunity was given to present this institution and its purpose.

Our next date was at the Erie Conference, Du Bois, Pa. Bishop Joseph F. Berry directed the workings of the conference in his own happy way, which inspired the confidence and approval of all present. At the proper time he introduced the speaker and his message. The University has many warm friends in this conference territory.

Monday we turned again westward to attend the Central Ohio Conference at Marion. Bishop Moore smiled cordially, as we thus met for the third time within a little over two weeks at different conferences. He gave the speaker a royal introduction. The brethren were alive to the interests of the University and its development, and many assurances were given of helpful cooperation in our work.

The members of the Detroit Conference assembled in annual session at Flint, Mich. This conference is large in membership and extent of territory. Unlike other conferences of the Middle West, it begins on the southern boundary in the midst of one of the best agricultural and industrial sections of the nation, and extends into the northern peninsula of Michigan. Its total length is over 600 miles, reaching far into the iron and copper ore fields and the lumber region. The ministerial and lay conferences gave the speaker a cordial hearing, and promised material support. Bishop William F. Anderson, as president of the conference, proved to be the right man in the right place. Thursday morning of the session he delivered a notable address on "Personal Fellowship with God," containing a blessed evangelistic note that deeply moved the conference. Such addresses will arouse the church to renewed zeal for the Kingdom of God. May we have many more like it.

President Welch Writes Concerning Dr. Hancher

OHIO WESLEYAN UNIVERSITY,
DELAWARE, OHIO.
OFFICE OF THE PRESIDENT.

April 19, 1911.

DR. J. W. HANCHER,
530 First Avenue, North,
Seattle, Wash.

MY DEAR DR. HANCHER:

While the pressure of Forward Movement work has not yet greatly relaxed, I must take a moment to write and express to you again my high appreciation of the help which you gave in the campaign. The total now on our list, and definitely in sight, will run over \$522,000, and we find, to our astonishment, that more than six thousand subscribers are represented. We are just getting the notices out this week, though quite a number have already commenced their payments.

Your coming to us in the middle of January was a providential help. It accomplished several very useful things:

- (1) Your arrival imparted new energy to the entire work. With your knowledge of methods, your enthusiasm, and your untiring energy you gave new impetus to the work of all those engaged.
- (2) You suggested what turned out to be a most valuable plan, namely, the appointment of the local committee to take charge of the Delaware canvass. The working of the Committee, as you know, brought the total up to about \$20,000.
- (3) You took practically entire charge of the so-called "gleaning" work among the churches, bringing the bishops, district superintendents, and pastors more definitely to the support of our campaign, securing a large number of representations in various churches and inspiring much personal work out in the field. While the direct result in money cannot be calculated, there is no question that in subscriptions and in the spread of the Movement, the benefits to the University were exceedingly great.
- (4) You conducted a vast amount of correspondence from

the office, furnished material for publication, and in other ways heartened and helped the home work; so that the total effect of the ten weeks which you gave us at the close of our campaign was, as I look at it, of the very highest value, both for immediate success and for permanent results. We are under great obligations to you and shall always remember it with appreciation.

With every good wish for your present work,

Heartily yours,

(Signed) HERBERT WELCH.

"Skool! To The Northland! Skool!"

The Norwegian-Danish Conference convened in Racine, Wisconsin, September 1st. The Conference is made up of sturdy, loyal men who have proved their worth under all sacrifices. When has the Scandinavian blood or stock ever failed in its allegiance to a cause where faith once has been plighted?

Again was this demonstrated at Racine. When the interests of the American University were called to the attention of the sons and daughters of the Norsemen who had gathered at Racine, the response of interest was spontaneous and instant. An eager desire to give another material encouragement to this enterprise was manifested on every hand.

A collection was taken and a surprisingly generous offering was found to have been made. Where do these self-sacrificing men and women get the money which they pour out so lavishly for every worthy cause? On the most meager salaries they manage to accomplish that which astonishes all who know them. The American University truly is their debtor. We only can record our heartfelt gratitude, and promise that every penny of this sacred money shall be guarded and used with the utmost care.

The doors of the American University will swing wide to welcome the sons and daughters of Norway and Denmark. "Skool! To the Northland! Skool!"

New Catholic Institution to be Erected in Washington

Catholic authorities in the United States have decided to erect in Washington a normal college for the higher education of Sisters who teach in Catholic schools. The project has been under consideration for several years. The plans are now fully outlined, and another great Catholic seat of learning will be added to the already large number of Catholic institutions in Washington.

The proposed normal college will be located in the neighborhood of the Catholic University and Trinity College, and in materials and architecture it will be in keeping. The building will be a fireproof structure, and is to be constructed with a view to the future and greater needs.

Cardinal Gibbons and the entire hierarchy of the United States approve the project, and are lending their influence to its success. The normal school, it is hoped, will be ready for formal opening next fall. A large enrollment, representing all the numerous teaching sisterhoods is expected.

The school's management will be similar to St. Anne's, at Munsterburg, Germany, which for ten years has steadily progressed under the direction of the bishops of Germany and Prussia, and is now held to be one of the principal elements in Catholic progress.

The Washington school will be under the special guidance of the Catholic University. Many of this institution's professors will be on the staff of the new institution.

No. 3

MAJOR GENERAL JOHN A. LOGAN

MARY A. LOGAN

General John A. Logan and Mrs. Mary A. Logan

In the long and lengthening list of our benefactors it is our privilege in this issue of the COURIER to present a series of illustrations which group themselves around the names of Major-General John A. Logan and his wife, Mary A. Logan. For many years in their beautiful Washington home, Calumet Place, Mrs. Logan preserved among the historic memorials of her famous husband his library of more than three thousand volumes. This collection of legal, military, scientific and literary material she has presented to the American University. It occupies two of a suite of rooms on the first floor of the College of History on the east side of the northern wing. Together with this valuable library Mrs. Logan has given a fine bust of the General, of heroic size, which has been placed on a pedestal in one of the same rooms. On the third page will be found a picture of this lifelike figure of John A. Logan, whose career in Illinois and later in the Civil War and in the United States Senate made his name familiar to the whole country. His memory will be green until the latest period of our nation because of his important initial relation to the original organization of the Grand Army of the Republic.

On the seventh page appears a picture of the north-west portion of our general library located in the central part of the College of History. Through the open door may be seen a small portion of the Logan collection in the adjoining room. By the side of this open door one may see the historic spade with which Bishop Hurst and others broke ground for the College of History. Here also stands a pike, a warlike weapon like those used by John Brown and his followers in the celebrated raid at Harper's Ferry. The alcoves at the right and left of the doorway contain books given by the late Dr. Lewis R. Dunn, of New Jersey, and the late Professor Alfred Higbie, of California.

Special privileges are given to those who wish to pursue prolonged studies in this incomparable library.

It is Free to Students

"I have just come from your wonderful Congressional Library," said Ernestus Gulick, of Dresden. "We have some wonderful libraries in Europe, but no such palaces for holding them. For one who loves books it is worth the trip to America to see both your Congressional and Carnegie libraries. We have a famous art gallery in Dresden with priceless pictures by the great masters, but alas! we cannot compete with your buildings."

Recent Gifts of Money

(Acknowledgment in this column of sums less than \$5.00 is to be regarded as a receipt therefor.)

"Here Comes Dear Anonymous Again"

The melancholy Cowper had a lady cousin who loved the poet dearly without his suspecting the gentle cousin's real sentiments. She was much in Cowper's home with him. Her affection found expression in gifts which constantly were laid before the poet but always came as the gifts of a friend whose name must not be given. Wholly charmed but equally bewildered by the constant succession of these anonymous offerings, Cowper finally was accustomed to exclaim to his demure cousin whenever a new present arrived, "Well, here comes dear Anonymous again!"

For some time past a dear Anonymous has been showering the American University with constantly recurring gifts of books. We suspect that it is Lady Anonymous from the delicacy of the method of giving as well as from the character of some of the volumes. The method has been for some one to appear in the office and then to disappear ere any one fully is aware of the gentle visitor's presence. Afterward there are found left behind packages of interesting, helpful and often really valuable books.

Several times before this we have noted these gifts.

Now again the benevolent visitor has come and gone, leaving us the richer. The last offering would have made the melancholy English poet forget all melancholy in lasting delight. Among the volumes as we have handled them lovingly and appreciatively we find a copy of that immortal Borrowian masterpiece "The Bible in Spain." There are old tomes redolent of Fletcher of Madeley, of Ben Franklin, Sterne,

Wesley, Wayland and similar imperial spirits. Some folios of old engravings are with the rest. One particular copy of the historic "Charm" with its graceful and colored prints is worthy of a shrine with him whose gatherings the continents only whisper about because of the United States customs. Accompanying these literary deposits, yet bringing a more delightful surprise than they, because concealed in cases resembling books, is a unique collection of hundreds of cameos of varying sizes, representing in purest white distinguished and historical persons and celebrated works of art. These are executed in finest style and form fascinating objects of study.

For all of which here and now we render grateful thanks. And, is it selfish? none the less we say it, because of the character of these treasures. "Dear Anonymous, kindly and graciously come again!"

Dr. S. Townsend Weaver Comes to the Help of the American University

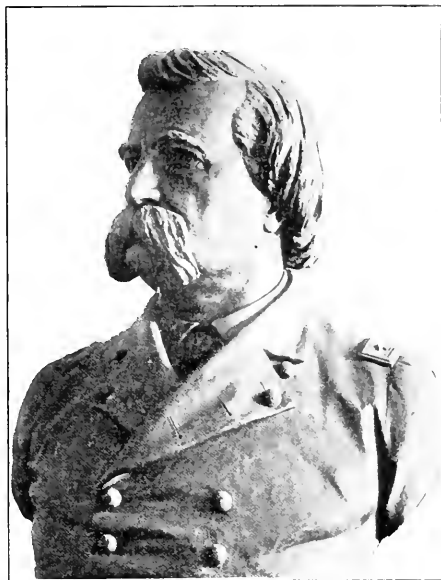

A kind Providence surely has taken under care the American University. Every day now seems to bring to our assistance some new friend. United they are forming a Tenth Legion which, we believe, will prove as irresistible as the famous Legio Decumana of the great Julius.

The latest helper who brings us hope and cheer is Rev. S. Townsend Weaver, D. D., of Pitman, New Jersey, who is inaugurating a far reaching and comprehensive plan by which the proceeds from the sale of his "Biblical Life of Christ" shall inure to the benefit of our work. Dr. St. Clair, who is a long-time friend and associate of Dr. Weaver, is to co-operate in this plan. Two such experienced and enthusiastic workers cannot fail to bring to pass great things through the undertaking which now is in process.

Those who as yet may not be familiar with Dr. Weaver's scholarly and luminous book will hear more of it anon. Suffice to say the specialists in the field which this work covers have given it their hearty indorsement. When Dr. Weaver and Dr. St. Clair have perfected their plans a full statement will be made in the COURIER. Meantime we make this preliminary announcement as an encouragement to our friends and as additional evidence of the fact that we slumber not at our labor, but that forever we seek to plan and invent and utilize new methods and attractive means of success in the American University. This latest undertaking ought to reach into every corner of the land with its appeal and practical suggestion in our behalf.

One Good Way to Help Us

A Methodist minister who long has followed the work of the American University with sympathetic interest has written us concerning a hope of his heart in our behalf. Gratefully we refer to it as affording

BUST—HEROIC SIZE—GENERAL LOGAN

a concrete illustration of our method of aiding our work.

By a kindly Providence this faithful servant of the church owns a farm. To work the farm would withdraw him from labor in the vineyard of the Master. To hire another to work the farm for him would result in all too small a return for the value invested. To give the farm to good causes the minister cannot now afford. But the plan finally suggested comprehends all three of these ideas. It is now in the heart of this self-sacrificing lover of all good things to sell the farm and invest the proceeds in an annuity with the American University.

This accomplishes all that could be desired.

For the value of the property will be invested as a working capital. While the owner remains at his post as a loyal minister of the Gospel it thus will be at work. The university will act as the agent in keeping this money at work and finally to the owner will be returned the full amount of the earnings with the additional increment saved from taxation and fees for agents and lawyers.

Does this not commend itself to all good business men and women who believe in thrift and who also would like to know that when they are gone their possessions are dedicated to good deeds for all time to come? If you believe this, write for information to the office of the American University.

Annuity Plan of the American University

We offer a plain business proposition which provides for a life support for self, wife, children or dependents, giving a steady and certain income, and at the same time performing a service of transcendent importance to humanity. Any person desiring to give money, notes, stocks, bonds or other property to the American University, reserving to himself the income, may do so, and receive in return an annuity bond legally executed and yielding a lifelong income at fair per cent., payable semi-annually. The advantages of this annuity plan are manifold. The interest is sure and larger than the banks pay. It gives freedom from business complications and exemption from taxes. It relieves from care and anxiety as to fluctuation in values and uncertainty as to securities. It gives to one who has created an estate the opportunity to administer it himself. It brings the consciousness that you are helping a worthy cause and that at last your money will be put to noble uses. We shall be glad to take up the matter of annuities with any who are interested.

Edwin D. Mead Endorses the Peace Professorship

A letter recently received from Mr. Edwin D. Mead, head of the International School of Peace, contains the following interesting endorsement of the

proposed Peace Professorship in the American University:

I am greatly pleased to read in the last number of the AMERICAN UNIVERSITY COURIER of Bishop Mallaliu's thought of a Professorship of International Peace in your new American University and of your suggestion of the carrying out of this idea. * * * Nothing could be more fitting, and nothing could be more useful, especially there in Washington. I sincerely hope that this will be taken up earnestly by your people. Bishop Mallaliu's death was a distinct loss to the peace movement here in Boston and in the country. It was only in the most recent years that I had come to know of his profound devotion to our commanding cause. From the time that I did learn of it to the time of his death we have been in frequent touch, and his intelligent and unremitting service for the cause was a great satisfaction and fortification. I believe that it had come to be the highest interest of his life, as was true of Dr. Hale; and I sincerely hope that his memory will be kept green in that best possible of ways, the perpetuation of service for the cause which he himself loved so much and served so well.

I trust that your good work is thriving. I hope to be in Washington for some time in January, to confer with our friends at the capital, and to speak in behalf of the cause to churches or any bodies that want to hear.

A Happy New Year

To the Readers of The Courier

Another round of Earth about the sun now ends.

How flies the sun himself through boundless ether space

And leads his planets on their interstellar race!

Perpetual progress thus with yearly circles blends.

Probationer of time, its arcs thy soul still bends,

Yet drives its spiral journey on with steady pace

Nearer each year to its own final dwelling place.

Eternal life, God's gift, its mighty magnet lends.

Wake every slumbering power and ardent onward press.

Years furnish shining paths for eager souls to tread.

Each moon may mercy comrade thee in thought and deed.

All days will open gates to lives that thou shouldst bless.

Renew each flying hour love's fires with kindness fed.

On, ever on, new faith with moments new. God speed.

ALBERT OSBORN.

Annual Meeting of the Trustees

The Trustees of the American University held their annual meeting on Wednesday, December 13. There was a large attendance and an enthusiastic spirit. Reports showed the most prosperous condition in the history of the university. The constantly increasing financial strength of the institution keeps pace with the advancing development of the Northwestern Heights of Washington, where is located the university site. Rev. Charles L. Goodell, D. D., of New York City, was elected a trustee. The following, whose terms of office had expired, were re-elected: Bishop Thomas Bowman, Dr. Charles W. Baldwin, Bishop Joseph F. Berry, Dr. J. G. Bickerton, Hon. Julian S. Carr, Bishop Earl Cranston, Dr. Franklin Hamilton, Dr. Abraham J. Palmer, Hon. Theodore Roosevelt, Hon. George C. Sturgiss, and Bishop Alphaeus W. Wilson. The officers of the Board were elected for one year: President, Dr. David H. Carroll; vice-president, Aldis B. Browne; secretary, Dr. Charles W. Baldwin;

treasurer, Charles C. Glover. The standing committees for the year are: Executive Committee—Franklin Hamilton, T. H. Anderson, B. F. Leighton, A. B. Browne, Thos. W. Smith, D. H. Carroll, W. R. Wedderspoon, C. W. Baldwin, G. W. F. Swartzell, Earl Cranston, C. F. Norment. Finance Committee—A. B. Browne, C. C. Glover, C. F. Norment. Auditing Committee—B. F. Leighton, T. W. Smith, G. F. W. Swartzell.

The keen and energetic business leadership of Bishop Earl Cranston more and more is being felt in this enterprise. Some of the strongest men of the National Capital, representing various religious denominations, are co-operating zealously in the present university plans.

Hon. John L. Donovan, Our Trustee and Benefactor, Is Ill

Word comes to us that one of our trustees and a noble benefactor of our work, the Honorable John L. Donovan, of Watseka, Illinois, is seriously ill. This is sad news, indeed. For we have no better or more staunch friend than Mr. Donovan. Not only has he been a generous benefactor to the enterprise, but he also has been a source of great strength to us in his vision and encouragement. If it be the Divine will we pray that our friend may be restored or at least kept from suffering. And we pray the Heavenly Father to strengthen the noble woman who during so many years has been the strength and inspiration of our brother as his devoted wife. Together these two have done good deeds. They always will be remembered together. They have our deepest interest and affectionate sympathy at this time. Such friends are few and rare. And they are appreciated.

Later.—Before going to press, the sad news reaches us that Mr. Donovan has passed away. Suitable reference to his life and deeds will be made in the next number of the COURIER.

At the California Conference

Hon. John P. Holland of Sacramento represented the American University at the session of the California Conference in the place of Chancellor Hamilton, who was not able to be present. Mr. Holland has been closely associated with the educational work in the East. He is a graduate of Dickinson College. He was a member of the General Conference at Baltimore. He is a member of First Church, Sacramento, and is a Bible class teacher and greatly esteemed by his pastor and the membership of First Church. Mr. Holland was elected a member of the delegation from the California Conference to represent that conference in the General Conference at Minneapolis. This recognition is well deserved. Mr. Holland will reflect great credit upon the California Conference by his services at Minneapolis.

Rev. Nathaniel J. Merrill Presents to the American University Museum An Interesting Souvenir

Rev. Nathaniel J. Merrill, a member of the New England Conference and one of the oldest Methodist ministers now living, has prepared and presented to the American University a souvenir which will be deposited in the museum of the university and carefully preserved. Brother Merrill long has been interested in the work of our enterprise and has followed it with deepest interest. The increasing years have not robbed him of his interest. The skill of Brother Merrill with the pen is one solace of himself and the pride of his friends. This tireless worker has prepared with infinite care and labor a magnificent representation of an American Eagle as the fitting symbol of the American University. The engrossing is worthy of the patient loving labor. The beautiful picture will be kept in perpetuity as a most remarkable achievement by one who has been permitted to see the light and joy of so many suns. May the kindly helper and loyal friend long be preserved to brighten the wide circle of his friends and loving associates.

Dr. St. Clair's Appeal

We gladly publish the following appeal and congratulate the American University on having secured the valuable services of Rev. J. F. St. Clair: "I accepted a position with the American University, beginning the first day of June, and I am anxious to have my friends interested in the same. I hope all the friends of education in Iowa will know of the plan and purpose of this university. It is to do post-graduate work. It is not in competition with our colleges, but supplemental. The need for a post-graduate school is shown in the numbers of students from the United States going abroad every year for graduate work. Nearly two thousand every year from the United States. Washington recognized the need of such a school as early as 1795 in a letter from him to the Governor of Virginia as follows: 'It is with indescribable regret that I have seen the youth of the United States migrating to foreign countries in order to acquire the higher branches of education and to obtain a knowledge of the sciences. Although it would be injustice to many to pronounce the certainty of their imbibing maxims not congenial with republicanism, it must nevertheless be admitted that a serious danger is encountered by sending abroad among other political systems those who have not well learned the value of their own.' Bishop Hurst and Bishop McCabe also felt this great need. Patriotism demands that we furnish the youth of our land the highest possibilities for study and culture. The government of the United States has spent nearly a hundred millions of dollars in its great collections of books, scientific collections, apparatus, and laboratories—more than any dozen universities can boast, and these are open to the students in the American University. Protestantism demands it. The Catholic Church has made Washington the center of their educational work in the United States, and we believe that the Protestant ideas of civilization should also center at the Capital. Evangelical Christianity demands a representation at Washington. The great Methodist Church has always been evangelical and close to the people, and it is fitting and proper that this great Church should take the lead in this great educational movement. If you are interested, will you not write to me, or to the editor of the *Iowa Methodist* and we will gladly furnish you with information of this movement and of the university. All money sent to the editor of the *Iowa Methodist* will be forwarded."

Dr. Fairall's Kind Word

The editor of this paper has been making an effort for several years to induce Rev. Dr. J. F. St. Clair, of the De-

Moines Conference, to become Field Secretary of the American University, but so many other Church enterprises desired his valuable services that he could not do so. He is now representing that institution and we rejoice because we feel an interest in it, having years ago raised nearly \$1,000 in Iowa and sent to Bishop J. F. Hurst for the first building, the Hall of History. It was a small gift, but we were glad to have Iowa Methodism donate something. Chancellor Hamilton reports an extraordinary gift of \$150,000, soon to have a value of \$200,000, for the general endowment fund. Several large subscriptions have also been recently made to the opening fund of the institution. Let these gifts be multiplied and the post-graduate work of the university will begin. May many Methodists in Iowa respond to Dr. St. Clair's appeal in another column.—*Iowa Methodist*.

Marks of Progress Near the Site of the American University

Each month records advances in the development of that part of Washington in which is located the American University. The wisdom of locating the university in this particular neighborhood already is demonstrated beyond any further questioning.

Now we are in a position, holding our own, to behold the national capital with the push of the whole people behind it, marching up, as it were, to spread itself in ever unfolding beauty and dignity around us.

The last link in the noble boulevard connecting us with the heart of the city having been provided the next step naturally follows. Massachusetts avenue now is to be carried through our grounds to a section well settled beyond us.

This will call for increased transportation facilities. Already this is in process of provision. A plan is being developed whereby a line of electric cars is to run from the center of the city to the site of the American University and thence straight on through the grounds of the university to a point beyond us where a junction can be effected connecting up all the suburbs on that side of Washington.

But such unusual facilities for direct communication with the heart of Washington naturally will result in two things. One of these is the betterment of the locality itself at the center of which lies the American University. This is taking place. Senator Nathan B. Scott has bought an estate adjoining the university. In immediate proximity on another side there is being erected a magnificent mansion house which will lend dignity to the entire community. This offers some suggestion of the material changes rapidly transpiring.

The second consequence of such improvements is the development of the suburban section beyond our grounds.

This already has begun in a systematic way. A strong syndicate has taken over a vast tract of land and improvements are being begun. One of the newspapers says of this latest important real estate development which stretches far beyond the grounds of the American University:

If the proposed project is carried to consummation it will give to the capital city a suburban community which will be fully equal in size, beauty and importance to the outlying area of any other city in the country. For several weeks rumors have been flying thick and fast and fragmentary stories have

been secured relating the purpose of the purchasers of a series of Maryland farms to build a trolley line, to lay out a boulevard and to open a new suburb for the marketing of villa sites, but the announcement of the new syndicate shows that the project embraces not only all three of these plans, but the intention also to devote fully 200 acres of its holdings amid the picturesque scenery at Great Falls to park purposes, with a beautiful lake and a large hotel as its principal features. Altogether the tract which it is proposed to include in the development comprises 4,000 acres of land, and it extends in a strip nine miles in length and varying in width from one-quarter to three-quarters of a mile from Bradley Lane, in Chevy Chase, Md., to Great Falls.

The American University is on Massachusetts Avenue

The capital of the nation is a certain restricted area into which the national government is putting millions in the erection of magnificent buildings and in the creation of vast park systems. Into this limited territory are coming people from all States of the Union who will reside here. Yet with all this influx of population and with the tremendous influences of the national government at work, Washington must remain the same Washington, so far as the amount of land is concerned.

While becoming a magnificent city, a city of steadily increasing wealth and prestige, the great transformation that is daily in progress is necessarily within the original confines, or boundaries. This condition can mean but one thing—that by the great law of supply and demand Washington real estate must steadily enhance in value. While the government is taking up large parcels of land, either for a building or a great park, that amount of property is forever eliminated from the local realty market. There can be no expansion of the city's limits to supply the deficiency that may result.

It is this condition of affairs that is accountable for the constant advance in values, not only in downtown sections, but along all the prominent thoroughfares leading into suburban districts. Paradoxical as it may seem, the fact that there can never be a greater Washington is the best reason for greater values in the National Capital. Rather than a greater Washington, it is to be a "magnificent Washington."

The best illustration of this condition of affairs is to be seen along Connecticut avenue and Massachusetts avenue, the two streets which are destined to be the leading residential thoroughfares of the city.

Connecticut avenue, for its entire length, is skirted on one side by a vast park comprising hundreds of acres. This property, forever eliminated from the local realty market, renders it imperative for those seeking homes in this section to locate either on or very close to Connecticut avenue. It is this limiting of desirable residence sites that is steadily forcing prices up the entire length of this great boulevard. The same condition practically is to be found along Massachusetts avenue.

Where ten years ago prices of \$1 a foot maintained, today \$6 and \$7 is being paid. It is the law of supply and demand that is primarily the cause of this advance in value. Palatial homes are being built along the street. This, combined with property used for parks by the government, is steadily and surely reducing the supply of building sites.—*Washington Post*.

Dr. Wallace Writes Wisely Concerning the American University

When the General Conference of 1912 meets next May in Minneapolis, twenty years will have elapsed from the time when the daring project of Bishop Hurst was adopted by its governing body, and the American University become an enterprise of the Methodist Episcopal Church. As conceived by the scholar and educator who, called from the presidency of one of our great schools to the episcopal office, took a very special interest in the educational equipment of the church, the American University was to be the crown of our institutions of learning. The project took hold upon the imagination of the church, and it was agreed that such an institution ought to be drawn on large lines. The first step taken was in harmony with this view. As a site for the university of which the Bishop had a vision and taught the church to dream, a splendid and ample estate was purchased

INTERIOR VIEW OF GENERAL LIBRARY—NORTHWEST CORNER

in a location toward and around which Washington City has been rapidly extending itself. The property has increased in commercial value, and its adaptation to the purpose for which it was acquired has become increasingly manifest. A very substantial beginning has been made toward securing the buildings necessary for the equipment of the school on the scale originally proposed, so that the trustees now control for the church a very valuable property. Some relatively large and a great many smaller gifts have been made toward endowment.

For many reasons, however, the actual beginning of the work of the University has been deferred. The mark of equipment and endowment prior to the opening of the school to students was placed so high that it seemed beyond the resources of the church, and the appeal based upon it attracted only those who had great faith and courage. Happily, however, there have been enough of those who had faith in the feasibility of the enterprise to keep it alive through all the years of waiting and discouragement. Recent reports indicate that if the gifts continue and are quickened in some degree, the time is not far distant when the board of trustees, who have been very conservative and firm in their determination to do nothing hastily in so important a matter, may, in harmony with their persistent policy, be enabled to begin the actual work of instruction, and make available to a limited number of students the very superior advantages which the institution was designed to offer to those fitted to enjoy them. No one can doubt that if ten years ago the University could have been made available, if only in part, the enterprise would be much further advanced today. No one can question the proposition that an early opening on a safe basis and with a promise of effective work, will greatly accelerate the realization of the high conception of those who first introduced and promoted the plan proposed. No one doubts that an institution on the original plan would be an honor to the church,

and of the greatest service to the nation. The Methodist Episcopal Church is committed to the undertaking. We can not now draw back with credit. We can go forward steadily and with quickened step to the establishment of a unique institution where there is a large place for it. Who will aid in securing the relatively small amount which will encourage the next crucial step toward fulfillment?—*Pittsburgh Christian Advocate*.

How the Catholic University is Built Up

Announcement was made in the Catholic churches of this city Sunday morning that the Holy Father has appointed next Sunday for the taking up of a subscription to the Catholic University of America in Washington in every Catholic church in the United States. In commenting on the claims which the university has upon the members of the church throughout the country, many priests said that the institution of learning has advanced with singularly rapid strides to a commanding place among the first colleges of the land. In the last year, it was said, large numbers of Catholic young men have flocked to the university to pursue studies in special branches, and notably in the sciences. These students are taking up medicine, law and civil engineering, while others in the science departments are specializing on the natural and applied sciences. The university, although so far more widely known as a theological college, where many young priests are taking post-graduate courses in advanced studies, has been remarkably successful this year in the lay colleges, and has won the unstinted approval of the Pope and the bishops of America, who ask generous support for the institution.—*San Francisco Newspaper*.

Dr. Claudius Spencer Always Writes Intelligently

The announcement of Chancellor Franklin Hamilton of the American University found in another column will be very gratifying to the friends of that institution and to the whole Methodist Episcopal Church with which the institution has become identified. This generous gift ought to provoke many other persons to a like good work. There is enough idle money, that is to say money which is not doing active service for the Lord Christ and humanity, to fully equip the great institution which Bishop Hurst planned and his successors have fostered in the national capital. The day when actual academic work should begin on the broad foundation laid should not be postponed to an indefinite future. If we do not soon utilize the golden opportunity set before us it will be taken from us to our confusion.—*Central Christian Advocate*.

A Bill

To Establish the University of the United States

The bill which recently was presented in Congress to establish a national Federal university is interesting from many points of view. We print the preamble:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be, and is hereby, established in the District of Columbia a body corporate, to be known as The University of the United States, whose purpose it shall be to provide facilities for the higher and the highest possible instruction exclusively graduate, in the whole field of knowledge, including departments of the practical arts and fine arts; to promote the advancement of knowledge by means of original research and investigation; to provide the instruction needed to qualify students for important posts in the service of State or Nation and for the practice of such callings and professions as require for their pursuit the highest special training; to so relate itself to the other institutions of the country as to encourage elevation and uniformity of standards; by its own standards, conditions, and honors to so stimulate the ambition of students everywhere for the highest attainments as to lead great numbers into all our colleges and universities, deepen the interest of the people in the cause of higher learning; and, by its subsequent bringing of them into friendly association at Washington, to incidentally prove itself a sure promoter of the security, dignity, and prosperity of the Nation.

The New Cardinal Falconio Praises the Work of the Jesuits at Washington

The intense interest taken by the Roman hierarchy in the aggressive propaganda of the Roman Church in America today has been manifested through the creation of three new cardinals for this country.

This would seem to indicate that the Papacy is alive to the opportunity now open to it to recoup itself in America for the losses now multiplying in the Old World.

One of these new American cardinals was the Apostolic Legate Mgr. Falconio, who for years has represented the Papacy in this land. Just before Cardinal-designate Falconio left Washington for Rome to receive the red hat of his cardinalate, a banquet in his honor was tendered the new prince of the church.

Many congratulations were extended to Mgr. Falconio. The reply of the honored guest was significant. We publish it as it was reported in one of the Washington daily papers:

"While here I have ever appreciated the work of Georgetown University and the solid education imparted by the faculty of this university and at St. Aloysius College. I must

say I have not wondered at the great work done by the Jesuits of Washington, for their work has been spread over the whole universe, and well known to all.

"Their order is well known to all who have read the history of the world. Therefore, my high opinion has only been confirmed by my stay here. The University of Georgetown has done a world of good, and, among the oldest universities in the land, it numbers among its graduates men of national reputations. Wherever I go I have heard its name, and I rejoice at the respect and honor shown it on all sides.

"The good relationship between faculty and alumni speaks eloquently of the work done by the Jesuits. Therefore, it will be a great pleasure for me to tell the holy father of the great work being done by Georgetown University."

Kindly Words From a Disinterested Source

The American University, located at the national capital and intended for advanced education and research, has just come into possession of property worth \$150,000 at least. Recently the trustees authorized a campaign to raise \$1,500,000. When \$500,000 of this is secured the institution is to be opened to students.

The late Bishop Hurst, of the Methodist Church, was the father of this University plan, and the Methodist Church formally approved it in 1892. Exceedingly valuable property, well situated, has been gotten together.

In 1908 Dr. Franklin Hamilton became chancellor, and under him advance has been made. Criticisms have well nigh ceased, and the project of the \$1,500,000 new fund has been entered upon. The Washington University is the only educational institution for which the General Conference specifically appeals to Methodists for financial help.—*Public Press*.

Seventh-Day Adventists Arraign the Catholic Propaganda at Washington

Severe arraignment of the Catholic Church is contained in a report made by the committee on controversies to the council of the general conference committee of Seventh-Day Adventists at Takoma Park last night. In the document regret is expressed for the "apostasy which gives plausibility to the claim of the Roman hierarchy that Protestantism is dead."

"We view with deep interest," the statement continues, "the avowed purpose of the Roman Catholic hierarchy 'to make America Catholic,' and regard this definite movement to convert the United States to the Catholic faith as a further and emphatic testimony to the correctness of our interpretation of the prophecies with reference to the work of the papacy in this country.

"We note the increasing number of those public functions skillfully planned by the representatives of the Roman church, at which are brought together the dignitaries of that church, and the highest officials of the state, and we recognize in them the working of that political diplomacy so characteristic of the history of the papacy which seeks to secure the powerful influence of the government in furthering its aims.

"We consider the many national organizations within the Roman Catholic Church and the recent affiliation of nearly all these organizations into the American Federation of Catholic Societies as evidence of a definite preparation to resist any future opposition to the encroachment of the Roman hierarchy upon the liberties of the people of America, and we look upon the boycott already employed by the federation in its warfare upon publications unfriendly to the papacy as an un-American and un-Christian weapon suitable for the inquisition, but absolutely destructive of freedom of thought, freedom of speech, and freedom of the press.

"We sincerely regret that widespread apostasy from those principles of truth which we vindicated at such cost in the reformation of the sixteenth century, and we greatly deplore the fact that this apostasy gives so much plausibility to the oft-repeated claim by the Roman hierarchy that Protestantism is dead and that in Romanism alone does Christianity survive. We regard what has been designated as 'the invasion of Protestant lands by Rome in a spirit of fierce aggressiveness' as a summons to renewed activity in behalf of the message of truth which we are bearing to the world."—*Washington Post*.

The American University Courier

Entered as second-class matter February 27, 1909, at the Post Office at Washington, D. C., under the Act of July 16, 1894

Volume XVIII

Washington, D. C., March, 1912

No. 4

HON. JOHN L. DONOVAN

REV. DR. CHARLES L. GOODELL

Hon. John L. Donovan Was a True Friend of the American University

In the death of the Hon. John L. Donovan, of Watseka, Illinois, the American University has lost a true friend. In a previous issue of the COURIER, we referred to the serious illness of Mr. Donovan and expressed the earnest hope for his recovery. But it has not been so ordered. And with many others, we are left to mourn a steadfast friend and earnest helper. In recording our sense of loss, it is not necessary for us to enter at length into Mr. Donovan's career. This we have told in full in an earlier number of the COURIER. He was one of the strong men of Illinois, who had helped to build that State into its present greatness. Having a personal knowledge of Grant, Sherman, and Senator Palmer, and being a warm personal friend of Gen. John A. Logan, Mr. Donovan, through these and similar associations, had become intensely American in all his views. It was this that led him to accept a trusteeship of the American University. He believed profoundly in the things for which the American University stands. They were a part of the very fibre of his being. It was because of this

that he and his devoted companion gave such help and encouragement to our work.

It were useless for us to attempt to express our gratitude to these noble friends for all that they have done in our behalf. Our sense of loss through the death of Mr. Donovan is the keener because we know that in his vision of our work and scope there was a rare and truly statesmanlike grasp of the interests involved. Mr. Donovan never showed his largeness of nature more certainly than in his alert and sympathetic understanding of the things for which, in the American University, we are contending. The sympathy that existed between husband and wife in this particular, was most rare indeed. To the gentle and kindly spirit of Mrs. Donovan we owe more than we ever can tell. Her constant encouragement to her husband in his manifold good works during the closing years of his life, was beautiful to behold.

In extending to Mrs. Donovan now, therefore, our profound sympathy with her in the great affliction under which she mourns, we feel that in a certain sense we are reminding our own hearts of what we all owe to her husband. The friends of the American Univer-

ity will not cease to recall with deepest gratitude the debt that they owe to the kindly encouragement and help of Mr. and Mrs. John L. Donovan. Neither Mrs. Donovan nor her husband ever will be forgotten in connection with the American University. Sincere Christians, feeling a keen interest in all that makes for righteousness, their help and encouragement never failed. But in all the helpful things that they have accomplished none, it is safe to say, will have so wide a scope or will reach so far as that which they have done for the work of patriotism and Christian education at the National Capital. Their names are linked immortally with the welfare of that which cherishes the good of the nation. And their names are written down on the roll of them who have had a true vision of that which makes for the largest usefulness in the Kingdom of our Lord.

Our New Trustee, Dr. Charles L. Goodell

If one were asked to name the foremost pastors in the Christian Church in America today and that one were alert, intelligently the answer would be sure not to omit the name of Charles L. Goodell.

We count it a great tribute to the place that the American University holds in the heart of earnest and far-seeing men, that Dr. Goodell, with all the heavy burdens now resting upon him in his remarkable work has been willing to accept a place on our Board of Trustees. But it is a big man that we want in our task, for it is only a big man who has the vision to see what is involved in our enterprise. For this reason we welcome with a peculiar appreciation and gratitude, the identification of Dr. Goodell with our cause.

This eminent and beloved leader needs no word of introduction from us. His work is known throughout the land. His present pastorate of Calvary Church, New York City, has challenged the attention of the whole country.

Dr. Goodell's magnetic personality will win friends for us, we feel assured, wherever he pleads for our interest. His long relation with strong and notable men will assure consideration and respect for our enterprise wherever it is known that Dr. Goodell is one of our trustees. The portrait of Dr. Goodell, which we give on the cover page, is a faithful likeness of him as he now is in full vigor and strength.

A Double Benefaction—\$7,000 Given

A new gift to the American University has just come to its treasury—one which gives us great pleasure to announce and will be equally pleasant for our

friends to read. It is from the hand of a friend, by request nameless here, and consists of \$7,000.00 in cash—\$5,000.00 of which is for the general purposes of the University, and \$2,000.00 for an annuity fund, which after lapsing, shall also inure to the general work of the institution. Thus the giver has done a double deed of blessing, to the present beneficiary of the annuity a dependable stated amount at fixed dates, and to the cause of the higher Christian education at a time of critical importance. This, too, is another fine illustration of the wisdom of administering upon one's own possessions during one's lifetime, and observing the actual operation on earth of good will toward men.

Recent Gifts of Money

(Acknowledgment in this column of sums less than \$5.00 is to be regarded as a receipt therefor.)

GENERAL FUND.

\$5,000.00, Donor's name withheld; \$300.00, T. C. Hunter; \$100.00 (each), James W. Jackson, Mrs. M. M. Sprowles, Theo. E. Miller, W. S. Pilling; \$50.00 (each), J. Atwood A. bite, C. H. Harding, Mrs. C. W. Broy, and Misses Ida and Elizabeth Simpson (jointly), Mrs. Sarah S. Levings; \$31.02, A. L. Wiley; \$25.00, J. McGregor Gibb; \$10.00 (each), George C. Coon, W. C. Arrison, E. G. Tanlue, Oscar W. Allen, John Oenstager, Jr.; \$10.00, Plimley E. Perkins; \$5.00 (each), S. S. Martin, Mrs. Minnie M. Raimier, D. H. Swope, Ira L. Bronson; \$1.00 (each), Mrs. George Null, Mrs. Abbie Mills, Miss Myrta A. Fairfield, Amanda Rogers.

HAMILTON LECTURESHIP FUND.

\$1,000.00 (each), Matthew G. Norton, A. Friend; \$100.00 (each), F. X. Kreidler, Thos. W. Eliason, Mrs. M. J. Schoyer, Robert Ingraham, T. B. Walker; \$50.00 (each), Henry Salzer, Edward F. Thompson, Mrs. Abbie S. Beede; \$10.00, Mrs. Wm. McEckron; \$25.00, Wm. E. Sessions; \$10.00 (each), Henry P. McGill, Flora C. Mickey, Miss M. B. Pierce, G. H. Knappen, John B. Myers, Marvin Campbell; \$5.00 (each), W. H. York, Miss K. M. Lewis, Andrew Porter, John A. Oakes, Mary N. Mickey, James A. Baum, R. B. Scheider; \$4.00 (each), W. V. Calkins, E. P. Robertson, J. T. Ensor; \$2.00 (each), Mr. and Mrs. H. M. Powell, F. N. Minor, M. L. Hallcock, C. H. McCrae, E. G. Sanford, C. A. Hawn, G. W. Koser, Milton McCann, F. H. Barnett, W. C. B. Turner; \$1.00 (each) Mr. and Mrs. E. C. Mason, R. H. Adams, H. A. Reed, Mrs. J. L. and Mr. H. L. Hudes, J. W. Mahin, L. S. Boyd, D. J. Shenton, J. Hanna, H. R. Williamson, M. G. Sherman, Miss M. L. Reddish, A. W. Brown, W. C. Snow.

McKINLEY MEMORIAL COLLEGE OF GOVERNMENT.

\$10.00, F. M. Swinehart.

ASBURY MEMORIAL FUND.

\$15.00, Charles T. House; \$10.00, R. H. Crawford; \$5.00, A. J. Holmes.

McCABE ENDOWMENT FUND.

\$5.00, R. Newbold.

ANNUITY FUND.

\$2,000.00, Giver's name by request not given.

Dr. David H. Ela's Library

In a former issue of the COURIER we stated that the daughters of the late Dr. David H. Ela had decided to donate to the American University the library of their sainted father. The Misses Ela have sent to us as a forerunner of the books which now are on their way, a list of the volumes. To one who knew Dr. Ela the list is most interesting. "Show me a man's books and I will tell you the man," here finds verification. In running over the list it is as if again we heard the musical voice and saw the refined face of our friend. These were his life tools, and as if they were speaking they tell with inerrancy the sources of his strength and girding. There is strong meat between some of those covers; soon they will nourish other eager minds and hearts. Again we thank the Misses Ela for this useful and noble gift to the American University.

The Bishop Hamilton Lectureship Fund

As will be seen in another column the Lectureship Fund which Bishop Hamilton is endowing is growing, not only in aggregate amount but also in the actual cash already turned over to the University treasurer as invested. The amount now placed in conservative interest bearing securities is \$5,100. This means that this nest egg for the whole fund already is drawing a neat little sum in interest, which, as it comes due, faithfully is turned back and added to the principal. This is compound interest and the magic rate at which money thus invested leaps upward reminds one of the gold counted in dreams. Watch this fund grow. If you wish to aid the upward course of this endowment write to Bishop Hamilton and send him some money. "Many a mickle makes a muckle" with Bishop John W. Hamilton.

George Bancroft's File For Maps, Charts and Manuscripts

The American University has been unusually fortunate in acquiring possession of pieces of furniture having historic value and association. One of these reminders of departed worthies is that whose picture is found on the third page of the COURIER. It is nothing less than the case once owned and used by the American historian, George Bancroft, during his residence at 1623 H Street Northwest, for filing his maps, charts, larger manuscripts, and papers which he desired to be kept flat. The trays or drawers are designed for that special purpose. It is made of French walnut and shows the mottled figure and grain of that beautiful wood. The right hand compartment was used as a wardrobe. As a souvenir of one of our nation's leading diplomatists and writers it is a center of constant attention and interest.

GEORGE BANCROFT'S FILE FOR MAPS

Superintendent J. B. Hammond Married.

Mr. J. B. Hammond, Superintendent of our grounds and buildings, has taken unto himself an elect lady as a wife. We extend our heartiest congratulations to the two and feel sure that the Hammond home, which is in close proximity to the University grounds, will take on a new sense of happiness and peace. The faithful and loyal guardian of our demesnes is worthy of all good things, of which the best is—a good wife. Cordially, therefore, we welcome and salute, Mrs. J. B. Hammond!

Education Better Than Money.

I know that it is a common belief that those who inherit wealth stand the best chance for a happy life and for enjoyment. This is the opinion held by both young men and young women. But I do not agree with it. The best thing you can give a young man is a good education and that sort of ambition which will lead him to carve out his own career and to make his own position in the world of men and events. This is no less true with regard to the girls of the country. The great trouble has been that we have never given woman a fair show. We have not opened to her all the means of livelihood that she is able to fill. In fact, I believe that women today are kept out of some sorts of work which in certain respects they are better able to fill than men are.—*President Taft.*

Visiting Spring Conferences

As usual, careful provision has been made for visiting the Spring Conferences in the interest of our work. Dr. Stone has just returned from a visit to Florida, where he reports a growing interest in the cause which he there represented. He is to speak of the American University to the following conferences: Wilmington, Philadelphia, Wyoming, Northern New York, Vermont, North Indiana, East German.

Chancellor Hamilton is to represent the University at the following conferences: Central Pennsylvania, New York, New York East, Maine, East Maine, New Hampshire, New England, Troy.

The conferences in the farther West are reserved for Dr. St. Clair.

Ex-Speaker Cannon and Senator Dillingham Help the American University

Our sincere gratitude goes out to Congressman Cannon and Senator Dillingham for their generous and invaluable assistance in the presentation to Congress of a Bill designed to bring the electric cars to the grounds of The American University. Any one who has studied our situation realizes how our hopes of inaugurating academic work are dependent upon electric car connection with the center of Washington. Congressman Cannon and Senator Dillingham by presenting this Bill have forwarded our cause materially. And for this assistance we are duly grateful.

In other columns will be found accounts from the daily press concerning this Bill and our efforts toward securing its passage by Congress. We shall bend every energy to this end, and we call upon all our friends to help us. Write to your Congressman and Senator in our behalf. This Bill, if passed, will mark an epoch in our life.

Mr. R. B. Ward, Treasurer of the Patrick Clendenen Land Company

We always have been grateful for the interest and generous help that Mr. R. B. Ward, President of the Ward-Corby Bread Company, has given the American University. We now are under added obligation from the fact that Mr. Ward, amid all his other heavy burdens, has consented to serve as Treasurer of the Patrick Clendenen Land Company. Our interests in this company are being cared for most industriously. Under his painstaking management the dividends from the company are beginning to be paid over to the University office. How true it is that an endowment for Christian Education creates an eternal flow of advantage to the generations. When added to this the endowment is in the care of such a famous captain of industry as Robert B. Ward, happy indeed are all concerned. We take this opportunity again, not only to register our gratitude to the donor for this noble endowment fund, but also for the assistance that is being given us in its care.

The Commission on the American University

"In order to focalize interest upon the problems of the American University, and if possible, harmonize the several forces and agencies that should cooperate for the early realization of the hopes of the Church concerning that enterprise, the Board of Bishops, on motion of Bishop Cranston, created a Commission on the American University, which Commission was to consist of nine members. This action was 'in the interests of the American University.'"

For this action every friend of the University will feel sincere gratitude to Bishop Cranston, whose wise and sagacious leadership in this enterprise thus found another concrete expression. But more than this, for Bishop Cranston's action is destined to prove historic. The work which the Commission thus created has been enabled to begin, already shows that in it are involved interests and events that will prove of the greatest moment.

The Commission as finally made up was as follows : Bishops Moore, Berry and Nuelsen, representing the Board of Bishops ; President Harris, Judge R. F. Raymond and J. Edgar Leaycraft, representing the Board of Education ; and Bishop Cranston, Dr. D. H. Carroll and Franklin Hamilton, representing the Trustees of the American University.

The first meeting of the Commission was held in the city of Washington and lasted through two days. A visit was made to the grounds of the University. The whole situation was taken under consideration.

The second and concluding session of the Commission was held in New York City. At this meeting Dr. Nicholson, Secretary of the Board of Education, was invited to participate in the deliberations. The whole subject and many allied matters were brought under discussion. The meeting was harmonious and constructive in spirit. The largest views were entertained by those sharing in the meeting.

A pleasant social feature was given to the occasion through the generous action of Mr. Leaycraft in entertaining the members of the Commission as his guests at a charming luncheon at the Aldine Club.

The result of the thorough study of the situation was a resolution by the Commission looking to the future for the largest possible constructive results. This resolution, in proper form, is to be submitted to the approaching General Conference at Minneapolis for approval. This proposed action by the General Conference will reveal more clearly than anything else, perhaps, could reveal the vast interests now under our hand at the National Capital.

Bill Plans New Line to Cleveland Park and American University

Residents of the neighborhood bordering on Massachusetts avenue extended were delighted yesterday by the action of Senator Dillingham and Representative Cannon in introducing bills in the Senate and House providing for the construction of a street car line through the section. They are preparing to do their utmost toward getting favorable action by Congress on the project.

If constructed the projected line is expected to greatly develop the territory lying between the Tennallytown and Chevy Chase lines on the north and the Glen Echo line on the south. There is a large strip of property between these lines, and residents there expect that it will be settled very rapidly. The land in this section is among the highest in altitude of any in the District.

This section of the District has improved very rapidly in recent years, and the present street railway facilities are totally inadequate. No railway bill proposed in recent years has been hailed with more satisfaction than this proposed measure, and it probably will be enacted into law without opposition from any quarter.

The extension provides for a continuation of the tracks of the Washington Railway and Electric Company from the point where it crosses the Capital Traction lines at Columbia Road and Eighteenth street, out Massachusetts avenue to the District line.

It is provided that the construction of the street railway extension shall begin six months after the condemnation verdict has been confirmed by the court, and cars are required to be running and the road in operation within two years.—*Washington Star*.

Expert Accountants Have Made a Thorough Examination of the American University Accounts

In order that the Commission on the American University, appointed by the Board of Bishops, might have all the assistance as to facts that it was in our power to afford, the books of the University were turned over to a firm of expert accountants to examine and audit. The examination was fundamental and thorough. It traversed the accounts of the institution from the beginning of the enterprise to January 31, 1912.

The report of the accountants was transmitted to the Commission at its meeting in New York City.

The findings of this expert examination were the same, practically, as those previously submitted by Chancellor Hamilton to the Board of Bishops at their meeting in Chicago. It will be interesting to state, however, that if there were any choice of conservatism as to statement, it would be in favor of the earlier report. For it was found that Chancellor Hamilton had understated the actual facts as to the property of the institution as found by the auditors.

We simply make this announcement as further evidence of the claim that we now are administering the enterprise upon the most careful and conservative basis that is possible.

George Washington University Honors American University

The warm and kindly feelings of common interest and sympathy existing between the George Washington University and the American University have found another expression. This is in the invitation to Chancellor Hamilton to serve as chaplain in the George Washington University at its coming commencement on June 5th. At many points the vital interests of these two institutions touch and coalesce. They face the same problems and confront the same difficulties and have a sense of sincere fellowship in their purposes. It is well for both universities that the men who now are directing their work are cultivating an earnest spirit of understanding and mutual appreciation. May the auspices of both enterprises prove propitious. We rejoice heartily in any increase in the welfare of our neighbor. In that welfare we feel involved.

Residents Want Facilities for Access to American University Grounds

The District Commissioners, at a hearing in the municipal building today on the bill providing an extension of the system of the Washington Railway and Electric Company, to afford access to the grounds of the American University, were urged to make to Congress a favorable report on the measure. Among those who advocated the passage of the bill

were Bishop Earl Cranston of the Methodist Episcopal Church, Bishop Harding of the Protestant Episcopal Church, Franklin Hamilton, president of the American University, and Aldis B. Browne, a member of the board of trustees of the university.

The bill authorizes the construction of the proposed railway line along the lines of the Capital Traction Company, in Calvert street, across the Calvert street bridge, and thence, by way of Cleveland avenue, 34th street, Alcorn street and Massachusetts avenue northwest to the District line.—*Washington Star.*

A Letter Extraordinary from Roman Catholic Propagandists

A remarkable letter has just been handed to us as an illustration of the extraordinary activity that now marks the work of the Roman Catholic Church in America. From this letter two facts are clear: one is that Washington, with its Apostolic Mission House, is the center of this propaganda. The other fact is that the Catholic University of Washington is the burning hearth from which radiate the light and heat of this glowing fire of "convert making," for the "Apostolic Mission House" is a part of the Catholic University itself. As a proper method of informing the country concerning this propaganda we print the letter just as it has come to our hands.

THE CATHOLIC MISSIONARY UNION.

UNDER ITS AUSPICES THE APOSTOLIC MISSION HOUSE.

WASHINGTON, BROOKLAND STATION, D. C.
February, 8, 1912.

MY DEAR FRIEND:

How near at hand do you think is the time when America will be dominantly Catholic? Things move on with rapid strides these days, and the recent creation of three American Cardinals has brought the Church once more to the forefront. The dominant note in the address of the Holy Father, as well as in the replies of the Cardinals, is the hope of wonderful progress among English speaking peoples. They have all spoken of the "era of convert making." All this indicates a marvellous advance along the lines whereon the Missionaries of the Apostolic Mission House have been working these twenty years.

If all the priests and laity would turn their faces to this one goal, what a tremendous impetus the movement would get! One of our great leaders recently said, and there is burning truth in it: "We must labor to gain the confidence, love and respect of the American people. This once gained, the Catholic Church in her way to claim the American heart, may carry a thousand dogmas on her back."

Last year our missionaries gave hundreds of missions, and the record of convert-making is now away beyond the thirty-five thousand mark each year. Just think what this means! This estimate says nothing of the thousands of fallen-away Catholics that have been brought back to a good life.

Come with us, and share the glories of this work!

Sincerely yours in Xto.,

CATHOLIC MISSIONARY UNION.

Massachusetts Avenue is a broad boulevard extending through the length of the city, and is inviting some of the best residences of the city to its noble and salubrious situation. This boulevard is macadamized to the University doors, where the intersecting highway, Nebraska Avenue, now brings water, sewers, and light to the University grounds.

Washington, in its most attractive and impressive growth, is moving straight toward the American University.

Real estate development and speculation steadily reveal ever more clearly the extraordinary importance of the University site.

From five to ten millions of dollars soon will be the value of the University land alone.

Two magnificent marble university buildings have been erected. One cost \$176,000. The second, when completed, will cost \$300,000. A third building is secured by a probated bequest. A fourth building is promised by a friend.

There is already \$650,000 of endowment.

There are testamentary bequests of \$750,000.

The total assets of the University are over three million dollars.

The American University has one of the finest museums in America of Bible Life and Customs.

It is the only University for which the General Conference of the Methodist Episcopal Church makes special appeal.

The Methodist Episcopal Church, South, through several of the bishops, has contributed toward the University endowment.

The Senior Bishop of the Methodist Episcopal Church, South, is one of the trustees and is Vice-Chancellor of the University.

Several different religious denominations are represented in the Board of Trustees.

Presidents of the United States have been members of the Board of Trustees.

President William McKinley volunteered to become the first rector of the College of Government.

The present annual gross income of the University is \$21,000.

The University is trying to raise for endowment, \$1,500,000, of which \$500,000, when paid in, shall be used for opening the doors to students.

\$10,000 will put the University plant, as it now exists, into condition for active work in scholastic service.

Over 1,500 students already have applied for admission.

Bishop Hamilton, who gave the first dollar to the American University, is endowing a lectureship with which the regular work of the University, as planned, may be opened.

President Taft says, "I sincerely hope that the American University will have a long life, and that the beautiful buildings and site assigned to it may be properly availed of, to make it useful to the country at large as it ought to be." President Taft has agreed to open the University with a lecture.

Secretary of State Knox and other eminent men have agreed to join the President in an opening course of lectures.

Theodore Roosevelt says, "I rejoice that such progress has been made in an undertaking fraught with such far-reaching promise of good to the entire nation."

Every branch of human knowledge has a literary deposit in Washington.

Address all communications to

FRANKLIN HAMILTON, Chancellor,

The American University,

1422 F St. N. W.

Washington, D. C.

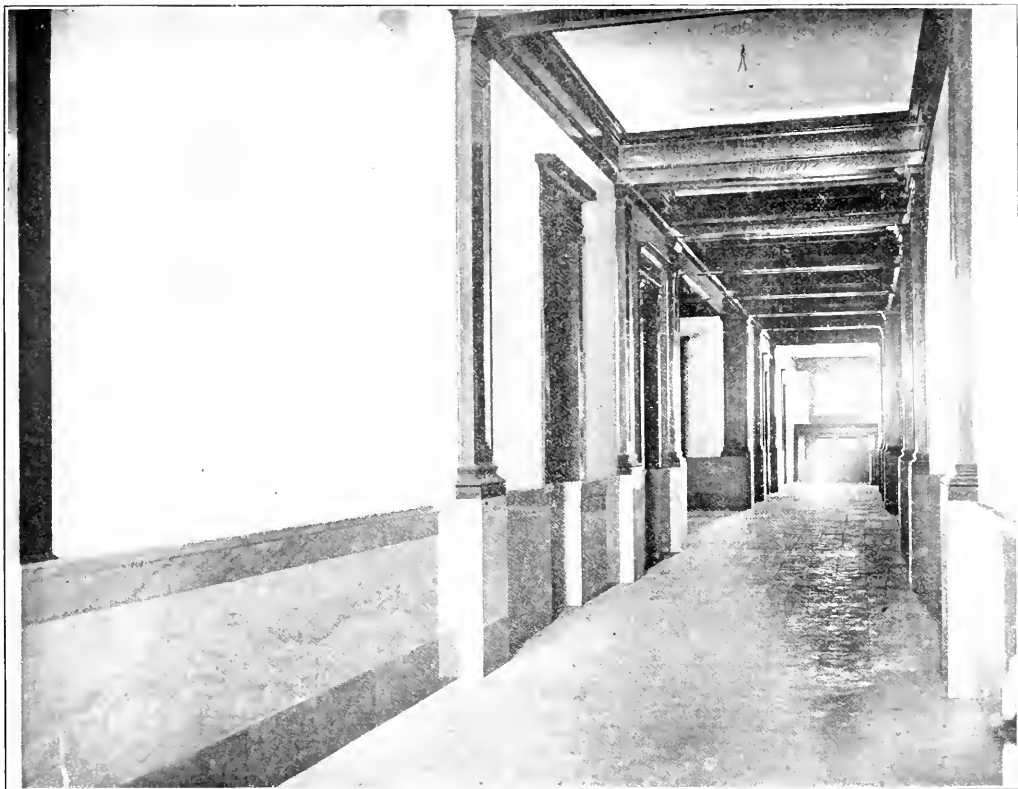

Our New Leaflet of Information—The American University

The American University is located in Washington, District of Columbia. It was founded, and the site was purchased by Bishop John Fletcher Hurst.

Beautiful for situation, the property includes nearly one hundred acres within the city limits.

Overlooking the valley of the Potomac, in full view of Arlington Heights and towering over the Capital, it fronts on Massachusetts Avenue.

* Since the above leaflet was printed a careful scrutiny and revision of the assets of the institution has been made, and by the elimination of sundry unpaid subscriptions no longer regarded as collectible the total aggregate is a little less than three million dollars.

MAIN CORRIDOR—COLLEGE OF HISTORY

Main Corridor of the College of History

The first building erected for the American University was the College of History. It stands near the eastern side of the site, but faces architecturally to the west upon the campus. The chaste strength and classic beauty of its exterior salute the eye of even the careless passerby. Its inner attractions also are numerous and strong. On page seven we present for the first time a picture of the main corridor of the first floor. The viewpoint is at the southern end, and the finely lighted and spacious hallway stretches out one hundred and seventy-five feet to the northern doorway. Its width is sixteen feet. For the entire length the floor and wainscoting are of beautifully colored and figured Tennessee marble. The woodwork is entirely of quartered oak and furnishes richness and dignity to all doorways, windows and stairways. At its center and at the main or western entrance to the building the corridor broadens into a rectangle 308.32

feet, but only a small portion of this appears in the picture. Doors and windows at each end give fine light and ventilation throughout. Its function of comfort and pleasure to both professors and students is fully assured.

A Chance to Help Us Vitaly

The recurring tax day fast is approaching for the American University. This always is a time of strenuous effort upon our part. This year it will prove more so than ever. The District of Columbia assessors, in addition to the usual taxes levied upon our holdings, have made upon our property a special assessment for betterments consequent upon the completion of Massachusetts Avenue.

This special tax will amount to about five thousand dollars (\$5,000). Since it is added to our regular taxes it constitutes a very heavy burden. It will cause

us a most serious effort to cover it. Only this month we have had to pay for other special assessments recently made, and we shall feel this new burden all the more acutely.

Will not some generous friend lend us a helping hand and give us a goodly contribution on this special tax assessment? Any help will be appreciated gratefully. The money will not be squandered. It will remain as a perpetual increase in the valuation of our property. Is there not some friend somewhere who will help us in this emergency?

Pope Praises University and Tells of Interest in Washington Institution

New York, Feb. 25.—Pope Pius XI, in an interesting letter to Cardinal Gibbons, which the cardinal has had translated and addressed in circular form to the members of the American hierarchy and all friends of the Catholic University, makes known that the Vatican has taken the university under its wing and purposes developing it to an extent beyond the dreams of its founders.

"We are fully determined on developing the Catholic University," the Pope writes. "For we clearly understand how much a Catholic University of high repute and influence can do toward spreading and upholding Catholic doctrine and furthering the cause of civilization. To protect it, therefore, and to quicken its growth is in our judgment equivalent to rendering the most valuable service to religion and country alike."

The letter stamps the university as the official home of learning for Catholics, priests and laity, in the United States and its possessions. The Pope gives hint of what it is proposed to make the university by urging all religious orders in this country to establish colleges and schools of studies about it, and requesting the bishops of the country to encourage and enlarge the plans already adopted of arranging special courses for the teaching of nuns.

The letter is the first papal document of an official character that has reached this country since the elevation of Cardinals Farley and O'Connell. In the introduction the Pope remarks that the steady and vigorous growth of the university, under the management of Cardinal Gibbons, occasioned no surprise. In the next paragraph he rejoices to hear that the faith as taught there is untainted.—*Public Press*.

Catholic University will Expend \$1,000,000 to Erect Teachers' Institute for Women

All plans and specifications for a Catholic teachers' college for women, to be known as the Sisters' College, and to adjoin the Catholic University, are complete for the contractor and builder, and ground will be broken in August for the institution, which will contain about eighteen buildings, including a chapel, a department for music, another for art, and a laboratory. The plans to finance this great enterprise, which will cost about \$1,000,000, also have been perfected, and there stands now nothing in the way to the quick consummation of a resolution, which was passed by the board of trustees of the Catholic University in November, 1910, authorizing the establishment of the Sisters' College.

On the first of December last a tract of fifty-seven acres adjoining the university was secured for the site of the proposed college.

It is proposed that the same faculty which teaches in the university proper shall also conduct the courses in the Sisters' College. The proximity of the institutions makes this feasible. Each sisterhood will be represented, and each will preserve its individuality. It is proposed that each teaching community shall build and own the house in which its members reside. The architecture is to be California mission.

The southern extremity of the tract has been selected for the academic group and will be in the nature of an acropolis. The residence group houses are disposed in harmonious re-

lation to the general ensemble. As a protection against the severity of the elements, these subdivisions or community dwellings are joined by means of covered passageways, so as to create a complete cloister for each small group.

The various teaching orders of the church will send to this college their most gifted members, to receive the highest training the age affords, and carry back with them to their several communities a knowledge of the latest developments in science and the most approved methods of teaching. The college is a response to two of the most obvious needs of Catholic education in the United States—the teachers' need of adequate training and the need of system and organization in the Catholic schools of America.

Among the sisterhoods represented in the Sisters' College are Sisters of Charity of the Blessed Virgin Mary, Sisters of Providence, from St. Mary's of the Woods; Sisters of Divine Providence, Sisters of St. Benedict, sisters of Jesus Mary, Sisters of St. Dominic, Sisters of the Immaculate Heart, Sisters of the Incarnate Word, Sisters of Mercy, and Sisters of the Holy Family of Mary.—*Washington Herald*.

Progress Toward American University Grounds

An extensive series of purchases of acreage property has just been completed by Allan E. Walker for a group of his clients. The scene of the operations is in the vicinity of Massachusetts avenue and the District line.

It is the intention of those interested in this enterprise to smooth the entire property into building lots, and encourage the building of high-class residences.

The section of the avenue from Wisconsin avenue to what has been named Hamilton Circle is still unopened, while beyond the circle and extending to the grounds of the American University the roadway of the avenue has been macadamized. Charles C. Glover donated the right of way for the main portion of this section of the avenue through the extensive grounds about his country residence.

The jury appointed in the condemnation proceedings has recently completed its work, so that the land for the entire extension from Wisconsin avenue to the District line is now public property.

It is expected that active work will be begun in preparing the land for the location of homes as soon as the pending bill becomes a law, which gives the Washington Railway and Electric Company the right to build a branch line from its tracks at 18th and Calvert streets along Calvert street and over the Rock Creek bridge to Macomb street, along that thoroughfare to Massachusetts avenue west of Hamilton Circle, and thence along the avenue to the District line.

This new center of proposed population, it is ascertained, is half a mile nearer the White House than Chevy Chase Circle. The land, however, has not been developed, owing mainly to its inaccessibility. Some years ago, when the American University was projected, a subdivision known as University Heights was made in the vicinity, and a number of houses have been built there. It is believed the opening of Massachusetts avenue and the building of the car line will make the new property attractive to many more home builders. The improvements will result also in opening a route in an entirely new direction to the picturesque region of the Potomac and Great Falls.—*Public Press*.

How it is Done for the Catholic University

The James J. Ryan and Hannah Cusack Ryan chair of the Old Testament is to be established at the Catholic University of America, in the new Cardinal Gibbons Memorial Hall. For this purpose Mr. Ryan, a retired builder of Philadelphia, has presented to Cardinal Gibbons in Baltimore \$50,000. Mr. Ryan called to see Cardinal Gibbons in person last Tuesday and laid in his hand fifty one-thousand dollar banknotes. It was at first stipulated that the story of the gift be kept secret, but later it was given out in Philadelphia.

Mrs. Hannah Cusack Ryan, in whose name Mr. Ryan made the gift as well as in his own name, was his wife. She died some time ago. Mr. Ryan, it was said by Dr. Dougherty, acting president of the Catholic University, today, is a knight of the Order of St. Gregory. It is said also that he is a leading member of the Hibernian society. He was the builder employed in the construction of the Catholic Cathedral at Richmond, Va.—*Washington Star*.

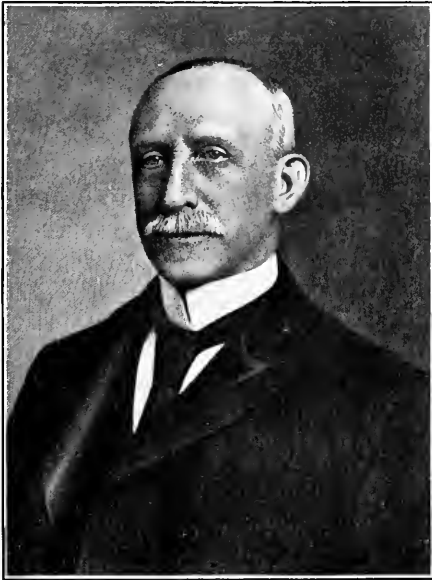

The American University Courier

Entered as second-class matter February 27, 1909, at the Post Office at Washington, D. C., under the Act of July 16, 1894

Volume XIX

Washington, D. C., June, 1912

No. 1

DR. DAVID H. CARROLL.

Help Us To Make It \$400,000

For the Trustees Meeting just held a careful review of our resources was made. This examination revealed the fact that our productive endowment now amounts to \$391,117. This, of course, is in addition to the non-productive endowment. But it is on the productive endowment funds of the university that for the present we are concentrating every effort. We are straining every nerve to lift the amount of the University funds actually producing income to the mark of \$400,000. We now only lack \$9,000 of this sum. Will not some one come to our aid? If some of our generous friends who have been promising to help us would realize that now is the hour above all others to assist the undertaking and would *give* what they have subscribed we could round the mark set for our present endeavor. It is funds invested and thus producing income that we must have. All else is secondary. Help us!

David H. Carroll, Philanthropist

The Gibraltar of the American University for years has been the President of its Board of Trustees, David H. Carroll, of Baltimore. The recent severe illness from which Dr. Carroll is recovering has brought

MR. WILLIAM S. PILLING.

home to the hearts of our friends how necessary to our welfare and success is the devoted service of this prince of Christian laymen. May the Heavenly Father long preserve to us this noble and generous man. He is a tried counselor, a fearless leader, an adamant friend. Incalculable is his help to us just now.

Mr. William S. Pilling

To the growing list of strong helpers to the cause of the American University has been added the name of Mr. William S. Pilling, of Philadelphia. Not only with his means, but by personal cooperation and by counsel the fruit of experience, and as an active member of the Board of Trustees, Mr. Pilling is identified with the institution. In the midst of business cares and the supervision of the vast interests of one of the leading industrial enterprises of the Keystone State, to take time for journeys to Washington and painstaking attention to the multitude of details which come before the Trustees for consideration and decision, indicates the importance he attaches to this educational project. Mr. Pilling is in sympathetic touch with many forms of philanthropy and his interest in our work is but the unfolding and extension of his long formed habit of doing good. Peculiar pleasure attends the privilege of showing a picture of his face on the first page of THE COURIER.

Mrs. John F. Keator

One of the most interested and helpful trustees of the American University is Mrs. John F. Keator of Philadelphia. All who know Mrs. Keator and the large place which she occupies in the best life of Philadelphia realize what it means for a woman of such character and standing to become a working trustee of the American University.

Through the personal part which Mrs. Keator took in the affairs in which her noble husband was so deeply interested, this elect lady has become a veritable Deborah in her own present part in affairs.

Her keen business acumen and rare discrimination are of great service to us. For the help which so unsparingly she gives us we are grateful indeed.

Mrs. Keator's daughter this month is graduated at Wellesley College. With this daughter and with her two sons Mrs. Keator just now is setting out for a tour of the world. To such a holiday we commend our friends with all best wishes and prayers for a great and joyful experience and a happy and safe return. Mrs. Keator writes: "I hope on my return, a year hence, to find the doors of the American University wide open."

Recent Gifts of Money

(Acknowledgment in this column of sums less than \$5.00 is to be regarded as a receipt therefor.)

General Fund

\$100.00 (each) John Gribbel, Wm. G. Catburt, John Walton; \$50.00 Henry C. Harris; \$10.00 Miss Maude Lester; \$5.00 H. C. Jones, John L. Ford.

Hamilton Lectureship Fund

\$15.00 D. D. King; \$12.50 Miscellaneous at Troy Conference; \$7.88 J. B. White; \$5.00 (each) E. D. Kohlsiedt, H. H. Murdock, W. W. Bowdish, A. M. Stockwell, R. D. Hopkins; \$3.00 C. M. Thompson; \$1.00 (each) John L. Fort, M. W. Fuller, O. R. Miller, Edwin Genge, Joel Martin, Frank Panley, F. L. Decker, E. C. Farwell, Mrs. F. B. Kelley, Milford H. Smith, Eugene Wiseman, Alex. McKinlay, B. C. Dahms, Sherman Rouse, James M. Cass, Lewis Sauerbrei, W. P. Rulison, G. M. Moody, A. J. Hutchinson, C. W. Rowley, F. O. Wiggins, F. H. Wright, A. J. Higgins, S. Palmer, C. E. Green, D. R. Smith, C. N. Curtis, T. G. Thompson, J. Kochler, M. L. Fuller, W. R. Davenport.

Annuity Fund

\$3,000.00, Donor's name not given.

McKinley Memorial College of Government

\$100.00 William R. Zollinger.

Asbury Memorial Fund

\$25.00 W. W. Gillies.

New Gates to the University Grounds

A set of new iron gates has just been put in place at the entrance to our University grounds. They are neat and strong and add greatly to the general appearance of the site. Now that the main boulevard of the city, Massachusetts Avenue, has been completed to our doors and soon will be pushed on through our grounds, greater attention, of necessity, must be given to the care and appearance of our camps. The increasing numbers, the tourists and visitors from all

over the land and, indeed, from all over the world will be led past our place of abiding. We have come out into the public eye at last. The favorite drive of the National Capital will be past our gates. The "White Marble Buildings on the Hill," as the genial and famous Mr. Wu Ting Fang described our material aspect, now will hold the popular gaze. We must remember that for which we stand of dignity and high import. As a beginning we meet the completed boulevard with a new entrance portal. It will swing in a welcome to you.

The Protestant Episcopal Cathedral Our Neighbor and Ally

The Cathedral of Saint Peter and Saint Paul which our Protestant Episcopal friends have begun to build, is located only a fraction of a mile from the grounds of the American University. Its site is a charming and commanding tract of about forty acres overlooking the city of Washington and located at the intersection of Massachusetts and Wisconsin Avenues.

In its building operations, which are now concentrated on the first portion of the Cathedral to be constructed, known as the Bethlehem Chapel, the trustees of the Cathedral Foundation have included in their list of loans one of a considerable amount from the endowment funds of the American University. Thus the bond of friendship and of common aim for the beautifying of Washington and rendering aid to the cause of Christian education in the whole country, which have existed from the time of Bishop Satterlee's strenuous and self-sacrificing labors to the present period of Bishop Harding's able and devoted leadership in the same great cause, has been demonstrated in concrete action and strengthened by this financial interweaving of mutual interest and good will.

We congratulate our Cathedral neighbors on the success of their endeavors thus far, and heartily bid them God speed in their efforts to help humanity and bless the world. We pledge them our earnest support and wish them the highest success in this culminating enterprise of their churchly and educational life at the Nation's Capital.

This Is Why We Are Building the American University

It is said that the Chinese government has invested the \$10,000,000 paid back by the United States from the Boxer indemnity funds, and is to spend the interest in sending carefully chosen young men to study in our leading American universities. They are to return to the service of the Chinese government. Pity it is that we have no Methodist university of international reputation which will attract these young men as will the names of Harvard, Yale, Johns Hopkins, or Chicago. It ought to inspire us to build one or two universities of international fame, imbued with the spirit and the Christian ideals for which Methodism has stood.—*Address Delivered by Dr. Thomas Nicholson, at the Thoburn Jubilee, Allegheny College, Meadville, Pennsylvania.*

STATUE OF COLUMBUS.

Influence Made Immortal

Last year 45,737 members of the Methodist Episcopal Church were transferred from the church militant to the church triumphant. Some thousands of these had property which they had a right to dispose of to loved ones by will. We wish to commend a more general inclusion of the Lord among the loved ones.

This is a matter of justice and obligation. While men own and personally possess property as they are related to their fellowman, they are simply stewards as related to God. The Lord has made this clear beyond the possibility of its being made clearer. He giveth the power to get wealth, and hence should be considered in its use and disposal. This justice and obligation also is evident from the fact that the general community has been a factor influential in making the getting of wealth possible. Men are actually indebted to many public causes for their wealth. There is the university that gave him his education at about ten per cent. of its cost. There is the church that made character possible. There is the co-operation of the customers with the tradesman, and there is the unearned increment on many an investment in real estate, etc. It is right that these aids to getting wealth should share in its distribution.

This disposal greatly affects the estimation in which the legatee is held. Everybody loves the posthumous benefactor of the lowly and needy children of earth. Even the other heirs see that their friend has higher ideas than mere money-getting and broader sympathies than one's own family.

It also affects one's own sense of relation to God. To go into His presence with an effective agency left behind working for His cause must be a joy. It greatly heightens the appreciation of the welcome, "Well done, good and faithful servant!" Thou hast visited My sick and helpless ones, and will continue to do so by continued agencies.

As life draws toward the close one wishes that his usefulness might be prolonged. It can be and should be made perpetual by will. When Professor McCabe celebrated his fiftieth year of teaching some of the 25,000 that had enjoyed the Ohio Wesleyan, some one calculated how many years he had preached the Gospel by the students he had taught. It footed up to six thousand years. Had any one endowed that

chair, and had that good man as his representative for that fifty years, and some other good man for all the fifty years to come, it would have added much to the joy of the Lord into which that man was to enter.

I was attending a conference once to which the district superintendents reported about a dozen legacies to benevolent objects. I remember it because such reports are not frequent. Such superintendents and ministers, in general, should make it a part of their business to instruct the people in regard to their high privileges in this matter. Pope Leo XIII. has no delicacy to prevent him performing his duty in that respect. In an encyclical letter he urges all who have received divine bounties either external or gifts of mind, to employ them as a steward of Providence for the benefit of others. Any one can obtain from their preachers or their district superintendents legal forms for bequests to the great helpful agencies of the church. In the time of Christ there were no general agencies by which one could benefit the world. Hence He highly commended and commanded alms giving to one's neighbors, and wonderfully enlarged the meaning of that word.—*Bishop Warren in Zion's Herald.*

Political University

Washington may some day become the site of a great national university, such as George Washington had in mind. The project looks feasible, and certainly the desirability of a great center of learning at the National Capital is beyond controversy. Tentative steps in the direction of giving creative effect to Washington's plans have been taken from time to time, but somehow Congress has always looked askance at the propositions laid before it. The original idea is regarded with favor by each succeeding generation of law-makers, and so the failure to take definite action must find other explanation.

Perhaps we need look no further than Senator Borah's bill in order to account for the long succession of futile endeavors to secure the necessary legislation. No scheme of management which provides for putting the institution under the control of active politicians of whatever prominence, and which would subject it to the menace of frequent changes in personnel incident to political upheavals, is likely ever to receive congressional sanction. Under the patronage system, as it now exists, it would not be possible to convince the public that the government of the university was wholly severed from politics. No matter how truly it might be said that the university was divorced from the "pie counter," the taint of politics would cling to it still, while the evils of brief incumbency of directing minds and consequent shifts in policies are too apparent to need pointing out.

Let Mr. Borah alter his bill so that educators, instead of politicians, shall shape the destinies of the proposed institution, if he would have it receive prayerful consideration. Anything suggestive of a "lame duck" preserve is anathema.

—*Washington Post.*

Romanism in the Press and Politics

While Roman Catholicism is dying in the Catholic countries of Europe, it is progressing in Protestant countries like the United States and England, where its influence in politics and in the press is apparent.

There is far greater danger to free institutions from increasing power of the Roman Catholic Church in the United States than there is in England. Its influence over our public men is appalling. Already the political wire pullers are counting on the Catholic vote as the deciding factor in the presidential election. That accounts for the presence of the most prominent politicians of the various parties at the recent Roman Catholic functions.—*Rev. S. A. Neblett, in the Converted Catholic.*

Strengthen and safeguard Protestantism by building and endowing the American University. Against such a bulwark of light and liberty no pontifical effort will avail.

Semi-Annual Meeting of the Board of Trustees

On Thursday, June 6, 1912, the Trustees of the American University met in semi-annual session at the University Office. President David H. Carroll presided, assisted by Vice-President Aldis B. Browne. The meeting was one of the most harmonious and significant ever held. Bishop Alphaeus W. Wilson, Dr. J. G. Bickerton, Dr. C. W. Baldwin, Chancellor Franklin Hamilton, Mr. Charles C. Glover, Dr. W. R. Wedderspoon, Mr. Thomas W. Smith, Mr. W. S. Pilling, Dr. J. C. Nicholson, Mr. G. W. F. Swartzell, and Mr. B. F. Leighton were also among those present. The report of the Chancellor indicated progress in many different lines toward the goal of endeavor. Measures looking to an early opening of the University on a high plane of educational work were initiated. A buffet luncheon marked a pleasant hour at the close of the meeting. The treasurer's report showed a healthful financial condition. The outlook is most encouraging.

Mrs. McCabe's Decease

Mrs. Rebecca Peters McCabe, widow of Bishop Charles C. McCabe, former Chancellor of the American University, recently passed away at Ironton, Ohio, where she had resided for several years. During the strenuous years of her husband's active life in the church she was an inspiring companion of his labors and travels, and gave her quick and intelligent sympathy to his varied lines of usefulness. He found in her an ardent helper in his advocacy of the higher Christian learning at the nation's center. Hers was a cheery spirit and her ministering touch has encouraged many a toiler in the hard and dark places of the earth.

Mrs. Rebecca Grazier Ill

Word some time ago reached the office concerning the illness of our friend and benefactor, Mrs. Rebecca Grazier, of Pittsburgh, Pa. Dr. Stone, the Endowment Secretary of the American University, has sent us word that in passing through Pittsburgh he stopped off to call upon Mrs. Grazier and express our sympathy with her in her illness. He found her much better than had been feared. Mrs. Grazier was resting quietly and her friends were rejoicing over her rally to better health and strength. The interest of Mrs. Grazier in our work and her generosity to us have rendered her name precious in our history. She has our deepest sympathy at this time. May the Heavenly Father stay her strength and bring her speedily to her accustomed health and vigor. Long has this consecrated servant of the Kingdom given of her time and means to righteous enterprises. Let her latter days be her best days.

Goucher College Has Our Earnest Support

The effort of the friends of Goucher College to raise funds to put the institution into proper financial condition for an enlarged and aggressive future enlists our sincere sympathy. A trustee of the American University has given \$60,000 to help Goucher College at this time. And this gift from one of our own most ardent supporters not only meets with our own hearty approval and endorsement but we would urge all who may read these words to take to heart the interests of our sister institution. The prosperity of Goucher College will be our prosperity. Any misfortune or calamity that could come to this College for Women would work to our injury.

We sympathize with Dr. Goucher and Dr. Van Meter at this time in their effort for help, and fain would lend them and their coadjutors every assistance in our power. May all success crown their efforts.

Reception to Bishops Cranston and Thirkield

The reception to Bishops Cranston and Thirkield in the Foundry Church at Washington on June 10 was a most interesting event. President Taft was present and made an appreciative address praising Methodist Bishops and missionaries. The Church

was filled by people from all over the city. Many came from Baltimore. The addresses showed the large and affectionate place which Bishop Thirkield has won for himself in the hearts of the loyal people of the National Capital. They indicated also that the return of the greatly beloved Bishop Cranston for another quadrennium to Washington meets with the warmest and most hearty approval of all.

There was a distinguished company assisting, as the French would say. Among them were Justice Anderson and Dr. Sumwalt who spoke, Rev. S. W. Grafflin who offered prayer, Dr. Wedderspoon who presided with rare tact and grace and Dr. J. C. Nicholson who pronounced the benediction.

At the conclusion of the speaking refreshments were served and the great company lingered long in friendly and happy social enjoyment.

During the course of the exercises public attention was called by one of the speakers to the fact that Mrs. Thirkield, who was the daughter of Bishop Gilbert Haven, is the only woman in Methodist history who has had a Bishop for a father and another Bishop for a husband. This same statement has been made in the press. This statement, unless we are in error, is incorrect. For the wife of Bishop John J. Tigert, of the Methodist Church South, was the daughter of Bishop McTyeire of that same church. But what splendid names are all these. They call us all to emulation. May the Heavenly Father bless and hearten Bishop and Mrs Thirkield and preserve Bishop Cranston for great leadership.

Behold the Completed Highway to Our Doors

The group of frame houses on the west side of Wisconsin avenue and directly across the line of Massachusetts avenue as extending beyond that thoroughfare have been removed. The avenue to its full width of 160 feet has been cut through the rising ground, the grading of the roadway has been finished and now it is possible to stand on Wisconsin avenue and, looking west along the line of Massachusetts avenue, to see the end of that thoroughfare, as it is now macadamized, at Nebraska avenue, a distance of more than a mile.

The improvement of the eastern end of the newly opened portion of Massachusetts avenue is to go on and the roadway is to be macadamized, thus completing the entire distance from Wisconsin avenue to Nebraska avenue. The work now being done covers only a comparatively short space, a distance of only a few hundred feet, but it forms the link between the eastern and the western sections of the avenue and affords a direct continuation of the splendid boulevard which starts at the Eastern branch and stretches through the city and beyond the original city limits across Rock Creek, thence to the heights past the Cathedral Foundation and now all the way out to the grounds of the American University.

The completion of the opening and improvement of the short stretch of the avenue just west of Wisconsin avenue was delayed while the necessary condemnation proceedings were held to secure the right of way. In the meanwhile the section to the west, where the right of way had been donated, mainly by Charles C. Glover, was graded and macadamized to Nebraska avenue, and it has been in use through a connection via Woodley road.

In addition to the roadway, the plan of the avenue provides for a circle a short distance west of Wisconsin avenue, which is known as Hamilton Circle, and will be about the same

size as Scott Circle. Beyond this circle occurs one of those irregular features in the surface of the country which give it such a diversified and interesting character—a heavily wooded ravine with considerable depth. The avenue crosses it on filled ground, and beyond, on a knoll of much beauty, stands the residence of Charles C. Glover, in the midst of extensive grounds.

There are two entrances to the Glover place from the avenue, while directly opposite one of the entrances and on the north side of the avenue, a short distance east of Nebraska avenue, a residence of large proportions is being erected, which is said to be intended as a surprise to her husband by the wife of a man prominent in official life. The house is of Spanish type, with overhanging eaves and stuccoed walls, and it will be in harmony with lawn and foliage in the midst of which it will stand.—*Washington Star*.

The Columbus Memorial

The memorial to Christopher Columbus, which is directly in front of the main entrance of the Union Station, is unique among the many similar works of art in Washington. With only two exceptions all of the numerous statues in the public parks of the national capital are of bronze or similar material. The Columbus memorial is composed entirely of pure white marble, including the heroic statue of Columbus, the two figures of ancient and modern American inhabitants, the shaft which forms the background of the statue, the globe and four eagles which surmount the shaft, the caravel on which the statue stands and its allegorical figurehead, the two lions at the ends of the semicircular fountain which provides a setting for the statue, and the superstructure of the fountain basin. The designer is Lorado Taft.

The unveiling and dedication of this monument to the great discoverer on June 8, 1912, was an imposing function. Under an ideal June sky the people of Washington and visitors from all parts of the republic thronged the avenues and streets centering at Union Station, especially along the route of the great procession which moved from Seventeenth Street northwest to the plaza, the scene of the dedicatory ceremonies. Here the event culminated in the address of President Taft and the hoisting of the great American flags from the historic pieces, and the unfurling of the Stars and Stripes from the three tall masts surmounted by the golden eagles. Pictures of the statue of Columbus and of the group may be found in this issue of the COURIER.

Knights of Columbus Endowment Fund

The Knights of Columbus have nearly completed an effort to raise \$500,000 for the endowment fund of the Roman Catholic University, through contributions apportioned among the local councils. The committee having the matter in charge reported to the recent national council, in Detroit, that eighty-six per cent of all the councils, representing ninety per cent of the membership, had pledged their shares. In summarizing the contributions it was found that \$478,010 had been pledged and \$304,457 paid in.

\$25,000 Gift for the Catholic University

The Gift of \$25,000 to the Catholic University of America, of Brookland, by Dr. Max Pam, of Chicago, a Jewish lawyer and philanthropic worker, has been announced by Cardinal Gibbons. A check for \$5,000 was received from Dr. Pam yesterday for the establishment of the first of five scholarships which the gift makes possible. Equal amounts for the other five scholarships will follow.

In his letter Dr. Pam explains that he is founding the scholarships with the understanding that the men who shall be chosen for them shall make a special study of social and economic problems. Cardinal Gibbons, in commenting on the establishment of the scholarships, explained that they would make possible the establishment of a chair of sociology at the university. He expressed himself as highly gratified at this unprejudicial testimonial of the work accomplished by the Catholic University and by the Catholic Church.

Dr. Pam, in his letter, declares that the gift is inspired by the fact that the Catholic Church "is the bulwark of society today." "I make this gift because the Catholic Church is the greatest safeguard against anarchy and socialism," Dr. Pam stated, "and because the Catholic Church, more than all others, teaches respect for constituted authority."

A second gift of \$5,000, received from a non-Catholic whose name was not announced, will aid in the wide-spread publication of the first book ever written by Cardinal Gibbons, "The Faith of Our Fathers." It was first published in 1888. It is intended primarily to enlighten Protestant and other non-Catholics in regard to the teachings of the Roman Church, and is said to have converted more Protestants than any other publication of its nature.—*Washington Post*.

New Improvements Close to the American University Grounds

A tract of land containing about sixteen acres has just been purchased from Charles C. Glover by the Massachusetts Avenue Realty Company. The property is located on the north side of Massachusetts avenue west of Wisconsin avenue, and in the locality which has not as yet been developed. It is bounded by Massachusetts avenue and Quebec street, with Arizona avenue on the east and 42d street on the west. The incorporators of the company intend to build large residences for their own use, and also to dispose of building sites to those who wish to erect dwellings of the larger class.

No consideration is mentioned in the deed. The land is embraced in four large city squares laid out in accordance with the plan of the city, which extends throughout the District.

Directly to the west are a couple of squares which are held in trust by the American Security and Trust Company, and upon which is now being erected a very large private residence.

New Opportunity for Research Study at Washington

"Within a day or two the military archives housed in the War Department in Washington will be made accessible to students and investigators—a step which, for years, they have been endeavoring to have the Government take. Pending the issuance of the new regulations, the authorities in charge have let it be known that those desiring to consult the archives may obtain permission at the office of the Secretary of War, Mr. Stimson."—*Washington Dispatch*, April 1.

Now that this important step has been taken towards a rational policy, we may hope that it will be followed by others directed towards both increasing the accessibility and insuring the safety of our national archives in general.

—*The Nation*.

To Be a Roman Catholic Center is the Greatest of World Capitals

While the great world capitals, London, Berlin, Paris and Vienna, were being slowly constructed the clock of time ticked centuries; today it marks the passage of the hours. The present generation will behold rising in majestic grandeur on the banks of the Potomac the greatest capital the world

has ever seen. Washington today is only in the initial stage of its development, and the public has scarcely begun to appreciate the wonderful transformation that will be effected.

Do not fail to see the great Catholic improvements, costing many millions of dollars, and to study the extensive area of their land investments and to calculate their future effect on the value of adjacent property whose destiny is indissolubly linked with the activities of the Catholic University of America and various affiliated orders.

The Redemptorists, Passionists, Carmelites, Benedictines, Oblate Fathers, Fathers of Mercy, Norbertine Fathers, Augustinians, Salesians, Theatines, Vincentians and Jesuits, are among the principal bodies that are expected to build colleges or houses of study.

"This grouping indeed, is of mutual advantage," says a letter from Pope Pius X on the subject. The colleges add to the adornment of the university and enhance its prestige while on its part the university affords the religious, who, along with their own studies, may follow its courses, opportunity to profit and attain more thorough knowledge. Carefully considering these relations, and concerned above all that those who are called to the service of the Lord should by growth in holiness and knowledge become workmen that need not be ashamed of rightly handling the word of truth, we regard these colleges with special favor, and we exhort the superiors of religious orders, while preserving their own discipline, to establish similar institutes.

Then follows an appeal to the clergy and laity to continue the practical assistance, and to the bishops that "they comply with our expressed wish in this matter" (the sending of specially fit students to be educated there) "from which each diocese will derive beyond doubt the greatest benefit.

"For these clerics elevated to the priesthood and returning to their respective dioceses will, in any position which the bishops may assign them, discharge their duties with an earnestness all the greater because of the deeper and wider knowledge they will have acquired at Washington."

—*Washington Star*.

The Lincoln Memorial in the National Capital

The following editorial from a leading daily journal gives a good idea of what the proposed national memorial to Abraham Lincoln will mean to the city of Washington. It is only another evidence of what Washington is becoming, the center of interest for the whole country.

The Art Commission's recommendation of a site for the national memorial of Lincoln at Washington, D. C., is certainly happy, in Potomac Park, not far from the Washington Monument, with the bronze Grant closing the vista. The grouping of the national memorials to the three great Americans most associated with making and saving the Union is worthy of the taste of Athens itself. Washington, Lincoln, Grant, memorialized within a radius wide enough for the noblest effect, and yet leading the eye and thought of the spectator in one direction to the Capitol, and in the other to the arena of the great struggle for the Union and to the home of the first President. Neither the Washington Monument nor the Lincoln memorial will dwarf the other. Rather, each will complement the other, and the lesson they teach will be emphasized by the great group honoring the conquering soldier of the Union that is being reared near the more familiar approach to the Capitol. History in three object lessons in bronze and marble.

Potomac Park, in which the Lincoln memorial is to be placed, if the advice of the Fine Arts Commission is followed, is of itself an illustration of art's service to utility. Scarcely more than a decade back it was an unsightly, because neglected and unkempt, stretch of river shore. Today it is one of the most beautiful river-side parks in the United States, the final word in a process of improvement which has eliminated the fever-breeding Potomac flats. Its drives, its walks, its bosage are the delight of Washingtonians whose fathers

COLUMBUS' MEMORIAL.

wisely avoided the dreary waste that it was as the breeding ground of ague. In Lincoln's time it was at its worst, the ragged border of a city that seemed the residuum of a failed ambition. Indeed the statue of Lincoln will look out upon a capital such as the living Lincoln never saw. The memorial comes tardily in point of years, but perhaps after all it comes the more appropriately, since it now has a setting and environment impossible had it been erected while the grief of the nation for his loss was still fresh. Doubtless the memorial will be a noble work of art, but even then it may not be more significant than the existing monument to Lincoln in Washington erected by the contributions of the race he freed. That speaks to the spectator with a pathos that the greatest sculptor often finds elusive of his skill.

The National Educational Center

The recent luncheon speech of Andrew D. White, in which he rode his main hobby, "Washington," struck the bull's eye in specifying to meet the capital's urgent needs two projects of city development. He would build here a memorial convention hall, impressive in size and in fine architectural lines; and he would establish or develop here a great university. The first project would practically perfect Washington as the convention city, the meeting place of all kinds of organized Americans in convention assembled. It would make the capital the successful host of a continuous and ever-increasing stream of delighted visitors from the republic, and for international assemblages from all the world. In connection with the campaign for the George Washington memorial this sub-

ject is of keen and immediate interest to many public-spirited Washingtonians.

The second project suggested by Dr. White affects the permanent character and status of the capital and thus rises higher than its mere equipment for the more satisfactory entertainment of transient visitors. It is natural, and it is of vital concern to Washington, that the city develop as a national educational center.

The benefit to be derived from the development of the capital as a great educational center is not confined to the Ten Miles Square, but is national in scope. Dr. White made forcible reference to the completeness of the capital's equipment in libraries, museums and laboratories, and in the experts in all branches of knowledge available as teachers or lecturers, that causes Washington to be without a rival in preliminary endowment of the machinery of education and in the possession and enjoyment of what may be termed the educational plant. Moreover, Washington, as the capital, is a school of patriotism in the very nature of things, in its normal exhibits, in its object lessons of the workings of the national government, and in the students' atmosphere and environment. As George Washington in effect proclaimed, it teaches good Americanism as well as the arts and sciences.

In his appraisal of the capital as the nation's natural and most conspicuously appropriate educational center, Dr. White agrees with George Washington, who put his views on record, and as far as he was able endowed higher education at the seat of government. He also agrees with President Grant, who in a message to Congress made specific recommendations along the line of George Washington's opinion.

—Washington Star.

Roman Catholic Church Prepared for Struggle

In addressing a Catholic Society in Chicago, not long ago, Archbishop Quigley used the following words:

The question confronting this organization is what to do about the dangers that are now threatening Christianity in this country. In France and Portugal the Catholic church was defeated and persecuted because the Catholics were not organized. Although there were thousands of devout and loyal Catholics who would have given their lives if need be for conscience sake, they were merely a mob without leadership and were defeated. I want to say that when the time comes in this country, as it surely will come, and the same forces attack the church here they will not find us unprepared or unorganized and they shall not prevail.

We have well ordered and efficient organizations, all at the back and nod of the hierarchy and ready to do what the church authorities tell them to do. With these bodies of loyal Catholics ready to step in the breach at any time and present in unbroken front to the enemy, we may feel secure.

—Chicago Record-Herald.

Opportunity to Become Immortal

Is there not one American millionaire who agrees with George Washington concerning the wisdom from the national and patriotic viewpoint of establishing a great university at the seat of government, where millions of dollars of available educational plant have been accumulated by the government? Is there not one independent operator in the field of educational beneficence who will seize up this grand opportunity? In no other conceivable way could a few surplus millions be expended with such glorious results in blessings conferred upon capital and nation alike and in fame deservedly acquired by the donor.—Washington Star.

The American Art Center

An unmistakable tendency is observable to recognize Washington as an artistic center. For a number of years the advantages of the capital in this respect have been brought to attention by incidents which have been too significant to be readily mistaken. First, for an instance, came the announcement that Mr. Charles Frear of Detroit had made provision for the gift, after his death, of his invaluable collection of Whistler paintings and etchings, including the famous "peacock room," to the Smithsonian institution, with an appropriate housing to be provided by the donor. Then the Harriett Lane Johnson collection was given to the Smithsonian to form the nucleus of a national gallery. Former Senator Clark of Montana loaned a number of valuable paintings to the Corcoran Gallery of Art for temporary exhibition which has been so prolonged as to become virtually a permanent installation. Material assistance has been given in the maintenance of a biennial salon of American art at the same gallery.

Now comes perhaps the most important of all the endowments to increase the Corcoran collection and to encourage similar gifts. The late Edwin A. Abbey, who, despite his long residence in England, did not lose his affection for his native land, provided in his will, which was filed yesterday for probate in New York, for the creation of a fund of about \$1,000,000 to be expended in the purchase of the best works of art from the annual exhibition of the Royal Academy of London to be placed in the Corcoran Gallery of Art as the property of the United States.

Regardless of the number of paintings thus yearly acquired, the example set by Mr. Abbey is certain to be an inspiration to others who wish to contribute to the art equipment of the capital and thereby aid in the evolution of the ideal Washington, which it is the desire of every patriotic American to behold. The fact is growing more evident to the country that Washington is peculiarly adapted to the purposes of exhibitions. Immense numbers of people come to Washington annually with leisure to inspect the treasures of the galleries

and museums. Nowhere else in the United States can a truly national salon be maintained entirely free from local limitations and influences.—Washington Star.

One of the Aims of the American University

Falling quite in line with the Carnegie universal peace movement, Rev. E. R. Willis yesterday morning at the Methodist ministers' meeting made a plea for a world university, in which there would be training for a world citizenship and fellow feeling. He based his proposition on the thought that the twentieth century cannot engage in a nobler task than in growing men tall enough to take in the whole world, with all its problems, adding that until a man gets his shoulder under the world, with all its wants and woes, he cannot be really great. He said:

"World burdens make world citizens. Our times are electric with world movements and we are thinking in world terms as never before. Whether we will or no, the world is becoming one vast neighborhood. We are realizing that we are vitally related to one another. The world is to be studied as a unit."

The claim is made that in such an institution each would be trained to realize that each human being can contribute to his own betterment and that he can contribute to the well-being of every human in the whole earth.

The idea of Dr. Willis through the world's university is the creating of a center from which would be dispensed the best accruing from all lands to each and every land. He entered quite in detail into the process of developing the possibilities of such a foundation, and removing all obstacles and objects that might be presented to the feasibility of establishing the world university.—San Francisco Newspaper.

Commissioner of Education Advocates Founding of Great University

Backed by the hearty support of prominent speakers, who advocated the abolition of war and the establishment of international peace, Philander P. Claxton, United States commissioner of education, suggested the erection of a great American university, with a yearly income of \$10,000,000, out of the funds now being expended on the army and navy in an address yesterday afternoon at the mass meeting of the Washington Peace Society.

Commissioner Claxton said he deplored the expenditure of millions of dollars of the country's money for the maintenance of the army and navy in times of peace. He declared that a new era of industrialism is awakening a broader understanding of nations, and that leadership is no longer determined by the ignorance of the masses, but by the intelligence of the people who recognize the fitness of the person for the office.

Industrialism and universal education, were they given free course, would demand international peace, he said, and the millions that go toward preparing the country for war would better serve the nation by being expended in the education of the masses.

With the money now spent for the army and navy, it would be possible to build a great national university with a yearly income of \$10,000,000; to provide an additional university in each state, twenty-five schools for each state, five normal schools for each state, five technical schools for each state, twenty agricultural schools for each state, and an additional \$1,000,000 income for each state for the public school fund.

The only hope for the future of the nation, he declared, lies in the education of the masses.—Washington Post

DR. FRED M. STONE, Endowment Secretary, writes the office that in several of the large cities which he has visited recently he finds a constantly increasing interest in our work and everywhere greater encouragement.

The American University Courier

COLONEL THEODORE ROOSEVELT.

Theodore Roosevelt, One of the Trustees of the American University.

Herewith we present the picture of Colonel Theodore Roosevelt, Candidate of the National Progressive Party for President of the United States. We do not take this liberty as an effort to interject ourselves into the political arena. We simply desire to call to the attention of our readers the fact that Colonel Roosevelt is a trustee of the American University, and that more than once he has shown his sincere interest in our welfare. Never can be forgotten his radiant participation as President, in the exercises on our university grounds during the General Conference at Baltimore in May, 1908. That speech attracted well merited attention throughout the world. It was a noble, a wonderful utterance. It will live forever in the hearts of those who were privileged to hear it. The other speaker on that occasion, Senator Jonathan P. Dolliver—sweet, immortal memory—has heard the great summons. Colonel Roosevelt, appointed as the standard-bearer of a new party, lives to mingle, seemingly with increasing force, in the affairs of men.

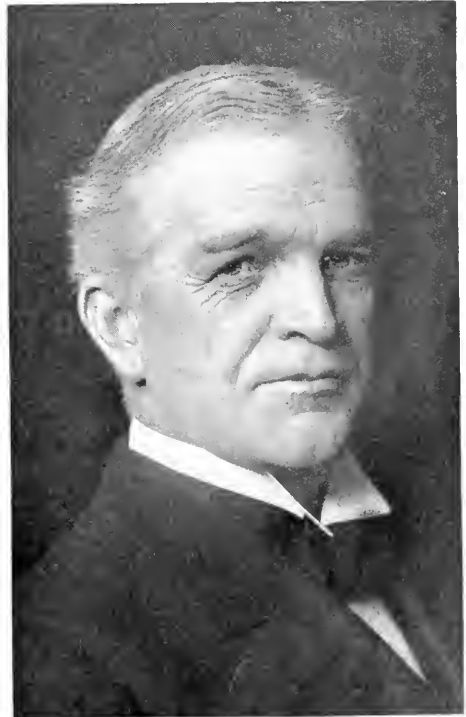

Women Given Degrees in a Pontifical University.

For the first time in four centuries degrees were conferred upon women by a pontifical university when the Catholic University of America on June 6, awarded the baccalaureate of arts to eighteen sisters.

Mgr. Thomas J. Shahan, rector of the university, remarked that a feature of the unusual event was the fact that the recipients surpassed all previous marks of scholastic attainment for a like degree given to men by the university.

Bishop McDowell to Advise the American University.

Bishop William F. McDowell very kindly has consented to act as an adviser to the American University in outlining the definite steps to be taken in formulating its educational policy. The Board of Trustees at their last meeting authorized the appointment of a committee of five of their number to take under advisement the outlining of a definite educational plan to be put into operation. At the request of the Chancellor, Bishop McDowell was invited to serve as an adviser to this committee. The Trustees unanimously extended the invitation to the Bishop and Bishop McDowell very kindly has consented to serve. We are very grateful to this eminent leader in our educational work, for his ready willingness to take this new burden upon his heart. It will mean much to our enterprise. We cannot but thank the Bishop and assure him that he shall be called into service and that, we trust, will be soon. We publish Bishop McDowell's picture below.

BISHOP WILLIAM F. MCDOWELL.

Recent Gifts of Money.

(Inconvenient, and in this column of sums less than \$5.00 is to be recorded as a receipt therefor.)

General Fund.

\$300 Edward L. Brown; \$250 T. C. Hunter; \$100 Zenas Crane, W. M. Crane; \$50 Thos. C. Day, W. C. Arrison, J. E. Fricke; \$35 B. Dangerfield; \$30 Mrs. Rebecca Grazier; \$25 Isaac S. Smythe, R. W. Tunnell; \$20 J. A. Hnston; \$10 Hugh Dougherty, J. W. Dalrymple; \$5.00 Miss Gay Edna Calvert, A. L. Wiley.

Hamilton Lectureship Fund.

\$10.00 C. E. Hamilton; \$5.00 N. L. Rockwell, J. W. Briggs; \$4.19 Miscellaneous; \$4.00 F. N. Mimer, Mrs. A. H. Benze; \$2.00 (each) A. C. Stevens, J. C. Craig, G. A. Fee; \$1.00 (each) C. P. Keast, Miss M. M. Nevim, Bertha Hostetter, H. R. Hartman, G. A. Finch.

Asbury Fund.

\$5.00 J. H. Goodrich, A. Dennis, C. G. Wallenius.

—Working Fund.

\$1,000.00 Donor's name withheld.

Courier Fund.

25c. N. R. Pearson.

Progressive Benevolence.

For several years one of the stanch friends of the American University and a firm advocate of the higher Christian Education has been showing his faith by his works by maintaining two insurance policies aggregating a benefit of \$8,000 to the University. To this he added an outright gift of \$2,000, the income of which is steadily added to a working fund keeping the insurances in force. Recently he has replenished this working fund by a new gift of \$1,000. This form of beneficence is to be highly commended for its soundness of method and certainty of result. Does the reader hear the still small voice of conscience saying: "Go, and do thou likewise"? "So say we all of us."

Dr. James Boyd Brady, a Benefactor of the American University.

The request that his body be cremated and that his son take a small urnful of his ashes and deposit that "three feet deep in Greenwood cemetery, Brooklyn, N. Y., beside my precious wife and beloved children," is made in the will of the Rev. James Boyd Brady, filed yesterday in the Suffolk probate court.

"Amid the pathos and pangs of parting," the will reads, "it is enrapturing to see Our Father calling to co-heirship with His Son. Blessed Jesus, thou art my all sustaining trust. Amen."

Under the will, made June 30 last, he gives to the American University, Washington, his library, pictures, curios, stereoscopic views, with boxes frames and cases. He also gives it "my recently written manuscript of three volumes on 'New Age,' two volumes on 'Divine Drama' and two on 'Celestial Blossoms.'" If the University should find the manuscripts of financial value, he directs that after his executors have been fairly compensated the surplus should be used to establish an annual prize for the greatest and best poem, oration or essay

on "The Surpassing Splendors of Jesus of Nazareth," and that this prize be open to world competition.

His 214 shares of preferred stock in the Washburn Realty Trust, Boston, he gives to Drew Theological Seminary, Madison, N. J., the yearly interest to be given to a student as a prize for the best oration on "The Power of the Holy Spirit in the Christian Ministry."

His copyrights, trunks, studs, buttons, rings, family photographs, gymnasia, are given to his son Paul.

To his daughter, Mrs. Florence I. Runkgaler of New York, is given his household furniture. The Rev. Dr. Franklin Hamilton is named as executor.

At the funeral in the church the Rev. George M. Spencer delivered the eulogy, and prayer was offered by the pastor, the Rev. A. H. Nazarian. The Rev. Dr. Franklin Hamilton conducted services at Forest Hills, where the body was cremated. —*Public Press.*

A Wise and Courteous Answer to Romanist Assumptions.

In another column we have quoted certain recent utterances of Romanists. One of these utterances has called forth from Dr. Eckman, Editor of the *New York Christian Advocate*, a rejoinder so wise, so brotherly and yet so conclusive that we cannot refrain from giving in outline the points of the answer. We give excerpts from the editorial of September 12, 1912.

"What Do the Methodists Intend to Do?"

A clever writer in *The Catholic World* for August asks this question, and in the spirit of meekness we propose to answer it:

1. The Methodists propose to acknowledge with all candor the excellences of the Roman Church. These are numerous, and not to be ignored by any unprejudiced observer.

2. The Methodists propose to work in fellowship with Romanists, so far as the latter will permit them to do so, for the furtherance of all great moral and social reforms.

3. The Methodists propose to refrain from all those things which the writer in *The Catholic World* suggests as possible weapons of warfare, such as the boycott in business, politics and social life, and every other form of persecution, public and private.

4. The Methodists propose to make a clear distinction between the Roman Church as a religious body, dedicated to the proclamation of the gospel of the Crucified One, and the politico-ecclesiastical institution which under the same name asserts its right to the temporal as well as the spiritual sovereignty of the world.

5. The Methodists propose to continue exposing the fallacy that Rome alone has "the keys" and the authority to "bind and loose."

6. The Methodists will persist in expressing, as they did at the late General Conference of one branch of their denomination "the deepest sympathy with as well as love toward the priests and people within the Greek and Roman Catholic Churches who are working toward a more spiritual interpretation of the Christian faith."

7. The Methodists will continue to lay bare the record of political Romanism in those countries where she has been dominant, both as an admonition to liberty-loving people and as a justification of Protestant missions in so-called Catholic nations.

If these ardent Romanists should assert themselves as eager to make America *Christian* at any cost, Methodists would shout for them with old-time fervor. But they are careful to announce their purpose to make America *Catholic*.

The Christian Church is vastly greater than the Roman Church, which can never be truly Catholic until it is divested of those accretions of worldly policy which offend many devout souls within its own borders, and awaken the censure of such humble people as the Methodists.

MASSACHUSETTS AVENUE—ENTERING SITE OF THE AMERICAN UNIVERSITY.

Does This Refer to the American University?

"The endeavor to establish an institution of the highest education has been beset by many difficulties. Its primary purpose and fundamental methods have been the subject of constant and not infrequently acrimonious debate. Should the institution be a teaching or only an examining body? If it were to be an examining body, should its examinations be limited to graduates of certain schools, or should the tests be thrown open to all? It has been obliged to contend against the indifference of a great commercial community—an indifference which harasses all institutions in a metropolis which are concerned with the higher education. The university of * * * * has not been free from the opposition, at certain times, of the university of ——— * * * *. Its revenues have been inadequate. Its progress has as a result been slow. Decades have been required to secure results which ought to have been gained in a year. Yet it has progressed. * * * *. Its progress has been like the growth of the principle of civil liberty—sinuous and slow. Beset and defeated by opposing forces, crushed or harried by foes either open or disguised as friends, suffering from the lack of wisdom in enthusiastic but irrational supporters, restrained by the indifference of formal but stolid friends, it has yet gone forward."

Does this refer to the American University? No.

It is taken from the description of the University of London, by Charles Franklin Thwing. Concerning this same University of London more yet shall be heard in connection with the American University. Watch the succeeding numbers of the COURIER, and keep in mind what here is written.

"Universities are like Temyson's Brook—men may come and men may go, but universities go on forever. * * * But what is more important for every democracy, is that a belief exists that the stability of a government by the people depends largely upon the intelligence of the people. Intelligence must increase as government becomes more democratic. In securing such intelligence, the guidance and inspiring force of universities are of prevailing worth."

"By reason of the presence of these three elements, the increasing complexedness of civilization, the increasing competitions of civilization, the increasing sense of the need of conservation of natural resources, the education which the colleges and universities of the world seek to give becomes of greater worth and of widening relationships."

Decease of Doctor Davidson.

We displace matter prepared for this issue of the COURIER to make room for the saddening announcement that our former Secretary, the Rev. Dr. Wilbur L. Davidson, suddenly departed this life on Tuesday, September 17, at his home in Cleveland. A remarkable coincidence is that his crowning occurred on the very day that his own loved East Ohio Conference was merged with the North Ohio Conference in Epworth Church of his own loved city, Cleveland. Further note of his useful life and work must be deferred to a later number.

Madame Mountford and Her Sister, Miss Anna Mamreov, Return to Washington.

After filling public engagements in the Middle West, Madame Lydia F. Mountford and Miss Anna F. Mamreov have recently arrived in Washington, and

already have entered upon the work of installing additional articles of great interest and value to the Mountford-Mamreov Biblical Museum in the College of History. Three years ago this unique and unmatched collection of costumes, utensils, pictures, and curios was begun, and it is now the purpose of the founders of this gallery of Scripture illumination to enrich the present assemblage of treasures and to make a complete and illustrated catalogue of the whole. In this congenial task Miss Mamreov's expert knowledge of Palestine and thorough acquaintance with its life and customs will be a most helpful factor.

Those who have seen this rich and beautiful museum will, if they repeat their visit after a few weeks, be rewarded with a vision of treasures new and old. Madame Mountford returns in a few days to Ohio to fulfill lecture engagements, but hopes shortly to rejoin her sister here in the labors which unite their hands and hearts. Visitors are welcomed and, so far as possible, will be granted the privilege of seeing the articles and hearing or reading descriptions.

Help Us to Make This Good.

Mr. J. B. White, the manager of our Gibson Farm in Southern Indiana, writes that the heavy rains and sudden high floods in the Ohio river have resulted in no little damage to our crops on the low lands.

This of course, will reduce the amount to be realized from this property this year. We are depending upon the returns from this farm to assist us in caring for certain heavy taxes. Will not the friends to whose eyes this word comes remember us with a gift to help us in this emergency?

We are administering our affairs now so closely and economically that every loss is felt. Let some generous friend therefore come now to our assistance. Let him help us to make good that upon which in our plans we had depended.

Concerning That Proposed Electric Car Line to Our Grounds.

It will be only a matter of time now when electric cars will be running from the heart of the city of Washington to our doors. The campaign to secure this line has begun. It never will be allowed to falter until we have what the whole community concedes is our right—proper transportation to our university site.

The bill providing for this proposed line still is in Congress. It has a chance to pass during the coming short winter session.

But just as this "COURIER" goes to press there comes the announcement that there has been organized a great corporation for the purpose of absorbing and unifying

the public utilities of the District of Columbia. This corporation, which, already has begun its initial operations, is capitalized at \$30,000,000 with the permission to enlarge its capital to \$60,000,000. The plan is to combine into one generous and comprehensive unit the traction lines, the gas and light companies, indeed, to "control and direct the affairs of all the public service corporations doing business in the District of Columbia."

The organization of this gigantic combine, without doubt, will forward the building of the particular car line in which we are interested. For in the past one of the chief barriers to the laying down of our line has been the courteous disinclination upon the part of both of the existing electric car systems to undertake the work through fear that such enterprise upon the part of either system would be an intrusion upon the working field of the other.

While these two polite car systems thus have been pursuing this Alphonse-Gaston policy we have walked. But a brighter day is dawning. The new public utilities corporation cannot fail to grasp and to utilize the great opportunity open to it through the extension of better transportation facilities into the most beautiful, salubrious and rapidly growing section of the national capital. Soon, therefore, the American University will have an electric car line to its doors.

Massachusetts Avenue Now Extended Through Our Grounds and to the District Line.

The work of the past summer just west of Wisconsin Avenue brought to completion the grading and macadamizing of Massachusetts Avenue between Wisconsin and Nebraska Avenues. This section of the great thoroughfare presents a magnificent view from either extremity, stretching out to nearly a mile of perfectly straight roadbed with a graceful dip to and across the viaduct of Foundry Branch and an easy gradient on either side. More recently under the direction of the District Officers a carriage way has been constructed, opening up Massachusetts Avenue across the site of the American University and on to Western Avenue about three-fourths of a mile beyond.

We present on page three a view of Massachusetts Avenue entering our site at its intersection with Nebraska Avenue and extending to the crest of a hill about four hundred feet to the northwest. The chimney and gable of the old Addison-Murdock house may be discerned in the foliage at the left. At this point, next to old Fort Reno the highest in the District, another view is obtained (see page seven), a vista reaching out across the District boundary, across Montgomery county, Maryland, over the Potomac and into Virginia toward the Blue Ridge. The western line of the University site, about sixteen hundred feet from its eastern or city front, may be located by a slight curve

in this carriage road, where stands a bridge over a branch of Murdock creek. The extent of the University grounds may be measured in part by joining the two portions of this new driveway and remembering that they traverse the site through its narrower limits.

The Fall Conferences.

Careful provision has been made for a thorough presentation of the cause of the American University to the conferences this autumn. The field has been mapped out and divided into strategic sections as far as possible. The arrangement in general is as follows: Rev. Albert Osborn will go to New York, visiting the scenes of his earlier ministry. He will be our official representative at the Genesee Conference.

Chancellor Hamilton will also go to New York, addressing the First General Conference District Convention of Epworth Leagues, which this year meets at Troy. The Chancellor thence will move on, visiting the Central New York Conference at Auburn, N. Y., the Erie Conference at Kane, Pa., the Northeast Ohio Conference at Cleveland, the Central Ohio at Kenton, Ohio, the Ohio Conference at Columbus, Ohio, the Pittsburgh Conference at Blairsville, Pa., and the West Virginia Conference at Elkins, West Virginia.

Dr. Stone will visit the conferences farther West. He will cover the conferences in Indiana, Michigan and Illinois.

Dr. Hancher, it is hoped, can represent our interests before the conferences still farther West. He hopes to be in Iowa and the adjoining sections of the country at this time and whenever the dates are practicable will cover the field.

Summer Meetings and the American University.

Each summer it has been the custom of Chancellor Hamilton to accept a certain number of invitations to address Camp meetings and Summer Assemblies and Institutes. This always offers opportunity to bring the American University to the attention and to lay it upon the hearts of the hearers. This past season has been no exception. Chancellor Hamilton visited quite a number of such meetings in the New England states and everywhere the cause was brought to the attention of the people. A more kindly reception than usual was given to the visitor and the literature which he distributed was received eagerly. A growing interest among the most conservative classes was manifested. Private conversation developed on every hand an earnest desire for our success.

MR. A. L. WILEY, of Wellfleet, Mass., is one of the most faithful and helpful members of that Tenth Legion who are gathering around the American University for the great forward march which soon is to begin. Mr. Wiley assists us in ways that astonish and always delight us. He has our deepest gratitude.

A Word or Two About Some of Our Workers and Friends.

Madame Mountford, the founder of the Mountford Biblical Museum in the American University, writes us that she has been lecturing with great success at the various Chautauques in Iowa, making Des Moines her headquarters. To the joy of all her friends she is restored to her wonted health and vigor. She sends a photograph of herself in the garb of the Shepherd Messenger from Palestine. The picture is very striking and most unusual and interesting. In a later issue of the COURIER we hope to reproduce it. Madame Mountford's permanent address is P. O. Box 323, Washington, D. C.

* * *

The editor of the COURIER, Rev. Albert Osborn, will present the cause of the American University at his own home Conference, the Genesee, meeting in Buffalo, N. Y., October 2, under Bishop Burt. It will be a refreshment to him to meet former friends and associates in the ministry, and to recall the memories of associations with Bishop Hurst in his literary and ecclesiastical labors while a resident in the Queen City of the Lakes.

* * *

Dr. Fred M. Stone, of the American University, preached for the Central Avenue congregation, Indianapolis, August 18th, during the vacation of Dr. Storms, pastor.

* * *

Dr. J. W. Hancher, after spending some strenuous months following the General Conference, is in Portland, having a short rest before he goes to his own conference in Iowa. Dr. Hancher looks fine and well. We are always glad to see his smiling and pleasant face. He is an inspiration.—*Pacific Christian Advocate*.

* * *

Mr. John P. Holland, lay delegate for the California Conference at the Minneapolis General Conference of 1912, and Mrs. Holland, of Sacramento, are on a trip which will carry them into New York, Connecticut and Delaware, and en route they will visit Vancouver, resorts in the Canadian Rockies and Winnipeg. They expect to return to California in October. Mr. Holland always will be glad to give addresses on Christian Education and the American University. He is a most winning and attractive speaker. We advise all our people to seize the opportunity to hear him.

A Memory of Bishop Warren, That Immortal Friend of the American University.

During the past seven years, from the most chance beginning, has grown up the custom of having Saturday night of Conference week devoted to a university supper, the aim of which is to stimulate interest in the University of Denver. This year the need of a chapel building had become apparent,

and that night the sum of \$10,000 was subscribed toward the same, to be followed by a campaign in the churches for twice or thrice as much more. On the opening day of the term, ground was broken for the Carnegie Library, and a few weeks later the sod was turned for the chapel, the walls of which are now going up. On the latter occasion Bishop Warren delivered the address, surpassing himself in a forceful and brilliant putting of the fact that education without religion is a headless torso, and that the church college, culminating in the chapel and what that building stands for, is the only complete and broad and free university possible in America. Civilizations that laid supreme emphasis upon only one phase of human nature did in ancient times become conspicuous—failures. Only those institutions, nations, civilizations, individuals, can enduringly succeed that make the largest room for the one true God.—*From a Report of the Colorado Conference Proceedings.*

Henry White Warren.

How high he towered among men of his time,
E'en as a snow-crowned Alp o'ertops the hill!
Nor spurned he lowly mind or halting will:
Reached pinnacles of truth and thought sublime,
Yielding no height attained, his joy to climb
Where broader vision with new power could fill
His hungry soul—yet on and upward still
Increasing manhood's weal with values prime,
To men at large he brought his quarry rare,
Entrapped on land or sea, in sky or air.
We saw him step from earth to sun and star
And breathless watched his soul-engaging wand,
Revealing realms of truth that stretched afar.
Rise, brother, teacher, prophet, seer, beyond
Enclosing walls of sense, of time, of clay,
Nor cease to draw us up the King's highway.

ALBERT OSBORN.

The American University—A Suggestion.

REV. JAMES C. BAKER, D. D.

(Reprinted from Zion's Herald).

It is now some twenty years since Bishop Hurst proposed that the Methodist Episcopal Church organize and develop a great post-graduate university in the city of Washington. Located at the seat of the Federal Government, with an endowment of at least ten million dollars, he hoped that this institution would stand far above all other institutions in the country, and secure for itself a place of unquestioned leadership.

The American University has a beautiful site, within easy reach of the very centre of the city of Washington. It will soon be less than half an hour from the library and the Capitol. It has one fine building completed and half of another. It has an ample acreage for libraries, lecture rooms, laboratories, and residence halls for men and women.

But the plan of this proposed university, with its very partial material realization, gives the Methodist Episcopal Church today its most serious educational problem. Many of the most earnest students of the educational situation are confident that there are some intermediate steps to be taken before Bishop Hurst's dream is realized. Indeed, an increasing number doubt the wisdom of trying to carry out his plans completely. The educational conditions have changed fundamentally, and the question now is—What can be done with the beginning of an endowment in the Federal City by the Methodist Episcopal

Church, which will be of service to this country, and which at the same time will be helpful to the church and will reflect credit upon the wisdom of its administration?

Before suggesting a possible way out, it is well to see how matters have changed educationally since Bishop Hurst first proposed his plan for an institution devoted exclusively to graduate work.

Such an institution was, in one sense, much more needed then than it is today. Then Johns Hopkins was still definitely in the lead of American universities providing graduate work. The present University of Chicago had not been established. Harvard had just begun to wake up to the desirability of establishing graduate work. So also Columbia, and other universities in the country were doing practically nothing in this field. Today, every university of large resources and strategic location considers graduate work an essential part of its scheme of instruction and investigation. The great State universities, Leland Stanford, Tulane, Northwestern, Western Reserve, have all incorporated this idea of graduate work in their scheme of organization. It is evident that this advanced work is no longer to be done at any one centre or by any one institution, but it is to be an essential part of every institution of real university rank and equipment in this country, as it is in Germany.

Further, the graduate university, developed without any reference to undergraduate departments, has not been a success. Johns Hopkins has found it necessary to establish an undergraduate department. The University of Chicago, which was going to emphasize primarily its graduate department, has seen its undergraduate departments overtake and surpass in attendance its graduate school; and even Clark University, which was very determined to have nothing to do with an undergraduate department, has finally succumbed, and Clark College has become an essential part of Clark University.

The logic of the situation surely points in this direction, viz., that a first-class college of the traditional type under the auspices of the Methodist Episcopal Church shall be developed in the city of Washington, and that out of this college shall be allowed to grow whatever departments for advanced work, professional or scientific, time and tide and circumstance may permit.

The time is ripe for such an institution in Washington *now*. Here is a population of a quarter of a million, which will undoubtedly steadily and rapidly increase until it reaches half a million, and perhaps twice that. And for this population the only college institutions are Georgetown University, under Jesuit auspices, and the Catholic University under the general auspices of the Catholic Church.

Now a college of this sort with a faculty of the right kind could impress the city of Washington and keep steadily before the country, as from one of the most strategic points, the idea that Methodism stands for scholarship, for the most advanced type of education, and thus create a helpful association in the minds of the people at large, in this country and in foreign countries, between the Methodist Episcopal Church and the intellectual movement of the time. We must do something, for the present situation is surely a reflection on the church, and has brought a certain amount of merited ridicule upon us.

Washington would undoubtedly support such an institution, recognizing that such a college would be of great service to its growing population. Hosts of young people all over the country would welcome it, who for one reason or another would like to study in the city of Washington. And these would come to it without appreciably diminishing the strength or clientele of any other Methodist institution. And surely in our present uncomfortable situation the church ought not to permit the jealousy or opposition of other church institutions to stand in the way of this great project.

It is worth noting that the Catholic Church with its customary sense of strategic situations, is demonstrating a wonderful interest in developing and strengthening its hold upon the Federal Capital City of the Union. The Catholic University is, so to speak, under the direct auspices and cherishing care of the Pope himself, and an effort is being made to bring all orders and all factions of the Catholic Church together for the combined support of this great undertaking, which is already attracting world wide attention. The Jesuits also have seized upon the Federal City for the location of one of their most efficient and influential institutions.

The Catholics understood how the whole country is easily

MASSACHUSETTS AVENUE—CROSSING SITE OF THE AMERICAN UNIVERSITY—LOOKING NORTHWEST.

reached from Washington. The Associated Press, the United Press, and all other similar organizations, have their agencies there, and are eager to snatch up even insignificant events and telegraph them to every village in the United States. This means a very great power and influence to a group of strong, vigorous men.

The argument advanced is not that Protestants ought to be doing things simply because their Catholic brethren are doing them, but that here is an immensely strategic situation which we have pledged ourselves to the church at large to occupy in an efficient educational way. A college is needed. Properly equipped and endowed, it would become one of the greatest forces for intellectual and moral uplift which could be set in motion; and by the influence which it would gain through the right kind of service properly rendered, it would secure for the church advantages far surpassing any outlay of capital or expended energy.

One word more. If the Methodist Episcopal Church, South, were willing to join with us and make this a common institution under the joint auspices of the two bodies, it would constitute a valuable means of bringing these two great organizations nearer together, and of cementing the ties already making for union. Here upon this neutral ground, neither South nor North, would it not be possible to bring together a very considerable body of young men and women, both from the North and from the South, who by their mutual action and interaction would advance the common interests of the church and country, which no other institution existing, nor any institution located elsewhere, could hope to accomplish with the same effort?

The above article we reprint from the Zion's Herald. The study so carefully made is a valuable and timely contribution. It shows that Dr. Baker has upon his heart this problem and is willing to give of his time

and strength to the solution of it. For this we are most grateful and here and now we record our gratitude. With peculiar pleasure we note the increasing interest and attention directed toward this enterprise. Naturally such a condition of public feeling pleases and greatly heartens us.

It was only a slip of the pen which made the article seemingly overlook the existence at the national capital of two colleges not under Romanist control. George Washington University has an historic College of Liberal Arts, which, as Columbian College, was founded by the Baptists. We fear that some would deem it injudicious to omit Howard University from his distinguished service in which university, with its great college and allied schools, the Methodist Episcopal Church has taken Wilbur P. Thirkield to be one of her Bishops. We do not suggest this *lapsus pennæ* as any occasion for controversy. Far from it. Our labor is not to become controversialists over the American University, but to seek to harmonize all shades of interest and feeling into a crystallized unit of active help. We hold no brief for controversy. Others in the past have found this. We do not care to depart from our irenic policy. We are engaged in the greatest single undertaking of Methodism, or indeed American Protestantism, and we seek only help.

In passing, however, we might add for the comfort of all that we are alive to our work, but we realize that all facts must be known. Not an hour passes without its burden of thought, care and study. As a result we are firmly persuaded, or, as one of the choice spirits of our day prefers to phrase it, we are distinctly of opinion that we are approaching a wise solution of the problem of the American University. When the matter has been analyzed and articulated a little more clearly, and the proper counsel and advice can have been secured to devise definite working details, and, when, take notice all! a little more consecrated money shall have been secured, we shall offer our thought and plan to the world.

Meantime, let us repeat it, we welcome a free and full discussion of the whole subject. This "COURIER" is an open forum for discussion. Thus shall we gain light and mutual confidence. We desire only the most searching and intelligent investigation of all the facts as they now exist. Then shall the truth be known and the right way be found, for as "iron sharpeneth iron, so a man sharpeneth the countenance of his friend."

Some Recent Roman Catholic Utterances.

The Roman Catholic is to wield his vote for the purpose of securing Catholic ascendancy in this country. All legislation must be governed by the will of God unerringly indicated by the pope. Education must be controlled by the Catholic authorities, and under education the opinions of the individual and the utterances of the press are included. Many opinions are to be forbidden by the secular arm, under the authority of the Church, even to war and blood-shed. *The Catholic World*.

[Extract of a sermon preached at St. Louis, Mo., June 30,

by the Rev. D. S. Phelan, LL. D., and reported in the *Western Watchman*.]

And why is it the Church is strong; why is it everybody is afraid of the Catholic Church? And the American people are more afraid of her than any people of the world. Why are they afraid of the Catholic Church? They know what the Catholic Church means. We of the Catholic Church are ready to go to the death for the Church. Under God, she is the supreme object of our worship. Tell us that we think more of the Church than we do of the United States; of course we do. Tell us we are Catholics first and Americans or Englishmen afterward; of course we are. Tell us, in the conflict between the Church and the civil government we take the side of the Church; of course we do. Why, if the government of the United States were at war with the Church we would say tomorrow, to hell with the government of the United States; and if the Church and all the governments of the world were at war we would say, to hell with all the governments of the world. They say we are Catholics first and Americans decidedly afterward. There is no doubt about it. We are Catholics first and we love the Church more than we love any and all the governments of the world. Let the governments of the world steer clear of the Catholic Church; let the emperors, let the kings, and the presidents not come into conflict with the head of the Catholic Church. Because the Catholic Church is everything to all the Catholics of the world; they renounce all nationalities where there is a question of loyalty to her. And why is it the Pope is so strong? Why is it that in this country, where we have only seven per cent of the population, the Catholic Church is so much feared? She is loved by all her children and feared by everybody. Why is it the Pope is such a tremendous power? Why, the Pope is the ruler of the world. All the emperors, all the kings, all the princes, all the presidents of the world today are as these altar boys of mine. The Pope is the ruler of the world. Why? Because he is the ruler of the Catholics of the world, the Catholics of all the world; and the Catholics of all the world would die for the rights of the Pope.

Can any patriotic American read the above fulminations and yet not hold that the hour has come to make at our national capital a firm, clear stand for Protestantism and civil liberty? For Romanist bane there is one good antidote—*Found and Endow the American University*.

But Why Not Duplicate the Rhodes Plan for Americans?

With the aid of wealthy Americans, Dr. Parkin, organizing representative of the Rhodes scholarship trust, hopes to duplicate on this side of the Atlantic the scheme of the South African millionaire, so that English students may be sent to American universities. As matters stand, European students are infrequently found at the universities of this country, while long before Cecil Rhodes founded his Oxford system many Americans had regularly gone abroad to complete their studies at the universities of France, Germany and England.

Back of Dr. Parkin's suggestion that English students be sent to this country is the obvious hope that through them England may be helped to acquire a better understanding of American life, American institutions and American modes of thought and work. To the average American who travels abroad the ignorance and misconception of the educated Englishman, Frenchman or German about things American are likely to be appalling. In spite of the numbers of their countrymen that have settled in this country, they seem to regard it as a land that by nature is somehow queer, monstrous or abnormal.

A few score of young Englishmen residing year after year in American colleges might serve as useful missionaries after they returned home and strengthened the bond of sympathy between the two countries as only intimate acquaintance and close fellowship can.—*New York World*.

No. 3

Doctor David Henry Carroll's Noble Bequest to the American University—The Value Not Yet Known—Wide Distribution to Many Worthy Causes.

The will of Dr. David Henry Carroll, subscribed to by himself on September 26, 1907, was filed for probate November 20, 1912. The executors and trustees named are, James Henry Smith, Alexander Warfield Monroe, and Daniel Hopper Emory. The exact value of the estate and hence of the several equal shares is at this time not known. We hope to be able in our next issue of the COURIER to make a more definite statement, based on careful estimates of the executors.

After the payment of the testator's debts and his funeral expenses the executors are to set aside \$40,000 worth of securities, and the income thereon shall be paid to the Misses Caroline Elizabeth, Ellen Virginia, Sophia Mantz and Florence Boyd, the four sisters of the testator's late wife. Upon the marriage or death of any of these the income is to be paid the survivors, and at the death or marriage of the last, the principal becomes the property of the American University, as also does all other property not otherwise disposed of by the will.

The residue of the estate is to be converted into cash as soon as can be conveniently done, unless the legatees are willing to accept in lieu of money stocks,

bonds or other securities of equal value. The residue is to be divided into 500 equal shares. These shares are to be distributed as follows:

To the American University, Washington, D. C., 200 shares for the erection of one of the buildings of the university or as an endowment fund to one of the colleges, according to the judgment of the trustees, in either case to bear the name of David H. Carroll.

For an orphanage for boys under the auspices of the Methodist Episcopal Church, to be established in Baltimore or its vicinity, 60 shares.

The initial steps for establishing such a corporation to be taken by the Preachers' Meeting of the Methodist Episcopal Church in Baltimore as soon after his decease as practicable.

Fifty of these shares to the Home for the Aged of the Methodist Episcopal Church, in Baltimore, for the erection of a building, or, if that be deemed impracticable, then an addition to the present building, in either case to be known as a memorial to Mrs. David H. Carroll.

To the Board of Foreign Missions of the Methodist Episcopal Church, 25 shares.

To the Board of Home Missions and Church Extension of the Methodist Episcopal Church, 25 shares.

To the Methodist Preachers' Aid Society of Baltimore, 25 shares, the income only to be used.

To the trustees of Dickinson College, at Carlisle, Pa., 25 shares, to be known as the David H. Carroll endowment fund,

the income on the fund to be used toward the support of a professorship in college.

To Goncher college, in addition to a gift already made of \$20,000, 10 shares.

To the Deaconess' Home of the Methodist Episcopal Church of Baltimore City, 15 shares, to be known as the David H. Carroll endowment fund, the income only to be used.

To the Trustees of Mount Vernon Methodist Episcopal Church, 15 shares, to be used in connection with the proceeds from the sale of their present parsonage and the sale of the ground rents held in trust to offset a ground rent on that property, for the purchase of a suitable lot and the erection of an attractive and commodious parsonage and for such improvements or expenditures as the trustees may deem desirable upon the present church building. Whatever remains after expenditures for new parsonage and possible improvements of the church building is to be held as an endowment fund, the income to be used in support of the minister in charge.

To the Hospital for Consumptives of Maryland, 10 shares, for the erection of a building to promote the benign work of staying the ravages of

tuberculosis, to be known as the David H. Carroll Memorial.

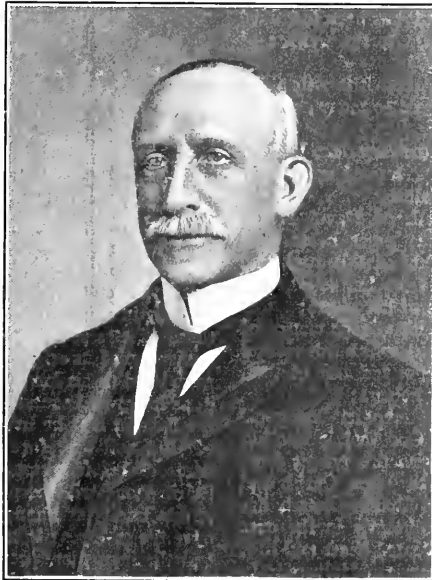

To the trustees of Morgan College, 10 shares, to be known as the David H. Carroll Endowment Fund, the income only to be used.

The Board of Education, Freedmen's Aid and Sunday Schools of the Methodist Episcopal Church, 10 shares.

To the Woman's Foreign Missionary Society of the Methodist Episcopal Church, incorporated under laws of New York, five shares.

The Woman's Home Missionary Society of the Methodist Episcopal Church, a corporation under the laws of Ohio, five shares.

To the American Bible Society, established in the City of New York, five shares.

DOCTOR DAVID H. CARROLL.

To the Nursery and Child's Hospital, Franklin and Schroeder streets, five shares.

The testator gives to the Misses Caroline Elizabeth, Ellen Virginia, Sophia Mintz and Florence Boyd such portions of household furniture, pictures, plate, etc., as may make comfortable a house of suitable size for them. The remainder of such property the executors are to distribute among the testator's sisters, nieces, nephews and other relatives according to their best judgment.

The will states that as a considerable time will elapse before the final and complete division of the estate, it is suggested that a partial division, or a percentage distribution, may be found desirable within a year of his death, to be followed in due time by a final and complete partition.

Resolutions of the Board of Trustees on the Death of Dr. David Henry Carroll.

WHEREAS, in His wise Providence our Heavenly Father has seen fit to remove from us our friend and fellow-laborer, Dr. David Henry Carroll; and

WHEREAS, this eminent Christian citizen, this noble and beloved servant of the Church has been identified with affairs of the utmost moment to the welfare of humanity; and

WHEREAS, the cessation of his activities will affect so many movements of progress and so many channels of Life's higher interests; and

WHEREAS, we, the Trustees of the American University, peculiarly are bereaved in the loss of our chosen and long tried leader; be it, therefore,

Resolved, First, that the death of David Henry Carroll has removed one of the great hearts and princes in the Christian citizenship of this land, and that the Church has had taken from her one of the most loyal and most helpful sons of her altars;

Resolved, Second, that the multitudinous causes of righteousness and the Kingdom with which this worker so long had identified himself, have lost one of their most generous and far-visioned helpers;

Resolved, Third, that the Methodist Episcopal Church is grateful to Almighty God that it was her privilege to raise up and to cherish this potent force of a heart perfectly dedicated to Jesus Christ and His purposes, and that she, as his Mother Church, has been permitted to share so munificently in the ever expanding beneficence of his dedicated heart and life;

Resolved, Fourth, that the American University in this death of the President of her Board of Trustees suffers an irreparable loss, and that the long years of patient and painstaking labor given by President Carroll with unstinted zeal to forwarding the University enterprise have placed this Board under a sense of personal obligation and gratitude which never can grow less, and have set for all friends of the American University a high and inspiring example;

Resolved, Fifth, that the extraordinary provisions for the future welfare of the University which President Carroll, through his will, has made, are accepted by this Board as a sacred trust which shall be administered with the utmost fidelity to the wishes and spirit of our benefactor;

Resolved, Sixth, that we, as the personal co-laborers for many years with this our trusted leader, do now and here record our deep personal affliction at his death, and that we feel moved by his devotion only the more earnestly to carry on the work which has dropped from his hands;

Resolved, Seventh, that this expression of our sorrow and grief in the death of our brother and friend be spread upon the records of this Board;

Resolved, Eighth, that a copy of these resolutions be published in the AMERICAN UNIVERSITY COURIER and that a second copy be sent to the relatives of Dr. Carroll.

On this eleventh day of December, in the year of Our Lord, one thousand nine hundred and twelve, unanimously adopted by a rising vote.

CHARLES W. BALDWIN,
Secretary.

Bishop Cranston's Tribute to Dr. Carroll.

A remarkable man was David H. Carroll, the late President of the Board of Trustees of the American University. He was remarkable in his native independence of character, judgment and decision; in his penetrating and yet comprehensive vision of intricate affairs; in his firm but ever urbane adherence to what he held to be right either in commercial ethics, social and civic obligation, or religious conviction.

As to the University his was a most wholesome obstinacy of purpose because it was also a most benevolent type of fixedness. He backed his judgment liberally in noble gifts to the University all through its times of stress, and never lost faith in the ultimate realization of its original conception. His last thoughts were loyal to his long cherished conviction concerning it, as his great bequest reveals. One cannot put away the thought that he lived and wrought as in the sight of God and therefore ever in sight of the highest needs of his fellowmen. The glory of his Master's Spirit shone with peculiar significance through some of his latest benefactions. It seems now as if it were the gathering halo in which his soul was to pass into the immediate presence of the Christ he had so long loved and so faithfully served. And now we are looking upward for some divine token that the passing of this faithful friend of the University is somehow to put forward more rapidly this great enterprise that filled so large a place in his heart and life.

Aldis B. Browne, President of the Board of Trustees of the American University.

Mr. Aldis B. Browne, of Washington, D. C., has been chosen to succeed Dr. Carroll as President of the Board of Trustees of the American University. A royal man has passed away, a royal man takes his place. The selection of Mr. Browne at this particular juncture is significant. Mr. Browne stands for a cer-

tain policy and for concrete, definite things in connection with the university enterprise. The choice of him as President of the Board, therefore, means that at last this policy shall be put into operation. It means a bold determination to open the doors of the institution at all cost. All who know Aldis B. Browne applaud the wisdom of naming him as President of the Trustees at this time. He is the embodiment of wise zeal and Napoleonic audacity for achievement. In the forefront of forward movements for good in his community, enjoying the personal friendship and perfect trust of men in highest places, widely affiliated with people of all classes, one of the great corporation and constitutional lawyers of the land, in the flower of his manhood and vigor, ripened in judgment through long contact with big affairs, optimistic in temperament, a natural leader of men, profoundly spiritual in his impulses, of lofty vision and unquenchable faith, a personal dynamo for real service—such is Aldis B. Browne. Under his fearless but adroit hand the doors so long locked shall be opened. Let every friend of this enterprise rejoice and be grateful for the leader whom Providence has been shaping and now offers for this epochal hour.

R. cent Gifts of Money.

(Acknowledgment in this column of sums less than \$5.00 is to be regarded as a receipt therefor.)

General Fund.

\$250.00, T. D. Collins; \$200.00, Harry E. Hopper; \$100.00 (each), W. S. Pilling, C. W. Welch, F. E. Masland, C. W. Masland; \$50.00, John Gribbel; \$25.00, Dr. Eudora V. Keen; \$20.00 (each), J. R. Peters, Mrs. Lottie B. Lamb; \$10.00 (each), C. H. Remede, G. B. Hughes, A. L. Wiley, James Peters; \$5.00 (each), F. C. Locke, Maude J. Lester.

Love's Greatest Gift.

Into the arteries of thy thought and will
May Christmas pouring love and peace now fill
Mind, heart and tongue with its own vital tide,
And carry joy from Yuletide ingleside,
Nor cease its kindling touch and ardent glow
Until the New Year's round it shall o'erflow.
Each happy year unto its follower tell:
Love's greatest gift to man—Immanuel.

ALBERT OSBORN.

American University Takes Epochal Action.

One of the most important meetings ever held of the Board of Trustees of the American University of Washington, D. C., was the annual meeting on December 11, 1912. The spirit of the meeting was most hopeful, aggressive and enthusiastic.

The following members were present: Bishop Cranston, who presided, Justice T. H. Anderson, Dr. Charles W. Baldwin, Mr. Charles C. Glover, Chancellor Franklin Hamilton, Mr. Benjamin F. Leighton, Dr.

J. C. Nicholson, Mr. W. S. Pilling, Mr. Thomas W. Smith, Mr. George W. F. Swartzell, Mr. George F. Washburn, and Dr. W. R. Wedderspoon.

A reorganization of the Board, necessitated by the death of Dr. D. H. Carroll, long its president, was effected. The officers selected are, President, Hon. A. B. Browne, of Washington, D. C.; Vice President, Judge B. F. Leighton; Secretary, Dr. C. W. Baldwin; Treasurer, Charles C. Glover, President of the Riggs National Bank. Two new trustees were elected. Bishop W. F. McDowell was present as adviser to the Board.

Chancellor Franklin Hamilton presented as a working plan for the University a system of higher education which many of the trustees present felt was of great importance and that it would have a far-reaching formative influence on higher education in this country. The adoption of the plan will eliminate the American University from competition with all other universities and will give it a special and distinctive sphere of action of the broadest scope. The proposition is that the American University shall specialize in a most important field not now covered by any institution of learning. The system thus outlined will bring the American University into close contact with all the educational institutions in this country. It also will secure, it is believed, the most hearty cooperation and effective relations with these institutions and will serve as a tie and a most useful intermediary between the educational institutions of the United States and those of Europe.

The plan as presented was adopted in principle and was referred to a special committee for study and recommendation. The Committee is to report for final action at the May meeting of the Trustees. The Committee consists of Hon. A. B. Browne, Dr. C. W. Baldwin, Bishop Cranston, Justice Anderson, Bishop Hamilton, Bishop McDowell, as adviser to the committee, and Franklin Hamilton.

The Board also took other action of importance and interest. It extended to the trustees of Goucher College at Baltimore a proffer of cooperating assistance. While expressing deepest sympathy with the present campaign in behalf of Goucher College, the trustees of the American University stated that should this campaign fail, they hold themselves in readiness to cooperate with Goucher College in such measures as may be instituted lawfully for the preservation of the College and for the continuation of its usefulness. The trustees of the American University felt warranted in this proffer not only by the fact that they control ample grounds and buildings that easily may be made ready for purposes of instruction, but also by the added consideration that Washington City geographically is related conveniently to the constituency of Goucher College.

Tribute of the Board of Trustees to Wilbur L. Davidson.

In the decease of Doctor Wilbur L. Davidson the Board of Trustees of the American University has lost a highly esteemed and useful member, and a brother beloved. The departure of this coworker leaves a large vacancy in the ranks of those who seek to serve the cause of righteousness and truth.

His student life at Scio College and at Drew was marked by the same genial bonhomie that won its way into many hearts through his later career to three-score years. A lover of music, and no ordinary singer himself, he became the patron and helper of all who gave themselves to the tuneful art. The son of a preacher and of a mother early sainted, whose spirit he ever regarded as his own guardian angel, he promptly obeyed the call to the gospel ministry. His pastorates in Cleveland and other places in Ohio were blessed with the conversion of souls and the upbuilding of the churches. Called to the special field of the South in the service of the Sunday School Union, he proved himself a highly useful factor in that splendid work of the church for her children and youth.

His first connection with the American University was in 1898, when he was elected Field Secretary, his own native state, Ohio, being specially assigned to him. He served one year in this capacity and in 1899 was elected Secretary of the University. For nine years he held this important post of duty, during the period in which occurred the break in health and the death of our first Chancellor, Bishop Hurst, and the sudden decease of Bishop McCabe, our second Chancellor. The weighty responsibilities that thus fell upon his shoulders were accepted and borne with loyalty and efficiency.

His interest in Chautauqua work was enthusiastic and intense. Beginning many years ago in his own platform addresses and lectures, it grew into the formation of an extensive and influential bureau to supply talent to churches, associations, and Chautauquas, and became a great system of popular entertainment and improvement. He proved himself to be a past-master as a builder of programs and as a discoverer and employer of young and able platform artists.

Doctor Davidson was a member of this Board of Trustees of the American University from 1905 to the time of his death. His memory is precious and his work goes on in the sweet and enduring influence emanating from the life of a Christian gentleman. His optimistic outlook on earthly affairs has merged in the eternal vision of heaven's verities.

Our warmest sympathies go out to the noble woman who wrought with him in his varied and strenuous labors, and to the three sons whose greatest inheritance is the good name and example of a loving and devoted father. We pray the Heavenly Father's richest and continuing solace and the presence of the great Comforter in their home and in their hearts.

DOCTOR WILBUR L. DAVIDSON.

David Henry Carroll.

REV. B. F. DEVERIS.

David Henry Carroll was born in Baltimore County, Maryland, July 11, 1840, and died in Baltimore City, November 15, 1912.

In his early childhood he manifested strong spiritual traits, an inheritance from good parents. He early became interested in the work of the Methodist Episcopal Church of which he was a lifelong member. He entered its ministry and served in a very successful way several charges, one of which was Carlisle, Pa. While serving the church here he graduated from Dickinson College, afterwards becoming one of her trustees and from her receiving his Doctorate in Divinity. Shortly after this, his father dying, great and grave responsibilities were placed upon him.

Believing he could serve the church in connection with them, he retired from the active ministry, but ever took a keen and deep interest in the affairs of the church.

He early became actively engaged in the work of various Societies and Boards of the Church and all of these soon felt the influence of his energy and superior judgment. As a layman he was twice selected to represent the church in the General Conference. The call of the church at home or abroad was always the call to duty. To serve was a delight and a privilege.

Among the men of his day and generation he stood out as a constructive force. He lived above the commonplace and sought his friends and did his work on the highest levels. He was a diligent student of the affairs and movements of his day.

He did not reach his conclusions with a leap and a bound, but with penetrating insight weighed every detail, then with one sweep of his excellent judgment would summarize them all and take his stand. He spoke not on impulse but on sincere conviction.

His positive stand for righteousness in business, church or state, won for him the lifelong respect and the lasting admiration of his colleagues and fellow-citizens.

His sterling qualities were soon recognized in the business world. He was elected to and filled in a distinguished manner many positions of honor and grave responsibility. He

was thrice elected to the Presidency of the Merchants and Manufacturers Association of Baltimore. He was selected as a director, then as secretary, then vice president and then to the presidency of the Cotton Duck Corporation.

He was bank president and organizer. He served as director in many of the financial institutions of the city of Baltimore.

He was a philanthropist of broadest mind and most generous heart. His deeds of kindness and of charity will never be fully known until the recording angel shall read the deeds of this man done in the name of his Lord and ours.

The history of many a chapel and church on the western plains of our country, in his native state and along the mountains and plains of South America, and also on the continents of Europe and Asia, will never be accurately written without the mention of the name of David Henry Carroll.

He was a firm believer in those eternal principles upon which a true humanity can be constructed. He stood as a strong wall against the false. He hated cant and despised hypocrisy.

He loved his fellow men; in life, he sought to serve and lead them; dying, he left all of his earthly fortune to advance their interests through the ages yet to come.

The lasting work he has done for humanity will shine out clear and bright when many another monument built of marble or granite shall have crumbled into dust.

\$200,000 More Will Open the American University.

Two hundred thousand dollars more, when paid into the treasury, will make possible the opening of the American University at Washington, District of Columbia. The financial policy, behind present efforts for this institution, is the determination to raise \$1,500,000, whereof \$500,000 when raised shall be used for the immediate opening of the University to students. Toward this first working unit of \$500,000 there has been paid in roundly \$300,000. This has been in addition to many good subscriptions secured. \$200,000 more is necessary. When this remaining \$200,000 shall have been received the institution will be opened.

The actual working scheme through which the American University shall be put into operation is being studied and evolved with utmost care. While it may be stated that this plan as finally worked out will include unusual features, the plan will be adapted to modern educational needs. It will commend itself to wise educational leaders.

Two Hundred Thousand Dollars more is all that now is needed to set into its initial stage of working educational life the great enterprise planned at the National Capital. A contribution to assist in making up this amount will be, therefore, of vast strategic help. It will serve to render useful and immortal all other funds now, and yet to be, in the possession of the University. He who gives now, gives twice; he lends a hand to the culminating effort toward the creation of an institution which is fraught with the welfare of the entire Nation.

The growing interests and expanding programme of the University keep Chancellor Franklin Hamilton busily occupied with its multiplying details, but he finds time daily to turn over all receipts from contribu-

tors to the national banking house which is the depository of the University and the custodian of its endowments.

Massachusetts Avenue—Looking Eastward from the University Site.

The view of Massachusetts Avenue presented on page seven of this issue is taken at the crossing of that great thoroughfare with Nebraska Avenue on the east front of the University site. The dip downwards extends by an easy grade of beautiful macadam to the viaduct across the Foundry branch and the graceful rise beyond carries the eye to the vanishing point near Wisconsin Avenue—about one mile in all. At the right appears "Westover," the summer residence of Mr. Charles C. Glover. The structure on the left is an imposing house in the style of an Italian villa just completed. Still farther to the left peering through the stately oaks, are the gables and roof of the Cathedral School for Girls, occupying the northwest corner of the Protestant Episcopal Cathedral grounds. This portion of this leading boulevard of the National Capital is proving a favorite course for driving, automobile riding and pedestrian tours. Taken with the still newer portion opened as a carriage road through the University site and beyond to the District line, this majestic avenue now sweeps from the Eastern Branch of the Potomac to the Maryland line, right through the heart of the city. Along this broad highway are found some of the largest and most celebrated homes, public institutions and picturesque scenes of Washington.

Action of the Trustees of the American University Concerning Goucher College.

Recognizing that under the noble and generous leadership of Dr. John F. Goucher, the founder and long the President of Goucher College, the rapid growth of that institution and the successful effort to bring it to a place in the first rank of American colleges for women have vindicated the present indebtedness of Goucher College, and realizing that this College is an honor to the Church and of extraordinary value to the womanhood of the country and especially to the higher education of womanhood in the South, we desire to express our sympathy with the Trustees of Goucher College in their campaign to discharge the debt and to secure sufficient endowment to meet annual deficiencies in income.

In expressing this sympathy with the trustees of Goucher College we cherish the hope that they will succeed in their financial endeavor. But in the event of their failure, then, for the conservation of all that has been gathered of substance and all that has been achieved in prestige in this institution, and for the sake of the Church and the cause of Christian training

MASSACHUSETTS AVENUE—LOOKING EASTWARD FROM UNIVERSITY SITE.

and for the sake of those who having there received their training are burdened with anxiety for the future of their Alma Mater, we desire the trustees and friends of Goucher College to understand that the American University holds itself in readiness to cooperate with them in such measures as may be instituted lawfully for the preservation of the College and the continuation of its usefulness in behalf of those in whose interest it was established.

We feel warranted in this proffer by the fact that the trustees of the American University control ample grounds and buildings that easily may be made ready for purposes of instruction and also by the fact that Washington City geographically is located conveniently to the constituency of Goucher College.

Excerpt from the minutes of the Meeting of the American University Trustees held on December 11, 1912.

(Signed) CHARLES W. BALDWIN,
Secretary.

A Stronghold at the National Capital.

The incompleteness of the American University at Washington is not cause for shame, but it is the occasion of much regret. So many educational enterprises have occupied the attention and demanded the contributions of our people during the last decade that the strategic importance of the American University at Washington has not impressed them as profoundly as it should. The present effort is to secure \$1,300,000. As soon as \$500,000 has been raised the University will be opened to students. About \$300,000 of this amount has already been secured, together with many valid subscriptions. Not until the half million dollars has actually been paid in however, will the institution open its doors. It is very important that ready response shall be made to the appeals now being issued for financial aid. Those who give quickly double the influence of their benefactions. Chancellor FRANKLIN HAMILTON says that, while the growing interests and expansion program of the University keep him busily occupied with its numerous details, he still "finds time daily to turn over all receipts from contributors to the national banking house, which is the depository of the University and the custodian of its endowments."

We make no apology for bringing to the attention of our readers nearly every week the financial requirements of some educational institution. We do not believe that a church as prosperous and generous as ours will tire of being shown

opportunities for wise investment. The American University is in no sense a local institution and has a just claim upon the consideration of people living in every part of the United State. We trust that the \$200,000 requisite for opening the doors of this broadly planned but inadequately endowed center of advanced learning will speedily be obtained.—*An Editorial in the New York Christian Advocate.*

Editorial in the Central Christian Advocate on the American University.

In 1890, three years after the Catholics commenced their immense university in Washington, Bishop Hurst acquired the land for our American University. The Catholic colleges are all open. Bishop Hurst foolishly obligated himself and the nascent educational foundation not to open it for instruction until five million dollars' endowment had been secured over and above its real estate; the General Conference then called also for five millions more for buildings and equipment, ten millions in all; and what was no less foolish, it was agreed that only post-graduate studies should be pursued.

Was ever anything so preposterous? Never since time began was a more utopian scheme built on mist. It is true that Stanford University and the "Rockefeller University" at Chicago began with such an endowment; but these were gifts from single individuals and were monuments, as it were. There was a difference.

The program entered into by Bishop Hurst was one which was to build a plant to cost five million dollars and to endow it with another five millions, and then, and not till then, as we have observed, open the institution only to post-graduate studies. Of course that was a house of dreams. It was an impossibility. It rested upon the chief impossibility that no such conception of a university exists, and it is impossible for it to exist. If Johns Hopkins started out on that plan it soon found out that a purely post-graduate institution is an impossibility. In the second place, the Church never did respond to a call for any ten million dollars for purely post-graduate studies for the favored few. One reason, say, its educational system, from Maine to California, was so slowly and painfully rising to the equipment necessary to existence. We are still in the throes. The next decade may see the Church ready to take hold of the American University and really and comprehensively establish it as a great Protestant foundation of learning at the heart and brain of the nation. Even then we will be a long while catching up with the Catholic institution, which is all the time nightly strengthening and enlarging its border lines.

Columbia University now has thirty-two million dollars productive funds and an annual income of three and a quarter millions. Harvard has twenty-four and a half millions and an income of two and a half millions. Chicago has sixteen millions productive and an income of two millions. Five state universities have an annual income of from \$1,500,000

to \$2,000,000. This is the deep water we must wade in to find a foundation for a great ultimate institution anywhere, particularly at Washington.

The report we have of our American University indicates an optimism on the part of its officers. Certain restrictions have now been removed by General Conference. It now stands that when \$500,000 endowment is in hand and \$10,000 are spent in building the College of History building educational work will be begun.

There is a great opportunity in Washington. But it will cost money to meet it. When will that money pour in? Would the torrent might flow this year.

Helping Hands from Influential Leaders.

We draw particular attention to the special and very gratifying announcement on page 20 of the American University. We trust that its appeal will not fall on heedless or deaf ears. Too long has this enterprise halted—much to the discredit of our Church. If there is a way now really pointing to a successful issue and to the opening of the college, there should be a cordial response and a concerted endeavor to attain the long-desired victory.—*Western Christian Advocate*.

We learn through Chancellor Franklin Hamilton that \$200,000 more, when paid into the treasury, will make possible the opening of the American University at Washington, District of Columbia. * * * The plan for opening the doors of the American University is being carefully evolved. The plan when fully completed will mean an endowment of \$1,500,000. The American University is laid out upon a broad and adequate plan.—*California Christian Advocate*.

Brief Tributes to Doctor Carroll.

Our long and close association with Dr. Carroll gave to us all an intimate knowledge of the high ideals he steadfastly maintained in civic and business life, his capable, generous and vigorous devotion of his time and his means to the advancement and general welfare of the city of Baltimore, his ever-readiness to safeguard with jealous zeal every institution, business or civic, with which he was identified.—*Directors Continental Trust Company, Baltimore*.

We join with multitudes in admiration of his intelligence, faithfulness, and efficiency, which secured him a foremost place in religious, business and social enterprises of this community and beyond. Nevertheless, we mourn also, as those who have lost a great friend and ever-ready helper.—*Faculty of Morgan College*.

Versatile and accomplished in all the operations of his life, he was preacher, merchant, banker, manufacturer, director, speaker as the occasion required; well rounded, well informed, of large discernment and vision, and of wise, sober and comprehensive judgment. He saw to the end of things. He was, moreover, an indefatigable worker; nothing seemed to weary or tire him. His step, quick and alert, was a feature of the streets of Baltimore.—*Dr. C. Herbert Richardson*.

It has been a constant marvel to those associated with him in connection with the League work that he was able to do so many things so well, and in everything he was painstaking and thorough, applying the full measure of his splendid business ability to every religious and charitable enterprise with which he was connected. While gentle and lovable, he was brave as a lion and never flinched even when the League contests were stirring up the bitterest opposition from men who were his associates in many business enterprises. No suggestion of compromise ever came from him. He was a warrior unafraid.—*The American Issue*.

In church and in civic life he was abundant in labors, faithful to every interest confided to him, efficient in every undertaking with which he was associated, and with a heart tender and true and full of love and sympathy for all.

Few of the citizens of Baltimore have been so largely and so closely identified with its welfare and its achievements as he. He was always found on the side of its best and noblest interests.—*Baltimore Methodist Episcopal Preachers' Meeting*.

He was wise in counsel, prudent in planning, efficient in administration and fearless in carrying out settled policies. Undismayed by opposition, unruffled by criticism, unswerving in loyalty to principle, patient, kindly, sympathetic with suffering, charitable toward the weak, high-minded, great-hearted, he was intolerant only of sin and selfishness.—*Anti-Saloon League of Maryland*.

Resolved, That this board hereby record their appreciation of his services to this bank and their individual and collective respect and affection for him and their recognition of his sagacity as a counselor, his astuteness and energy in business, his long-continued usefulness to the community as a business, financial and philanthropic leader, and of his kindly and sympathetic tactfulness and sincerity in all his human relationships.—*Directors National City Bank, Baltimore*.

From Our Book of Life.

It is our custom and pleasure, from time to time, to publish excerpts from the letters and suggestions of friends concerning our work. We urge our helpers and well-wishers everywhere, to write us, incorporating into definite propositions their views and ideas concerning this enterprise. We withhold the names and addresses but believe that such contributions from the living thoughts and hopes of our friends will be of interest to many. Naturally we do not, in any way, hold ourselves responsible for the opinions of our correspondents. But honest convictions clearly stated cannot fail to be thought-provoking.

Such are the ideas embodied in a letter from which herewith we print selections. The letter is from a well-known man and leader of men, endowed with high gifts and graces of which not the least is vision.

Ever since I missed seeing you at * * * * Conference I have had in mind the two things I would have spoken about to you.

1st. When we can let Protestant friends see that the American University is to be at Washington City, as thoroughly devoted to Protestant life in this nation, as the Roman Catholic University at Washington is to the life and advancement of Romanism, we will receive thousands of dollars * * * *

We can let them see this by bringing into its "Board of Control" representative men (and women) from all the Evangelical Churches. This we can do—and still if necessary have the sure guidance of its affairs * * * * as it must be under some recognized leader.

Under some National Protestant recognition, endorsement and cooperation the ten millions of required money for its inauguration would speedily come. Enlarge your "Boards," your Trustees or make an Advisory Board of Control in which all Protestant Evangelical Churches have representation. If necessary to this to give each a separate "Hall of Theology"—Amen. It will not be needed in "Letters" or in "Philosophy" to have separate halls and may not be long-necessary in true Protestant Evangelism. [Here certain well known Americans of large means are named] and many of less financial note could be persuaded to endorse and aid such a National Light-house of Protestantism—for post-graduate students. We need such a National School if we are a Protestant Nation of seventy millions of peoples and are to hold our own.

The American University Courier

Entered as second-class matter February 27, 1909, at the Post Office at Washington, D. C., under the Act of July 16, 1894

Volume XIX

Washington, D. C., March, 1913

No. 4

HON. JOHN A. PATTEN.

Hon. John A. Patten Becomes a Trustee.

The addition of the Hon. John A. Patten, of Chattanooga, Tenn., to the membership of the Board of Trustees of the American University, brings a distinct enlargement to the forces of that body. Mr. Patten combines in his personality fine business talent, with far visioned and statesmanlike judgment. By the exercise of his native powers he has come to the forefront in the manifold lines of his activity. Early becoming a Christian lad, he devoted his service to God and the Christian Church, and has been largely instrumental in placing the first Methodist Episcopal Church of Chattanooga, once weak and struggling for existence, on its present splendid foundation. Through the organization of the Laymen's Association in the Holston Conference, Mr. Patten has led in a marvelous work of debt paying and church expansion during the past twelve years, and similar fine results in the church at large have been secured under the presidency of Mr. Patten in the General Laymen's Association since 1908. As Chairman of the Commission on Ministerial Support Mr. Patten has accomplished substantial gains in the funds for the maintenance of the preachers and their families.

MR. CALVERT CRARY.

Mr. Patten's relation to Christian education long has been of a vital and intimate kind. He is a member of the Board of Education of the Methodist Episcopal Church, of Goucher College, and of the University of Chattanooga, which he also serves as Treasurer. He interested himself in the publications of the church, especially in the Methodist Advocate Journal, the organ of Holston Conference. He became a member of the Book Committee in 1904, and has been Chairman of that most important body since 1910. He was a member of the General Conferences of 1900, 1904, 1908 and 1912, and also on the great committees of Episcopacy and on the Book Concern.

While identified with so many departments of church life, for the demands of each of which he gives of his time, his thought and his means, Mr. Patten is deeply interested in the civic business affairs of Chattanooga and vicinity, having active and responsible relations with several banks, industrial and transportation houses, the Chamber of Commerce, the Young Men's Christian Association and the Hamilton County Board of Education. We are happy to be able to present in this issue of the COURIER the face of this new trustee who thus cheerfully accepts an additional burden in his broad and generous spirit of service to the cause of the higher Christian Education.

Calvert Crary, Our New Trustee from Massachusetts.

The American University chose wisely in electing as a trustee Mr. Calvert Crary of Newtonville, Mass. His picture on the front page of the COURIER shows him to be a young man. Yet he is of tried business sagacity and ripe experience. From youth he has been associated with men and with corporation interests belonging to the empire of business in its most masterful scope. His father, of noble memory, was Mr. Horace Crary of Binghamton, N. Y. Calvert, the son, was fortunate to win for his wife the charming daughter, Miss Ruth, of his father's great business associate, Mr. James Horton. These two, Horace Crary and James Horton, had large place in the later developments of tanning and the leather trade in this country.

A sturdy and royal family was that of Horace Crary. The wife and mother was a godly and devoted woman whose benefactions were as beautiful as her life and spirit. A brother and older sister of Calvert Crary worthily maintain the family traditions in the old home city of Binghamton. A younger sister married a minister in the Methodist Episcopal Church.

Boston and Newtonville became the home of our friend. In the local church of Newtonville, Calvert Crary put his vital and contagious manliness behind every interest. It is not to be wondered at that the Newtonville Church has been lifted to the first grade in the New England Conference.

Mr. Crary, through his wide business interests, has friends and acquaintances everywhere. It was characteristic of his nature that shortly after his election as a trustee of the American University Mr. Crary appeared at the university office in Washington, offering help. He is to accompany Chancellor Hamilton on a visit to one of the university properties in the west, which requires the attention of an expert in forestry. Of such must have been David's mighty men. Certainly with workers and leaders like Calvert Crary to speak for her in the gate, the American University faces a new and fairer day.

When choice young men like this one bring their lives and their powers to be suffused with the vision of what to the nation can be made to mean the AMERICAN UNIVERSITY, the great hour of the University indeed it at hand. Thus captained, quenchless will be her strength, imperial her watchword—"For God and Fatherland."

Congress Provides Car Line to American University Grounds.

President Taft as one of his last official acts signed the Act of Congress which provides for an electric car line from the grounds of the American University to the heart of the city of Washington. The act says that the construction of the line is to begin within six months after the passage of the act and that cars must be running within two years. It is understood,

however, that the line can be completed earlier, at such time as the university shall be ready to open its doors. It is because of this fact that the campaign to raise the additional \$200,000 enrollment now needed for opening the university is being pushed with zealous determination.

Thus the long struggle to give the university proper transportation facilities has been crowned with success. Running out along Massachusetts Avenue extended, the new car line will traverse the university grounds and continue to the District line. Soon, therefore, the great university campus on its height overlooking the national capital will be directly accessible from the down town district and the Union Station.

The success of the legislation was due largely to the untiring and enthusiastic labors of Senator Dillingham in the Senate and of Ex-Speaker Cannon in the House. To both of these and to all other friends who in the long hard fight have stood by us and assisted, we here and now render hearty thanks. Words cannot tell what this car line will mean to our work. As a Congressman expressed it, "You are now on the map."

In discussing the proposed new electric car line, one of the public prints of Washington published a map showing the route and commenting on the whole outlook. Indeed, since the passage of the car line bill by Congress, there has been more comment and discussion of the American University in the public press than during years preceding. From the above mentioned illustrated article in the *Washington Star*, we quote the following interesting paragraphs:

By the building of about two miles of street railway, forming a branch of its present system, the Washington Railway and Electric Company will do much, it is believed, in developing a large tract of country that lies between Wisconsin avenue and the grounds of the American University and the bounds of the District. The law which has just been enacted by Congress authorizes the construction of such a branch along Macomb street west of Wisconsin avenue and thence for the balance of the distance along Massachusetts avenue beyond the University to the District bounds.

The opening up and improvement of Massachusetts avenue nearly the entire distance has already been done and a good deal of the property in the section has been subdivided into building lots. In fact when the University project was started several subdivisions of land were made, but owing, mainly, it is thought, to the lack of communication with the city and the want of ready accessibility the improvements did not progress as rapidly as was believed the character of the section warranted.

Since the extension of Massachusetts avenue through to the District limits additional farm lands have been acquired and arrangements made for providing for house building on an extensive scale. It is expected the building of the railway and the carrying out of plans of development of the land will go on together, so that by the time the cars are running there will be preparations made for a considerable population.

Plans are being discussed for opening the University during the coming fall, so that there will be an immediate need for railway connections with the city not only for the convenience of the students and professors, but also for strangers in the city, who will wish to visit an institution that has been founded through the co-operative efforts of such an influential body as the Methodist Church.

With a through service either via Wisconsin avenue through Georgetown or across country via Connecticut ave-

nue bridge, both the region of the American University and that lying east of Wisconsin avenue through the locality now being developed by the Massachusetts Avenue Heights Company will be provided with direct railway connection with the center of the city.

Hon. John Fritz and His Bequest.

One of nature's noblemen passed from the sight of men in the decease of the Hon. John Fritz, which occurred on February 13, 1913, at his home in Bethlehem, Pa. He had attained the great age of ninety years, all filled with an earnest good will and a useful and enterprising industry. For the last eighteen years he was a trustee of the American University, and a contributor to its financial needs. In his will he has continued his benefactions to the University by a generous bequest of excellent securities of the par value of \$21,000, which manifests his final approval of its plans for the future. This opportune gift is another instance of the wise policy of inducing friends to remember in their wills the institutions which they, while living, have investigated and assisted by their offerings. Mr. Fritz was a large giver to Christian churches, to philanthropic causes, and especially to education, and liberally remembered many of them in the final distribution of his estate, which amounted to about \$750,000.

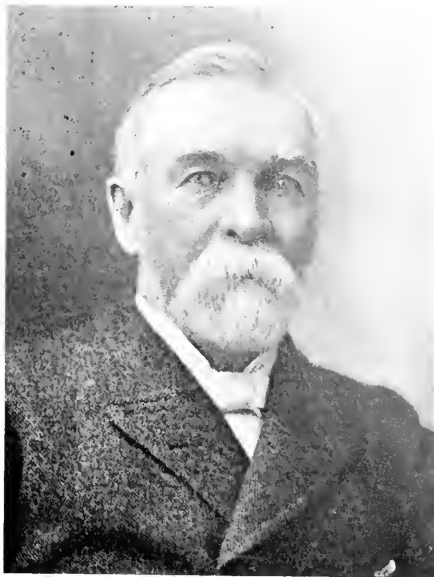

From a farm boy, John Fritz became one of the great masters in the iron and steel industries of America. He was one of the chief factors in the evolution of the gigantic modern steel plants—one who applied his brain and hand to the Bessemer and open-hearth processes of improvement, which have resulted in the titanic machinery and output of the present day. Of him it is true that his first interest has been not in financial gain, but in substantial increase of the comfort and welfare of humanity. He stands in the line with such persistent workers and pioneers of progress as Edison, Burbank and Marconi.

The following tribute to Mr. Fritz has been made by a writer in the Century Magazine:

"In all the spectacular piling up of huge wealth from steel, the creation of colossal corporations, the fierce outbursts of sensationalism, the tremendous interplotting of politics and finance, the tiresome focusing of the limelight of publicity on one millionaire after another, and the ceaseless efforts of the muckraker to drag another ancient or new scandal from the slag heaps, nobody has ever seen mention of any kind or degree of John Fritz, in whose honor the four great national engineering societies have founded a gold medal in recognition of his worth and work—the only American for whom such a thing has ever been done. The humor and the irony of it—likewise the compliment! On a green hill far from the madding crowd he has lived in dignity and quiet, after a career begun long before the American steel industry was successfully established, as it was, largely through his courage, energy and genius."

We Lose Nothing in the Mouths of Our Friends.

The American University has grounds in Washington of nearly one hundred acres, worth perhaps \$5,000,000, two marble buildings, \$500,000, and \$650,000 endowment. Over 1,500 students are asking admission.—*St. Louis Christian Advocate.*

HON. JOHN FRITZ.

Recent Gifts of Money.

Committee at Work on Opening Plan.

The plan for opening the American University, which Chancellor Hamilton submitted to the trustees of the University at their December meeting, is being studied carefully by the committee to which it was referred. This committee held a meeting on March 5th and went over all the data and facts with close and painstaking attention. Much new light of an encouraging nature was found. The study of the whole matter is being made as thoroughly and conservatively as possible. Progress was made. The committee soon will hold another meeting. The advice and help of some of the most prominent men in the country is being invoked. The final result will be worthy of the labor.

Goucher College Has Our Active Sympathy.

The strenuous campaign of Goucher College to raise a million dollars moves apace. We wish this campaign every success. The welfare of Goucher

College is the welfare of the American University. A true vision of mutual helpfulness ought to pervade all our educational institutions. Our work is one. We have every hope and faith in a successful outcome to the campaign for Goucher. Chancellor Hamilton is doing what he can to assist in the struggle for the Baltimore college, both by public addresses and in raising money. He does this with joy as a concrete illustration of the fact that our interests are one with the welfare of our sister institution. In this connection we note with deep satisfaction that Mrs. Woodrow Wilson has just contributed \$500 to the Goucher College fund, as a testimonial of her gratitude for what the College has done for her daughters. And President Wilson has promised that if it is in any way possible, he will make a speech in behalf of the College at the great mass meeting, which in Baltimore is to serve as a grand climax to the whole campaign for the million dollars.

Dr. Hancher Eloquent in Our Behalf.

Dr. Hancher came before the Conference in the interest of the American University, showing us that this great institution could be built in Washington for \$20,000,000, when anywhere else it would cost \$50,000,000 for same opportunity for work, the government having already expended some \$90,000,000 there for the very things every student attending such an institution should be able to use. The Roman Catholic Church, seeing the great advantage of this, is occupying the ground for the same purpose in this same city. His address was loudly applauded.—From report of Oklahoma Conference, in the Central Christian Advocate.

"Chevy Chase" Describes the Surroundings of the American University.

Rock Creek Park, with the sparkling waters of Rock Creek flowing through it, in the northwestern section of the District of Columbia, is one of the most picturesque and charming parks in America. The bridge spanning Rock Creek, carrying Connecticut Avenue over a yawning gorge, cost a million dollars and is one of the finest structures of its kind. From this bridge Connecticut Avenue extends northward through a stretch of country where dense forests, covering gently rolling slopes and deep ravines, make one feel as though he were riding through one of nature's favorite regions. The avenue has been finished in fine shape for two miles beyond the District line.

The ground about the city is uneven and hilly so that from many elevated positions one can have splendid views of natural scenery and city streets. Massachusetts avenue extended affords a view of Washington and the Potomac River which one who has once witnessed can never forget. It is upon this favored elevation that the American University is located.—Letter in Western Christian Advocate.

A Good Bill Delayed Which Would Help Our Enterprise.

The bill which Senator Gallinger offered in the Senate, to require larger endowments for educational institutions in the District of Columbia, and to prohibit the use of misleading names by such institutions, ought to have passed Congress. It was a needed act of legislation and it would have helped our enterprise materially. For it would have sifted out all unworthy institutions which are seeking to benefit through an association with the National Capital. And by a strict requirement that any new institution which seeks to be

chartered at Washington shall be possessed of large endowments, it rules out entirely the existence at the Capital of fake colleges and easy degree factories, which today bring scandal on American education.

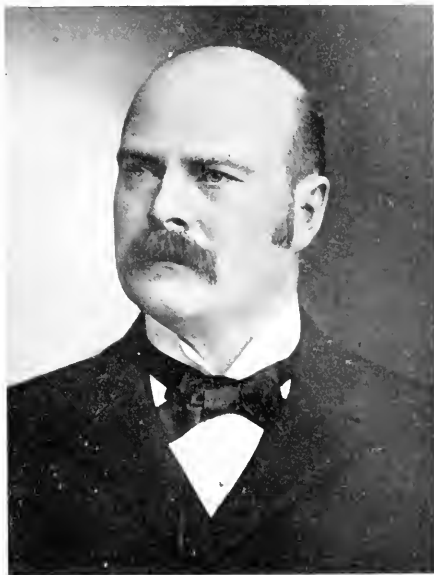

In the hurry of the last Congress, this bill failed to pass. But it will be brought up again, we trust, and speedily carried through to become a law. When thus codified as law, the bill will protect and dignify all existing educational institutions which it names as entitled to legal existence and recognition. Among those thus named, and so receiving new confirmation and approval by the Congress of the United States, is our own institution, the "American University, incorporated in 1893." We thank you, Senator Gallinger. May your bill pass unanimously the next Congress.

Another Proof of the Wisdom of Our Plan.

A most interesting tribute to the wisdom of the plan of the American University transpired during the session of the Congress just closed. Representative Carlin, of Virginia, introduced a bill in the House of Representatives, asking the appropriation of a half million dollars, to establish a federal institution of learning. We made a study of this bill, and found that in its essence it comprehended the very plan which the American University for years has been pushing consistently. We were informed, moreover, that the bill had the backing of the National Association of State Universities and of the National Education Association. If this be true, it is a striking confirmation of the wisdom of the present plans of the American University. This ought to hearten every friend of our enterprise, for it shows that we are moving on the right line, and that we are undertaking a work which the wisest educators of the land approve. Are we wrong in our inference if we jocosely suggest that since Congress did not pass this bill, our good friends, the legislators, who helped us with our "car line," believed that the American University could be trusted safely to do the work outlined in the bill?

The "Senator" Speaks Well of Us.

The American University, so long a "child of sorrow and of woe," seems now to be standing at the threshold of a happier fortune. The substantial though slow benevolence of the past years have been fully increased by the noble bequest of David H. Carroll, of Baltimore, recently deceased. By the terms of Dr. Carroll's will the University will benefit in three ways: First, Dr. Carroll set aside \$30,000, the increment of which is for the use of his sisters during their life; at their death the original sum reverts to the University. In the second place, the remainder of the estate is divided into five hundred equal shares, of which two hundred are bequeathed absolutely to the institution. What will be realized by this is not certainly known. No estimate of the estate has made the five hundred shares of less value than \$1,000 each, while it is not unlikely that they will be worth nearer twice that sum. In the third place, after all the estate has been divided, the University becomes the residuary legatee of any funds left simply in trust or for life. Of course, what these will amount to no one can tell. But on

REV. GERVASE A. VIETS.

the lowest estimate, David H. Carroll, for a time an honored Methodist preacher, compelled by circumstances to relinquish his great work, for many years thereafter a remarkable layman, has of his abundance marvelously remembered the things of the church and the kingdom.

With the new optimism born of this beneficence, what has been called the greatest meeting in the history of the University was held in Washington, on Wednesday, December 11. The trustees met, with Bishops Cranston, Hamilton and McDowell present, and there adopted unanimously a program of advance action of such far-reaching aims and vision as to prophesy a victorious day close at hand. What this program is, is not yet a matter of publicity, as the terms of it were adopted only as the guiding principle by which a special committee, exhaustively studying the situation, shall formulate a detailed and definite plan of action to be reported at the next meeting of the Board in May. The special committee having the matter in hand consists of Bishops Cranston, Hamilton and McDowell, Chancellor Hamilton, Rev. C. W. Baldwin, D. D., of Baltimore, secretary of the Board; A. B. Browne, of Washington, president, and Judge T. H. Anderson. After long twilights and some darkness, there is a breath of dawn upon the University, and Methodism here begins already to rejoice.—From "Senator's" Washington Letter in *Zion's Herald*.

Bringing the University Nearer the Center.

One of the most interesting of the bills before the present Congress is one which was introduced in the Senate by Senator Dillingham, of Vermont, and in the House by ex-Speaker Cannon, providing for an electric car line from the heart of the city to the American University grounds. The bill was favorably reported from the committees of both houses. Chancellor Hamilton has been working night and day, and has been for a long time, to secure its passage. Bishop Cranston and others have interested themselves actively in the bill, and it meets the approval of public sentiment. The Senate on Wednesday afternoon unanimously passed the measure. It will work incalculable good to the University, and to the development of what is destined to be the finest residential section of the District.—*Zion's Herald*.

The Washington Papers Follow Our Work with Interest

Yesterday the American University trustees, through Chancellor Hamilton, received notice of a bequest of \$21,000 from one of the Penn. "iron" pioneers in the steel business, John Fritz, of Bethlehem, Pennsylvania. The amount was one of a large number of Mr. Fritz's gifts to education, Lehigh University being the chief beneficiary under his will.

With a steadily growing financial income, the trustees are looking forward to their meeting in May as the time when they will be able to announce definitely the plans for beginning the work of the American University. Street car extension to that section of the city in which the University property lies has been another encouraging development. *Washington Herald.*

Rev. Gervase A. Viets, Financial Secretary.

On page five of this paper, through his portrait, we introduce to our readers our new Financial Secretary, the Rev. Gervase A. Viets, a member of the New York East Conference. As the family name would indicate Mr. Viets comes of Normandic French lineage, his ancestors having settled on the Farmington River at Simsbury, Connecticut, about 1670. He was born on a farm among the foot hills of the Berkshires in Hartford County, Connecticut. He was converted at the early age of twelve and joined the Methodist Episcopal Church; at eighteen became an exhorter and at twenty-one a local preacher. He taught school for a time in a neighboring town.

Mr. Viets graduated at Drew Theological Seminary, attended Yale University for two years, and was ordained by Bishop Henry W. Warren in 1886 at Newburyport, Mass., in the old church under which George Whitefield's dust reposes. His early pastorates were in the New England Conference; for a time he served a Congregational church in Cincinnati; and since 1901 his field of service has been in and near New York. His wide experience, his knowledge of men and affairs, his vigor of mind and body, and his high ideals of character and life, all unite to give promise of efficiency in the new relation he has taken. May he achieve his greatest laurels in his plea for and devotion to Christian education.

Ambassador Bryce Urges a Great American University at Washington.

In his remarks Thursday night before the committee of 100 on the future development of Washington, Ambassador Bryce dealt at length on the capitals of old world nations as compared to Washington. Mr. Bryce declared that the natural advantages of scenic beauty, location and environment were all with Washington: "The city of Washington should try to set before it, should feel that its mission in life is to be a great capital, that it is to be the embodiment of the majesty and the staidness of the whole nation, to be a capital of capitals, a capital of the whole nation, as each state has its capital, overtopping the capitals of those states as much as this nation overtops those states, representing all that is finest in American conception, all that is largest and brightest in American thought, representing in ideals what the capital of a great nation should be. It should do that partly by the staidness and number of its edifices; but above all by their beauty. What one desires is that this city should represent the highest aspirations as to dignity and beauty that the people can form for that which is to be the center and focus of their national life.

"Let me add that there is one thing that it seems to me you really ought to have. You ought to have the great

American University in Washington. I am very far from suggesting that it should be a national University in the sense that it should be managed by the nation through Congress or necessarily endowed by Congress. But the National Capital ought to have a great university. It need not be a university which would compete with such universities as Columbia, for instance, or the University of Chicago. Both of those universities are located in great cities, and here you have no great industrial establishments calling for a faculty of engineering here, as those universities must have, placed as they are, in great commercial centers. You would want a university dedicated to two kinds of study, to the artistic side of science and to the human studies. You want a university where you will have professors of the highest competence in the physical sciences, the mathematical sciences, in the branches of natural history, etc., things which can be pursued without any immediate necessity of coming in contact with practical life. You ought to have a fine school of law, a fine school of political science, a fine school of economics and a school of history. You have already in your government departments an unusually large number of eminent, industrious and illustrious scientific men, who are one of the glories of Washington, but you want also to have an equal number of men diligent in the pursuit of those studies, such as history, economics, philology and law, which are the balance of scientific studies, and I cannot hope but that through the liberality of benefactors, with perhaps the national government to help, it will be found possible before very long to carry out the great idea which the first President expressed, when he contended that a university should be established in this city, which was the darling of his old age.

That leads me to observe that it is very important to preserve the best views in Washington. I would like to call attention to two points, however. Those who know the Ridge road and the American University know the road that comes down, that turns south before you come to Georgetown, south of the University. There are a number of points of view on that road, toward its southern end, from which you see over the city way down ten or fifteen miles toward Maryland and Virginia. They are perhaps the most beautiful views around Washington, and it would be very easy to spoil those views by putting up rows of houses. There are only a few points from which you could get those views, and so it is of great value and well worth keeping.

"There is another point. You all know the point of intersection of Wisconsin avenue, from which the cars run to Tenleytown and Chevy Chase, with Massachusetts avenue, which is now being extended into the country. At that point, just opposite where the Episcopal Cathedral is to stand, there is one part which I think affords the most beautiful general view of Washington. You look down upon the city, you see the striking buildings, the Capitol, the Library, State, War and Navy Department and the Post Office, the large buildings along Pennsylvania avenue, and beyond them you see the great silvery flow of the Potomac and the soft lines fading away in dim outline in the far southeast. It is a beautiful view. It is a view that reminds me of the fine views of Rome that the traveler is able to obtain from the other side of the Tiber."—*Washington Star.*

The American University is situated on the slope just back of and above the view to which Mr. Bryce in his closing sentence refers.

Our Biblical Museum Represented in the Women's Parade.

One of the most attractive and significant floats in the recent women's parade, was prepared by Madame Lydia M. von Finklestein Mountford, of Jerusalem, who with robes from the Mountford Mamreoy Biblical Museum of the American University arrayed a company of twenty-eight persons in garments typical of the Palestine attire.

A picture of this interesting group is presented on the seventh page. The float bore a banner inscribed with

FLOAT IN WOMEN'S PARADE.—WOMEN OF BIBLE LANDS.

the words of Psalms 68, verse 11: "The Lord giveth the word, the women that publish the tidings are a great host." Madame Mountford, dressed in white in the center of the company, represents the prophetess Huldah.

The Women of Bible Lands.

(By MADAME VON FINKELSTEIN MOUNTFORD.)

There exists a somewhat general impression that the women of Bible lands, both in ancient and modern times, were kept in a state of seclusion and ignorance, and not permitted to take any part in the questions and activities of public national life.

That is a mistaken idea. The women who are in so-called seclusion are a very small percentage of the women of the country. But all the women, more or less, take an interest in the national life. We have many notable examples of prominent public positions being held by women in Bible lands, of which we will cite a few examples.

Miriam, the sister of Moses the great emancipator of the Tribes of Israel and greatest of lawgivers, was a prophetess, and the chief counsellor and leader of all the women of Israel. At the triumphal passage of the Red Sea, Miriam headed the women with song and timbrels; the men of Israel marching under the leadership of Moses and the women marching under the leadership of Miriam; celebrating equally, without distinction of sex, their national deliverance.

Thus we have proof that a "Women's Parade" is not an innovation of the "Snifragettes" of this country.

Deborah was a prophetess and also "judged Israel,"—and

all the children of Israel came to her for "judgment." Barak, the general of the armies of Israel, refused to go to battle against the King of Canaan unless Deborah headed the army as commander-in-chief, which she did and won the battle. It is recorded that Deborah had a husband, but it is not recorded that, because she held position as the Chief Judge in Israel, and, as Commander-in-Chief of the army, defeated the invader of her country in battle, she in any manner neglected her domestic duties.

Huldah was a prophetess and president of the temple college in Jerusalem. At an important national crisis, Josiah the King of Judah ordered the high priest and other members of his Cabinet to take counsel with and advice of Huldah, which they did. Huldah was a married woman, and her domestic relations must have been as successful as her public career; otherwise, as an oriental woman, she could not have occupied such an eminent position.

In the New Testament times, the famous Evangelist Philip had four daughters, virgins, who were prophetesses. To be a prophetess does not mean to be one who foretells future events. It means primarily a public speaker and teacher; also, one who holds a public position both religious and political; one who is consulted by men as well as by women.

These four daughters of Philip the Evangelist, as well as Miriam the sister of Moses and Aaron, were unmarried women, and evidently were as well fitted for public life as the married prophetesses. We have no record in Bible history that the men of those times regarded these and other notable women as in any way inferior to themselves or as cranks unfit for public careers because of their sex. Consequently the men and women of the United Sovereign States of America ought to strive to be even more progressive than the ancients, and not to be retrogressive in comparison.

The modern women of Bible Lands is not by any means so far behind the thought and progress of this country as she is so frequently misrepresented to be. Competent women in Bible lands never lost their rights to public positions as counselors and leaders among their own people; careers they fill honorable and successfully whether as married or unmarried women up to the present time. These women and all women holding property in real estate have a vote in local affairs. But they are now interested in extending such right to all women; as well as in securing other rights which will place the sexes on an equality in responsibilities and activities.

St. Paul the great apostle of Bible lands in his Epistle to the Galatians emphasizes that, to Christians, "There can be no male and female, for ye are all one Man in Christ Jesus."

Rainbow in Morning.

This morning rainbow was over the grounds and buildings of the American University. In view of the many happy auguries that now mark our outlook, let no cynic bark if we claim this celestial phenomenon as a bow of promise in our sky emblematic of our approaching victory. The account describing the phenomenon is appropriately from the *Washington Star*:

Something rare in celestial phenomena was on tap for early risers in the neighborhood of Tenleytown early this morning, when a perfectly formed rainbow spread its many-hued arch in the northwestern skies for ten minutes, beginning at 7:20 o'clock.

The arch stayed in full view for at least ten minutes. At that hour, of course, the sun was not very high in the eastern portion of the heavens.

In the west and northwest a background of gray mist spread its screen, against which a ray of the early morning sun, peeping through some drop of moisture in the air, spread its prismatic glory in a fine, fullledged bow. The rarity in this occurrence is, of course, that a rainbow should appear in the western skies in the morning. Early morning bows are not seen often—in Tenleytown or anywhere else.

Bishop Cooke's Vision of the American University.

Some of us felt proud, at the last session of the Columbia River Annual Conference, when our good Bishop stated that another great Bishop had expressed to him, some years ago, the opinion that within the next half century would come the crisis struggle between Methodism and Catholicism. We have heard it said time and again, that the hope of Protestantism lies with the Methodist Church. If this is our real conviction, and means anything to us, more than just thrilling talk, it would seem to be a reasonable proposition that we should commence now to ask ourselves what will be the deciding factors, and what the effective weapons of that warfare. It will not be won by talk, nor any propaganda, however extensive, against doctrinal tenets. The fact of the matter is that it is becoming increasingly apparent that you have not, in the public mind, made a very bad case against men or institutions when you have demonstrated that they teach false doctrines. Nor will the deciding factor be numerical strength. We Methodists are running around in circles these days, and gashing our spiritual flesh, like the prophets of Baal, because our net gain in membership is being expressed in figures lamentably small. But let us not worry. No ecclesiastical warfare worthy of our attention will ever be decided by putting church membership records over against one another, as boys match marbles. Our evangelistic fervor will have a very direct bearing on the issue, but I am sure that thinking men will agree that more is needed if we are to become the greatest religious world force.

You will remember that our Bishop Cooke, with the unerring instinct of statesmanship went to the heart of the matter and advocated the immediate planting of our great American University at Washington. The problem of our ultimate destiny is at heart an educational problem. By education I do not mean simply academic instruction, but the inculcation, by any agency whatsoever, of those convictions and decisions which finally go into the making of character.—Rev. Charles MacCaughy in *Pacific Christian Advocate*.

Washington a Catholic Center.

The Catholics are centering in Washington. Taking the Nation as a whole the Church has a large number of colleges, running into the hundreds. But in Washington it seems to be intended to bring their educational system to its climax. The Catholic University of America, incorporated in 1887, seven days after the Pope canonically installed it, has a family of six colleges, all running and well equipped. Cardinal Gibbons is chancellor; the trustees include all the archbishops and laymen and ecclesiastics as far west as St. Louis. Of this plant a Washington daily says: "Do not fail to see the great Catholic improvements, costing many millions of dollars, and to study the extensive area of their land investments and to calculate their future effect on the value of adjacent property whose destiny is indissolubly linked with the activities of the Catholic University of America and various affiliated orders.

"The Redemptorists, Passionists, Carmelites, Benedictines, Oblate Fathers, Fathers of Mercy, Norbertine Fathers, Augustinians, Salesians, Theatines, Vincentians and Jesuits, are among the principal bodies that are expected to build colleges or houses of study."

In addition here is the Georgetown University with its superb courses in law and medicine, the Jesuit College, the Immaculate Conception College, conducted by the Passionist fathers, the St. John's College, conducted by the Brothers of the Christian Schools, beside fourteen academies and convents and seminaries. The total plant reaches an investment of many millions. And no one can visit these institutions, particularly the University of America, and fail to be impressed particularly with what the near future will show forth of Catholic strength at the nation's heart.

Now, we do not criticise our Catholic fellow citizens a particle for this concentration at Washington. It simply shows that they are good strategists. They see that they are advantaged by doing it, therefore they do it. Would that we as a denomination had their vision, their grit and their machinery for securing results. They began the construction of their buildings and immediately opened their classes. Twenty-one years have elapsed since we caught the idea of what it means to have a vast educational opportunity in the Nation's Capital, with all its accessories. But we have not got the five million dollars yet. And Rip Van Winkle will have whiskers a yard long before we do get the five million. We hope we will wake up some day and come groping down from the Catskills and find that we too have at last made good in our program to make Washington a Methodist center, a Protestant citadel.—*Central Christian Advocate*.

Congress Makes Noble Provision for the National Capital.

The District of Columbia Bill which was one of the last to pass the outgoing Congress will add greatly to the resources and noble appearance of Washington. Provision was made for an extension to **Rock Creek Park**, already a joy to the whole city. Initial plans for building the great **Potomac Memorial Bridge** were authorized. It is intended that this bridge shall cross the river at the new **Lincoln Memorial** and make possible a great triumphal way sweeping up in magnificent curve to the **National Cemetery** at Arlington.

Congress also provided for a home for the Geological Survey and a vast structure to house the national archives. The long desired amphitheatre and chapel at Arlington Cemetery also are authorized. And on the site of the old Pennsylvania Station there is to be built a magnificent **George Washington Memorial Hall**. This building so aptly named will provide accommodations for **National Conventions** and **International Assemblies**. Truly the Sixty-Second Congress wrought well for the future. Washington is rising beside her river the true *omphalos*, as the Greeks termed it, the world-center.

The American University Courier

Entered as second-class matter February 27, 1909, at the Post Office at Washington, D. C., under the Act of July 16, 1894

Volume XX

Washington, D. C., June, 1913

No. 1

VIEW OF WASHINGTON FROM POINT EAST OF THE AMERICAN UNIVERSITY.

The American University Will Open June 4, 1914.

The trustees of the American University at Washington, D. C., on May 14, defined the policy, directed the chancellor at once to carry it into effect, and fixed the opening day for the institution. This policy is the outcome of long and careful review and investigation. It provides for the organization of a College for Graduate Study. This College is made possible largely through the gift of the late president of the university trustees, Dr. David H. Carroll of Baltimore, Md., whose recent generous bequest to the university will be used as endowment for the College. The College for Graduate Study, for the present, will undertake work in three fields. First, it will maintain an Institute for Research to be operated in connection with the various departments, bureaus, institutions, museums and other educational resources of the National Government at Washington. Second, it will carry on a series of public lectures and dissertations incorporating some of the features of the Bampton Lectures at Oxford and the Lowell Institute Lectures at Boston. Third, it will support a comprehensive system of Fellowships, that shall be carried on in connection with the leading educational institutions of Europe and America. Several fellowships for foreign study and travel already have been ordered to be assigned.

The various reports of the university showed the most prosperous condition in its history, there being a continued advance in financial resource. The first Convocation Day will be Thursday, June 4, 1914.

The Northwestern Christian Advocate of Chicago Comments The American University.

The friends of education should rejoice that after many years the definite announcement has been made that the American University at Washington will soon open its doors for active work, the exact date being June 5, 1914. The changed conceptions of education in these later years, have finally necessitated a like shifting of base by those in charge of this institution, until now the program projected is wholly different from that originally planned. It will be remembered that Bishop Hurst had a vision of a great university at Washington, housed in a score of buildings, and gathering into its halls thousands of the youth of the land to engage in undergraduate as well as postgraduate work. For the time being his project met with enthusiastic response from the Church, but in time the friends of education were forced to see that such a program could not be carried out by any one Church. We confess to never having been enthusiastic over the plan as originally projected, but with the present plan we find ourselves in heartiest accord. The American University is not to conduct an undergraduate college, but is to engage in educational work of a most unique character.

The program is as follows: There is to be appointed a board of award, who shall employ the services of approved scholars and advisers. This board shall have authority also to select fellows of the American University; it shall pass upon the qualifications of any students who are candidates for degrees from the university.

An institute of research will be established at Washington, to be in charge of a staff for whose duty shall be to advise students in the utilization of the facilities and materials for study and research in the various historical, literary, scientific, technological, and other departments, made possible by act of Congress. Instead of taking instruction in buildings upon the campus, the students will resort to the different governmental buildings and there pursue their studies. This obviates the necessity of great buildings. In fact, the Hall of History, which is completed, with its forty-two rooms, gives adequate physical equipment for the work as at present projected. At the furthest, there will be no need of more than one or two buildings additional. It also obviates the expense of a great faculty. In fact, it is simply the Church utilizing the national resources accumulated at the Capital, directing earnest searchers to just those places where they can best discover that which they seek.

No student will be matriculated in the American University who has not a regular academic degree. The present plan is to issue fellowships of two grades.

(a) Fellows who pursue their studies at seats of learning or at places of study and investigation within the United States. A fellow of class A shall receive a stipend of \$500 per annum.

(b) Fellows who pursue studies at foreign seats of learning or at places of study and investigation abroad. A fellow of class B shall receive a stipend of \$800 per annum.

Appointment to a fellowship shall be for one year, subject to renewal for a second year. In special cases a fellowship may be held for a third year, but no longer. The officers of the American University shall decide upon the length of the term of each fellow.

This scheme, submitted by Chancellor Hamilton, has been adopted by the board of trustees, and the Church should rejoice that this long projected American University is at last to be put into practical operation. We believe there is nothing like it in America. It is almost like getting something for nothing; and yet the scheme is tied up to the Church. It interferes in nowise with present educational institutions, and we believe its operation will mark a new epoch in higher education in the United States. We hope the launching of this institution, which has been building so long, will be attended with the greatest enthusiasm. We wish Chancellor Hamilton and his co-laborers Godspeed in this great undertaking.—*Northwestern Christian Advocate*.

Some Comments from the Public Press.

The American University, planned years ago by Methodist Episcopal educators and provided with beautiful buildings and grounds in the outskirts of Washington, will be opened formally with a college for graduate study June 4, next.

Large sums of money were spent in constructing the university buildings and equipping them, but the opening has been delayed from time to time because until recently the trustees were without a sufficient income to warrant them in undertaking to operate the institution. A considerable bequest by the late president of the board, Dr. David H. Carroll of Baltimore, made the college for graduate study possible.—*Boston Transcript*.

Years of labor by Methodist educators will bear fruit June 4, 1914, when the American University will open its doors to students, it was announced yesterday.

The university, which will rank with the foremost educational institutions in the United States, has been organized for several years, but difficulty was experienced in obtaining an endowment fund.

There has been a continued advance in financial resources of the American University, it was said at the meeting of the trustees. Finances at present are encouraging.

The trustees in announcing their policy stated they were confident that the plans would be approved. They had spent years in formulating a policy for the university.—*Washington Herald*.

The university is situated at Nebraska and Massachusetts avenues northwest. Several handsome buildings have been

erected there for years, awaiting an opportune time for the university to throw open its doors, a step that has been delayed from time to time because the trustees have been without sufficient income to warrant them in undertaking to operate the university. The university was planned years ago by Methodist Episcopal educators, and large sums of money were spent in constructing the buildings and equipping them.—*Washington Star*.

The first convocation of the American University will be held June 4, according to an announcement today by the trustees. This institution, which is under the management of the Methodist Church has been provided with beautiful buildings on Massachusetts avenue, north of Georgetown, but these have not been utilized, it being the determination to await altogether favorable auspices before formally opening these halls of learning.—*Washington Times*.

In 1890 Bishop Hurst acquired ninety-two acres of land near Washington City for the site of the American University. Gifts, including money, securities, and real estate, have since been made to this institution amounting to nearly one million dollars. The value of all the holdings is estimated at \$2,050,000. There are now two buildings—the College of History, containing forty-five rooms and costing \$176,000, and the McKinley Memorial College of Government, costing, when it shall have been finished and equipped, \$305,000.

The trustees met on May 14. At this meeting the policy of the institution was defined, and the Chancellor was directed to carry it into effect. June 4, 1914, was fixed as the opening day. The policy provides for the organization of a college for graduate study. This college was made possible through the gift of the late President of the Board of Trustees, Dr. David H. Carroll, of Baltimore. He made a generous bequest, which will be used as an endowment for the college.

The college for graduate study will have work in three fields. It will maintain an institute of research, a system of public lectures incorporating some of the features of the Hampton Lectures at Oxford and the Lowell Lectures at Boston, and fellowships which shall be carried on with the leading institutions of England and America.

Dr. Franklin Hamilton is the Chancellor of the institution. Bishop A. W. Wilson is Vice Chancellor.

It is a matter of general satisfaction that this great university will soon be ready for work.—*Nashville Christian Advocate*.

The American University opens next week! That is new news, and true news, and good news.

Years ago many Epworth League chapters made gifts to the American University, in response to the appeals of its founder, Bishop Hurst. Those gifts were not lost; they are part of the resources which have made possible the opening of the doors next Wednesday.

The first College of the University to get down to work will be the College for Graduate Study. It will take up three distinct forms of scholastic activity, an Institute for Research, a series of public lectures, and a system of fellowships in connection with other American and European universities.

Chancellor Franklin Hamilton has worked long and unwearyingly for this beginning of things in the Church's great center at Washington. To him it will seem as much an end as a beginning; the end of doubt, the end of captious unbelief, the end of waiting that has seemed near to endless. He is to be congratulated, that his persistence and faith are justified; the end crowns the work.

But it would be ungrateful, if it were not impossible, to mention the opening day of the American University without thought of that determined scholar, that practical dreamer, in whose brain and heart the bold project was born. John Fletcher Hurst was the Moses of this educational journeying; at times he supplied faith enough for a whole denomination, and he never turned back. His Nebo vision of the promised land was from a remoter viewpoint than that where Moses stood, but he saw it!

The one thing the Church asks of the American University now is that it shall hold itself steady to the ideals of its founder. It must be more than a great school; in small measure at

first and always increasingly, it must be the supreme school. It must give scholarship's last masterful word on every subject it touches. It must be the college man's college.

Methodism is ready to develop a great pride in the American University, and a great dependence on it.—*Epworth Herald*.

A New Scholarship for the American University.

What immortality could be more impressive than that of an influence springing immortally from a life that on earth is ended? How better can such immortality find practical form and relation than through the efficiency of some altruistic enterprise that lives to sweeten and ennoble the generations? These are questions that have been answered by a godly woman in a practical way. A certain widow cast two mites into the temple treasury while lordly and affluent merchants and magistrates looked on depreciatingly—and lo, in the sweep of the ages that beneficence has become a standard of loving service; it has immortalized the Temple treasury itself.

Like immortality of spirit awaits the honored widow of a well-known pastor and preacher who in life helped and stayed up the American University. This delect woman holds an annuity in the American University. She proposes to turn this annuity into an active scholarship now. Instead of accepting the income from the annuity, this wide-visioned and generous benefactor has decided to set the income apart to endow a scholarship and hopes to add to the fund until it can support such scholarship. For such noble helpfulness we can only record our gratitude and thanksgiving. The names of her dear husband and of herself, thus linked in an immortality of high service, shall bless mankind. God is not unmindful of such loyal love.

View of Washington from Point East of American University Site.

On the first page will be found a new view of the city of Washington. It is from a photograph taken on Wisconsin Avenue, a little south of its crossing of Massachusetts Avenue. At the center are seen the noble shaft—the monument to George Washington, and the dome and buildings of the new Naval Observatory. To the right will be noted the sweep and bend of the broad Potomac, while on the left appear the stately Capitol and many other of the structures of the government. The foreground presents a portion of the recently graded part of the Massachusetts Avenue Heights subdivision, which is being taken rapidly as sites for villas and homes of superior architectural beauty. A slight summer haze hangs over the city and gives the picture a poetic cast.

The Hibernians will Endow Additional Scholarships in the Catholic University.

The national directors and officers of the Ancient Order of Hibernians, who are in annual session at the Raleigh Hotel, today discussed the proposition of increasing the number of scholarships of the order at the Catholic University of America.

The meeting was addressed by Mgr. Shaban, rector of the university, and Dr. Doherty, vice rector. The order now maintains six state scholarships at the school, and will increase this number, but by how many has not definitely been decided upon.—*Washington Star*.

May Meeting of Trustees.

The semi-annual meeting of the trustees of the American University was held at the University office on May 14. From widely separated points the members of the Board gathered with a new enthusiasm. The reports of new and strong financial aid added to the fresh interest. The discussion and adoption of the working plans for inaugurating academic work, beginning on June 4, 1914, brought this group of counsellors to the high water mark of its history. Those newly chosen to membership in this body in their zeal and cooperation vied with those who for many years have been giving their time and thought to the great task in hand. It was a meeting of vast import in that it bore a crucial relation to the actual policies of the institution in its initial period. In another column under a proper heading will be found the substantial action taken on the opening of the University.

The Next Thing to Do.

The Trustees have voted to open the American University on June 4th, 1914. This action necessitates certain preparations of our university plant; for we intend to utilize the College of History building as the headquarters of our new work. There are however, certain things which must be done before we can make proper and free use of this building. The College of History itself is a superb structure capable of accommodating perfectly the initial stages of our work. But before the College of History thus can become a convenient home for the new educational undertaking we must have the sewer connection made with the trunk lines of the District. We also must have that part of Massachusetts Avenue which traverses our grounds graded and macadamized and made ready for the electric car line.

These fundamental preparations must be the work of the District of Columbia. Hitherto the authorities of the District have heeded our request in a most generous and sympathetic manner. Now again we appeal to them to add these two last needed links in our long chain of effort—give us proper sewer connection, then grade and macadamize Massachusetts Avenue through our grounds and we energetically will cooperate. We must have this help. We will do the rest. On June 4th the university will open its doors, and all Washington and hosts of loyal friends beyond her borders will rejoice that at last the great undertaking has been launched.

It Is In The Air.

Our attention has been called to two educational references by eminent men that bear upon our enterprise. These reflections in a manner indicate a deepening interest and sympathy with our undertaking in the most influential quarters.

The president of one of the leading universities of the middle west, in a recent address dealing with the attitude of the Christian people of this country toward education, expressed regret that a more abundant help in the past had not been granted to our undertaking. He uttered the hope that this neglect soon would be remedied. This wise leader said that the enterprise ought to be given every assistance and pushed to speedy success.

Henry Van Dyke in his delightful little volume entitled "The American Spirit," dwells for a moment on the original design of a great university at Washington as this idea was cherished by the fathers. He speaks of it sympathetically as one of the educational hopes that as yet have not been realized. But none the less it has been a true ideal and worthy of commendation.

Needless to say, we from the start, have been determined to make good that dream of George Wash-

ington that languished and then failed of fulfilment. The dream has not died—it is today as worthy an ideal as ever. We are determined that one component part, at least, of that longed for educational centre of learning and light shall be achieved in the American University.

President Emeritus Warren and the Name "American University."

In a valuable and most interesting letter to Chancellor Hamilton, President Emeritus Warren of Boston University calls attention to the first claimants to the use of the name "American University." This information is the more illuminating just now when it has been decided to give the American University an actual academic function. Moreover, two Bishops of the Methodist Episcopal Church, who since have entered into light, claimed the distinction of having suggested the use of the word "American" in naming the university. We are all the more grateful to Dr. Warren for his word at this time. It is characteristic of his never failing hospitality of heart that he should show this interest in the "metropolitan babe" that soon now is to have utterance. Dr. Warren's impress is felt on our work and will help to guide our undertaking safely and wisely. Chancellor Hamilton was a pupil of Dr. Warren and often looks back in tender, grateful thought to memorable days and golden hours now, alas, long gone. We regret that we have not time before this issue of the Courier goes to press to consult the authorities that Dr. Warren cites in his letter, but we promise that in the next issue of our paper we will publish a discussion of this whole subject of the name of our institution that still continues to excite interest and comment around the world. Meantime we shall be busy, indeed, with events that ere long may give hope that the metropolitan babe is not illy christened if vision and hoped-for usefulness ever can justify a noble name.

To be Our Next Door Neighbor.

The announcement that a large tract of land in the Massachusetts avenue section west of Wisconsin avenue had been purchased as a site for a young ladies' seminary has attracted a good deal of attention. This is not so much because the new owner of the land, Mrs. Somers, who is at the head of the Mount Vernon Seminary, intends to remove that large educational plant from its present location within the original limits of the city to the new location in the suburbs, as because the group of buildings of the new Mount Vernon Seminary will be in a neighborhood that is to become quite an educational center.

On the east side of Nebraska avenue, or the old time Ridge Road, is the group of buildings where it is expected in the near future the students of the American University will assemble. Massachusetts avenue extended passes along the north borders of the university grounds, while a short distance to the north of the junction of Massachusetts and Nebraska avenues and on the east side of the latter lie the eighteen acres which Mrs. Somers has just acquired.

This new holding comprises in part the ground about the old house which is now occupied by the Country Club and was known some years ago as Grasslands. A recent act of Congress gave authority to the Washington Railway Company to build a branch of its line on Wisconsin avenue west along Massachusetts avenue to the bounds of the District,

MISS ANNA F. MAMREOV.

and it is expected by the time the American University is ready to open its doors, which may be this fall, the railroad line will be in operation. There is another large educational institution—and, in fact two—at the junction of Massachusetts and Wisconsin avenues, where the buildings of the Cathedral School for girls and also the one for boys are located.—*Washington Star*.

A Bill Confirmatory of the Wisdom of Our Plans.

Representative Raker of California has introduced into the House of Representatives a Bill, which is another effort to utilize this time through correspondence for the popular good, the immense educational treasures of the National Government. It is based upon conditions which loudly call for such a correlation of these rich deposits with one another and with the personal contact, aptitudes and qualifications of our graduate citizens as is proposed in the Institute for Research in our College for Graduate Study. The Bill follows:

A bill to make accessible to all the people the valuable scientific and other research work conducted by the United States through establishment of a national school of correspondence.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to give the largest number of people access to and practical instruction from the largest and most valuable collection of scientific and other data upon all subjects in which the American people are most vitally interested heretofore and now being collected by the National Government and lodged at the city of Washington, the President of the United States and the heads of the several executive departments be, and they are hereby, constituted a board of com-

ered, under the direction of the Board, the duty of the Commissioner of Education to prepare, explain or plans whereby the publications of the several departments and bureaus of the Government shall be properly classified and lists thereof be published for the information, and to cause instruction by correspondence to be furnished on with all persons, both inside residents of the United States, who may apply therefor, and with all foreign countries, such publications as any such person may desire to purchase, and which shall be supplied to him free of charge and cost. The cost of such service shall be annually estimated for upon plans and in amount to be approved by the Board of Control and submitted to the Congress annually through the Secretary of the Treasury for necessary appropriation.

Section 7. That it shall be the duty of the board of control to submit annually to the Congress a report of the work hereby authorized and any recommendations for the improvement and extension of such work and in aid of which additional legislation may be required.

Two More Pages From Our Book of Life.

MY DEAR PROVOST, ETC.:

I have an estate that will give you an endowment fund of "One Hundred Million Dollars," that will yield \$20,000,000 per year.

Do you want the operation laid before you?

Very truly yours, * * *

"A friend of Higher Education stands ready to deed two million dollars to found an Institute of Art in connection with the American University, provided the American University will help sell a vast stretch of property in a foreign land, the property being worth at least \$15,000,000. All the owner asks is the residue from the sale of the property, much of which also will be devoted to education, philanthropy, art and charity."

A Vision of Washington, D. C.

ANNA F. MAMREOV.

Washington is the capital city of the United Sovereign States of America.

One belief rises the heart to a deeper throbb of hope for the coming age of the world, and that belief is, that the God who endowed man with the divine rights of liberty has his chief seat on earth in the city of Washington.

The religious and political organizations of a country make a people great or otherwise. Commercialism is only a necessary servant to man's development. In all past history where commercialism became the master, that nation deteriorated and its existence as a factor in the higher development of mankind vanished. Assyria, Tyre, Palestine, Egypt, Rome, Greece—straight down through the ages tell that tale. History has repeated itself and will continue so to do, in spite of all temporary successes of commercialism as a chief factor.

Washington should and will become the center for universities which afford the youth of this great Republic a post graduate course in the two great factors that make or unmake nations, the laws of religious and of secular governments.

Washington has been favored above all capitals which have been or are. Capitals of the ancient nations and modern capitals of the Old World peoples have had no choice in the matter of being commercial centers. Every one of them is so situated as to belong to some particular province of the country of which they are the capitals. Thus they have been more or less hampered through the ages by the forces of immutable outward circumstances.

But Washington "is free." No territorial division has any claim upon it. It is—"the city which hath the foundations whereof the architect and maker is God." It was not founded on lust of territory, or through lust for power or gain, nor by unjust invasions or bloody wars. But it was established

in peace and goodwill to be the Federal City for the United States of a sovereign people.

Washington is a true manifestation of the genuine American spirit; for while we cannot say that any State represents Washington, we can assert that Washington is the soul and spirit of the body of this great country and its people.

The seers of old among all races and nations foretold a state of society to be realized on this earth, which some term the Millennium. Some believe that this age will be ushered in or terminated by the appearance of the "New Jerusalem which is to come out of heaven from God." How shall we recognize the advent of the New Jerusalem and of the Millennium dawn? What did they mean by the expression "out of heaven" and "from God?" Heaven is to be understood as a greater development of all man's powers; and "from God" signifies that the highest development can not be attained by merely material civilizations for man's carnal appetites, but through his spiritual nature by which he communes directly with his Creator.

Seers and prophets gave the signs by which the advent of this higher state of life could be recognized. "All nations shall flow into it." Men of all races and of all nations have flowed and still flow into the United States, chiefly, "Because we have heard that God is with you." "Thy gates shall be open continually; they shall not be shut day nor night; that men may bring unto thee the wealth forces of the nations." The gates to this country are open day and night to the visitors and equally to the immigrants whether they arrive in the steerage of a vessel or in the most costly cabins of the steamers. The "wealth forces of the nations" consist not of mammoth matter; but in the physical and mental health and activities with which the immigration to this land was so richly dowered. From the day that the first white man landed on the shores of this vast continent, the millions of capable, industrious, honest men and women immigrants may have left material wealth behind, or had none to carry away, but they brought with them the "true riches" of clean, strong, healthy bodies, clear, keen intellects, and all the talents inherited from their ancestry of the various nations who in all ages excelled in the arts of agriculture, music, and manufacture. They brought character, honest, upright and moral, because achieved through generations of God serving and humanity loving men and women.

For Washington, that the greatest glory of the ages are reserved, if its legislators and its inhabitants prove to be like the "children of Issachar," chosen because they "were men that had understanding of the times to know what Israel ought to do." Let Washington not vainly expect miraculous transformations abroad, but let her observe diligently the numerous signs of the times which prove that she is called to be the New Jerusalem, the City of Peace, which is to be "a praise in the Earth."

The Old Jerusalem, through many errors and much tribulation, brought God and man into a very near relationship. The vision for Washington is to perfect that glorious mission by promoting and cementing the brotherhood of man in such wise that the whole world shall know that "The Lord is our Judge and the Lord is our Statute maker." Of our incoming President may it be recorded as it was of the seer of old, that "He was a wise counsellor" and that "He had understanding in the visions of God." May he prove to be the adviser and leader of a "people who shall be all righteous and inherit the earth forever."

Group Wearing Costumes from the Biblical Museum of the American University.

A striking feature of the famous Women's Parade of March 3 was the boat which bore the Women of the Bible Lands, and of which a good picture was shown in the Courier of March, 1913. This company is presented in this issue of our paper grouped compactly on the sidewalk in front of the First Presbyterian Church, their place of rendezvous. The costumes from the Mountford-Mamreov Museum of the American University with their rich variety of pattern and

GROUP WEARING COSTUMES FROM BIBLICAL MUSEUM OF THE AMERICAN UNIVERSITY.

color made a very pleasing and instructive impression. The success of this fine presentation was due chiefly to the taste, skill and labor of Madame Mountford, who was called to the preparation and execution of this beautiful exhibition.

John Barrett on Washington as a World-Capital.

John Barrett, director general of the Pan American Union, in a recent address on "Making Washington a World Capital," pointed out what he considers shortcomings and necessities of the National Capital.

"In using the phrase 'making Washington a world-capital' I mean making Washington the world capital—that is, the capital of capitals among the forty-five odd nations of the world; a capital which shall be as nearly ideal as possible in every respect, the ideal seat of government of a nation which seeks to lead the world in civilization; a capital which shall not only possess the highest beauty of plan and architecture, but shall be a model in municipal government, in the housing, in the health and in the happiness of its inhabitants; a capital which shall set a world example to other capitals and cities not only in official structures, in streets, parks, boulevards, monuments and bathing places, but in social uplift, school systems, public utilities, sanitation and artistic, literary, musical and scientific advancement; a capital where the poor as well as the rich shall be considered in all schemes and undertakings for the public welfare.

"Washington as a world capital must first be an ideal national capital. If it does not qualify under the latter head,

it will not qualify under the former.

"Washington, as an ideal capital, must welcome, not patronize or ostracize, the men and families of limited means but sterling qualities. The senators and congressmen of small means who come here from distant cities, towns or states should be made as welcome as their rich colleagues, as the retired banker, lawyer or mining man, and as even the rich widow with herself or daughters to marry!

"There is no better way to increase our prestige or influence and our trade abroad than to bring foreigners other than immigrants in increasing quantities to our country and to this capital, and then, after showing them our national capital, letting them meet, through its hospitality, our representative men in public and in private life, taking them to our government offices and institutions, send them back to Europe, South America and Asia as our lasting friends and admirers. Exchange of travel and visits and the getting acquainted of one people with another will do more to promote peace and end war than all other peace propaganda put together.

"Washington, to be a world city, must have a great convention hall suited for international and national conventions of the highest dignity and importance. Through this agency and the hospitality and confraternity which I have already mentioned it will become, more than any other capital in the world, the seat of international conventions and gatherings. For all the world is only too ready to come to this new land, study its problems and institutions, if Washington possesses the facilities for extending such hospitality.

"Congress and the people of Washington should work together to develop, without delay, its parks and boulevard-

systems to the full extent of their possibilities. There should be a complete canopy of boulevard and park system reaching entirely around the National Capital.

"Never will it be possible to make the surroundings of our great national buildings and their approaches beautiful unless there is created an architectural commission which shall have power to prescribe the general style of architecture of public and private buildings. Such authority rests in some board in nearly every other important capital of the world. Washington must come to it or become more ugly rather than more beautiful.

"The carrying out of the plan for a national forest or park reserve between Washington and Baltimore will aid greatly in giving Washington the ideal environment of a great national and world capital. The movement in this direction should be fostered and brought to a successful issue."—*Washington Star*.

Great University Needed.

The address by Mr. Barrett above quoted gains interest and strength from a subsequent utterance by this sagacious student of our national and international interests. In a speech made at the graduating exercises of one of the educational institutions of Washington, Mr. Barrett discusses the advantages of the city of Washington as a place for a great university. We quote the portion of his address which refers to this aspect of Washington as the address is reported in the public prints.

"Washington is unique among the capitals of the world, in that it is solely the capital and not a mighty, material and commercial center and entrepot where fashion, society, the almighty dollar and the mad rush of worldly competition act as deterrents upon the young man and woman trying to get an education. Washington has the ideal atmosphere and conditions of life for a great educational center.

"This thought prompts me to express the hope that one of the notable features of Washington in the future is to be that of the location and development here of all classes of educational institutions—technical, professional, collegiate, academical and others—which will provide the ambitious young American man and woman with every and any kind of schooling he or she requires for success in life.

"In this connection it seems to be inevitable that there must be established here presently, and the sooner the better, a great national university to which the graduates of colleges all over the United States and the world, and also the students of lesser institutions, can come to round out their education and secure that special training which the governmental facilities of Washington can provide.

"If we can only cut out a small portion of the vast sum of money that we spend on pensions, 'pork barrel bills' and other measures which have a doubtful usefulness, and utilize it for the establishment and maintenance of a national university under the control of the United States government, we would bring here thousands upon thousands of the best young men and women not only of the United States, but of all other nations, to get that schooling which would make them better, more patriotic and more useful citizens of this and other countries."

National Shrine at the Catholic University.

A national shrine of the Blessed Virgin is to be set up at Washington to be a part of the Catholic University. A reason for the selection of that name is the fact that in 1846 the sixth provincial council of Baltimore placed the United States, then containing one ecclesiastical Catholic province, under the protection of the Blessed Virgin Mary. As yet no general recognition of that fact has been made by Catholics of America. Now Catholic prelates put forth the argument that the national capital and the Catholic University have superior claim, and they appeal to Catholic women to collect the funds. These same prelates argue that as women raised

money to purchase Mt. Vernon, Catholic women ought to raise money for this national shrine.

The Catholic University, opened in 1889, has grown steadily, until its student body, including professors, numbers about 550. Many functions take place there each year, and there is at Brookland, the site of the university, no suitable church for the saying of mass, and the display of the rich Catholic ritual. It is also said to be not unlikely that another plenary council may be called in America, and if so, it will be held in Washington. Thus there is additional need for a church, or imposing university chapel. The head of the movement is the rector of the university, Rev. Thomas J. Shahan, and women in some cities are interesting themselves in the project. No mention is made of the amount of money needed.

—*Public Press*.

Rome at Washington.

We are not trembling at the presence of Rome in Washington. But it is suspicious. The *New World*, the Catholic paper, boasting the largest circulation in America, has these items which we quote verbatim:

"Mgr. Vincent Misurata, who has been chosen secretary of the papal legation in Washington, has been delayed in Rome, and plans to leave in a day or so for this country to take up his new duties."

"Mgr. Misurata has been for some years connected with the diplomatic service of the Catholic Church, and his appointment is regarded in army quarters as confirming the impression that the United States is to be hereafter considered by the hierarchy of the Church as a most important part of its diplomatic corps.

"Our Holy Father, it is understood, has been able to see Mgr. Misurata, but only for a brief period, to give instructions as to his new work. The interview was continued by the papal secretary of state, Cardinal Merry del Val. It is declared that the latter spoke in the pontiff's name of a new era which the Catholic Church hopes for in this new country."

"Cardinal Farley of the New York diocese, the first of the great Catholic prelates to make a personal call on President Wilson, visited the White House a recent afternoon. He was accompanied by United States Senator James A. O'Gorman of New York.

"The cardinal remained a short while with President Wilson, but he took occasion to say that he was heartily in accord with the ideals of government the Democratic President has expounded.

"Mgr. Ceretti, auditor for the papal delegate, was presented to President Wilson by Postmaster General Burleson.

"St. Matthew's has been a power in Washington church circles for years, and the old and the new church have also been the religious home of the Catholics of the exclusive diplomatic corps, stationed at Washington, and those of the Army and Navy of the faith.

"For instance, at mass on a recent Sunday, among the congregation were the French and Italian ambassadors and their families; Justices White and McKenna of the Supreme Court; Admiral Ramsey of the navy, and Generals Torney and Melhryre of the army.

"Elaborate plans to make the Catholic University one of the great educational centers in the United States, and in fact, in the world, were formulated at a meeting of the board of trustees held recently, and which drew to Washington the highest prelates and dignitaries of the Catholic Church in this country. The meetings were held in Caldwell Hall, at the university, and all day the campus was colored by the brilliant robes of the visiting churchmen.

"In order to avoid delay in carrying out the plans, the board of trustees unanimously voted that Monsieur Thomas J. Shahan, rector of the university, be authorized to prepare a schedule of all the buildings that he thinks the university needs and to carry forth the work on the new structures which it is estimated, will cost more than \$1,000,000.

"Three new buildings are to be begun immediately, and are to be completed before the beginning of the next scholastic year."—*Central Christian Advocate*.

THE SMITHSONIAN BUILDING.

The John Fritz Bequest of \$21,000 Promptly Paid.

Much credit is due the three executors of the will of the late Hon. John Fritz, of Bethlehem, Pa., for their promptness in handing over to our Treasurer, Mr. Charles C. Glover, all the securities left to the American University. In a little more than three months after Mr. Fritz died the transfer of the entire list was completed, wholly free from any collateral inheritance tax, for the payment of which Mr. Fritz thoughtfully had made other provision. This trio of faithful administrators consists of Mr. Abraham S. Schropp, Mr. Wm. R. Tucker, and Mr. George F. Chandler, who are respectively designated in the instrument in terms of endearment as "my friend," "my cousin," and "my nephew." The entire document

breathes the rare spirit of gentle kindness, which marked the daily life of its author. For the early and thorough execution of their great trust these men have the appreciative gratitude of the trustees and officers of the university.

That Money Which We Need.

It is settled now that the American University is to open its doors for work on June 4, 1914. But no one goes to war without counting the cost. In view of the vital consequences which an actual academic inauguration of the university enterprise involves, we have been forced to give the most earnest and searching study to our financial condition and resources. We have been reviewing also our educational policy and

the hoped for scope of our work when once it is set in operation. It is no light undertaking to plan, finance and set into functional life a great university that adequately shall meet the modern requirements in education. If any one dreams other than this let him attempt the task. A certain brilliant writer and man of affairs whose name is in many months has declared that the most sobering experience in life is to be the responsible man who has to face a pay roll the first of every month.

This office has known that responsibility now for no little time. Because, therefore, of caution and discretion born out of past experiences, we now say that to be justified in putting the American University into academic operation we must have more money. We ought to have two hundred thousand dollars more than we now see at hand. The university must have the breath of life. There will be no drawing back, let it be understood, from the adventure into life. That is settled. The die has been cast. On the flowing tide our barque soon will push out to join the great fleet that sweeps over the sea. And we have faith. We behold, as it were, in a God-given vision, a voyage of discovery and achievement that shall rejoice generations yet unborn. But notwithstanding this fixed plan and this vision of the future, we have a practical problem confronting us. To pay the expenses made necessary by our opening plans we must have more money.

Recent Gifts of Money

(Acknowledgment of amounts less than five dollars to be regarded as a receipt therefor.)

Ashbury Memorial Fund

\$85.85, Bishop Naphtali Luccock; \$3, S. S. Farley.

General Endowment Fund

\$21,000, Estate of the late Hon. John Fritz.

General Fund

\$300, W. F. Marston; \$200, Mrs. J. F. Keator; \$100 (each), W. M. Crane, John Walton; \$25 (each), Salem Kile, Chas. W. Smith, Miss Annie Harpham; \$10 (each), Charles Dreiske, J. M. Dalrymple, J. P. Smith, C. W. Lefler, B. C. Downey, E. O. Hunter, J. M. Ogden, Alex. Taggart, S. M. Smith; \$5 (each), Geo. H. Rehm, T. S. Harris, J. C. Lowe, J. N. McMaster, A. B. Cornelius; \$2.50, P. H. Yant; \$2, J. B. Sappington.

Hamilton Lectureship Fund

\$5, J. W. Briggs; \$3, O. T. Baynard; \$1, Wm. A. Campbell, C. P. Keast.

Information Concerning the Plans of the American University.

Many inquiries for information concerning the proposed fellowships to be maintained by the American University have been made at the university office. There is also a constant demand for general information as to our new plans. In order that this natural interest may be satisfied and all available light on our work may be brought to those desiring it, we wish

to make, at this time, a preliminary statement. Beyond what may be embodied in this statement we are unable for the moment to give further concrete data. The present status of the work does not justify it. To whomever this statement comes, therefore, there is being afforded all the light that at this time we are able to give.

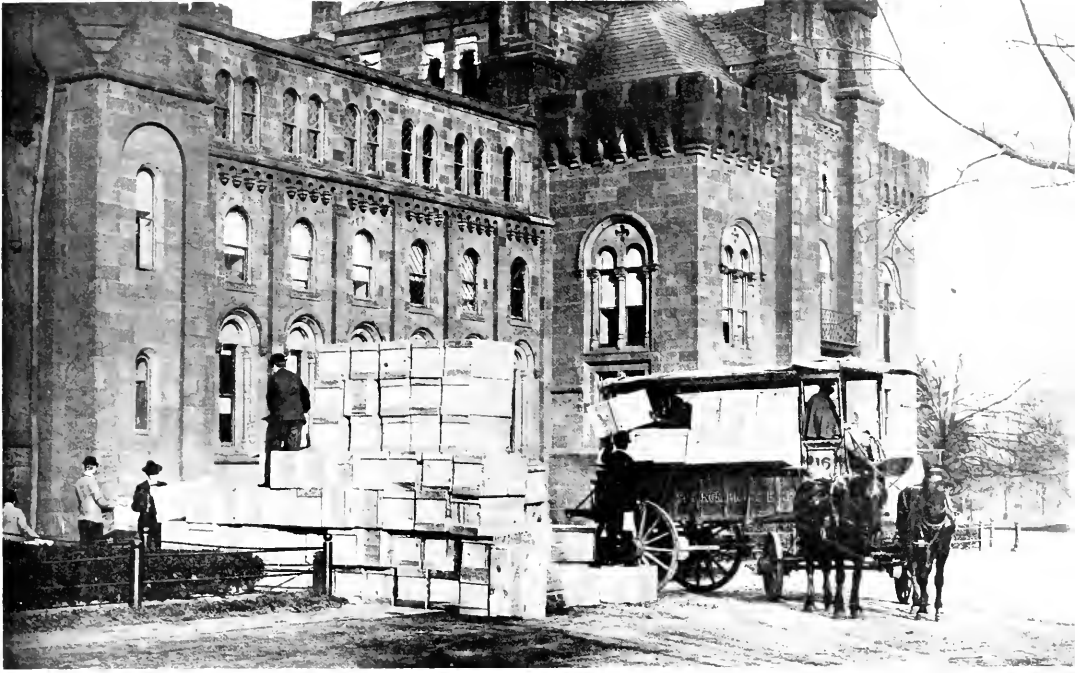

The facts are as follows. We are at this time in the process of coordinating our plans in accordance with the policy decided upon by the Board of Trustees at their last meeting. At this stage, therefore, we are unable to give definite facts concerning the educational work or courses that may be available through our university channels. Nor are we as yet at a point where the actual selection of fellows of the university can be undertaken. The personnel of the Board of Award and the Director of Research first must be determined.

After this question of the personnel of our educational helpers has been settled, there must be made a first hand examination of the educational opportunities now existing in the Government departments and a codification of the results into a printed catalogue or handbook. There also must be set down in this handbook all details of needed information concerning the requirements which the university may make in the selection of its fellows and in the enrollment of those who desire to embrace the university privileges. When this has been done, the university handbook embodying all these details will be mailed under proper conditions to all who send for it. It can be seen that, up to this moment, we still are in a formative state and are unable to give the actual data for which our friends are asking.

We make, therefore, the following suggestion:—All who desire to be appointed to a fellowship in the American University, and all others who desire definite information concerning the educational work which is to be undertaken by us, will send their names and addresses to the American University, 1422 F St., N. W., Washington, D. C., and in due time under the conditions noted above the literature needed illumination upon the subject will be mailed to the addresses given.

Endorsement by the New Jersey Conference.

The American University at Washington City is strategically located both as to the District of Columbia and as to the nation. The vast treasures and equipment of the Federal Government open and accessible to all students of the University free, constitute an equipment unequalled in the country. The increase of endowment and the promise of opening the Fellowship Department and some lecture courses as soon as \$200,000 more shall have been raised are hopeful. This institution, properly supported in prayer, love and sacrifice cannot fail to become a medium through which shall be interpreted the noblest ideals of personal freedom in national life and evangelistic aggressiveness in the Christian religion.

INTERNATIONAL EXCHANGE SERVICE—SHIPPING DEPARTMENT.

Our Friend Doctor Couch Throws Light on Our Name.

Ancient the origin of the name "The American University," the Rev. Dr. David W. Couch of Brooklyn, one of the most beloved of our host of veteran preachers, writes this interesting letter under date of July 3, 1913:

My Dear Brother Hamilton:

I am surprised to find in the late issue of your paper, several persons claiming to be the authors of the name "American University." It absolutely originated as follows. I was on my way from New York to Wisconsin, to preach at the dedication of two or three churches. I stopped over night in Chicago with Bishop Samuel Fallows. During our conversation he suggested that the university in Washington should not be called the Methodist University, but that all Protestant people should be interested in it. So we began to suggest names. Protestant University was suggested. United States University—finally we settled on American University. I suppose that name was suggested by myself, from the fact that I said to Bishop Fallows—"Now my brother, you write at once to Bishop Hurst and suggest the name, as I am going into Wisconsin to be gone for two or three weeks." He said "No—the name is yours and you are the one to write." I immediately wrote and suggested the name. When I returned to New York, I found a letter from Bishop Hurst saying "Your name has been adopted" and thanking me for it. Had I thought for a moment that there was any possibility of the name being claimed by anyone else, I should have certainly preserved that letter, which

would have settled the whole matter. But these are the facts in the case.

I hope you will publish this in your little paper and see if anyone can contradict it.

From your old friend and brother,

(Signed) D. W. Couch.

Mark This New Asset for the American University

Katsuji Makina, a Japanese artist, who was at the New Willard, came to Washington to inspect the site for the art buildings that will be erected here with funds donated by Mr. Freer, of Detroit.

"These three buildings will cost more than \$500,000," said Mr. Makina. "A large central hall will be used for American and European art. On the right will be the Chinese building, and on the left the Japanese gallery. They will be one-story buildings, conforming in general style with the National Museum."

The Japanese building is to be designed and the interior decorated by Mr. Makina, who has been in the United States six years designing interiors and buildings for Dr. I. Faika Mina, president of the Nippon Club, of New York, who has a Japanese palace in Sullivan county, N. Y. Dr. Mina's Riverside drive home, in New York, is another Japanese palace designed by Mr. Makina.

"The buildings in Washington will contain Japanese hanging pictures, which are called 'kikemono,'" confirmed Mr. Makina. "One of the finest collections of Japanese art objects in the world will be assembled in the Freer galleries. The basements will be so designed that they can be used by students." *Washington Post.*

The New Street Railroad Begun.

The Washington Railway and Electric Company has made its formal return to the Commissioners of the District stating that the construction of the new railway extension from Wisconsin Avenue to the District line along Macomb Street and Massachusetts Avenue, has been begun. This initial work has been done just west of Wisconsin Avenue at its intersection with Macomb Street. Our friends and the general public will watch with great interest the progress of this improvement in transportation facilities.

Highly Appreciated Greeting from Doctor Beiler.

From his home in Redlands, California, our former Vice-Chancellor, the Rev. Dr. Samuel L. Beiler, now associated with the Maclay College of Theology, at Los Angeles, as Professor of Pastoral Theology, comes this cordial greeting, written July 22, 1913:

My Dear Chancellor: I congratulate you that at last the date is set for the opening of work in the American University. I congratulate you also on the three-fold scheme of work you have selected. It is worthy of the high ideals of the early days, and does not clash with the work of our other schools. It makes the old flame of love break forth anew. How I wish I could be with you on the historic Opening Day of next year, but fear distance and expense will make it impossible. Be assured of my deepest interest and my prayers for your largest success.

Yours sincerely,
(Signed) SAMUEL L. BEILER.

A Friendly Note from the Western Christian Advocate

The Rev. Fred M. Stone, D. D., endowment secretary of American University, in Washington, D. C., is on his way West, looking after the last hundred thousand dollars of the endowment, which must be had before the formal opening of the university next June. He made a call upon this office and gave us most encouraging words concerning the progress of his work. Methodism has a great piece of educational business on her hands in the building, equipping, and supporting of a great university at the capital of the Nation. It is the purpose of the leaders to so swing the interests of this school into the Church's attention during the winter as to have a great consummation.

Thomas Nelson Page Writes Discriminately on the Nation's Capital.

Dr. Thomas Nelson Page, the new ambassador to Italy, writes an interesting article called "The Romantic Founding of Washington" in the current number of Scribner's Magazine, in which he points out that it is far from true that to L'Enfant alone is due the magnificence of the plan for the capital of the United States. He says, in part:

"The capitals of most countries are the especial pride of their people. It is not so with us—at least, it has not been so in the past. Happily, it appears as though this condition were changing. It has, indeed, ever appeared to me strange that Americans know so little of and care so little for the capital of their own country. Nature, prodigal of gracious slope and curve and tone, has endowed it with perhaps more charm than any other national capital—at least, than any large European capital, and its founders laid it off on a generous plan which has left the opportunity of furthering what nature presented in a way to appeal to the pride of our people. Yet how large a proportion of Americans turn their eyes and their steps, not toward its majestic buildings, but to some foreign capital, with its gaudy shops and commercial allurements, returning with an alien's ideas on many subjects and boasting of beauties which are not comparable to those of our own capital city.

"Not long since, in a club in our chief commercial city, a group of gentlemen were discussing foreign cities with the familiarity of regular habitues, and a provincial visitor from a small territory on the banks of the Potomac suggested that in the spring at least Washington might vie with any capital that he had ever seen.

"I have never been to Washington," said a member of the club, who was an annual visitor to nearly every European capital and had, indeed, a familiarity with them second only to his familiarity with his native city.

"You mean that you have never visited Washington?"

"No. I have passed through Washington frequently, going back and forth to Florida or some other southern winter resort, but I have never spent an hour there."

"Come with me tonight, man, and see the most beautiful city in the world!" exclaimed his guest, gathering courage.

"Washington—with its noble buildings, its charming parks, its smilt stretches and shady avenues, its majestic monument—the most majestic on earth—now bathed in the sunshine, now reflecting the moonlight, now towering amid the clouds—meant nothing to him. Washington, with its charming society, its cosmopolitan flavor, its interesting circles social, political, scientific, artistic, diplomatic, meant nothing to him. Why was it?"

THE ROOSEVELT TROPHIES FROM AFRICA—LION GROUP IN NEW NATIONAL MUSEUM.

"Washington has a unique life; though how long it will remain so no one can tell. Fresh with the beauty of youth, situated at the pleasant mean between the extremes of heat and cold, possessing a climate which throughout the greater portion of the year admits of the only proper life—life in the open air—with sunshine as sparkling and skies as blue as Italy's, it presents to those who wish them political, scientific and social life, and soon it will offer a literary and artistic life, which, second to none in the new world, may possibly, in no long time, be equal to that of any in the whole world. In Washington one may, according to taste, hear discussed the most advanced theories of science in every field, the political news of every country, and enjoy the society as simple, cultured and refined—or, if one prefers it, as pretentious, as empty and diverting—as in any capital of the globe."

Our Field Workers in the Campaign.

In the campaign to gather in money and the permanent Endowment needed for opening the university, our workers all are alive to the great interests involved. Each is at work enthusiastically in the appointed field. The fall conferences are being visited, the claims of the university work are being pressed everywhere with a new zeal and assurance. The decision to open the institution together with the plans for the opening which finally have been adopted have created a new sense of loyalty to the undertaking. They have awakened a new interest in all quarters. The many appli-

cations for fellowships which have reached the office are evidence that this department of our proposed work will meet an important need.

It gives us pleasure to announce that at the session of the Des Moines Conference just concluded, Dr. J. F. St. Clair was reappointed to work with the American University and already has entered successfully upon a new year of determined labor in the middle west. For this successful steward of the Kingdom we bespeak the kind offices of help and encouragement from all to whom he may appeal.

Dr. Stone is in the section of country east of Dr. St. Clair's. He writes the office encouragingly concerning a new enthusiasm with which he finds all reference to our work now greeted. He says that all over the states which he has visited he finds disseminated a confidence and trust in the final outcome of the University that augurs well for the future. Everywhere, he declares, the assurance at last has come that the high hopes of the early days and the loyal devotion of long waiting friends are not to be disappointed. Best of all, the plan proposed invokes universal approval.

Our more recent helper, Rev. Gervase A. Viets of the New York East Conference, makes his headquar-

ters in New Haven, Connecticut. He is hard at work familiarizing himself with the eastern field and men. He is laying careful plans for largest possible usefulness. He has wide personal acquaintance among men of national reputation and to these he is bringing the appeal of the undertaking at the National Capital. Being perfectly familiar with New York and New England, Mr. Viets is in congenial environment. We ask the help of all for his best success.

Dr. John A. Gutteridge unfortunately still is confined to his home. But his love for the old work still is his joy and his hopes are never dimmed. He wields his pen with no little success in our behalf. He keeps the university enterprise alive to many men of open heart and generous hand.

Rev. J. B. Palsgrove still is at work in his own field and home of Pennsylvania. Rev. Albert Osborn this autumn visits in our interest two important New York Conferences, Genesee and Central New York. Here he will find old friends and life-long interests.

Chancellor Hamilton is looking after the interests of the University in the country around Pittsburgh. He will visit the conferences in this neighborhood and give personal attention to various matters connected with the large interests which the university has in this section.

Thus all are of one heart, though not all in one place. This distributed activity, systematically apportioned and administered with all possible aggressiveness, will not be allowed to languish until the university is opened on June 1, 1914. From that day on a new and determined campaign of national proportions will be pushed to complete the present university program. May all auspices be propitious and all friends loyal and all hearts kind.

Now is the Time to Help Us

Many friends have been telling us, "Wait until you are ready to open, then come to me and I will help you." Others have said, "If you will only once get the university opened, there will be no difficulty in getting money. Come to me, then, and I will stand by you." Still others have made pledges to help us when we needed money for the actual opening.

To all these friends, and to all others who desire our success in this crucial hour of the undertaking, we say, "The hour of our supreme need has come. Strike hands with us for the highest possible success. Help us to raise this two hundred thousand dollars which we need. Give us as generous a gift as you can. Every dollar now will count."

Those who may desire to perpetuate their names and interest in posterity can do so by endowing fellowships in the university. Sixteen thousand dollars will endow a foreign fellowship to bear the name of the

giver. Twelve thousand dollars will endow a fellowship for work in America. A less sum can be devoted to the foundation of a scholarship.

But our needs now are so multiform that any sum of money will help to stay our hands and render the new phase of the project full of promise. Those who have made subscriptions to the work are urged most earnestly to pay their pledges at the earliest possible moment. Extra expense already has been incurred through the plans for opening. Soon each new day will involve additional outlay. Help us. Now is the hour.

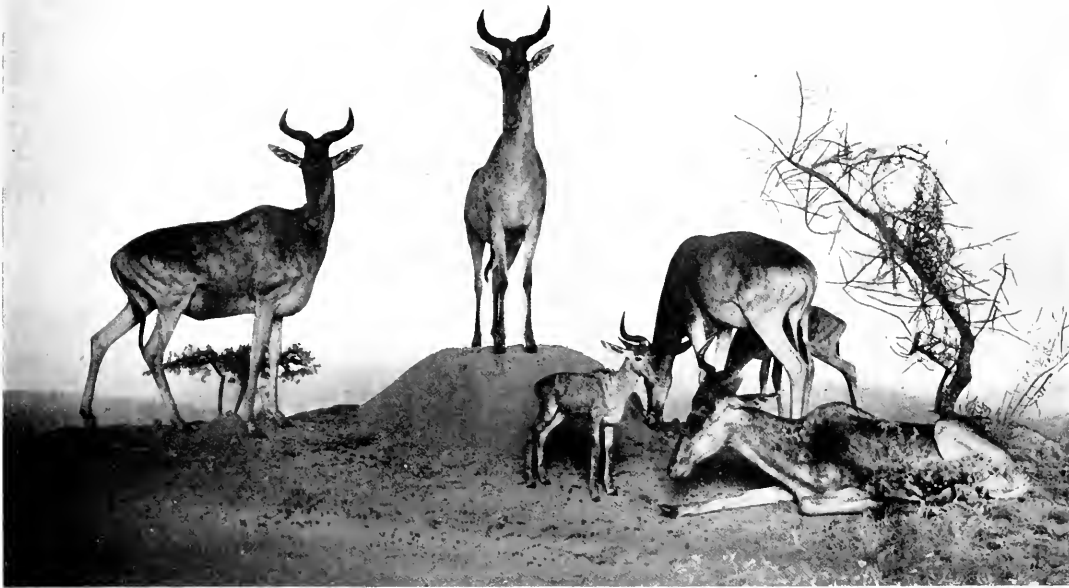

The Smithsonian Institution.

This issue of the Courier might be called the Smithsonian Number, for it contains six views relating to the buildings and materials of this noble mother of institutions clustering at the Nation's center.

The Smithsonian Institution was created by Act of Congress in 1846, under the terms of the will of James Smithson, an Englishman, who, in 1826, bequeathed his fortune to the United States of America to found at Washington, under the name of the "Smithsonian Institution," an Establishment for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian building, was erected on land given by the United States. The Institution is legally an Establishment, having as its members the President of the United States, the Vice President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice President, the Chief Justice, three members of the United States Senate, three members of the House of Representatives, and six citizens of the United States, appointed by joint reso-

SOLAR ECLIPSE—CORONA, TAKEN WITH 135 FOOT FOCUS.

THE ROOSEVELT TROPHIES FROM AFRICA—HARTBEEST GROUP IN NEW NATIONAL MUSEUM.

lution of Congress. It is under the immediate supervision of the Secretary of the Smithsonian Institution, who is its executive officer and the director of its activities.

For the increase of knowledge, the Institution aids investigators by making grants for research and exploration, supplying books, apparatus, laboratory accommodations, etc. It occasionally provides for lectures, which are published. It has initiated numerous scientific projects of national importance, some of which have resulted in the creation of independent government bureaus. It advises the government in many matters of a scientific character, especially in such as have an international aspect. It supports a table at the Naples Marine Zoological Station. It cooperates with scientific bodies of national importance, like the National Academy of Sciences, the American Association for the Advancement of Science, the American Historical Association, etc.

The Smithsonian Institution has administrative charge of several branches which grew out of its early activities, and which are supported by Government appropriations. These are the National Museum, including the National Gallery of Art; the International Exchange Service; the Bureau of Ethnology; the National Zoological Park; the Astro-physical Observatory, and the United States Bureau for the International Catalogue of Scientific Literature.

The International Exchange Service, a view of whose shipping department is given on page three, is conducted in accordance with the terms of a convention entered into between the United States and various other countries, and is for the free interchange of scientific, literary, and governmental publications between governments, institutions and investigators. Over 50,000 establishments and individuals have availed themselves of the privileges offered, and since its establishment it has handled over 3,000,000 packages.

The Astro-physical Observatory investigates solar radiation and other solar phenomena, and has produced a chart made by

automatic and trustworthy processes, which shows in detail the so-called invisible infra-red spectrum. The work of this Observatory is especially directed to those portions of the energy of the sun that affect the climate of the earth and the crops. On the sixth page will be seen reproductions of a magnificent photograph of the total eclipse of the sun taken at Wadesboro, N. C., May 28, 1900, showing a most beautiful corona. This picture was taken with a 16 second exposure with a 135 foot focus camera. The picture on page eight is a view of the Bolometer, slightly magnified, an instrument for measuring heat radiation. The delicate wires across the plate will indicate a difference of less than one-billionth of a degree centigrade!

The United States National Museum is the depository of the National Collections. It is especially rich in the Natural History of America, including Zoology, Botany, Geology, Paleontology, Archeology, and Ethnology, and has unique collections of American History, as well as many series relating to fine arts and the industrial arts. It is a museum of record, research, and education, and issues numerous technical and popular scientific publications. On pages five and seven will be found views of two striking groups of mounted animals. These are some of the famous collection resulting from the hunting expedition of ex-President Roosevelt in African jungles. These lifelike representations of the hartbeest and lion families stand in the New National Museum.

Some of the Resources Which We Plan to Use.

In this issue of THE COURIER we publish several illustrations which are of unusual interest. These pictures are the first of a series of similar photographic reproductions which now from time to time we shall lay before our readers. The pictures will comprise a

graphic representation of the Federal treasures which are available for educational and research work at the National Capital. Few realize how vast are these national resources and how rapidly they are expanding. As a whole they comprehend a unique reservoir of riches which for more than a century have been accumulating. During all this century that they have been gathering never once have they been put to work systematically and continuously in an educational way. It is our plan to tap this reservoir and cause the waters to flow out along proper systematized lines and through channels which shall bring to definite individual use and training the material so long held back in the storage or utilized only through bureau publications and government circulars of information.

Concerning these facilities for study and research in the offices of the United States Government at Washington, President Hadley of Yale University says: "Of the extent and value of the researches made by these various offices and bureaus there can be no doubt whatever. The scientific results are admirable alike in quantity, quality, and range of subjects. Of the investigations which have given American science its credit and its standing in other countries, a surprisingly large proportion have been conducted in government departments. But it has been felt in many quarters that these bureaus were not administered in such a way as to have the maximum educational value. The work has not been done by students but by officials. The very fact that its scientific and administrative usefulness is so great has emphasized its lack of direct connection with the educational system of the country. It has been felt that if a larger number of students were trained in the government offices at Washington, this would form

a natural development and culmination of our whole system of public instruction."

Various effort have been made to put to educational use these resources thus described, but nothing has resulted. In referring to one of these efforts subsequently abandoned, the one which happens to approximate most closely to our own plan, President Hadley says: "What might have come from this movement if it had been vigorously pursued it is impossible to tell." Then the writer rather despondently concludes, "The student who comes to Washington today to get his scientific training in the government department comes under his own impulse and at his own risk."

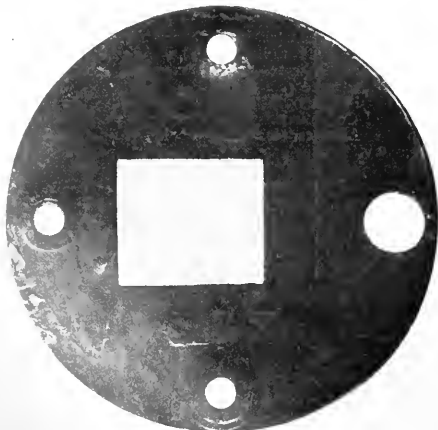

Others have shared in President Hadley's feeling. The National Association of State University Presidents repeatedly has endorsed the idea of utilizing in a more definite and practical way the educational resources of the Federal Government. President Van Hise convincingly has written on this subject. President Edmund J. James eloquently has spoken on it. For years it has been the dream of scores of our wisest educators and statesmen. And still nothing has come of it all—like the riches of life in the enchanted palace, bound all in slumber, yet waiting only on the vital touch of an active hand to spring into full course of action, these government treasures have remained hidden and fallow.

But now we propose to change all this. We are not boastful. We arrogate not to ourselves or to our enterprise that which is beyond our capabilities or our proper scope—none the less, we fully are minded now to make the high adventure, to break through the hedge, and to lay virile and quickening hand on these resources. We are not rash, for, from modest beginnings have grown well nigh all that is great in human enterprise. From the pictures which we offer, let it be seen what wealth of material, what matchless opportunities are ours. Authorized and justified by the spirit and the letter of two Acts of Congress, one can say, "Here is the equipment of The American University. Here are our laboratories, our libraries, our museums, our experiment stations, our art galleries, our botanical gardens. They are ready and waiting. Have they not dignity and promise? Where on earth can they be surpassed?"

Another Expanding Educational Opportunity at Washington

Deeds were placed on record yesterday transferring to the Carnegie Institution of Washington from several owners a tract of land on the Broad Branch road near Chappell road, and a short distance east of Connecticut avenue and south of Chevy Chase circle. The holding thus acquired comprises seven acres.

On this site is to be built from plans prepared by Waddy Wood, architect, a brick structure, where will be located the offices, laboratory and shop of the department of terrestrial magnetism of the Carnegie Institute, of which Dr. Fleming is at the head.—*Washington Star*.

LIBRARY OF CONGRESS—PORTION OF GRAND VESTIBULE

\$30,000 For a Lectureship

Inquiry has been made to this office as to the amount of money that is required to endow a lectureship in the American University. The answer calls first for a word of explanation. That word is as follows: The plan for opening the university contemplates the carrying on of three departments of work. These three departments will be lectures, research work and the support of fellowships. The financial resources of the university will be used to develop all three of these forms of academic activity. Any money whatsoever which now is given to the enterprise can be used for either of these three kinds of work, as the giver may indicate. Whatever the amount therefore that may be donated, if the donor desires it to be used for lecture purposes, the money thus will be used.

In order, however, to assure perpetuity and a proper dignity attaching to any one lectureship, provided it is to bear the name of the giver, it has seemed best to fix upon a sum that would support adequately such work. It is felt that \$30,000 will do this. In the present tendency toward a shrinking return from capital it is not safe to settle on a sum much less than this.

But even so we do not care to speak finally on such a subject realizing that we are the beneficiaries in each case. We suggest \$30,000 as the proper amount to support a lectureship, but await the pleasure and added suggestions of our benefactors and friends.

The Opening of The American University

The developing of a great university is a slow process. Indeed, it is always a growth. The periods of its evolution can be designated with ease and distinction. The most commendable thing that can be said of any educational institution is that it grew slowly into its place of usefulness and so deeply pushed its roots into the educational life of the times that it could not be destroyed, neither dispensed with. American Methodism during the past twenty years has been developing a great institution in Washington, D. C.—the American University. Bishop John F. Hurst first saw the vision of it and gave his great powers to its inception. It was not to rise into being and full fruition in a day. It was to be a great post-graduate school, to stand at the capital of the Nation, under Methodist auspices. It was to be so equipped that it would command a place at the head of the great educational systems of this country, furnishing the final touches and highest grade of American scholarship. It was not to be a competitor with other schools. It was to stand apart and above, for the select, those seeking the highest education this Nation was able to give. It

was to be built within reach of the library facilities of the greatest library in the Western Hemisphere, thus enhancing research and investigation. It was to furnish the greatest educational opportunity in the country. It was a great dream, worthy of a great Christian scholar.

The years have passed since the first announcement of this scheme. Appeals have been made frequently, and at times the attention of the Church riveted upon the progress of the movement. Slow, quiet progress has been made. Just that kind which commends itself to thinking and business men. It has not been forced, neither pushed, at the expense of laying deep and permanent the foundations. Ninety-one acres were acquired for the campus in the northwestern part of the city, with direct connection with the capital buildings, situated in a residential district which is building up very rapidly. A car line is now under construction by order of Congress. Two buildings are now ready for occupancy. The McKinley Law and Government Building for a great law school, and the College of History Building are finished.

Chancellor Franklin Hamilton and his Board of Trustees are now enabled to announce that the school will be opened June, 1914, with elaborate ceremonies in which the greatest scholars and men of the Nation will participate.

One hundred thousand dollars are to be added to the endowment by that date. All interested in the launching of a great educational institution ought to mark the date and await the program with anticipation.

We seek also to call attention to the educational program of the American University, for there are many of our readers who need to be informed, since the school is a new and entirely unique project in American history.

The program is as follows: There is to be appointed a Board of Award, who shall employ the services of approved scholars and advisers. This Board shall have authority also to select fellows of the American University; it shall pass upon the qualifications of any students who are candidates for degrees from the university.

An institute of research shall be established at Washington, to be in charge of a director whose duty shall be to advise students in the utilization of the facilities and materials for study and research in the various historical, literary, scientific, technological, and other departments, made possible by Act of Congress. Instead of taking instruction in buildings upon the campus, the students will resort to the different governmental buildings and there pursue their studies. This obviates the necessity of great buildings. In fact, the Hall of History, which is completed, with its forty-two rooms, gives adequate physical equipment for the work as at present projected. At the farthest, there will be no need of more than one or two buildings additional. It also obviates the expense of a great Faculty. In fact, it is simply the Church utilizing the National resources accumulated at the Capital, directing earnest searchers to just those places where they can best discover that which they seek.

No student will be matriculated in the American University who has not a regular academic degree. The present plan is to issue fellowships of two grades:

(a) Fellows who pursue their studies at seats of learning or at places of study and investigation within the United States. A fellow of Class A shall receive a stipend of \$600 per annum.

(b) Fellows who pursue studies at foreign seats of learning or at places of study and investigation abroad. A fellow of Class B shall receive a stipend of \$800 per annum.
